Many thanks for your email.

My only additional comments to support this document is to confirm that there is no firm infrastructure plan to implement to changes required to make the Chidswell site a sustainable one.

I would also refer the Inspector to the Planning Inspectorate Public Inquiry at Dunningley Lane (Planning Inquiry – ref 3169594). Leeds City Council – as the Highways Authority – opposed development on this site on the basis of the negative highways impact on junction 28 of the M62 and associated roads of 770 houses at this location. It is difficult to understand how Leeds City Council and Kirklees Council state that both Highways Authorities have no formal objection to the Chidswell Proposal when Leeds City Council formally objected to a smaller site at Dunningley.

Many thanks

Cllr R Finnigan
