---

Good morning,

I am writing to show further concern regarding the planning permission application for the Amazon warehouse on the A58, Cleckheaton. Upon reading this mornings news, I came across an article which details how Amazon UK Services (which includes warehouses) does not pay ANY tax here in the UK, despite making £204million profit.

How can a company that size not pay tax! It's time someone stood up to the giants of this world, who are all take and no give, and say enough is enough! The community do NOT want this to go ahead and I see very little benefit but huge problems. The minor benefit being jobs created - however, Amazon have been known to greatly exaggerate the number of jobs available and the working conditions have been reported to be poor. Also, other companies, such as the airports are struggling to recruit staff and unemployment is at a 50 year low. Where are these staff coming from? The expense of small local businesses? Will they employ staff that do not live local?

I hope for a swift resolution that puts those who live in Kirklees before the multi-million pound profit, non tax paying corporations who have little concern for us normal people.

Regards,
