

**Matter 23 – Environmental protection policies (Policies PLP 51, 52 & 53)**

***Comments by Holmfirth Conservation Group (HCG)***

1. HCG has a concern that measuring air quality of a development, per se, will be inadequate. Because, ultimately, all developments will have to feed into the major bottlenecks of Holmfirth town centre or New Mill. Which are already, as we have stated previously, congested, polluted and overloaded. Yet these factors have not been addressed by the DLP.
2. As noted elsewhere PLP 52 contained many fine words, but we have concerns that Kirklees have the means, or will, to police the implementation of this policy.
3. PLP 53 does not affect our area of concern.
