

Matter 25 - Appendix 2 – Monitoring

Comments by Holmfirth Conservation Group

1. HCG has a concern that Policy 35(b) is not robust enough, it only states that “there be a reduction in the number of heritage assets at risk”. This is not measurable as the Authority has no plans in place to carry out any programme of conservation area appraisals and management plans.
2. We believe that there is a likelihood of further conservation areas being declared “at risk”. Which is a worrying trend.
