<p>I feel very strongly about the environmental impact this will have. Numerous wildlife species inhabit the dams, there is no other water source/ pond in the area for wildlife. The area proposed for the construction of housing is currently a natural break within the built up area in the village and removal of this will negatively affect the animal, bird, fish and insect populations. I cannot see that any provision has been made for wildlife. Additionally this area is a natural draw for locals and gives everyone an opportunity to experience herons, geese, goslings etc.</p> <p>Parking on Hart Street, Naomi Road and Ruth Street is already to capacity. This development will cause extreme pressure to the local residents and visitors/shoppers as they depend on roadside parking which will inevitably be eaten up by residents of the new development parking additional cars. Furthermore the increased traffic flow in this small area will inevitably cause further congestion in an already very congested village.</p> <p>Development for residential purposes on the site has only negatives.</p>
