<p>The should not go ahead. It is not in the interests of the local area for various reasons. An old landmark building such as is very much part of the local lanscape and character of clough and should be preserved. To alter a landscape from a beautiful building and grounds to a new build housing estate is detrimental. Cumulative building of new housing estates in clough are taking away from the greenery and semi rural location. Extra traffic will cause pollution and affect kids laking out and families taking walks.</p>
