<p>This proposal is deeply disturbing on so many levels but particularly in its effects on the environment. It would seem no account has been made regarding the loss of habitat for local wildlife nor indeed for the amount of air and light pollution this will undoubtedly cause. For a company claiming to be environmentally friendly I can see precious little thought given to it. I am not against progress but the scale of this is preposterous. The whole project requires scaling back and a rethink to address the very obvious problems it will create. Would you like it on your doorstep?</p>
