Subject: Objection to planning application 2021/62/92603/E
Date: 31 August 2021 08:47:47

Dear sir

I strongly object to this planning application on the grounds that the already heavily congested motorway network in our area will further come under pressure when handling the extra number of wagons which will be delivering to these premises. I work in the transport industry and know how many vehicles are needed to support an Amazon warehouse of this size. I also know that when the vehicles turn up on a regular basis Amazon don't allow them onto their premises if they are busy and ask them to come back in maybe one hour or two hours. Where will they go under these circumstances other than park up in local streets or in the M62 services which are not designed to handle such extra workflow.

It concerns me about the management of the water which will flow off these premises during rainfall. The Chain Bar roundabout already floods during heavy rain so this extra flow will only compound an existing problem. The suggested solution doesn't look as though it will manage the volume as otherwise why are there already flooding problems and this supposed resolution will only add to the issue.

I also support Save Our Spenn's representation on this planning application as I share it's concerns

Many thanks for the opportunity to put my concerns forward
