7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	The area contains two areas of allotments which could be lost as a result of housing development. However, the site is approximately 45m from amenity greenspace which includes a children's playground to the south. The site is also approximately 80m from an area of private playing fields to the south east. Approximately 200m to the south is an area of semi-natural & natural greenspace and approximately 160, south of the runs a national cycle route. In addition within 135m north west of the site are four PRoW footpaths. Therefore, a mixed significant positive effect and significant negative is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.54ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (0.54ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land (the land is classed as urban).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (0.54ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA F4: Colne (Slaitwaite, Marsden), as identified in the 2015 Landscape Character Assessment for Kirklees. This is the deeply incised valley of the River Colne. Woodland cover is found clinging to the steep valley sides and cloughs. There are dense ribbons of urban and industrial development along the valley floors and sides. It is a busy

SA Objectives	SA Score	Justification
		landscape with lots of movement owing to transport corridors and urban development along the valley floor.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on Pickle Top and barn, 1-2 Hawthorne Road are which are Grade II Listed . The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 545m from Huddersfield Narrow Canal Local Wildlife Site; therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: leisure and recreation (part of a mixed effect), 10: sustainable transport and 19: climate change and potential significant negative effects were identified in relation to SA objective 8: leisure and recreation (mixed effect). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be		

SA Objectives	SA Score	Justification
achieved through Local Plan policies.		

H356: POL, Lingards Road, Slaithwaite, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	-	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of the site is within 41-45 minutes travel time of the nearest employment node (with a small area within 46-50); therefore a minor negative effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The majority of the site is within 6-10 minutes travel time of a primary school (with an area to the south within 11-15 minutes) and within 16-20 minutes travel time of a secondary school (with an area to the north within 11-15 minutes) so is likely to have a significant positive effect. The northern part of the site is within 26-30 minutes of a further education institute whilst the southern part is within 41-45 minutes.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health. The majority of the site is within 6-10 minutes travel time of a GP (with a small area to the south within 11-15 minutes) and within 41-45 minutes travel time of a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are a number of existing residential properties within close proximity of the site to the north and south which may

SA Objectives	SA Score	Justification
		be affected by noise during the construction phase. The site is also within close proximity to the A62 (Manchester Road) which may mean that residents in the southern part of the site are affected by road noise. A minor negative effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Levels of access to local and town/district services and facilities vary throughout this site. The northern part of the site is within 6-10 minutes of both a local centre and a town/district centre however the southern part of the site is within 21-25 minutes from a local centre and within 11-15 minutes of a town/district centre. In between those areas journey times to local and town/district centres vary in between those two extremes. However, overall a minor positive effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	There is an area of semi-natural and natural greenspace and two PRoW footpaths within the site which could be lost or disrupted as a result of housing development. However, within 10m of the site there is an area of amenity greenspace which contains a children's play area. Approximately 180m east of the site and approximately 400m to the north of the site are two areas of school playing fields. There is also an area of semi-natural & natural greenspace approximately 540m to the north of the site. In addition, there are three PRoW footpaths within 140m south of the site. Therefore, a mixed significant positive and significant negative effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (2.59ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to five of the eight features assessed. H357: Land south and east of Rumble Road, Bywell, Dewsbury

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>The majority of the site is within 6-10 minutes travel time of the nearest employment node (with a small area to the north east within 11-15); therefore a significant positive effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of the site is within 6-10 minutes travel time of a primary school (with an area to the north within 5</p>

SA Objectives	SA Score	Justification
		minutes) and within 21-25 minutes travel time of a secondary school (with small areas in the north west and south west corners within 16-20 minutes) so is likely to have a minor positive effect. The site is also within 26-30 minutes of a further education institute.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The majority of the site is within 6-10 minutes travel time of a GP (with a small area to the south within 5 minutes). Levels of access to a hospital are very variable throughout the site; however. The south eastern part of the site is within 31-35 minutes of a hospital and the north eastern part of the site is within 41-45 minutes of a hospital. In between the far north eastern and south eastern parts of the site, journey times to healthcare facilities vary in between those two extremes. However, overall a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties within close proximity of the site to the north and south which may be affected by noise during the construction phase. In addition, there appear to be commercial or industrial units immediately to the east of the site which may result in noise pollution affecting residents in the longer-term. A significant negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	++/0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Levels of access to local services and facilities vary throughout the site. The northern part of the site is within 6-10 minutes of a local centre and within 16-20 minutes of a town/district centre however there are areas in the south and western corners which are 5 minutes from a local centre and within 11-15 minutes of a town/district centre. In between those areas journey times to local and town/district centres vary in between those two extremes. Therefore, a mixed effect is expected for this objective; significant positive for the south and western corners and negligible for the remaining areas of the site.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the	++/--?	The site is within an area of semi-natural & natural greenspace which could be lost as a result of housing development. However, adjacent to the north west boundary of the site lies an area of school playing fields. Approximately 160m

SA Objectives	SA Score	Justification
provision of new recreation facilities and areas of open space and encourage their usage.		north of the site adjacent the school playing field is an area of public playing fields which contains a children's play area. To the north west of the site approximately 160m away is an area of semi-natural & natural greenspace. Approximately 80m south west of the site is an area of allotments. To the west of the site approximately 250m away is an area of amenity greenspace which is adjacent to another area of school playing fields. In addition, there is a PRow footpath that runs adjacent to the eastern boundary of the site and there is another footpath approximately 275m to the west of the site. Therefore, a mixed significant positive and significant negative effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (4.45ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (4.45ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The majority of the site is also within an area of high quality agricultural land (the land is classed as grade 3) with the remainder of the site classed as urban.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (4.45ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in an area classed as 'urban' in the 2015 Landscape Character Assessment for Kirklees.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 595m from Caulms Wood Quarry, Dewsbury Local Geological Site; therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: leisure and recreation 9(part of a mixed effect), 10: sustainable transport and 19: climate change. Potential significant negative effects were identified in relation to SA objectives 8: leisure and recreation (mixed effect) and 14: biodiversity and geodiversity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H358: POL Wentworth Drive, Emley, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. This site is within 11-15 minutes travel time of the nearest employment node; therefore a significant positive effect on this objective is expected.
2. Achieve an economy	0	The location of housing sites will not affect the success of the local economy. While housing development may result in

6. Retain and enhance access to local services and facilities.	+ / 0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The site is within 6-10 minutes travel time of the nearest local centre. Levels of access to a town/district centre are very variable throughout the site; however. The north eastern part of the site is within 11-15 minutes of a town/district centre and the south western part of the site is within 16-20 minutes of a town/district centre. In between those areas journey times to local services and facilities vary in between those two extremes. Therefore, a mixed effect is expected for this objective; minor positive for the north eastern part and negligible for the south western part of the site.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.

SA Objectives	SA Score	Justification
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	A PRoW footpath runs through this site and could be lost or disrupted as a result of housing development. However, there are three areas of open space adjacent to the site; and area of park and gardens along the southern boundary, an area of park and gardens that includes a children's play area on the eastern boundary and an area of private playing fields on the northern boundary. Approximately 250m to the south east of the site is an area of open space associated with a scheduled monument. To the north of the site there is an area of school playing field approximately 410m away and an area of park and gardens approximately 420m away. In addition there is a PRoW footpath adjacent to the south eastern boundary of the site and another footpath is within 70m south of the site. Therefore, a mixed significant positive and significant negative effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.28ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (1.28ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The majority of the site is not within an area of high quality agricultural land (the land is classed as grade 4) with the remainder of the site classed as grade 3.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (1.28ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA N1: Emley Moor, as identified in the 2015 Landscape Character Assessment for Kirklees. This is an elevated, undulating farmland plateau with frequent woodland cover. The character is predominantly traditional rural, occupied by small villages.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance	0?	This site is over 1km from any designated biodiversity or geodiversity site; therefore development here could have a negligible effect on this SA Objective.

SA Objectives	SA Score	Justification
biodiversity and geodiversity.		
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 8: leisure and recreation (part of a mixed effect), 10: sustainable transport and 19: climate change and a potential significant negative effect was identified in relation to SA objective 8: leisure and recreation (mixed effect). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H359: POL Barnsley Road, Flockton, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.

SA Objectives	SA Score	Justification
opportunities available for local people, and ensure that they are accessible.		This site is within 16-20 minutes travel time of the nearest employment node; therefore a significant positive effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>This site is within 6-10 minutes travel time of a primary school and within 36-30 minutes travel time of a secondary school so is likely to have a minor positive effect. The majority of the site is also within 46-50 minutes of a further education institute (with a tiny area in the east within 51-55 minutes).</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 11-15 minutes travel time of a GP and within 56-60 minutes travel time of a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties within close proximity of the site to the east and west which may be affected by noise during the construction phase. The site is also adjacent to the A637 (Barnsley Road) which may result in noise pollution affecting residents in the longer-term. A significant negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The site is within 6-10 minutes travel time of the nearest local centre and within 21-25 minutes travel time of the nearest town/district centre; therefore a negligible effect is likely.</p>
7. Make our communities safer	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the

SA Objectives	SA Score	Justification
by reducing crime, anti-social behaviour and the fear of crime.		incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	There is a PRow that runs along and encroaches the eastern boundary of the site which could be disrupted as a result of housing development. However, to the east of the site there are two areas of semi-natural and natural green space approximately 150m and 220m from the site. Approximately 165m to the west of the site is an area of allotments and a PRow. To the west of the site there are two areas of school playing fields approximately 370m and 420m away. There is also an area of public playing fields approximately 470m north east of the site. Therefore a mixed significant negative and significant positive effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.39ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (1.39ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is also within an area of high quality agricultural land (the land is classed as grade 3).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (1.39ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA N1: Emley Moor, as identified in the 2015 Landscape Character Assessment for Kirklees. This is an elevated, undulating farmland plateau with frequent woodland cover. The character is predominantly traditional rural, occupied by small villages.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.

SA Objectives	SA Score	Justification
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is approximately 740m from Kirby Wood Local Wildlife Site; therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 8: leisure and recreation (part of a mixed effect), 10: sustainable transport and 19: climate change and potential significant negative effects were identified in relation to SA objectives 5: amenity, 8: leisure and recreation (mixed effect) and 14: biodiversity and geodiversity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H360: Part of POL, Lees Hall Road, Thornhill Lees

SA Objectives	SA Score	Justification
---------------	----------	---------------

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>This site is within 11-15 minutes travel time of the nearest employment node; therefore a significant positive effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>This site is within 11-15 minutes travel time of a primary school and the majority of the site is within 21-25 minutes travel time of a secondary school (with an area to the east within 16-20) so is likely to have a minor positive effect. The majority of the site is also within 41-45 minutes of a further education institute (with an area to the east within 36-40 minutes).</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	++/+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 6-10 minutes travel time of a GP. Levels of access to a hospital are very variable throughout the site; however. The eastern part of the site is within 26-30 minutes travel time of a hospital whereas the western part is within 36-40 minutes of a hospital; therefore a minor positive effect is likely. In between those areas journey times to healthcare facilities vary in between those two extremes. Therefore a mixed effect is expected – potentially significantly positive for the eastern part and minor positive for the western part. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties within close proximity of the site to the north and east which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	0	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.

SA Objectives	SA Score	Justification
		The majority of the site is within 6-10 minutes travel time of the nearest local centre (with an area to the west within 11-15 minutes) and within 16-20 minutes travel time of the nearest town/district centre; therefore a negligible effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There is an area of allotments adjacent to the eastern boundary of the site; however the open space is within another housing site option. To the north of the site there is a private bowling green approximately 25m away and an area of allotments approximately 135m away however the allotments are within another housing site option. Approximately 180m north of the site is an area of semi-natural and natural greenspace and an area of amenity greenspace which includes a children's play area. There is also a children's play area located approximately 125m north of the site. Within 300m to the west of the site there is a children's play area, an area of amenity greenspace, allotments and an area of school playing fields. There are also several PRoW paths within 350m of the site. In addition, to the south west of the site approximately 195m away is a bridleway however it is located within other housing site options. Therefore, a significant positive effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.97ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (1.97ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is also within an area of high quality agricultural land (the land is classed as grade 3).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (1.97ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E7: Emley Moor Northern Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a landscape of gently undulating elevated slopes with abundant woodland cover. The proximity of the

SA Objectives	SA Score	Justification
		urban centres exerts an influence on landscape character with urban fringe land uses evident in many areas.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	<p>Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset.</p> <p>The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 860m from any Sparrow Wood Local Nature Reserve and Local Wildlife Site; therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on greenfield land; therefore a minor negative effect is likely.</p>
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 4: healthcare facilities (part of a mixed effect) and 8: leisure and recreation, 10: sustainable transport and 19: climate change. No potential significant negative effects were identified in relation to the SA objectives.</p>		

H361: Housing Allocation H10.5, Ravensthorpe Road, Thornhill Lees, Dewsbury

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>This site is within 11-15 minutes travel time of the nearest employment node; therefore a significant positive effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	<p>The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.</p>
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>This site is within 11-15 minutes travel time of a primary school and the majority of the site is within 21-25 minutes travel time of a secondary school (with an area to the north east within 16-20 minutes) so is likely to have a minor positive effect. The site is also within 36-40 minutes of a further education institute.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 6-10 minutes travel time of a GP and within 36-40 minutes of a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties within close proximity to the east of the site which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is within 6-10 minutes travel time of the nearest local centre (with an area to the west within 11-</p>

SA Objectives	SA Score	Justification
		15 minutes) and within 11-15 minutes travel time of the nearest town/district centre (with an area to the west within 16-20 minutes); therefore a minor positive effect is likely for this objective.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	A local cycle route runs within the southern part of the site and could be lost as a result of housing development. However, there are two areas of open space adjacent to the site; an area of allotments on the northern boundary and an area of amenity greenspace on the eastern boundary. There are two children's play areas to the east of the site; one approximately 15m away and one approximately 170m from the site. There is a bridleway which runs along the western and southern boundary of the site. Approximately 10m north west of the site is an area of school playing fields. To the north of the site there are two areas of semi-natural and natural greenspace approximately 190m and 310m away. Therefore, a significant positive effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.52ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (1.52ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is also within an area of high quality agricultural land (the land is classed as grade 3).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (1.52ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E7: Emley Moor Northern Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a landscape of gently undulating elevated slopes with abundant woodland cover. The proximity of the urban centres exerts an influence on landscape character with urban fringe land uses evident in many areas.
13. Conserve and enhance the historic environment,	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset.

SA Objectives	SA Score	Justification
heritage assets and their settings.		The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	This site is over 1km from any designated biodiversity or geodiversity site; therefore development here could have a negligible effect on this SA Objective. As all development may present opportunities to promote habitat connectivity through the provision of green infrastructure etc the effect is recorded as uncertain.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such as the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 4: health and 8: leisure and recreation (part of a mixed effect), 10: sustainable transport and 19: climate change. A potential significant negative effect was identified in relation to the SA objective 8: leisure and recreation however this was part of a mixed effect overall.		

H362: Housing Allocation 11.1, Grange Road, Soothill, Batley

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++/--	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Levels of access to the nearest employment node vary throughout the site. The most accessible part of the site is the western part of this site is the eastern part which is within 16-20 minutes whereas the least accessible part is the north which is over 60 minutes from employment. In between those areas journey times to an employment node vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially significant positive for the eastern part and potentially significant negative for the northern part of the site.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?/--?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Levels of access to education facilities vary throughout the site. The most accessible part of the site is the eastern part which is within 11-15 minutes from a primary school and within 26-30 minutes of a secondary school. The least accessible part of the site is the north which is over 60 minutes from any education facilities. In between those areas journey times to education facilities vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially minor positive for the eastern part and potentially significant negative for the northern part of the site. Travel times to the nearest further education institute also vary across the site.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	0/--	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Levels of access to healthcare facilities vary throughout the site. The most accessible part of the site is the eastern part which is within 16-20 minutes from a GP and within 41-45 minutes of a hospital. The least accessible part of the site is the north which is over 60 minutes from all healthcare facilities. In between those areas journey times to healthcare facilities vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially negligible for the eastern part and potentially significant negative for the northern part of the site. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New

SA Objectives	SA Score	Justification
light pollution.		residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are no existing residential properties within close proximity of the site however; there is an area of industrial site immediately to the south west of the site which may result in noise pollution affecting residents in the longer-term. A minor negative effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	-/--	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. Levels of access to local services and facilities are very variable throughout the site. The most accessible part of the site is the eastern part which is within 16-20 minutes travel time of the nearest local centre and 21-25 minutes from a town/district centre. The least accessible part of the site is the north which is over 60 minutes from both a local centre and town/district centre. In between those areas journey times to local services and facilities vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially minor negative for the eastern part and potentially significant negative for the northern part of the site.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There is a PRoW path that runs adjacent to the southern boundary of the site and a PRoW path and bridleway that runs between the northern and southern sections of the site. Approximately 265m south east of the site is an area of public playing fields which is adjacent to a park and gardens containing two children's play areas (approximately 385m from the site). Approximately 220m north of the site is an area of school playing fields. To the west of the site there is an area of semi-natural and natural greenspace approximately 130m away however it is within another housing site option. In addition, within 500m north west of the site there are two areas children's play areas. Therefore, significant negative is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.22ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to three of the eight features assessed. Therefore, a minor positive effect is likely.
11. Secure the efficient and	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land

SA Objectives	SA Score	Justification
prudent use of land.		<p>than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (1.22ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is also within an area of high quality agricultural land (the land is classed as grade 3).</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a relatively small site (1.22ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development.</p> <p>The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	<p>Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset.</p> <p>The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	<p>This site is approximately 915m from Soothill Wood Local Wildlife Site; therefore development here could have a minor negative effect on this SA Objective.</p>
15. Reduce air, water and soil pollution.	0	<p>This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.</p>
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	<p>This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.</p>
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on greenfield land; therefore a minor negative effect is likely.</p>

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to three of the eight features assessed; therefore a minor positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment (part of a mixed effect) and 8: leisure and recreation, and potential significant negative effects were identified in relation to SA objectives 1: employment, 3: education, 4: health and 6: local services which were all part of a mixed effect overall. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H363: Land north of High Street, Hanging Heaton, Batley

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++/+	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Levels of access to an employment node vary throughout this site. The northern part of this site is within 21-25 minutes travel time of the nearest employment node whereas the southern part of the site is within 6-10 minutes from employment. In between those areas journey times to an employment node vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially significant positive for the southern part and potentially minor positive for the northern part of the site.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?/0?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects

SA Objectives	SA Score	Justification
		<p>will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The southern part of this site is within 5 minutes travel time of the nearest primary school and within 21-25 minutes from a secondary school, whereas the northern part of the site is 16-20 minutes away from a primary school and within 31-35 minutes of a secondary school. In between those areas journey times to education facilities vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially minor positive for the southern part and potentially negligible for the northern part of the site. Travel times to the nearest further education institute also vary throughout the site.</p>
<p>4. Improve the health of local people and ensure that they can access the health and social care they need.</p>	<p>+ / 0</p>	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Levels of access to healthcare facilities vary throughout the site. The southern edge of this site is within 5 minutes travel time of the nearest GP and within 31-35 minutes from a hospital, whereas the northern edge of the site is 26-30 minutes away from a GP and within 46-50 minutes of a hospital. In between those areas journey times to healthcare facilities vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially minor positive for the southern edge and potentially negligible for the northern edge of the site. The site is not within or adjacent to an AQMA.</p>
<p>5. Protect local amenity including avoiding noise and light pollution.</p>	<p>--</p>	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties within close proximity of the site to the south. In addition, there is an area of industrial site immediately to the north and north west of the site which may result in noise pollution affecting residents in the longer-term. A significant negative effect on this SA objective is therefore likely.</p>
<p>6. Retain and enhance access to local services and facilities.</p>	<p>+ / -</p>	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Levels of access to local services and facilities vary throughout the site. The northern part of the site is within 26-30 minutes travel time of both the nearest local centre and town/district centre, whereas the southern part of the site is within 6-10 minutes travel time from a local centre and within 11-15 minutes of town/district centre. In between those areas journey times to local services and facilities vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially minor positive for the southern part and potentially minor negative for the northern part of the site.</p>
<p>7. Make our communities safer by reducing crime, anti-</p>	<p>0</p>	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting,</p>

SA Objectives	SA Score	Justification
social behaviour and the fear of crime.		could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	There is a PRoW footpath that runs through the south eastern part of the site which could be disrupted as a result of housing development. However, approximately 150m east of the site is an area of park and gardens that contains two children's play areas which is adjacent to an area of public playing fields (approximately 155m from the site). To the south of the site approximately 45m away is an area of school playing fields. In addition, there is an area of private playing fields approximately 300m south west of the site and an area of allotments approximately 500m north west of the site. Approximately 230m north of the site is an area of semi-natural and natural greenspace however it is within another housing site option. Therefore a mixed significant negative and significant positive effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (12.1ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively large site (12.1ha) on greenfield land; therefore a significant negative effect on this SA objective is likely. The majority of the site is not within an area of high quality agricultural land (the land is classed as urban) however a section in the north of the site is classed as grade 3.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This is a relatively large site (12.1ha) on greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies mainly in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend

SA Objectives	SA Score	Justification
		on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	This site is over 1km from any designated biodiversity or geodiversity site; therefore development here could have a negligible effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment (part of a mixed effect), 8: leisure and recreation (part of a mixed effect), 9: affordable housing, 10: sustainable transport and 19: climate change, and potential significant negative effects were identified in relation to SA objectives 5: amenity, 8: leisure and recreation (mixed effect), 11: land use and 12: character. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H364: POL Wesley Avenue, Netherthong, Holmfirth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>The majority of the site is within 36-40 minutes travel time of the nearest employment node (a tiny area in the south west of the site is within 31-35 minutes); therefore a negligible effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	<p>The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.</p>
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>This site is within 6-10 minutes travel time of a primary school and within 21-25 minutes travel time of a secondary school so is likely to have a minor positive effect. The majority of the site is also within 26-30 minutes of a further education institute. Therefore, a minor positive effect is likely.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 6-10 minutes travel time of a GP and within 56-60 minutes of a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties within close proximity of the site to the south and east. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	-	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The site is within 21-25 minutes travel time of the nearest local centre and within 16-20 minutes travel time of the</p>

SA Objectives	SA Score	Justification
		nearest town/district centre; therefore a minor negative effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	Approximately 10m north of the site is an area of semi-natural and natural greenspace. To the east of the site approximately 240m away is an area of school playing fields which is adjacent to an area of amenity greenspace that includes a children's play area. In addition, there are two areas of park and gardens which include children's play areas approximately 455m south and 510m north of the site. Therefore a significant positive effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.72ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to three of the eight features assessed. Therefore, a minor positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (0.72ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land (the land is classed as grade 4).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (0.72ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E1: Holmfirth-Meltham, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with considerable tree and woodland cover. Although the proximity of the urban centres exerts an influence on landscape character, with urban fringe land uses evident in many areas, there are pockets of relative tranquillity away from the main settlements. There is a strong visual relationship with the moorlands of the National Park.
13. Conserve and enhance	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the

SA Objectives	SA Score	Justification
the historic environment, heritage assets and their settings.		uncertain potential impacts on the adjoining Netherthong/Deanhouse Conservation Area. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 440m from Holmroyd Wood Local Wildlife Site; therefore development here could have a minor negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to three of the eight features assessed; therefore a minor positive effect is likely.
Summary of SA findings: A potential significant positive effect was identified for this site in relation to SA objective 8: leisure and recreation, and no potential significant negative effects were identified in relation to the SA objectives.		

H365

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0/-	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people’s ability to access jobs.</p> <p>Levels of access to an employment node vary throughout the site. The north western part of this site is within 41-45 minutes travel time of the nearest employment node whereas the eastern part of the site is 31-35 minutes away from employment. In between those areas journey times to an employment node vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially negligible for the eastern part and potentially minor negative for the north western part of the site.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	<p>The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.</p>
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Levels of access to education facilities vary throughout the site. The eastern part of this site is within 6-10 minutes travel time of the nearest primary school, within 6-10 minutes from a secondary school and within 21-25 further education institute, whereas the north western part of the site is 11-15 minutes away from a primary school and secondary school and within 26-30 minutes of a further education institute. In between the far eastern and north western parts of the site, journey times to education facilities vary in between those two extremes. However, overall a significant positive effect on this objective is expected.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+ /0	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents’ health.</p> <p>Levels of access to healthcare facilities vary throughout the site. The south eastern part of this site is within 6-10 minutes travel time of the nearest GP and within 41-45 minutes from a hospital, whereas the north western part of the site is 16-20 minutes away from a GP and within 51-55 minutes of a hospital. In between those areas journey times to healthcare facilities vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially minor positive for the south eastern part and potentially negligible for the north western part of the site. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New</p>

SA Objectives	SA Score	Justification
light pollution.		residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are a number of existing residential properties within close proximity of the site to the east. A minor negative effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	+ / 0	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. Levels of access to local services and facilities vary throughout the site. The northern part of the site is within 11-15 minutes travel time of the nearest local centre and 26-30 minutes from a town/district centre, whereas the southern part of the site is within 6-10 minutes travel time from both a local and town/district centre. In between those areas journey times to local services and facilities vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially minor positive for the southern part and potentially negligible for the northern part of the site.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	Approximately 200m south west of the site is a golf course. A PRoW footpath runs adjacent to the northern boundary of the site. To the north west of the site approximately 250m away is an area of amenity greenspace which includes a children's play area as well as an area of school playing fields approximately 265m from the site. In addition, to the east of the site approximately 60m away is an area of amenity greenspace that contains a children's play area. There is also another children's play area approximately 310m to the east of the site. To the north of the site there are two areas of park and gardens which both contain children's play areas approximately 445m and 510m from the site. Approximately 490m to the south east of the site is an area of amenity greenspace however this open space is within another housing site option. Therefore a significant positive effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (16.89ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to six of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	++	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.

SA Objectives	SA Score	Justification
		This is a relatively large site (16.89ha) on brownfield land; therefore a significant positive effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	+?	This is a relatively large site (16.89ha) on brownfield land; therefore development here could have a minor positive effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site mainly lies in an area classed as 'urban' in the 2015 Landscape Character Assessment for Kirklees.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on Crossland Hall which is situated just under 300 metres from the western boundary of this area and is a Grade II* Listed Building. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 405m Johnson Wellfield Quarries, Crosland Hill Local Wildlife Site, approximately 730m from Delves Wood Local Wildlife Site and approximately 815m from Huddersfield Narrow Canal Local Wildlife Site; therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	0	This site is on brownfield land and is outside of flood zones 2 and 3; therefore a negligible effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	+?	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on brownfield land; therefore a minor positive effect is likely.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to six of the eight features assessed; therefore a significant positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objective 3: education, 8: leisure and recreation, 9: affordable housing, 10: sustainable transport, 11: use of land and 19: climate change and no potential significant negative effects were identified in relation to the SA objectives. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H366: Land at Lower Blacup Farm, Ashbourne Way, Cleckheaton

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++/+	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Levels of access to an employment node vary across the site. The south western part of this site is within 11-15 minutes travel time of the nearest employment node whereas the central part of the site is within 21-25 minutes from employment. In between those areas journey times to an employment node vary in between those extremes. Therefore a mixed effect on this objective is expected – potentially significant positive for the south western part and potentially minor positive for the central part of the site.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?/0?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.

SA Objectives	SA Score	Justification
		<p>Levels of access to education facilities vary throughout the site. The southern part of this site is within 6-10 minutes travel time of the nearest primary school and within 11-15 minutes from a secondary school whereas the central part of the site is 16-20 minutes away from a primary school and within 21-25 minutes of a secondary school. In between those areas journey times to education facilities vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially significant positive for the southern part of the site and potentially negligible for the central part of the site. Journey times to the nearest further education institute also vary throughout the site – 21-25 minutes in the south west and 31-35 minutes in the central part of the site.</p>
<p>4. Improve the health of local people and ensure that they can access the health and social care they need.</p>	<p>+/0</p>	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The southern part of this site is within 6-10 minutes travel time of the nearest GP and within 36-40 minutes from a hospital. The northern part of the site is within 6-10 minutes of a GP and within 41-45 minutes of a hospital, whereas the central part of the site is 11-15 minutes away from a GP and within 51-55 minutes of a hospital. In between those areas journey times to healthcare facilities vary in between those two extremes. However, overall a minor positive effect on this objective is expected. The site is not within or adjacent to an AQMA.</p>
<p>5. Protect local amenity including avoiding noise and light pollution.</p>	<p>--</p>	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties within close proximity to the east and south of the site. In addition, there is an industrial area immediately to the north of the site which may result in noise pollution affecting residents in the longer-term. A significant negative effect on this SA objective is therefore likely.</p>
<p>6. Retain and enhance access to local services and facilities.</p>	<p>+/-</p>	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Levels of access to local services and facilities vary throughout this site. The southern edge of the site is within 11-15 minutes travel time of both the nearest local centre and town/district centre whereas the central part of the site is within 21-25 minutes travel time from a local and within 16-20 minutes of a town/district centre. In between those areas journey times to local services and facilities vary in between those two extremes. Therefore a mixed effect on this objective is expected –minor positive for the southern edge and minor negative for the central part of the site.</p>
<p>7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.</p>	<p>0</p>	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the</p>

SA Objectives	SA Score	Justification
		effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	The site is within an area of semi-natural and natural greenspace and has a PRow footpath running down through the site and both could be lost or disrupted as a result of housing development. However, there are three children's play areas approximately 235m, 250m and 290m south of the site. Approximately 180m south west of the site is an area of park and gardens. In addition, approximately 340m east of the site is a green corridor which contains a national cycle route. Also, approximately 585m north of the site is an area of park and gardens that contains a children's play area. Within 280m south of the site are a number of PRow footpaths. Therefore a mixed significant negative and significant positive effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (10.66ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively large site (10.66ha) on greenfield land; therefore a significant negative effect on this SA objective is likely. The site is within an area of high quality agricultural land (the land is classed as grade 3).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This is a relatively large site (10.66ha) on greenfield land; therefore development here could have a minor positive effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies mainly in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on Lower Blacup Farmhouse and 2 and 3 Quaker Lane which are Grade II Listed. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance	0?	This site is over 1km from any designated biodiversity or geodiversity site; therefore development here could have a negligible effect on this SA Objective.

SA Objectives	SA Score	Justification
biodiversity and geodiversity.		
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3 (a small section of the northern edge encroaches on an area of flood zone 2); therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objective 1: employment, 3: education, 8: leisure and recreation (part of a mixed effect), 9: affordable housing, 10: sustainable transport and 19: climate change, and potential significant negative effects were identified in relation to SA objectives 5: amenity, 8: recreation and leisure (mixed effect), 11: land use and 12: character. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H367: Magma Ceramics, Ashbourne Way, Cleckheaton

SA Objectives	SA Score	Justification
1: Increase the number and range of employment	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.

SA Objectives	SA Score	Justification
opportunities available for local people, and ensure that they are accessible.		The majority of the site is within 16-20 minutes travel time of the nearest employment node; therefore a significant positive effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. 7. Make our communities safer by reducing crime, anti-	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting,

SA Objectives	SA Score	Justification
social behaviour and the fear of crime.		could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	A PRoW footpath runs adjacent to the south eastern boundary of the site and within 140m to the south west of the site is a local cycle route. Approximately 45m north east of the site is an area of semi-natural and natural greenspace which is adjacent to an area of amenity greenspace. To the west, approximately 45m from the site is an area of semi-natural and natural greenspace. Also, to the south west of the site approximately 30m from the site is an area of public playing fields. In addition, 190m north east of the site is an area of park gardens which contains three children's play areas, a bowling green and a multiuse games area. To the south east of the site there is an area of amenity greenspace approximately 190m from the site and an area of semi-natural and natural greenspace approximately 310m away. There are also two PRoW footpaths within 100m east of the site. Therefore a mixed significant negative and significant positive effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.41ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as entirely 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	+	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (1.41ha) on brownfield land; therefore a minor positive effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	+?	This is a relatively small site (1.41ha) on brownfield land; therefore development here could have a minor positive effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA M1: Calder Valley Floor, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a valley landscape with limited woodland cover, and agricultural land cover is very limited due to urban development. This is a heavily urbanised area with little tranquillity, although the area has more of a rural feel in the east.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.

SA Objectives	SA Score	Justification
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	This site is over 1km from any designated biodiversity or geodiversity site; therefore development here could have a negligible effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	0	This site is on brownfield land and is outside of flood zones 2 and 3; therefore a negligible effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	+?	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on brownfield land; therefore a minor positive effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as entirely 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objective 1: employment, 8: leisure and recreation, 10: sustainable transport and 19: climate change, and no potential significant negative effects were identified in relation to the SA objectives.		

H408: Northern Varley Road, Slaithwaite, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment	-	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.

SA Objectives	SA Score	Justification
opportunities available for local people, and ensure that they are accessible.		The majority of the site is within 41-45 minutes travel time of the nearest employment node (with a section to the north within 36-40 minutes); therefore a minor negative effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The site is within 6-10 minutes travel time of the nearest primary school and the majority of the site is within 16-20 minutes from the nearest secondary school (with a small area to the north within 11-15 minutes); therefore a significant positive effect on this objective is expected. The majority of the site is also 26-30 minutes from a further education institute (with a small area in the north within 21-25 minutes).</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	0	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The majority of the site is within 5 minutes travel time of the nearest GP (with a small area to the south within 6-10 minutes) and within 46-50 minutes from the nearest hospital (with an area to the north within 41-45 minutes); therefore a minor positive effect on this objective is expected. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties within close proximity of the site to the east, west and north of the site. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is within 6-10 minutes travel time of the nearest local centre (with a small section in the south within 11-15 minutes) and within 5 minutes from the nearest town/district centre; therefore a minor positive effect on this objective is expected.</p>

SA Objectives	SA Score	Justification
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	The site is within an area of semi natural and natural green space and also contains a PRow footpath which could both be lost as a result of housing development. However, approximately 10m west of the site is a national cycle route. To the south east of the site within approximately 30m lies an area of public playing fields. In addition approximately 115m north east of the site is an area of allotments. Approximately 270m west of the site is a PRow footpath and an area of school grounds and playing fields. Approximately 255m to the east of the site is a public bowling green which is adjacent to an area of amenity greenspace (approximately 305m from the site), however the bowling green is within another housing site option. Also, approximately 575m north east of the site is Colne Valley Leisure Centre. Therefore a mixed significant positive and significant negative effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.14ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to six of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (1.14ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land (the land is classed as urban).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (1.14ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA F4: Colne (Slaithwaite, Marsden), as identified in the 2015 Landscape Character Assessment for Kirklees. This is the deeply incised valley of the River Colne. Woodland cover is found clinging to the steep valley sides and cloughs. There are dense ribbons of urban and industrial development along the valley floors and sides. It is a busy landscape with lots of movement owing to transport corridors and urban development along the valley floor.
13. Conserve and enhance the historic environment,	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the adjacent Slaithwaite Conservation Area. The loss of this currently-open area and its

SA Objectives	SA Score	Justification
heritage assets and their settings.		subsequent development could harm elements which contribute to the significance of this area. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 265m from Huddersfield Narrow Canal Local Wildlife Site; therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and the majority of the site is outside of flood zones 2 and 3 (with a very small area running along the eastern boundary within flood 3); therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as entirely 'green' in terms of its access to six of the eight features assessed; therefore a significant positive effect is likely.
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education and 8: leisure and recreation (part of a mixed effect), 10: sustainable transport and 19: climate change and potential significant negative effects were identified in relation to SA objective 8: leisure and recreation (mixed effect). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H435: Commercial Road, Skelmanthorpe, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 11-15 minutes travel time of an employment node; therefore a significant positive effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The majority of this site is within 6-10 minutes travel time of a primary school, secondary school and further education facility. Overall, a significant positive effect is likely.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	The majority of this site is within 6-10 minutes of a GP and the whole site is within 51-55 minutes from a hospital. Therefore, a minor positive effect is likely. The site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are several properties within 100m west and south of this site, and the residents of such could experience noise and light pollution during construction of the site. Therefore, a minor negative effect is likely.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 6-10 minutes travel time from a local centre and the whole site is within 6-10 minutes from a town/district centre; therefore a minor positive effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced

SA Objectives	SA Score	Justification
of crime.		by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	A small part of this site at the south-western end falls within an outdoor sports facility area, and the development of this site could result in the loss of this part of the facility. However, there are a number of recreational facilities and areas of open space within 600m of the site which could be used by residents, including other outdoor sports facilities, semi-natural and natural greenspace, amenity greenspace and areas for children and young people. There are also a number of PRow footpaths surrounding this site, and a national cycle route is directly adjacent to the north. Therefore, a mixed effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is large (6.19ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to seven of eight of the features assessed. Therefore, a significant positive effect is likely overall.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is large (6.19ha) and on mostly greenfield land which is classified as grade 3 agricultural quality; therefore a significant negative effect on this SA objective is expected.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This site is large (6.19ha) and on mostly greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies mainly in LCA E6: Fenay Beck Valley Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with large blocks of tree and woodland cover found on slopes. It is perceived as a tranquil landscape with a traditional rural feel, although this is impacted upon by the main roads and urban development around Shepley.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on Skelmanthorpe Conservation Area (the loss and development of this site could harm elements that contribute to the significance of the area). The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	There are a number of biodiversity designations within 1km of this site, including Blacker Wood candidate Local Wildlife Site (approximately 260m north), Park Gate Dyke approved Local Wildlife Site (approximately 640m north-east) and High Bridge Wood candidate Local Wildlife Site (approximately 670m south-east). Therefore, a minor negative effect is likely.
15. Reduce air, water and	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.

SA Objectives	SA Score	Justification
soil pollution.		
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on mostly greenfield land and outside flood zone 3 (although the centre of the site is within a flood zone 3 area, however development in this area could be avoided); therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on mostly greenfield land therefore a minor negative effect is likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to seven of eight of the features assessed. Therefore, a significant positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: recreation and leisure (part of a mixed effect overall), 9: housing, 10: sustainable transport and 19: climate change. Potential significant negative effects were identified for SA objective 8: recreation and leisure (part of a mixed effect overall), 11: use of land (part of a mixed effect overall) and 12: character and landscape. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H437: Land east of Huddersfield Road, Meltham, Holmfirth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	+	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The whole of this site is within 21-25 minutes travel time of an employment node; therefore a minor positive effect is likely.
2. Achieve an economy better capable of growth	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing

SA Objectives	SA Score	Justification
through increasing investment, innovation and Entrepreneurship.		provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The majority of this site is within 11-15 minutes from a primary school and the whole of the site is within 31-35 minutes of a secondary school. Therefore, a minor positive effect is likely for this SA objective overall.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	The whole if this site is within 6-10 minutes travel time of a GP and 41-45 minutes from a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	--	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There is an industrial area directly adjacent to this site which could result in future residents being exposed to noise pollution over the long term. As such, a significant negative effect is likely for this SA objective.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The whole of this site is within 6-10 minutes travel time from a local centre and 5 minutes from a town/district centre; therefore a minor positive effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There a number of recreational facilities and areas of open space within 600m of the site, the closest of which is a green corridor approximately 280m south of the site. Other recreational facilities and area include semi-natural and natural greenspace, a cemetery, an outdoor sports facility, allotments and areas for children and young people. There are also a number of PRow footpaths surrounding the site, one of which is directly adjacent to the north. There is also a national cycle route to the west. Therefore, a significant positive effect is likely for this SA objective.
9. Ensure all people are able	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the

SA Objectives	SA Score	Justification
to live in a decent home which meets their needs.		proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (0.66ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to five of eight of the features assessed. Therefore, a significant positive effect is likely overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is small (0.66ha) and on mostly greenfield land meaning that there is likely to be a minor negative effect on this objective. The site is not in an area of quality agricultural land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This site is small (0.66ha) and on mostly greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA F5: Holme & Hall Dyke (Holmfirth & Meltham), as identified in the 2015 Landscape Character Assessment for Kirklees. This landscape comprises steep incised valleys associated with the upper parts of River Holme and its tributaries. Mixed semi-natural woodlands are found along the waterways and on the steepest slopes of the valleys. There are contrasting levels of tranquillity throughout the LCA, influenced by proximity to development and roads. Perceptions of tranquillity and remoteness are greatest on the fringes of the National Park.
13. Conserve and enhance the historic environment, heritage assets and their settings.	-?	Historic England has rated this site as 'yellow' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site could avoid damage to Bentley Mill Grade II Listed Building directly opposite the site, provided that proposed Local Plan policies to protect the historic environment are implemented. The effect on this SA objective is therefore likely to be minor negative although this is uncertain. Uncertainty also exists as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	Folly Dolly Falls Local Geological Site is approximately 170m to the west of the site, and Honley Wood candidate Local Wildlife Site is approximately 250m to the east; therefore a significant negative effect is likely.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on mostly greenfield land and mostly outside flood zone 3, although the south and eastern parts of the site fall within this zone. Overall, a minor negative effect is likely.

SA Objectives	SA Score	Justification
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on mostly greenfield land therefore a minor negative effect is likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to five of eight of the features assessed. Therefore, a significant positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 8: recreation and leisure, 10: sustainable transport and 19: climate change. Potential significant negative effects were identified for SA objectives 5: amenity and 14: biodiversity and geodiversity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H438

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 36-40 minutes travel time of an employment node; therefore a negligible effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The majority of this site is within 11-15 minutes travel time of a primary school and secondary school, therefore a significant positive effect is likely.

SA Objectives	SA Score	Justification
4. Improve the health of local people and ensure that they can access the health and social care they need.	0	The majority of this site is within 16-20 minutes of a GP and 41-45 minutes from a hospital. Overall, a negligible effect is likely. The site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	--	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. The A639 (New Mill Road) is directly adjacent to the south of this site, and as a result future residents could be exposed to noise pollution over the longer term. This results in a significant negative effect on this SA objective. In addition, there are a number of existing residential properties within 100m south and west of this site, and these residents could be exposed to noise and light pollution during construction of the site. This reinforces the negative effect.
6. Retain and enhance access to local services and facilities.	0	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 6-10 minutes travel time of a local centre and 16-20 minutes from a town/district centre; therefore a negligible effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	This site is on land designated as semi-natural and natural greenspace, and there is a PRoW bridleway and footpath within the site. It is likely that these features could be lost if the site was developed. However, there are a number of other recreational facilities and areas of open space within 600m of the site which could be used by future residents, including outdoor sports facilities (directly adjacent to the site), a sports centre, other semi-natural and natural greenspace, allotments, parks and gardens and areas for children and young people. There are also a number of PRoW bridleways directly adjacent to the site, and there are a number of footpaths to the south and east. Therefore, a mixed effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (3.8ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to three of eight of the features assessed. Therefore, a minor positive effect is likely.

SA Objectives	SA Score	Justification
modes of transport.		overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is small (3.8ha) and on greenfield land meaning that there is likely to be a minor negative effect on this objective. The site is not in an area of quality agricultural land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This site is small (3.8ha) and on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA F5: Holme & Hall Dyke (Holmfirth & Meltham), as identified in the 2015 Landscape Character Assessment for Kirklees. This landscape comprises steep incised valleys associated with the upper parts of River Holme and its tributaries. Mixed semi-natural woodlands are found along the waterways and on the steepest slopes of the valleys. There are contrasting levels of tranquillity throughout the LCA, influenced by proximity to development and roads. Perceptions of tranquillity and remoteness are greatest on the fringes of the National Park.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	The site is not within 1km of any designated biodiversity or geodiversity sites; therefore a negligible effect on this SA objective is most likely. However, this is uncertain as there may still be effects on non-designated biodiversity, and depending on the design of the development, it may be possible to incorporate biodiversity enhancements
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to three of eight of the features assessed. Therefore, a minor positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education and 8: recreation and leisure (part of a mixed effect overall). Potential significant negative effects were identified for SA objectives 5: amenity and 8: recreation and leisure (part of a mixed effect overall). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H439: Cockley Hill Lane, Kirkheaton, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 36-40 minutes travel time of an employment node; therefore a negligible effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The majority of this site is within 6-10 minutes travel time of a primary school and 36-40 minutes of a secondary school. Therefore, a minor positive effect is likely.
4. Improve the health of local people and ensure that they	+	The whole of this site is within 5 minutes travel time of a GP and the majority of the site is within 41-45 minutes from a hospital. Overall, a minor positive effect is likely. The site is not within or adjacent to an AQMA.

SA Objectives	SA Score	Justification
can access the health and social care they need.		
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are a number of existing residential properties within 100m north and west of this site, and these residents could be exposed to noise and light pollution during construction of the site. A minor negative effect is therefore likely.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 5 minutes travel time of a local centre and 16-20 minutes from a town/district centre; therefore a minor positive effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	There is an area of semi-natural and natural greenspace within this site which could be lost if the site was developed. However, there are a number of other recreational facilities and areas of open space within 600m of the site which could be used by future residents, including allotments (directly adjacent to the west), a park and garden, area for children and young people, amenity greenspace and a cemetery. There are also a number of PRow footpaths to the south, and there is a local cycle route to the south-west. Therefore, a mixed effect is likely for this SA objective overall.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (2.06ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to three of eight of the features assessed. Therefore, a minor positive effect is likely overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is small (2.06ha) and on greenfield land meaning that there is likely to be a minor negative effect on this objective. The site is not in an area of quality agricultural land.

SA Objectives	SA Score	Justification
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This site is small (2.06ha) and on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E7: Emley Moor Northern Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a landscape of gently undulating elevated slopes with abundant woodland cover. The proximity of the urban centres exerts an influence on landscape character with urban fringe land uses evident in many areas.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	The site is not within 1km of any designated biodiversity or geodiversity sites; therefore a negligible effect on this SA objective is most likely. However, this is uncertain as there may still be effects on non-designated biodiversity, and depending on the design of the development, it may be possible to incorporate biodiversity enhancements
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to three of eight of the features assessed. Therefore, a minor positive effect is likely overall.
Summary of SA findings: A potential significant positive effect was identified for this site in relation to SA objective 8: recreation and leisure (part of a mixed effect overall). A potential significant negative effect was identified for SA objective 8: recreation and leisure (part of a mixed effect overall). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H440: Land to the south of Cockley Hill Lane, Kirkheaton, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The whole of this site is within 31-35 minutes travel time of an employment node; therefore a negligible effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The majority of this site is within 11-15 minutes travel time of a primary school and 31-35 minutes from a secondary school. Therefore, a minor positive effect is likely.
4. Improve the health of local people and ensure that they can access the health and	+	Accessibility to healthcare facilities varies across this site. In this way, the far northern part of the site is within 5 minutes travel time of a GP and 41-45 minutes of a hospital, whereas the far southern part is within 11-15 minutes of a GP and 41-45 minutes of a hospital. In between, journey times to healthcare facilities vary in between those two

SA Objectives	SA Score	Justification
social care they need.		extremes. Although accessibility to healthcare facilities varies across the site, a minor positive effect is likely overall as a result of the site's proximity to a GP.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are a number of existing residential properties within 100m north and west of this site, and these residents could be exposed to noise and light pollution during construction of the site. A minor negative effect is therefore likely.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 6-10 minutes travel time of a local centre and 11-15 minutes of a town/district centre; therefore a minor positive effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	A PRoW footpath runs across this site and this path could be lost as a result of the site being developed. However, there are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is a cemetery approximately 70m to the south. Other recreational facilities and areas of open space include a park and garden, outdoor sports facilities, semi-natural and natural greenspace and allotments. There are a number of PRoW footpaths surrounding the site, and there is a bridleway and local cycle route to the west. Therefore, a mixed effect is likely for this SA objective overall.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is large (5.43ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to four of eight of the features assessed. Therefore, a significant positive effect is likely overall.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is large (5.43ha) and on greenfield land meaning that there is likely to be a significant negative effect on this objective. The site is not in an area of quality agricultural land.

SA Objectives	SA Score	Justification
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	<p>This site is large (5.43ha) and on greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA E7: Emley Moor Northern Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a landscape of gently undulating elevated slopes with abundant woodland cover. The proximity of the urban centres exerts an influence on landscape character with urban fringe land uses evident in many areas.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	There are two biodiversity designations within 1km of this site, these being Dalton Park Local Nature Reserve and approved Local Wildlife Site (approximately 950m north-west) and Round Wood approved Local Wildlife Site (approximately 990m south-west). Therefore, a minor negative effect is likely for this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on greenfield land therefore a minor negative effect is likely on this SA objective.</p>

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to four of eight of the features assessed. Therefore, a significant positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 8: recreation and leisure (part of a mixed effect overall), 9: housing, 10: sustainable transport and 19: climate change. Potential significant negative effects were identified for SA objectives 8: recreation and leisure (part of a mixed effect overall), 11: use of land and 12: character and landscape. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H441: Globe Mill, Bridge Street, Slaithwaite, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	+	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The whole of this site is within 21-25 minutes travel time of an employment node; therefore a minor positive effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The whole of this site is within 6-10 minutes travel time of a primary school and 11-15 minutes from a secondary school. Therefore, a significant positive effect is likely.
4. Improve the health of local people and ensure that they	+	The whole of this site is within 5 minutes travel time of a GP and 36-40 minutes of a hospital; therefore a minor positive effect is likely.

SA Objectives	SA Score	Justification
can access the health and social care they need.		
5. Protect local amenity including avoiding noise and light pollution.	--	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. This site is directly adjacent to an industrial area which could result in future residents being exposed to noise over the long term. A significant negative effect is therefore likely. In addition, there are a number of existing residential and commercial premises within 100m to the north of the site which could be exposed to noise and light pollution during construction of the site, and this reinforces the negative effect.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The whole of this site is within 6-10 minutes travel time of a local centre and within 5 minutes of a town/district centre; therefore a minor positive effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which are allotments approximately 80m to the south. Other recreational facilities and areas of open space include parks and gardens, outdoor sports facilities, additional allotments, semi-natural and natural greenspace, cemeteries, a sports centre and amenity greenspace. There are a number of PRoW footpaths surrounding the site, and there is a national cycle route to the west. Therefore, a significant positive effect is likely for this SA objective overall.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (0.96ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to five of eight of the features assessed. Therefore, a significant positive effect is likely overall.
11. Secure the efficient and prudent use of land.	+	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is small (0.96ha) and on brownfield land meaning that there is likely to be a minor positive effect on this objective. The site is not in an area of quality agricultural land.
12. Protect and enhance the	+?	This site is small (0.96ha) and on brownfield land; therefore development here could have a minor positive effect on this

SA Objectives	SA Score	Justification
character of Kirklees and the quality of the landscape and townscape.		SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA F4: Colne (Slaithwaite, Marsden), as identified in the 2015 Landscape Character Assessment for Kirklees. This is the deeply incised valley of the River Colne. Woodland cover is found clinging to the steep valley sides and cloughs. There are dense ribbons of urban and industrial development along the valley floors and sides. It is a busy landscape with lots of movement owing to transport corridors and urban development along the valley floor.
13. Conserve and enhance the historic environment, heritage assets and their settings.	-?	Historic England has rated this site as 'yellow' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site could avoid damage to the Grade II Listed Building at 24 Bridge Street and the Slaithwaite Town Centre Conservation Area provided that proposed Local Plan policies to protect the historic environment are implemented. The effect on this SA objective is therefore likely to be minor negative although this is uncertain. Uncertainty also exists as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	Huddersfield Narrow Canal candidate Local Wildlife Site is approximately 50m north-east of this site; therefore a significant negative effect is likely.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	0	This site is on brownfield land and outside flood zone 3, although this zone is directly adjacent to the south of the site. Overall, a negligible effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	+?	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on brownfield land therefore a minor positive effect is likely on this SA objective.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to five of eight of the features assessed. Therefore, a significant positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: recreation and leisure, 10: sustainable transport and 19: climate change. Potential significant negative effects were identified for SA objectives 5: amenity and 14: biodiversity and geodiversity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H442: Land to the south of Richmond Park Avenue, Roberttown, Liversedge

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The whole of this site is within 11-15 minutes travel time of an employment node; therefore a significant positive effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The majority of this site is within 6-10 minutes travel time of a primary school and secondary school and 11-15 minutes from a further education facility. Therefore, a significant positive effect is likely.
4. Improve the health of local people and ensure that they	+	The majority of this site is within 11-15 minutes travel time of a GP and 36-40 minutes of a hospital; therefore a minor positive effect is likely.

SA Objectives	SA Score	Justification
can access the health and social care they need.		
5. Protect local amenity including avoiding noise and light pollution.	--	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. This site is directly adjacent to the A62 (Huddersfield Road) which could result in future residents being exposed to noise over the long term. The site is also surrounded by existing residential properties, and these residents could be exposed to noise and light pollution during construction. A significant negative effect is therefore likely for this SA objective.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 5 minutes travel time of a local centre and within 16-20 minutes of a town/district centre; therefore a minor positive effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	There are two PRoW footpaths within this site and it is possible that these could be lost if the site is developed. However, there are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is an outdoor sports facility directly adjacent to the west. Other recreational facilities and areas of open space include additional outdoor sports facilities, a park and garden, areas for children and young people, a cemetery, amenity greenspace and semi-natural and natural greenspace. There are a number of other PRoW footpaths surrounding the site, and there is a bridleway to the west. Therefore, a mixed effect is likely for this SA objective overall.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is large (7.79ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to six of eight of the features assessed. Therefore, a significant positive effect is likely overall.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.

SA Objectives	SA Score	Justification
		This site is large (7.79ha) and on greenfield land meaning that there is likely to be a significant negative effect on this objective. The majority of this site is not within an area of quality agricultural land, although the northern part is in an area of grade 3 agricultural land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	<p>This site is large (7.79ha) and on greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the Old Hall Farmhouse Grade II* Listed Building (the loss of the site and its development could harm elements which contribute to the significance of this asset). The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	The site is not within 1km of any designated biodiversity or geodiversity sites; therefore a negligible effect on this SA objective is most likely. However, this is uncertain as there may still be effects on non-designated biodiversity, and depending on the design of the development, it may be possible to incorporate biodiversity enhancements.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on greenfield land therefore a minor negative effect is likely on this SA objective.</p>

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to six of eight of the features assessed. Therefore, a significant positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: recreation and leisure (part of a mixed effect overall), 9: housing, 10: sustainable transport and 19: climate change. Potential significant negative effects were identified for SA objectives 5: amenity, 8: recreation and leisure (part of a mixed effect overall), 11: use of land and 12: character and landscape. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H443: Land to the south of Plane Street, Newsome, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++/+	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. Levels of accessibility to employment nodes vary across this site. In this way, the eastern part of the site is within 6-10 minutes travel time of an employment node whereas the far western part is within 21-25 minutes from an employment node. In between these two extremes, accessibility to employment nodes varies. Overall, a mixed effect is likely; potentially significant positive for the eastern part and minor positive for the far western part.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?/+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. Levels of accessibility to education vary across this site. In this way, the far southern part of the site is within 5 minutes travel time of a primary school, 11-15 minutes from a secondary school and 5 minutes from a further education facility, whereas the far western part is within 11-15 minutes of a primary school, 26-30 minutes from a secondary school and

SA Objectives	SA Score	Justification
		21-25 minutes from a further education facility. In between these two extremes, accessibility to education varies. Overall, a mixed effect is likely – significant positive for the far southern part and minor positive for the far western part.
4. Improve the health of local people and ensure that they can access the health and social care they need.	++/+	Accessibility to healthcare facilities varies across this site. In this way, the eastern part of the site is within 6-10 minutes travel time of a GP and 21-25 minutes of a hospital, whereas the far western part is within 11-15 minutes of a GP and 36-40 minutes of a hospital. In between these two extremes accessibility to healthcare varies. Overall, a mixed effect is likely – significant positive for the eastern part and minor positive for the far western part.
5. Protect local amenity including avoiding noise and light pollution.	--	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. This site is surrounded by existing residential properties and Hillside Primary School is to the west. These receptors could be exposed to noise and light pollution during construction and a significant negative effect is therefore likely for this SA objective.
6. Retain and enhance access to local services and facilities.	+/0	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. Accessibility to local services varies across this site. In this way, the eastern part of the site is within 6-10 minutes travel time of a local centre and 11-15 minutes of a town/district centre, whereas the far western end of the site is within 11-15 minutes travel time of a local centre and 26-30 minutes of a town/district centre. In between these two extremes, accessibility to local services varies. Overall, a mixed effect is likely – potential minor positive effect for the eastern part and negligible for the far western part.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	This site is on semi-natural and natural greenspace land and a PRoW footpath runs through the site. It is considered likely that these features would be lost if this site was developed. However, there are a number of other recreational facilities and areas of open space within 600m of the site which could be used by future residents, including additional semi-natural and natural greenspace, outdoor sports facilities, amenity greenspace, parks and gardens, allotments and area for children and young people. There are a number of other PRoW footpaths surrounding the site, and there is a byway and bridleway to the east and south-east. Therefore, a mixed effect is likely for this SA objective overall.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is large (7.98ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or

SA Objectives	SA Score	Justification
use of sustainable and active modes of transport.		mainly 'green' in terms of its access to seven of eight of the features assessed. Therefore, a significant positive effect is likely overall.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is large (7.98ha) and on greenfield land meaning that there is likely to be a significant negative effect on this objective. The site is not in an area of high quality agricultural land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This site is large (7.98ha) and on greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in an area classed as 'urban' in the 2015 Landscape Character Assessment for Kirklees.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the Scheduled Monument at Castle Hill (the loss of the site and its development could harm elements which contribute to the significance of this asset). The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is within 1km of a number of biodiversity designations, including Hey Lane candidate Local Wildlife Site (approximately 800m to the east), Castle Hill Local Nature Reserve and approved Local Wildlife Site (approximately 900m south-east), and Huddersfield Narrow Canal candidate Local Wildlife Site (approximately 600m north). Therefore a minor negative effect on this SA objective is most likely.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to seven of eight of the features assessed. Therefore, a significant positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment (part of a mixed effect overall), 3: education (part of a mixed effect overall), 4: health (part of a mixed effect overall), 8: recreation and leisure (part of a mixed effect overall), 9: housing, 10: sustainable transport and 19: climate change. Potential significant negative effects were identified for SA objectives 5: amenity, 8: recreation and leisure (part of a mixed effect overall), 11: use of land and 12: character and landscape. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H444: Land south of Jill Lane, Mirfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 11-15 minutes travel time of an employment node; therefore a significant positive effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The whole of this site is within 6-10 minutes travel time of a primary school and the majority of the site is within 11-15 minutes of a secondary school and 21-25 minutes of a further education facility. Therefore, a significant positive effect is likely overall.

SA Objectives	SA Score	Justification
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	The majority of this site is within 11-15 minutes travel time of a GP and 41-45 minutes of a hospital. Therefore, a minor positive effect is likely overall.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are several residential properties within 100m south, east and west of this site which could be exposed to noise and light pollution during construction of the site; therefore a minor negative effect is likely.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The whole of this site is within 6-10 minutes travel time of a local centre and the majority of the site is within 11-15 minutes of a town/district centre. Therefore, a minor positive effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is a park and garden approximately 160m west of the site. Other recreational facilities and areas of open space include outdoor sports facilities, amenity greenspace, a cemetery, parks and gardens, allotments and areas for children and young people. There are also a number of PRoW footpaths surrounding the site. Therefore, a significant positive effect is likely for this SA objective overall.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (1.03ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to seven of eight of the features assessed. Therefore, a significant positive effect is likely overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.

SA Objectives	SA Score	Justification
		This site is small (1.03ha) and on greenfield land meaning that there is likely to be a minor negative effect on this objective. The majority of this site is not in an area of high quality agricultural land, although a small part at the northern end is within grade 3 agricultural land, however it may be possible to avoid developing this area of the site.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This site is small (1.03ha) and on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	The site is not within 1km of any designated biodiversity or geodiversity sites; therefore a negligible effect on this SA objective is most likely. However, this is uncertain as there may still be effects on non-designated biodiversity, and depending on the design of the development, it may be possible to incorporate biodiversity enhancements..
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on greenfield land therefore a minor negative effect is likely on this SA objective.</p>

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to seven of eight of the features assessed. Therefore, a significant positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: recreation and leisure, 10: sustainable transport and 19: climate change. There were no potential significant negative effects identified for this site.		

H445: Land to the north east of Pavillion Way, Meltham, Holmfirth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	-	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 41-45 minutes travel time of an employment node; therefore a minor negative effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	-?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The majority of this site is within 21-25 minutes travel time of a primary school and 41-45 minutes of a secondary school; therefore a minor negative effect is likely.
4. Improve the health of local people and ensure that they can access the health and	+	The southern part of this site is within 6-10 minutes travel time of a GP and 46-50 minutes from a hospital, whereas the northern part of the site is within 6-10 minutes travel time of a GP and 56-60 minutes from a hospital. Although accessibility varies across the site, a minor positive effect is likely overall due to the proximity of the site to a GP. This

SA Objectives	SA Score	Justification
social care they need.		site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are several residential properties within 100m west of this site which could be exposed to noise and light pollution during construction of the site; therefore a minor negative effect is likely.
6. Retain and enhance access to local services and facilities.	-	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 26-30 minutes travel time of a local centre and the whole site is within 16-20 minutes of a town/district centre. Therefore, a minor negative effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is a green corridor approximately 130m south of the site. Other recreational facilities and areas of open space include areas of semi-natural and natural greenspace, a park and garden, outdoor sports facilities, cemeteries, parks and gardens, allotments and areas for children and young people. There are also a number of PRoW footpaths surrounding the site, one of which is directly adjacent to the north and there is a national cycle route directly adjacent to the south. Therefore, a significant positive effect is likely for this SA objective overall.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (0.68ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to one of eight of the features assessed. Therefore, a minor positive effect is likely overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is small (0.68ha) and on greenfield land meaning that there is likely to be a minor negative effect on this objective. This site is not in an area of high quality agricultural land.
12. Protect and enhance the	-?	This site is small (0.68ha) and on greenfield land; therefore development here could have a minor negative effect on this

SA Objectives	SA Score	Justification
character of Kirklees and the quality of the landscape and townscape.		<p>SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA F5: Holme & Hall Dyke (Holmfirth & Meltham), as identified in the 2015 Landscape Character Assessment for Kirklees. This landscape comprises steep incised valleys associated with the upper parts of River Holme and its tributaries. Mixed semi-natural woodlands are found along the waterways and on the steepest slopes of the valleys. There are contrasting levels of tranquillity throughout the LCA, influenced by proximity to development and roads. Perceptions of tranquillity and remoteness are greatest on the fringes of the National Park.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is within 1km of a number of biodiversity and geodiversity designations including Folly Dolly Falls Local Geological Site (approximately 300m north-east), Honley Wood candidate Local Wildlife Site (approximately 550m to the east) and Hall Hayes Wood approved Local Wildlife Site (approximately 740m north-east). Overall, a minor negative effect is likely.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on greenfield land therefore a minor negative effect is likely on this SA objective.</p>

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to one of eight of the features assessed. Therefore, a minor positive effect is likely overall.
Summary of SA findings: A potential significant positive effect was identified for this site in relation to SA objective 8: recreation and leisure. There were no potential significant negative effects identified.		

H446: Land to the north of 271 Cliffe Lane, Gomersal

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The site is within 16-20 minutes travel time of the nearest employment node. As such a significant positive effect is expected on this SA objective.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The site is within 11-15 minutes travel time of a primary school and is also within 11-15 minutes travel time of a secondary school. As such a significant positive effect is expected on this SA objective. The majority of the site is within 31-35 minutes travel time of the nearest centre for further education.
4. Improve the health of local people and ensure that they	+	The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.

SA Objectives	SA Score	Justification
can access the health and social care they need.		The majority of the site is within 11-15 minutes travel time of the nearest GP (a portion of the site to the south is within 6-10 minutes of the nearest GP). The majority of the site is also within 46-50 minutes travel time of the nearest hospital (part of the site is within 41-45 minutes travel time of the nearest hospital). A minor positive effect is therefore expected on this SA objective.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. This site is adjacent to existing residential properties to the south on Cliffe Lane. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	-	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of the site is within 16-20 minutes travel time of a local centre (the north western corner of the site is within 21-25 minutes travel time of the nearest local centre). The majority of the site is also within 16-20 minutes travel time of a town/district centre (part of the site is also within 11-15 minutes travel time of a town/district centre). As such a minor negative is expected on this SA objective.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	The site is in close proximity to a number of open spaces which could be used by residents. The site is within 40m of a cemetery which is located to the north east. The site is within 105m and 185m of two children's playgrounds which are located to the south and south east Priority Court and Aspen Court respectively. Amenity greenspace can be accessed within 230m to the south east of the site on Reform Street. As such given that the relative close proximity of these open spaces to the site may encourage new residents to make use of them a significant positive effect is expected on this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.84ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.

SA Objectives	SA Score	Justification
use of sustainable and active modes of transport.		In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to four out of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (1.84ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is located mostly on land which has been identified as Urban Land in terms of its Agricultural Land Classification.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (1.84ha) on greenfield land; therefore development here is expected to have a minor negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies mainly in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the Gomersal Conservation Area which the site adjoins. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is within 770m of Oakwell Park which has been designated as a Local Wildlife Site and Local Nature Reserve to the north east. The relative proximity of the site to this designated biodiversity feature may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is located on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings

SA Objectives	SA Score	Justification
use, recovery and recycling of waste close to source.		and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of greenfield land meaning there is likely to be little opportunity to reuse material already onsite; therefore a minor negative effect is likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is classed as 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objective 1: employment, 3: education, 8: recreation and leisure, 10: transport and 19: climate change. No significant negative effects were identified for this site in relation to any of the SA objectives. These issues will need to be considered further in terms of enhancement, which may be achieved through Local Plan policies.		

H447: Land to the south east of Batley Girls High School, Upper Batley Lane, Upper Batley

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++/+	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The north eastern corner of the site is within 26-30 minutes travel time of the nearest employment node while the southern corner of the site is within 6-10 minutes travel time of the nearest employment node. Areas between these two extremes are within variable travel times of the nearest employment node. As such a mixed effect is expected on this SA objective. A significant positive effect is expected for the southern corner of the site while a minor positive effect is expected for the north eastern corner of the site.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?/+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how

8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	<p>The site is crossed by a footpath towards its north western corner and as such a potential significant negative is identified given that housing development at this location may result in the loss of this access route. The site is however also in close proximity to a number of open spaces which could be used by residents. The site is within 15m of outdoor sports facilities which are provided to the south east. Amenity greenspace can also be accessed to the south east within 280m. Allotments are provided within 375m to the south of the site. To the south west of the site within 450m a cemetery is provided on the grounds of the Church of the Resurrection.</p> <p>As such given that the relative close proximity of these open spaces to the site may encourage new residents to make use of them but that development at this location may result in the loss of a footpath an overall mixed effect (significant positive/potential significant negative) is expected on this SA objective.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (4.06ha); therefore a minor positive effect is likely.</p>
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to six out of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (4.06ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is located on mostly Grade 3 Agricultural Land (a small part of the site to the south is on Urban Land).</p>
12. Protect and enhance the character of Kirklees and the	-?	<p>This is a relatively small site (4.06ha) on greenfield land; therefore development here is expected to have a minor negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the</p>

SA Objectives	SA Score	Justification
quality of the landscape and townscape.		development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is within 540m of Sunny Bank Ponds which has been designated as a Local Wildlife Site and a Local Nature Reserve to the north east. The relative proximity of the site to this designated biodiversity feature may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is located on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of greenfield land meaning there is likely to be little opportunity to reuse material already onsite; therefore a minor negative effect is likely on this SA objective.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>This site is classed as 'green' in terms of its access to six of the eight features assessed; therefore a significant positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: recreation and leisure (it should be noted that the overall effects for SA objectives 3 and 8 were recorded as being mixed), 10: transport and 19: climate change and potential significant negative effects were identified for this site in relation to SA objective 8: recreation and leisure (it should be noted however that the overall effect for this SA objective was recorded as mixed). These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.</p>		

H449: Land to the north east of 1 Green Balk Lane, Lepton

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>The majority of the site is within 31-35 minutes travel time of the nearest employment node (a small part of the site to the north east is located within 26-30 minutes travel time of the nearest employment node). As such a negligible effect is expected on this SA objective.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?/-?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The north eastern corner of the site is within 11-15 minutes travel time of a primary school while the western part of the</p>

SA Objectives	SA Score	Justification
		site is within 21-25 minutes travel time of a primary school. The northern eastern corner of the site is within 36-40 minutes travel time of a secondary school while the western part of the site is within 46-50 minutes travel time of a secondary school. The areas located between these extremes are within variable travel times of a primary school and secondary school. Overall a mixed effect (minor positive/minor negative) is expected on this SA objective.
4. Improve the health of local people and ensure that they can access the health and social care they need.	0	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The majority of the site is located within 16-20 minutes travel time of a GP (a small part of the site to the north east is located within 11-15 minutes travel time of a GP). The majority of the site is also located within 51-55 minutes travel time of a hospital (a small part of the site to the north east is located within 46-50 minutes travel time of a hospital). As such a negligible effect is expected on this SA objective.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is in close proximity to a number of existing residential properties to the south on Green Balk Lane. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	-	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is located within 16-20 minutes travel time of a local centre (a small part of the site to the north east is located within 11-15 minutes travel time of a local centre). The majority of the site is also located within 26-30 minutes travel time of a town/district centre (a small part of the site to north east is located within 21-25 minutes of a town/district centre). A minor negative effect is therefore expected for this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	The site is on land which has a footpath running through it, which could be lost as a result of housing development; therefore a potential significant negative effect is identified. However, the site is also in close proximity to a number of additional open spaces which could be used by residents. A cemetery is located to the north of the site within 125m. Outdoor sports facilities are located within 365m to the east of the site. A large semi-natural and natural greenspace is located to the west of the site within 375m. A mixed (significant positive and potential significant negative) effect is therefore identified.

SA Objectives	SA Score	Justification
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (3.59ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	--	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was not classed as 'green' in terms of its access to any of the eight features assessed. Therefore, a significant negative effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (3.59ha) on mostly greenfield land (it is acknowledged that a small part of the site to the south has previously been developed); therefore a minor negative effect on this SA objective is likely. The site is located on mostly Grade 4 Agricultural Land (a small part of the site to the north is on Urban Land).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (3.59ha) on mostly greenfield land (it is acknowledged that a small part of the site to the south has previously been developed); therefore development here is expected to have a minor negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E6: Fenay Beck Valley Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with large blocks of tree and woodland cover found on slopes. It is perceived as a tranquil landscape with a traditional rural feel, although this is impacted upon by the main roads and urban development around Shepley.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is within 375m of Lepton Great Wood which has been designated as a Candidate Local Wildlife Site to the west (part of the wood to the south has been designated as a Local Geological Site). The relative proximity of the site to this designated biodiversity feature may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate	-	This site is located on mostly greenfield land (it is acknowledged that some of the site to the south has previously been

SA Objectives	SA Score	Justification
new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.		developed) and is outside of flood zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of mostly greenfield land (it is recognised that a small part of the site to the south has previously been developed) meaning there is likely to be little opportunity to reuse material already onsite; therefore a minor negative effect is likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	--	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is not classed as 'green' in terms of its access to any of the eight features assessed; therefore a significant negative effect is likely.
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objective 8: recreation and leisure (it should be noted however that the overall effect for this SA objective was recorded as mixed) and potential significant negative effects were identified for this site in relation to SA objectives 8: recreation and leisure (it should be noted however that the overall effect for this SA objective was recorded as mixed), 10: transport and 19: climate change. These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.</p>		

H450: Land to the south east of Marsh Lane, Shepley

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++/0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The north east part of the site is within 16-20 minutes travel time of an employment node. The eastern part of the site is within 31-35 minutes travel time of an employment node. Areas in between these extremes are located at variable travel times from the nearest employment node. As such a mixed effect (significant positive/negligible) is expected on

SA Objectives	SA Score	Justification
		is located within 26-30 minutes travel time of the nearest town/district centre. As such a mixed effect (minor positive/negligible) is expected overall on this SA objective.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	The site is in close proximity to a number of open spaces which could be used by residents. The site is adjacent to a semi-natural and natural greenspace which is located to the north. Outdoor sports facilities are provided to the north of the site also within 170m. A children's playground is located within 120m to the east of the site. As such given that the relative close proximity of these open spaces to the site may encourage new residents to make use of them a significant positive effect is expected on this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (18.80ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five out of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively large site (18.80ha) on mostly greenfield land (it is acknowledged that a small part of the site to the west has previously been developed); therefore a significant negative effect on this SA objective is likely. The site is located on Grade 4 Agricultural Land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This is a relatively large site (18.80ha) on mostly greenfield land (it is acknowledged that a small part of the site to the west has previously been developed); therefore development here is expected to have a significant negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development. The site is not within close proximity of the Peak District National Park.

SA Objectives	SA Score	Justification
		The site lies in LCA E6: Fenay Beck Valley Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with large blocks of tree and woodland cover found on slopes. It is perceived as a tranquil landscape with a traditional rural feel, although this is impacted upon by the main roads and urban development around Shepley.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the Shepley Conservation Area which is in close proximity to the site. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is within 700m of Upper and Lower Stones Wood which has been designated as a Local Wildlife Site to the north west (part of the wood has also been designated as a Local Geological Site). The relative proximity of the site to this designated biodiversity feature may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is located on mostly greenfield land (it is acknowledged that some of the site to the west has been previously developed) and is outside of flood zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of mostly greenfield land (it is recognised that a small parts of the site to the south and north west has previously been developed) meaning there is likely to be little opportunity to reuse material already onsite; therefore a minor negative effect is likely on this SA objective.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is classed as 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education (it should be noted that the overall effects on these two SA objectives were recorded as mixed), 8: recreation and leisure, 9: housing, 10: transport and 19: transport and potential significant negative effects were identified for this site in relation to SA objectives 11: land use and 12: landscape and townscape. These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.		

H451: Ryecroft Lane, Scholes, Holmfirth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	-	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The site is within 46-50 minutes travel time of the nearest employment node; as such a minor negative effect is expected on this SA objective.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The site is within 6-10 minutes travel time of a primary school. The majority of the site is within 21-25 minutes travel time of a secondary school (a small part of the site to the south west is within 26-30 minutes travel time of a secondary school). Overall a minor positive effect is expected on this SA objective.

SA Objectives	SA Score	Justification
4. Improve the health of local people and ensure that they can access the health and social care they need.	-	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The site is located within 16-20 minutes travel time of a GP. The site is also located more than 60 minutes travel time from a hospital. Overall a minor negative effect is expected on this SA objective.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	-	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is located within 16-20 minutes travel time of the nearest local centre (a small part of the site to the north west is located within 11-15 minutes travel time of the nearest local centre). The site is located within 16-20 minutes of a town/district centre. As such a minor negative effect is expected overall on this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	<p>The site is in close proximity to a number of open spaces which could be used by residents. The site is adjacent to a children's playground which is located to the south. Outdoor sports facilities are provided to the east of the site within 335m. Further outdoor sports facilities are provided to the north west within 390m. A semi-natural and natural greenspace is located within 510m to the north west of the site.</p> <p>As such given that the relative close proximity of these open spaces to the site may encourage new residents to make use of them a significant positive effect is expected on this SA objective.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.68ha); therefore a minor positive effect is likely.</p>
10. Secure an effective and safe transport network which encourages people to make	+	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p>

SA Objectives	SA Score	Justification
use of sustainable and active modes of transport.		In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to one out of the eight features assessed. Therefore, a minor positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (0.68ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is located on Grade 4 Agricultural Land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (0.68ha) on greenfield land; therefore development here is expected to have a minor negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA D7: Peak Fringe Upland Pastures, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a broad terrace, comprising small square fields and is sparsely wooded. The settlement pattern is dispersed and there is a strongly rural, traditional agricultural character, although perceptions of tranquillity reduce closer to Huddersfield in the east.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is within 720m of Morton Wood which has been designated as a Local Wildlife Site to the south east. The relative proximity of the site to this designated biodiversity feature may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is located on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-use, recovery and recycling	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.

SA Objectives	SA Score	Justification
of waste close to source.		Development at this site would make use of greenfield land meaning there is likely to be little opportunity to reuse material already onsite; therefore a minor negative effect is likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is classed as 'green' in terms of its access to one of the eight features assessed; therefore a minor positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objective 8: recreation and leisure. No potential significant negative effects were identified for this site in relation to any of the SA objectives. These issues will need to be considered further in terms of enhancement, which may be achieved through Local Plan policies.		

H452: Land to the east of Oakes Fold, Lepton, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	-	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. This site is largely within 46 – 50 minutes travel time of the nearest employment node, whilst a small portion is within 51 – 55 minutes; therefore a minor negative effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. This site is largely 11 - 15 minutes travel time of a primary and 41 – 45 minutes of a secondary school. It is also over 60

SA Objectives	SA Score	Justification
		minutes of a further education institute. There is likely to be a minor positive effect.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is largely within 6-10 minutes travel time of a GP but over 60 minutes of a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are some residential properties within 100m of this site which may be affected by noise during the construction phase, including properties directly adjacent to the western boundary of the site. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is largely within 6 – 10 minutes travel time of a local centre and within 16 - 20 minutes of a town/district centre; therefore a negligible effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	<p>This site is adjacent to three footpaths and has as many as five more within 250 metres. The site is also within 350 metres of an outdoor sports facility. There is also an area of woodland (Hall Wood) within 300m. The site is not located within any area currently designated as open space and therefore a significant positive effect is likely.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing.</p>

SA Objectives	SA Score	Justification
		This site is relatively small (2.14ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to three of the eight features assessed. Therefore, a minor positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (2.14ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is located on land which has been designated as Grade 4 Agricultural Land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (2.14ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA N1: Emley Moor, as identified in the 2015 Landscape Character Assessment for Kirklees. This is an elevated, undulating farmland plateau with frequent woodland cover. The character is predominantly traditional rural, occupied by small villages.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 940m from the Lepton Great Wood candidate Local Wildlife Site; therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and	0	This site is located on greenfield land and is outside of flood zones 2 and 3. As such a minor negative effect is expected on this a SA objective given that development at this location will increase the area of impermeable surfaces in the District and risk of flood in Kirklees.

SA Objectives	SA Score	Justification
people		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is located on greenfield land; therefore a minor negative effect is likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to three of the eight features assessed. Therefore, a minor positive effect is likely
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objective 8: culture and recreation facilities and no potential significant negative effects were identified in relation to any of the SA objectives addressed. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H453: POL, Quarry Road, Crosland Hill, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. This site is largely within 31 – 35 minutes travel time of the nearest employment node, whilst a small portion is within 36 – 40 minutes; therefore a negligible effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.

SA Objectives	SA Score	Justification
		This site is largely within 6-10 minutes travel time of a primary school, although part of the west is within 11 -15, whilst the same is true of secondary schools although an area in the north is also within 11 – 15. The site is largely within 21 – 25 minutes of a higher education facility. Overall, a significant positive effect is likely.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is largely within 11 - 15 minutes travel time of a GP and within 41 – 45 minutes of a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of residential properties around this site which may be affected by noise during the construction phase, including properties directly adjacent to the southern and eastern boundary of the site. In addition, the site is adjacent to what appears to be an industrial area (although it is possible that this is no longer in use). A significant negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+/0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is within 6 - 10 minutes travel time of a local centre. Travel time of a town/district centre is a very mixed picture however, with part of the west being 26 – 30 minutes, whilst the south-east is 11 – 15. In between these areas, journey times vary in between those two extremes. In between these areas, journey times vary in between those two extremes. Therefore a mixed effect on this objective is expected – negligible throughout the majority and minor positive for south-eastern area of the site.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is located within 600m of three areas of amenity greenspace, three of which have provision for children and young people. The site is also located within 600m of two areas of parks and garden space, both of which have provision for children and young people. There are a number of PRoW footpaths within close proximity to the site, one of which straddles the western boundary of the site. In addition, there are also allotments and an outdoor sports facility within 600m. The site is not located within any area currently designated as open space and therefore a significant positive effect is likely.

SA Objectives	SA Score	Justification
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (4.2ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (4.2ha) on mostly greenfield land (it is noted that the north east part of the site has already been developed); therefore a minor negative effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (4.2ha) on mostly greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in an area classed as 'urban' in the 2015 Landscape Character Assessment for Kirklees.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on 41, 43, 67 and 69 Crossland Hill Road which have been designated as Grade II Listed buildings. The loss of this area and its subsequent development could harm elements which contribute to the significance of these buildings. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is located within 1km of the Delves Wood candidate Local Wildlife Site and within 650m of Johnson Wellfield Quarries (a Local Geological Site); therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and	-	This site is on greenfield land which is outside of flood zones 2 and 3; therefore a minor negative effect is likely given that development at this location will increase the area of impermeable surfaces within Kirklees and therefore increase the overall increase of flood in the Borough.

SA Objectives	SA Score	Justification
people		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-?	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: culture and recreation facilities, 10: sustainable transport and 19: climate change, and a potential significant negative effect was identified in relation to SA objective 5: amenity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H454: Manor House Farm, POL, Wakefield Road, Clayton West, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. This site is within 5 minutes travel time of the nearest employment node, therefore a significant positive effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.

SA Objectives	SA Score	Justification
		This site is within 6 - 10 minutes travel time of a primary and 11 – 15 of a secondary school. It is also within 16 - 20 minutes of a further education institute. Overall the site is likely to have a significant positive effect.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 6-10 minutes travel time of a GP and within 46-50 minutes of a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties in close proximity to the east and west of the site, and these residents could experience noise and light pollution during construction of the site. In addition, there is an industrial area immediately to the north of the site which may result in noise pollution affecting residents in the longer-term. Therefore a significant negative effect on this SA objective is considered likely.</p>
6. Retain and enhance access to local services and facilities.	++	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is within 5 minutes travel time of a local centre and between 5 and 6 – 10 minutes of a town/district centre; therefore a significant positive effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is adjacent to a cricket ground. To the south of the site there are two areas with provision for children and young people within 300m of the site and an allotment within 250m. There are also three parks and gardens within 600m south of the site and a bridleway runs adjacent to the southern boundary of the site. In addition, a number of PRoW footpaths are within 600m to the south, north and east of the site. The site is not located within any area currently designated as open space therefore a significant positive effect is likely.
9. Ensure all people are able to live in a decent home	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable

SA Objectives	SA Score	Justification
which meets their needs.		housing. This site is relatively small (1.00ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (1.00ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is located on Grade 3 Agricultural Land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (1.00ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not located within close proximity to the Peak District National Park. The site lies in LCA G10: River Dearne Valley, as identified in the 2015 Landscape Character Assessment for Kirklees. This LCA comprises relatively broad valleys with a high level of broadleaved woodland cover. The main valley floor is densely settled and has a peri-urban feel, while the tributary sections of the LCA are generally more tranquil and rural and are only crossed by minor roads.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is located within 970m of Cliffe Woods Park Quarry, Clayton West which has been designated as a Local Geological Site to the south west. As such given the relative proximity of this area of geological importance a minor negative effect is identified on this SA objective. Given that this negative effect might be mitigated through appropriate measures and green infrastructure provided onsite may allow for increased habitat connectivity, a level of uncertainty is attached.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely. The development of this site would increase the area of impermeable surfaces in Kirklees and therefore increase the risk of flood.

SA Objectives	SA Score	Justification
development does not contribute to increased flood risk for existing property and people		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-?	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 6: access to services 8: leisure and recreation facilities, 10: sustainable transport and 19: climate change, and potential significant negatives effect were identified in relation to SA objective 5: amenity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H455: Land to the south east of Hermitage Park, Lepton, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. This site is within 6 - 10 minutes travel time of the nearest employment node; therefore a significant positive effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities	++?	The availability of school and college places to serve the growing population will depend in part on whether new places

SA Objectives	SA Score	Justification
are available to all.		<p>are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>This site is largely within 6-10 minutes travel time of a primary, whilst a northern part is within 5 minutes. The site is within 16 – 20 minutes of a secondary school. The site is also between 16 – 20 minutes in the north and the south-west of a further education institute, whilst the rest of the site is within between 21 – 25 minutes. A significant positive effect is therefore considered likely.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is largely within 11 – 15 minutes travel time of a GP, whilst a northern part is within 6 - 10 minutes. The site is largely within 51 - 55 minutes of a hospital, whilst a northern part is within 46 - 50 minutes; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA. Therefore a minor positive effect is likely.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are some residential properties within 100m of this site which may be affected by noise during the construction phase, including properties directly adjacent to the western boundary of the site. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is largely within 11-15 minutes travel time of a local centre, whilst a northern part is within 6 – 10 minutes. The site is also largely 11 – 15 minutes of a town/district centre, whilst a northern part is within 6 – 10 minutes; therefore a minor positive effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation	+ +/--?	<p>This site located approximately. The site is has a footpath running through its centre which may be lost as a result of housing development at this location. However, the site is adjacent to the Lepton Great Wood (semi-natural/natural greenspace) and less than 100m from another semi-natural/natural greenspace. The site is also less than 100m from an</p>

SA Objectives	SA Score	Justification
facilities and areas of open space and encourage their usage.		outdoor sports facility, 200m from amenity greenspace and less than 400m from a green corridor. In addition to the footpath which runs through the site there are also a number which are within close proximity. Overall a mixed effect is predicted, a potential significant negative due to footpath running through the site and significant positive for the number of sports and recreation facilities in close proximity to the site.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (5.02ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively large site (5.02ha) on predominately greenfield land which is of grade 3 high agricultural quality; therefore a minor negative effect on this SA objective is likely. Therefore a significant negative effect is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This is a relatively large site (5.02ha) on predominantly greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not in close proximity to the Peak District National Park. The site lies mainly in LCA E6: Fenay Beck Valley Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with large blocks of tree and woodland cover found on slopes. It is perceived as a tranquil landscape with a traditional rural feel, although this is impacted upon by the main roads and urban development around Shepley.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	This site is adjacent to the Lepton Great Wood candidate Local Wildlife Site (the southern part of the wood has also been designated as a Local Geological Site); therefore development here could have a significant negative effect on this SA Objective.
15. Reduce air, water and	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.

SA Objectives	SA Score	Justification
soil pollution.		
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land but is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is mainly on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: culture and recreation facilities (as part of a mixed effect), 9: affordable housing, 10: sustainable transport and 19: climate change, and a potential significant negative effect was identified in relation to SA objective 8: culture and recreation facilities (as part of a mixed effect), 11: use of land and 14: biodiversity and geodiversity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H456: Land between New Hey Road and M62, Outlane, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. This site is largely within 11-15 minutes travel time of the nearest employment node (although a small area in the north is over 60 minutes from an employment node); therefore a significant positive effect on this objective is expected.
2. Achieve an economy	0	The location of housing sites will not affect the success of the local economy. While housing development may result in

SA Objectives	SA Score	Justification
better capable of growth through increasing investment, innovation and Entrepreneurship.		job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?/--?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Levels of access to education facilities vary throughout this site. Most of the east of the site is within 5 minutes travel time of a primary school while the south west of the site is within 6-10 minutes and a small area in the north west is more than 60 minutes. Travel time to secondary schools from the site also varies, being 21–25 minutes in the west, 26-30 minutes in the east and over 60 minutes in the north-west. Overall a mixed effect is predicted - minor positive for most of the site but significant negative in the north-west.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	++	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The majority of this site is within 6-10 minutes travel time of a GP although a small part is over 60 minutes in the north-west. The site is also largely within 16-20 minutes of a hospital although a small part is over 60 minutes in the north-west; therefore a significant positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are existing residential properties near this site which may be affected by noise during the construction phase. In addition, the site is sandwiched between the A640 and the M62 which could mean that residents are affected by noise in the longer term. A significant negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+/--	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Levels of access to local and town/district centres vary throughout this site. The majority of the site is within 6-10 minutes travel time of a local centre, although a small area in the north-west is over 60 minutes. Most of the site is within 11-15 minutes of a town/district centre although the south west is within 16-20 minutes and a small area in the north west is over an hour. Overall, a mixed effect is likely – minor positive for most of the site but significant negative for the area in the north-west.</p>
7. Make our communities	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the

SA Objectives	SA Score	Justification
safer by reducing crime, anti-social behaviour and the fear of crime.		incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site located approximately 50m from an area with provision for children and young people, less than 250m from an outdoor sports facility, 450m from a park and garden and less than 550m from a semi-natural and natural greenspace. The site also has a number of PRoWs in close proximity. Therefore, a significant positive effect is likely.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.60ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (1.60ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land (it is grade 4).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (1.60ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site lies more than 500m from the Peak District National Park. The site lies in LCA E2: Barkisland-Holywell Green, as identified in the 2015 Landscape Character Assessment for Kirklees. This area comprises steeply rising land with frequent tree and woodland cover. It is an urban fringe landscape. Some areas retain a relative tranquil, rural character despite the proximity of urban development. Increasing urbanisation on the LCA's fringes creates a landscape of transition. The area has an important visual relationship with the National Park.
13. Conserve and enhance	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment meaning

SA Objectives	SA Score	Justification
the historic environment, heritage assets and their settings.		that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 450m from the Shaw Wood approved Local Wildlife Site and approximately 780m from Old Lindley Moor Local Geological Site; therefore development here could have a minor negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such as the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 4: health, 8: culture and recreation facilities, 10: sustainable transport and 19: climate change, and potential significant negative effects were identified in relation to SA objectives 3: education (as part of a mixed effect), 5: amenity and 6: access to services (as part of a mixed effect). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H457: Land to the west of 55, Near Bank, Shelley, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>This site is within 16 - 20; therefore a significant positive effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	<p>The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.</p>
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>This site is within 6 - 10 minutes travel time of a primary and 26 – 30 minutes from a secondary school. The site is also within 31 – 35 minutes of a further education facility. Overall, a minor positive effect is likely.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 11 - 15 minutes travel time of a GP and within 46-50 minutes of a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>The site is located away from sensitive receptors and major roads and railways, but is in close proximity to industrial activities. Therefore, a significant negative effect is likely.</p>

SA Objectives	SA Score	Justification
6. Retain and enhance access to local services and facilities.	0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is within 6 – 10 minutes travel time of a local centre and within 21 - 25 minutes of a town/district centre; therefore a negligible effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	<p>The site is crossed by a footpath to the east by the access point to Near Bank. It is considered however given the narrow width of the site at this point that this area would be used to provide access to the site and that the footpath provision could therefore be accommodated within this area. As such no negative effect has been identified. There are also a number of footpaths and areas of open space within walking distance (600m) of the site which could be used by residents for sports and recreation, including a park and garden, natural and semi-natural greenspace, amenity greenspace, allotments, an area of woodland, an outdoor sports facility and provision for children and young people. Overall, a significant positive effect is expected.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing.</p> <p>This site is relatively small site (1.64ha); therefore a minor positive effect is likely.</p>
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	+	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (1.64ha) on brownfield land; therefore a minor positive effect on this SA objective is likely.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	+?	<p>This is a relatively small site (1.64ha) on brownfield land; therefore development here could have a minor positive effect on this SA objective although this is uncertain depending on the design of the development.</p> <p>The well outside from the Peak District National Park.</p>

SA Objectives	SA Score	Justification
		The site mainly lies in LCA G9: Fenay Beck Valley & Tributaries, as identified in the 2015 Landscape Character Assessment for Kirklees. This LCA comprises the main valley of the Fenay Beck River. There are high levels of broadleaved woodland cover. Tranquillity is variable throughout the LCA, with the less developed and more rural tributary valleys being much more tranquil than the main Fenay Beck valley due to the main roads and larger settlements.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	<p>Historic England has rated this site as 'orange' in terms of the potential for effects on Shelley Methodist Church to the east of this area, which is a Grade II Listed Building. The loss of this area and its subsequent development could harm elements which contribute to the significance of this building.</p> <p>The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 310m from the Gelder Wood Candidate Local Wildlife Site; therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	0	This site is on brownfield land and is outside of flood zones 2 and 3; therefore a negligible effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	+?	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on brownfield land; therefore a minor positive effect is likely.</p>

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 8: culture and recreation facilities, 10: Sustainable transport and 19: climate change, and a potential significant negative effect was identified in relation to SA objective 5: amenity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H458: Land to the west of 55, Near Bank, Shelley, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++/--	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Levels of access to an employment node vary throughout the site, from 16 - 20 minutes in southern and central parts to more than 60 minutes in the north. In between these parts of the site, journey times to employment opportunities vary in between those two extremes. Overall a mixed effect is likely, being significant positive for the southern and central part of the site and significant negative for the northern part.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?/--?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Levels of access to education facilities vary throughout this site. In southern and central parts it is 6 - 10 minutes travel</p>

SA Objectives	SA Score	Justification
		<p>time to a primary school, while in the north of the site it is over 60 minutes travel time. For secondary schools the journey time is between 26 - 30 minutes in the south and central part and over 60 minutes in the north. The southern and central part of the site is within 31-35 minutes of a further education institute while journey times are over 60 minutes in the north of the site. On balance, the overall most accessible part of the sites are southern and central parts. In between these parts of the site, journey times to education facilities vary in between those two extremes Therefore a mixed effect on this objective is expected – potentially minor positive for the north western tip and potentially significant negative for the northern part.</p>
<p>4. Improve the health of local people and ensure that they can access the health and social care they need.</p>	+/--	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Levels of access to healthcare facilities vary throughout this site. The southern and central parts of this site are within 11 - 15 minutes travel time of a GP and the northern part is over 60 minutes travel time. The southern and central parts of the site are 46 – 50 minutes of a hospital and the northern part is in excess of 60 minutes. In between these parts of the site, journey times to healthcare facilities vary in between those two extremes. Therefore a mixed effect on this objective is expected – minor positive for the southern and central parts and significant negative for the northern part. The site is not within or adjacent to an AQMA.</p>
<p>5. Protect local amenity including avoiding noise and light pollution.</p>	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are existing residential properties near the western edge of the site, which may be affected by noise during the construction phase. In addition, there is an industrial site in close proximity. A significant negative effect on this SA objective is therefore likely.</p>
<p>6. Retain and enhance access to local services and facilities.</p>	0/--	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Levels of access to local centres and town/district centres vary throughout this site. The southern and central parts of the site are within 6 - 10 minutes of a local centre and the northern part of the site is over 60 minutes from a local centre. The southern and central part of this site is within 21 - 25 minutes of a town/district centre, whilst the northern part is over 60 minutes from a town/district centre. In between these areas, journey times to local and town/district centres vary in between those two extremes. Overall, a mixed effect is expected, a negligible effect on this objective is expected in southern and central parts and a significant negative for the northern part.</p>
<p>7. Make our communities safer by reducing crime, anti-social behaviour and the fear</p>	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced</p>

SA Objectives	SA Score	Justification
of crime.		by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	There are a number of footpaths and areas of open space within walking distance (600m) of the site which could be used by residents for sports and recreation, including a park and garden, natural and semi-natural greenspace, amenity greenspace, allotments, an area of woodland, an outdoor sports facility and provision for children and young people. However, a footpath does run through the site. Overall, a mixed effect is expected; a significant positive effect due to the number of sport and recreational facilities within close proximity, but a potential significant negative due to the footpath running through the site which may be lost as a result of housing development at this location.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (6.18ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was assessed as being entirely or mainly 'green' for four of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively large site (6.18ha) on mainly greenfield land (part of the central area of the site is located on greenfield land); therefore a minor negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land (the land is classed as Grade 4).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This is a relatively large site (6.18ha) on mainly greenfield land (part of the central area of the site is located on greenfield land); therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in between LCA E6: Fenay Beck Valley Rural Fringes and G9: Fenay Beck Valley & Tributaries, as identified in the 2015 Landscape Character Assessment for Kirklees. LCA E6 is a gently undulating plateau with large blocks of tree and woodland cover found on slopes. It is perceived as a tranquil landscape with a traditional rural feel, although this is impacted upon by the main roads and urban development around Shepley. LCA G9 comprises the main valley of the Fenay Beck River. There are high levels of broadleaved woodland cover. Tranquillity is variable throughout the LCA, with the less developed and more rural tributary valleys being much more tranquil than the main Fenay Beck valley due to the main roads and larger settlements.
13. Conserve and enhance the historic environment,	?	Historic England has rated this site as 'orange' in terms of the Shelley Methodist Church to the south of this area which is a Grade II Listed Building. The loss of this area and its subsequent development could harm elements which contribute to

SA Objectives	SA Score	Justification
heritage assets and their settings.		<p>the significance of this building. The loss of this currently-open area and its subsequent development could harm elements which contribute to the significance of this area.</p> <p>The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 310m from the Gelder Wood Candidate Local Wildlife Site; therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and only the most southerly part of the site is located within Flood Zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on greenfield land; therefore a minor negative effect is likely.</p>

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was assessed as being entirely or mainly 'green' for four of the eight features assessed. Therefore, a minor positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 9: affordable housing, 10: sustainable transport and 19: climate change and also 1: employment and 8: leisure and recreation facilities (as part of a mixed effect). Potential significant negative effects were identified in relation to SA objective 5: amenity, 11: use of land, 12: character, and also 1: employment, 3: education, 4: health, 6: local services and 8: leisure and recreation facilities (as part of a mixed effect). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H459: Land to the west of 55, near bank, Shelley, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++/--	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Levels of access to an employment node vary throughout the site, from 16 - 20 minutes in the south-west and north-east to more than 60 minutes in the north-west, north and south-east. In between these parts of the site, journey times to employment opportunities vary in between those two extremes. Overall a mixed effect is likely, being significant positive for the south-west and north-eastern parts of the site and significant negative for the north-west, north and south-east.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?/--?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects

SA Objectives	SA Score	Justification
		<p>will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Levels of access to education facilities vary throughout this site. In the south-west and north-eastern parts it is 6 - 10 minutes travel time to a primary school, while in the north-west, north and south-east of the site it is over 60 minutes travel time. For secondary schools the journey time is between 6 -10 minutes in the north-east and over 60 minutes in the north-west, north and south-east, whilst the picture is the same for further education facilities. In between these parts of the site, journey times to education facilities vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially minor positive for the south-west and north-eastern parts and potentially significant negative for the north-west, north and south-east.</p>
<p>4. Improve the health of local people and ensure that they can access the health and social care they need.</p>	+/--	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Levels of access to healthcare facilities vary throughout this site. The north-east of this site is within 6 - 10 minutes travel time of a GP and the north-west, north and south-eastern part is over 60 minutes travel time. The south-west and north-eastern parts of the site are 46 – 50 minutes of a hospital and the north-west, north and south-east part are in excess of 60 minutes. In between these parts of the site, journey times to healthcare facilities vary in between those two extremes. Therefore a mixed effect on this objective is expected – minor positive for the south-west and north-eastern parts and significant negative for the north-west, north and south-eastern part. The site is not within or adjacent to an AQMA.</p>
<p>5. Protect local amenity including avoiding noise and light pollution.</p>	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are existing residential properties in close proximity to western edge of the site, which may be affected by noise during the construction phase. In addition, there is an industrial site in close proximity. A significant negative effect on this SA objective is therefore likely.</p>
<p>6. Retain and enhance access to local services and facilities.</p>	+/--	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Levels of access to local centres and town/district centres vary throughout this site. The south-west and north-eastern parts of the site are within 6 - 10 minutes of a local centre and the north-west, north and south-eastern parts are over 60 minutes from a local centre. The north-eastern part of this site is within 5 minutes of a town/district centre, whilst the north-west, north and south-eastern parts are over 60 minutes from a town/district centre. In between these areas, journey times to local and town/district centres vary in between those two extremes. Overall, a mixed effect is expected, a minor positive effect on this objective is expected in north-east and a significant negative for the north-west, north, and</p>

SA Objectives	SA Score	Justification
		south-western parts of the site.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	There are a number of footpaths and areas of open space within walking distance (600m) of the site which could be used by residents for sports and recreation, including a park and garden, natural and semi-natural greenspace, amenity greenspace, allotments, an area of woodland, an outdoor sports facility and provision for children and young people. However, two footpaths run through the site. Overall, a mixed effect is expected, a significant positive effect due to the number of sport and recreational facilities within close proximity of the site, but a potential significant negative may be possible due to the footpaths running through the site given that they may be lost as a result of housing development.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (12.31ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was assessed as being entirely or mainly 'green' for three of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively large site (12.31ha) on mainly greenfield land (a part of the central area of the site is located on brownfield land); therefore a significant negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land (the land is mostly classed as Grade 4).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This is a relatively large site (12.31ha) on mainly greenfield land (a part of the central area of the site is located on brownfield land); therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park.

SA Objectives	SA Score	Justification
		<p>The site lies in between LCA E6: Fenay Beck Valley Rural Fringes and G9: Fenay Beck Valley & Tributaries, as identified in the 2015 Landscape Character Assessment for Kirklees. LCA E6 is a gently undulating plateau with large blocks of tree and woodland cover found on slopes. It is perceived as a tranquil landscape with a traditional rural feel, although this is impacted upon by the main roads and urban development around Shepley. LCA G9 comprises the main valley of the Fenay Beck River. There are high levels of broadleaved woodland cover. Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 9: affordable housing and also 1: employment and 8: leisure and recreation facilities (as part of a mixed effect). Potential significant negative effects were identified in relation to SA objectives 5: Amenity, 11: use of land, and 12: character and also 1: employment, 3: education, 4: health, 6: local services and 8: leisure and recreation facilities (as part of a mixed effect). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H460: Land at Lower Blacup Farm, Ashbourne Way, Cleckheaton, BD19 5HZ

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. This site is largely within 11 – 15 minutes travel time of the nearest employment node, whilst a small portion is within 16 – 20 minutes; therefore a significant positive effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. This site is within 6 - 10 minutes travel time of a primary and 11 – 15 minutes from a secondary school. The site is also within 21 - 25 minutes of a further education institute. A significant positive effect is considered likely.

SA Objectives	SA Score	Justification
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 6-10 minutes travel time of a GP. The site varies for hospitals between 31 – 35 minutes in the south-west to 41 – 45 minutes in the north-east; however, a minor positive effect is likely through the site due to the proximity to a GP. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of residential properties within close proximity to the site which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is within 11-15 minutes travel time of a local centre and of a town/district centre; therefore a minor positive effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	<p>There are a number of areas of open space within walking distance (600m) of the site which could be used by residents for sports and recreation, including a park and garden, natural and semi-natural greenspace, amenity three areas of amenity greenspace, three outdoor sports facilities and four areas of provision for children and young people. However, the site is almost entirely located within an area of natural and semi-natural greenspace. Overall, a mixed effect is expected, a significant positive effect due to the number of sport and recreational facilities within close proximity, but a significant negative effect may be possible due to the natural and semi-natural greenspace which exists within the site and could be lost as a result of housing development at this location.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing.</p>

SA Objectives	SA Score	Justification
		This site is relatively small site (1.04ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (1.04ha) on mainly greenfield land (the southern part of the site has previously been developed); therefore a minor negative effect on this SA objective is likely. The site is based on Urban Land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (1.04ha) on mainly greenfield land (the southern part of the site has previously been developed); therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not located within proximity of the Peak District National Park. The site lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	There are no sites of biodiversity or geodiversity within 1km of the site; therefore development here could have a negligible effect on this SA Objective. As all development may present opportunities to promote habitat connectivity through the provision of green infrastructure etc the effect is recorded as uncertain.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood	-	This site is on greenfield land but is outside of flood zones 2 and 3; therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
risk for existing property and people		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: culture and recreation facilities (as part of a mixed effect) and 19: climate change, and also 10: sustainable transport as part of a mixed effect. Potential significant negative effects were identified in relation to SA objective 8: culture and recreation facilities (as part of a mixed effect). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H461: Land North of Mill Lane, Hunsworth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	+	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. Most of this site is within 21-25 minutes travel time to the nearest employment node (aside from the far western edges which are over 60 minutes travel time); therefore a minor positive effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	The availability of school and college places to serve the growing population will depend in part, on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how

SA Objectives	SA Score	Justification
		<p>accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Most of this site is within 6-10 minutes travel time to a primary school and within 21-25 minutes to a secondary school (aside from the far western edges which are over 60 minutes travel time to both a primary and secondary school); therefore it is likely to have a minor positive effect. It is also within 16-20 minutes of a further education institute.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Most of this site is within 11-15 minutes travel time of a GP and 46-50 minutes of a hospital (aside from the far western edges which are over 60 minutes travel time to both a GP and hospital); therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>Whilst the site is not surrounded by residential properties or other sensitive receptors, there are a number of residential properties to the east of the site, and the residents of these may be affected by noise and light pollution during the construction phase. There are also industrial buildings and activities directly to the north which could cause noise effects over the long term. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	--	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is within 51-55 minutes travel time of a local centre (aside from the far western edges which are over 60 minutes travel time) and within 41-45 minutes of a town/district centre(aside from the far western edges which are over 60 minutes travel time) ; therefore a significant negative effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	--?/++	<p>This site contains a Public Right of Way (PRoW), which could be lost as a result of development. However the site is within 600m of other recreation and leisure facilities including several PRoW, the closest being a Bridleway, immediately adjacent to the site to the south. Other facilities include one park and garden, which contains provision for children and young people and two outdoor sports facilities. Therefore, overall a mixed (significant positive and potential significant negative) effect is therefore identified.</p>

SA Objectives	SA Score	Justification
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (2.31ha); therefore, a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to three of the eight features assessed. Therefore, a minor positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (2.31 ha) on mainly greenfield; therefore a minor negative effect on this SA objective is likely. Most of this site is designated Grade 3 Agricultural Land Quality, although the eastern boundary of the site is located on land designated as urban land quality.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a small site (0.57 ha) mainly on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	The site is adjacent to Hunsworth Great Wood and Little Wood Candidate Local Wildlife Site to the west and within 1km of Cockleshaw Wood Candidate Local Wildlife Site and Hanging Wood Local Wildlife/ Candidate Local Wildlife Site and as such, a significant negative effect is recorded on this SA objective. Given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development the effect is noted to be uncertain.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas	-	This site is on greenfield land and is outside of flood zone 3; therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
and ensure development does not contribute to increased flood risk for existing property and people		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a potential minor negative effect is identified.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site is classed as mainly or entirely 'green' in terms of its access to three of the eight features assessed; therefore a minor positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objective 8: leisure and recreation (this score was given as part of an overall mixed effect) and potential significant negative effects were identified in relation to SA objectives 6: access to services, 8: leisure and recreation (this score was given as part of an overall mixed effect) and 14: biodiversity and geodiversity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H462: POL south of Helme Lane, Meltham, Holmfirth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0/-	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The site is located within variable travel times of the nearest employment node. The west of the site is located within 31-35 minutes travel time of the nearest employment node while the east of the site is located within 41-45 minutes travel time of the nearest employment node. Overall a mixed effect (negligible/minor negative) is expected on this SA objective.
2. Achieve an economy better capable of growth through increasing investment, innovation and	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.

SA Objectives	SA Score	Justification
Entrepreneurship.		
3. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The site is located within variable travel times of the nearest primary school and secondary school. The northern part of the site is located within 6-10 minutes travel time of a primary school while the south eastern part of the site is located within 16-20 minutes travel time of a primary school. The northern part of the site is located within 16-20 minutes travel time of a secondary school while the south eastern part of the site is located within 31-35 minutes travel time of a secondary school. Overall a mixed effect (significant positive/negligible) is expected on this SA objective.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Most of this site is within 6-10 minutes travel time of a GP (a small part of the site to the east is located within 11-15 minutes travel time of a GP). The site is located at variable travel times of the nearest hospital. The western part of the site is located within 46-50 minutes travel time of the nearest hospital while the eastern part of the site is located within 56-60 minutes travel time of the nearest hospital. Overall a minor positive effect is expected on this SA objective. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>Whilst the site is not surrounded by residential properties or other sensitive receptors, there are a number of residential properties to the north west of the site at Helme Lane, and the residents of these may be affected by noise and light pollution during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	0/-	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The site is located within variable travel times of the nearest local centre. The western part of the site is located within 11-15 minutes travel time of the nearest local centre while the south western part of the site is located within 21-25 minutes travel time of the nearest local centre. The majority of the site is located within 6-10 minutes travel time of the nearest town/district centre (a small part of the site to the south east is located within 11-15 minutes travel time of a town/district centre). Overall a mixed effect (negligible/minor negative) is expected on this SA objective.</p>
7. Make our communities safer	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the

SA Objectives	SA Score	Justification
by reducing crime, anti-social behaviour and the fear of crime.		incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	This site contains a Public Right of Way (PRoW), which could be lost as a result of development. However the site is located in close proximity to a number of open spaces which encourage their use by new residents in the area. The site is adjacent to outdoor sports facilities to the south west at Meltham Sports and Community Centre. Allotments are located to the south west of the site within 285m. Also to the south west of the site within 260m by Mean Lane a cemetery is located at Meltham Baptist Chapel. Therefore, overall a mixed (significant positive and potential significant negative) effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (3.23ha); therefore, a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (3.23ha) on greenfield; therefore a minor negative effect on this SA objective is likely. Most of this site is designated Grade 4 Agricultural Land Quality, although the most westerly part of the site is located on Urban Land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a small site (3.23ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies mainly in LCA F5: Holme & Hall Dyke (Holmfirth & Meltham), as identified in the 2015 Landscape Character Assessment for Kirklees. This landscape comprises steep incised valleys associated with the upper parts of River Holme and its tributaries. Mixed semi-natural woodlands are found along the waterways and on the steepest slopes of the valleys. There are contrasting levels of tranquillity throughout the LCA, influenced by proximity to development and roads. Perceptions of tranquillity and remoteness are greatest on the fringes of the National Park.
13. Conserve and enhance the historic environment, heritage	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts as this development of this site would bring development to within 40 metres of the

SA Objectives	SA Score	Justification
assets and their settings.		Grade II Listed Craddin Cottage. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is located within 460m of Folly Dolly Falls, Meltham Local Geological Site to the east and as such, a minor negative effect is recorded on this SA objective. Given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development the effect is noted to be uncertain.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and is outside of flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a potential minor negative effect is identified.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such as the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site is classed as mainly or entirely 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education (this score was given as part of an overall mixed effect), 8: leisure and recreation (this score was given as part of an overall mixed effect), 10: transport and 19: climate change and potential significant negative effects were identified in relation to SA objective 8: leisure (this score was given as part of an overall mixed effect). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H463: Greenwood Farm, Barnsley Road, Upper Cumberworth, Huddersfield

SA Objectives	SA Score	Justification
---------------	----------	---------------

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>The majority of the site is within 11-15 minutes travel time of the nearest employment node; therefore a significant positive effect is expected for this objective.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The site is within 11-15 minutes travel time of the nearest primary school and within 16-20 minutes of the nearest secondary school; therefore a significant positive effect is likely for this objective. The site is also within 16-20 minutes of a further education institute.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The site is within 6-10 minutes travel time of the nearest GP and the majority of the site is within 56-60 minutes from a hospital (with an area in the east over 60 minutes). Therefore a minor positive effect is expected for this objective. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are several existing residential properties within close proximity to the east of the site. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Levels of access to local services and facilities vary throughout the site. The most accessible part of the site is the northern part which is within 6-10 minutes travel time of both the nearest local centre and town/district centre. The least accessible part of the site is the south which is within 11-15 minutes of both the nearest local centre and</p>

SA Objectives	SA Score	Justification
		town/district centre. Overall a minor positive effect is likely for this objective.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	There is a PRoW footpath that runs through the north eastern corner of the site and could be lost or disrupted as a result of housing development. However, there are several PRoW footpaths that run within 280m south of the site and there is another footpath approximately 25m north of the site. Approximately 30m south of the site is an area of semi-natural and natural greenspace. In addition, there is another area of semi-natural and natural greenspace approximately 50m east of the site. To the north of the site within 215m is an area of park and gardens that contain three areas of children's play provision. Also, to the north west of the site are a children's play area, as well as an area of school grounds and playing fields within 350m and an area of park and gardens approximately 365m away. Therefore a mixed significant positive and significant negative effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.12ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mostly or entirely 'green' in terms of its access in seven of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (1.12ha) and is on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land (the land is classed as urban).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (1.12ha) and is on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA G10: River Dearne Valley, as identified in the 2015 Landscape Character Assessment for Kirklees. This LCA comprises relatively broad valleys with a high level of broadleaved woodland cover. The main valley floor is densely settled and has a peri-urban feel, while the tributary sections of the LCA are generally more tranquil and rural

SA Objectives	SA Score	Justification
		and are only crossed by minor roads.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	This site is within 50m of Turpin Hill Local Wildlife Site and approximately 710m away from Lower Jane Well Local Wildlife Site; therefore development here could have a significant negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	The majority of the site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. The majority of the site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mostly or entirely 'green' in terms of its access in seven of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: leisure and recreation (part of a mixed effect), 10: sustainable transport and 19: climate change. Potential significant negative effects were identified in relation to SA objectives 8: leisure and recreation (mixed effect) and 14: biodiversity and geodiversity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H464: Land to the east of New Lane, Hightown

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Most of this site is within 11-15 minutes travel time of the nearest employment node, although the area in the far south western corner and the far northern area of the site are within 16-20 minutes travel time; therefore a significant positive effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however, this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Most of this site is within 11-15 minutes travel time to a primary school (aside from the northern area which is within 6-10 minutes). Approximately half of this site is within 11-15 minutes travel time to a secondary school, while the other half is within 16-20 minutes travel time to a secondary school. Therefore, it is likely to have a significant positive effect. The site is also within 30 minutes travel time to a further education institute.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+/0	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Access to healthcare facilities varies across the site. The most accessible area is within the far north, which is within 6-10 minutes of a GP and 51-55 minutes travel time to a hospital. The least accessible area is in the far south, which is within 11-15 minutes time to a GP and 36-40 minutes travel time to a hospital. Travel times to healthcare facilities vary between these two extremes. Therefore, a mixed effect on this objective is expected – potentially minor positive effect for the far north of the site and potentially negligible for the far south. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is adjacent to the A649 (Halifax Road) to the south which may mean that residents in these parts of the site east which may be affected by noise during the construction phase. There are existing residential properties adjacent to the site to the north, south and east which may be affected by noise during the construction phase. A significant negative effect on this SA objective is therefore likely.</p>

SA Objectives	SA Score	Justification
6. Retain and enhance access to local services and facilities.	+/0	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. Levels of access to local and district/town centres vary throughout the site. The most accessible area is in the north of the site, which is within 11-15 minutes travel time to a local centre and 6-10 minutes travel time to a town/district centre. The least accessible area is within the far south of the site, which is within 16-20 minutes travel time to a local centre and town/district centre. Travel times to district/town centres vary between these two extremes. Therefore, a mixed effect on this objective is expected – potentially minor positive effect for the north of the site and potentially negligible for the far south of the site.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	The site is located within a semi-natural and natural greenspace, which could be lost as a result of development. However, this site is within 600m of more than three recreational and leisure facilities, including several PROWs, one park and garden and two amenity greenspaces. Other areas include two outdoor sports facilities and three areas containing provision for children and young people. However, the outdoor sports facility to the west of the site is located within housing option site H171 and as such could be lost as a result of development. Therefore, overall a mixed (significant positive and potential significant negative) effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (2.8ha); therefore, a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to six of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (2.8ha) on mainly greenfield land; therefore, a minor negative effect on this SA objective is likely. Most of the site is designated as urban land, aside from an area in the north of the site, which is designated as grade 3 agricultural quality.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a small site (2.8 ha) mainly on greenfield land, therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park.

SA Objectives	SA Score	Justification
		The site lies mainly in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	The site is not within close proximity of any designated biodiversity features; Hanging Wood Local Wildlife/ Candidate Local Wildlife Site is the closest of such features but is located approximately 2.4km to the north east and as such, a negligible effect is recorded on this SA objective. Given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development the effect is noted to be uncertain.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is mainly on greenfield land and is outside of flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is mainly on greenfield land; therefore a potential minor negative effect is identified.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site is classed as mainly or entirely 'green' in terms of its access to six of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: leisure and recreation, 10: sustainable transport and 19: climate change and potential significant negative effects were identified in relation to SA objectives 5: amenity and 8: leisure and recreation. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H465

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	+/--	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. Levels of access to employment nodes vary within this site. The southern part of the site is within 26-30 minutes travel time of the nearest employment node; however an area in the north west of the site is within 51-55 minutes travel time of the nearest employment node. In between, journey times vary between these two extremes. A mixed effect is therefore likely – minor positive in the southern part and significant negative in the north western part of the site.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?/-?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.

SA Objectives	SA Score	Justification
		Levels of access to education facilities vary within this site. The southern part of the site is within 6-10 minutes travel time of a primary school; however an area in the north west of the site is within 26-30 minutes of a primary school. Similarly with secondary school access, the northern part of the site is within 21-25 minutes travel time; however an area in the north west of the site is within 41-45 minutes of a secondary school. In between, journey times to schools vary between these two extremes. A mixed effect is therefore likely – potentially minor positive for the most accessible parts of the site (the north and south) and minor negative for the least accessible part of the site in the north west.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+ / 0	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Levels of access to healthcare facilities vary within this site. The southern area of the site is within 5 minutes travel time of a GP and 41-45 minutes of a hospital; however the northern part of the site is within 26-30 minutes travel time of a GP and 56-60 minutes of a hospital. In between, journey times vary between these two extremes. Therefore, a mixed effect is likely - minor positive in the southern area and negligible in the northern area. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is not surrounded by existing residential development; however there are a number of sensitive receptors adjacent to the southern and part of the western site boundaries, which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+ / -	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Levels of access to local and town/district centres vary within this site. The southern part of the site is within 6-10 minutes travel time of a local centre; however the central area is within 26-30 minutes of a local centre. The southern part of the site is within 5 minutes of a town/district centre; however the northern part of the site is within 26-30 minutes of a town/district centre. In between, journey times vary between these extremes. A mixed effect is therefore likely – minor positive in the southern part of this site and minor negative in the least accessible areas to the north and centre of the site.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals

SA Objectives	SA Score	Justification
		for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	The northern part of this site is partially bisected by an existing Public Right of Way, while an official cycle path also runs directly through the site. These features could be lost as a result of housing development within the site. However, the site is also within 600m of a number of areas of open space including an area of semi natural and natural greenspace, approximately 25m to the south of the site, an area of allotments approximately 94m to the south of the site and a public park, approximately 101m and also to the south of the site. A mixed (significant positive and potentially significant negative) effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (5.74ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly 'green' in terms of its access to one of the eight features assessed. Therefore, a minor positive effect is likely.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively large site (5.73ha) on greenfield land; therefore a significant negative effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This is a relatively large site (5.73ha) on greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies in LCA F5: Holme & Hall Dyke (Holmfirth & Meltham), as identified in the 2015 Landscape Character Assessment for Kirklees. This landscape comprises steep incised valleys associated with the upper parts of River Holme and its tributaries. Mixed semi-natural woodlands are found along the waterways and on the steepest slopes of the valleys. There are contrasting levels of tranquillity throughout the LCA, influenced by proximity to development and roads. Perceptions of tranquillity and remoteness are greatest on the fringes of the National Park.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, as the development of this site is unlikely to result in harm to any designated asset. The effect on this SA objective is therefore negligible but uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to	--?	This site is approximately 140m from Folly Dolly Falls Local Geological Site; therefore development here could

SA Objectives	SA Score	Justification
protect and enhance biodiversity and geodiversity.		have a significant negative effect on this SA objective. The site is also approximately 282m from the Honley Wood candidate Local Wildlife Site and 581m from the Hall Hayes Wood Local Wildlife Site.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and the majority is outside of flood zones 2 and 3 (although a tiny area at the southern tip of the site falls in to flood zone 3); therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly 'green' in terms of its access to one of the eight features assessed. Therefore, a minor positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 8: leisure and recreation (part of an overall mixed effect) and 9: housing, and potential significant negative effects were identified in relation to SA objectives 1: employment, 8: leisure and recreation (both were part of an overall mixed effect), 11: land use, 12: landscape and 14: biodiversity and geodiversity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H466: Former White Lee Colliery, Leeds Road, Heckmondwike

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++/0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The eastern part of this site is within 11-15 minutes travel time of the nearest employment node; however the northern part is within 36-40 minutes travel time. In between, journey times vary between these extremes.

SA Objectives	SA Score	Justification
		Therefore a mixed effect on this objective is likely – significant positive in the eastern part of the site and negligible in the northern part.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?/-?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The eastern part of this site is within 11-15 minutes travel time of both a primary school and a secondary school; however the northern part is within 36-40 minutes of both a primary school and a secondary school. In between, journey times vary between these extremes. Therefore a mixed effect on this objective is likely – significant positive in the eastern part of the site and minor negative in the northern part. The majority of the site is also within 30 minutes of a further education institute, which will contribute to the significant positive effect in the eastern part of the site.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	++/-	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The eastern part of this site is within 11-15 minutes travel time of a GP and within 21-25 minutes of a hospital; however the northern part is within 36-40 minutes of both a GP and a hospital. Therefore a mixed effect on this objective is likely – significant positive in the eastern part of the site and minor negative in the northern part. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>Part of the south eastern site boundary is directly adjacent to the A62 (Leeds Road) which may mean that residents in that part of the site are affected by road noise. There are also a number of residential properties, within 100m of the site, to the south east and north east, which may be affected by noise during the construction phase. A significant negative effect on this SA objective is therefore likely.</p>

SA Objectives	SA Score	Justification
6. Retain and enhance access to local services and facilities.	0/--	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The eastern part of this site is within 11-15 minutes travel time of a local centre and within 16-20 minutes of a town/district centre; however the northern part is within 31-35 minutes of a local centre and 41-45 minutes of a town/district centre. In between, journey times vary between these extremes. Therefore a mixed effect on this objective is likely – negligible in the eastern part of the site and significant negative in the northern part.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is within 600m of a number of areas of open space including a public park approximately 119m to the east of the site and an area of amenity greenspace approximately 178m to the south west. In addition there is a Public Right of Way located approximately 286m to the north west. A significant positive effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (2.36ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (2.36ha) on mainly greenfield land (although there are several existing industrial buildings and a residential property on the site); therefore a minor negative effect on this SA objective is likely.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (2.36ha) on mainly greenfield land (although there are several existing industrial buildings and a residential property on the site); therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development.

<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 4: health and 6: services (these were all part of mixed overall effects), and potential significant negative effects were identified in relation to SA objectives 5: amenity, 8: leisure and recreation, 10: sustainable transport and 19: climate change. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H467: Land North of Meadow Park, Kirkheaton, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	-	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>This site is within 41-45 minutes travel time of the nearest employment node; therefore a minor negative effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	<p>The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.</p>
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of this site is within 6-10 minutes travel time of a primary (although an area to the north is within 11-15 minutes travel time) and within 41-45 minutes travel time of a secondary school (although an area to the north is within 36-40 minutes). A minor positive effect is therefore likely on this SA objective.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The majority of this site is within 6-10 minutes travel time of a GP (although a very small area to the north west is within 11-15 minutes travel time) and within 46-50 minutes of a hospital (although an area to the south and north west is within 51-55 minutes travel time); therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p>

SA Objectives	SA Score	Justification
		This site is not surrounded by existing residential development; however there are a number of sensitive receptors adjacent to the southern site boundary, which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of this site is within 6-10 minutes travel time of a local centre (although a small area to the north west is within 11-15 minutes travel time) and within 21-25 minutes of a town/district centre (although a small area to the north east is within 16-20 minutes); therefore a negligible effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is within 600m of a number of areas of open space including a Local Nature Reserve located approximately 121m to the west, and two areas of amenity greenspace (one of which includes a children's playground) located approximately 94m to the south and 320m to the south east of the site. In addition there is a Public Right of Way directly adjacent to the southern site boundary. A significant positive effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (3.27); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to three of the eight features assessed. Therefore, a minor positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (3.27ha) on greenfield land, with a Grade 3 Agricultural Land Classification; therefore a minor negative effect on this SA objective is likely.</p>
12. Protect and enhance the character of Kirklees and the quality	-?	This is a relatively small site (3.27ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development.

SA Objectives	SA Score	Justification
of the landscape and townscape.		<p>The site is not within 500m of the Peak District National Park.</p> <p>The site lies in LCA E7: Emley Moor Northern Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a landscape of gently undulating elevated slopes with abundant woodland cover. The proximity of the urban centres exerts an influence on landscape character with urban fringe land uses evident in many areas.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	<p>Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, as the development of this site is unlikely to result in harm to any designated asset.</p> <p>The effect on this SA objective is therefore negligible but uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	This site is approximately 96m from the Dalton Bank Local Wildlife Site and Local Nature Reserve; therefore development here could have a significant negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on greenfield land; therefore a minor negative effect is likely.</p>
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to three of the eight features assessed. Therefore, a minor positive effect is likely.</p>

SA Objectives	SA Score	Justification
Summary of SA findings: A potential significant positive effect was identified for this site in relation to SA objective 8: leisure, and a potential significant negative effect was identified in relation to SA objective 14: biodiversity. This issue will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H468: Land East of Eastfield Road, Northorpe, Mirfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	+	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>The majority of this site is within 21-25 minutes travel time of the nearest employment node (although an area to the east of the site is within 16-20 minutes); therefore a minor positive effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	<p>The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.</p>
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The whole of this site is within 6-10 minutes travel time of a primary and the majority of the site is within 21-25 minutes travel time of a secondary school (although an area to the west of the site is within 16-20 minutes travel time). A minor positive effect on this SA objective is therefore likely.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	0	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The whole site is within 16-20 minutes travel time of a GP and the majority is within 41-45 minutes of a hospital (although an area to the east of the site is within 36-40 minutes travel time); therefore a negligible effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is not surrounded by existing residential development; however there are a number of sensitive</p>

SA Objectives	SA Score	Justification
		receptors within 100m of the northern and the southern site boundaries, which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is within 6-10 minutes travel time of a local centre (although an area to the east is within 11-15 minutes travel time) and the whole site is within 11-15 minutes of a town/district centre; therefore a minor positive effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is within 600m of a number of areas of open space including a public park located directly adjacent to the north east corner of the site, a recreation ground located approximately 149m to the south east of the site and an area of allotments located approximately 200m to the east of the site. A significant positive effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.4ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (1.4ha) on greenfield land; therefore a minor negative effect on this SA objective is likely.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a relatively small site (1.4ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development.</p> <p>The site is not within 500m of the Peak District National Park.</p>

SA Objectives	SA Score	Justification
		The site lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, as the development of this site is unlikely to result in harm to any designated asset. The effect on this SA objective is therefore negligible but uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 759m from the Lower Spen Wildlife Area, a designated Local Wildlife Site and Local Nature Reserve; therefore development here could have a minor negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 8: leisure and recreation, 10: sustainable transport and 19: climate change. No potential significant negative effects were identified in relation to any of the SA objectives.		

H469: Land East of Eastfield Road, Northorpe, Mirfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	+	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 21-25 minutes travel time of the nearest employment node (although a very small area to the east is within 16-20 minutes travel time); therefore a minor positive effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The majority of this site is within 6-10 minutes travel time of a primary school (although a small area to the north is within 11-15 minutes travel time) and the whole site is within 21-25 minutes of a secondary school. A minor positive effect is therefore likely.
4. Improve the health of local people and ensure that they can access the health and social care they need.	0	The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health. This site is within 16-20 minutes travel time of a GP and within 41-45 minutes of a hospital; therefore a negligible effect is likely. The site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. This site is not surrounded by existing residential development; however there are a number of sensitive receptors within 100m of the eastern and western site boundaries, which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.

		The majority of this site is within 6-10 minutes travel time of a local centre (although an area to the east of the site is within 11-15 minutes) and the whole site is within 11-15 minutes of a town/district centre; therefore a minor positive effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is within 600m of a number of areas of open space including a public park located approximately 64m to the east of the site, a recreation ground located approximately 161m to the south east of the site and an area of allotments located approximately 240m to the east of the site. A significant positive effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.78ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (0.78ha) on mainly greenfield land (although there is an existing building in the north eastern corner of the site); therefore a minor negative effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (0.78ha) on mainly greenfield land (although there is an existing building in the north eastern corner of the site); therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, as

historic environment, heritage assets and their settings.		<p>the development of this site is unlikely to result in harm to any designated asset.</p> <p>The effect on this SA objective is therefore negligible but uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 758m from the Lower Spenningsdale Wildlife Area, a designated Local Wildlife Site and Local Nature Reserve; therefore development here could have a minor negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on mainly greenfield land (although there is an existing building in the north eastern corner of the site); and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on mainly greenfield land (although there is an existing building in the north eastern corner of the site); therefore a minor negative effect is likely.</p>
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to four of the eight features assessed. <p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 8: leisure and recreation, 10: sustainable transport and 19: climate change. No significant negative effects were identified in relation to any of the SA objectives.</p>		

H470: Parkwood Road, Golcar, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities	0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.

SA Objectives	SA Score	Justification
available for local people, and ensure that they are accessible.		The majority of this site is within 36-40 minutes travel time of the nearest employment node (although the southern part of the site is within 31-15 minutes); therefore a negligible effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Approximately half of this site is within 11-15 minutes travel time of a primary school, and the other half (the southern area of the site) is within 6-10 minutes travel time. Levels of access to secondary education vary across this site. The southern part of the site is within 36-40 minutes travel time of a secondary school; however an area in the north east is within 46-50 minutes travel time of a secondary school. In between, journey times to a secondary school vary between these extremes. Despite these variations, a minor positive effect is likely overall as the whole site is within 15 minutes of a primary school.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Approximately half of this site is within 11-15 minutes travel time of a GP, and the other half (the southern area of the site) is within 6-10 minutes travel time. Levels of access to hospital facilities vary across this site. The southern part of the site is within 36-40 minutes travel time; however an area in the north east is within 46-50 minutes. In between, journey times to a hospital vary between these two extremes. Despite these variations, a minor positive effect is likely overall as the whole site is within 15 minutes travel time of a GP. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is almost entirely surrounded by existing residential properties, which may be affected by noise during the construction phase. A significant negative effect on this SA objective is therefore likely.</p>

SA Objectives	SA Score	Justification
6. Retain and enhance access to local services and facilities.	+/0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Approximately half of this site is within 6-10 minutes travel time of a local centre, and the other half (the north eastern part of the site) is within 11-15 minutes travel time. Levels of access to a town/district centre are even more varied across the site. The southern part of the site is within 6-10 minutes travel time of a town/district centre; however an area to the north east is within 16-20 minutes travel time. In between, journey times to a town/district centre vary between these extremes. A mixed effect is therefore likely – minor positive in the southern part of the site and negligible in the north eastern area.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is within 600m of a number of sites that can be used for recreation including an area of open space which includes a children's playground approximately 142m to the north east of the site and a public playing field located approximately 272m to the south east. In addition there is a bridleway located approximately 35m to the north of the site. A significant positive effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (3.6ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (3.6ha) on greenfield land; therefore a minor negative effect on this SA objective is likely.</p>
12. Protect and enhance the character of Kirklees and the quality	-?	This is a relatively small site (3.6ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development.

SA Objectives	SA Score	Justification
of the landscape and townscape.		<p>The site is not within 500m of the Peak District National Park.</p> <p>The site lies in an area classed as 'urban' in the 2015 Landscape Character Assessment for Kirklees.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	<p>Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts as this site adjoins the boundary of the Longwood Edge Conservation Area. The loss of this currently-open area and its subsequent development could harm elements which contribute to the significance of this area.</p> <p>The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	Longwood Edge Quarry Local Geological Site is within approximately 890m to the north; therefore development at this site could have a minor negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on greenfield land; therefore a minor negative effect is likely.</p>
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.</p>

SA Objectives	SA Score	Justification
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 8: leisure and recreation, 10: sustainable transport and 19: climate change. A potential significant negative effect was identified in relation to SA objective 5: amenity. This issue will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H471: Land North of Hall Bower Lane, Hall Bower, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>The majority of this site is within 11-15 minutes travel time of the nearest employment node (although an area to the south is within 16-20 minutes travel time); therefore a significant positive effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	<p>The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.</p>
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of this site is within 5 minutes of a primary school (although an area to the south is within 6-10 minutes) and 6-10 minutes of a secondary school (although an area to the south is within 11-15 minutes). A significant positive effect is therefore likely. The whole site is also within 15 minutes of a further education institute which will contribute to the significant positive effect.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The majority of this site is within 6-10 minutes travel time of a GP (although an area to the north is within 5 minutes) and the whole site is within 31-35 minutes of a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is not surrounded by existing residential development; however there are a number of sensitive</p>

SA Objectives	SA Score	Justification
		receptors directly adjacent to north western and part of the western site boundaries, which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	++	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of this site is within 5 minutes travel time of a local centre (although a small area to the south of the site is within 6-10 minutes) and within 11-15 minutes of a town/district centre (although a small area to the north is within 6-10 minutes travel time); therefore a significant positive effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is within 600m of a number of areas of open space including an area of semi natural and natural greenspace which is directly adjacent to the western site boundary, an area of allotments approximately 130m to the north west of the site and a public playing field approximately 169m to the south west of the site. In addition there is an existing Public Right of Way located approximately 21m to the south east. A significant positive effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.63ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (0.63ha) on greenfield land; therefore a minor negative effect on this SA objective is likely.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a relatively small site (0.63ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development.</p> <p>The site is not within 500m of the Peak District National Park.</p>

SA Objectives	SA Score	Justification
		The site lies in LCA E6: Fenay Beck Valley Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with large blocks of tree and woodland cover found on slopes. It is perceived as a tranquil landscape with a traditional rural feel, although this is impacted upon by the main roads and urban development around Shepley.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	<p>Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on part of the area of open countryside which contributes to the setting of the Scheduled Monument at Castle Hill. The loss of this area and its subsequent development could harm elements which contribute to the significance of this Scheduled Monument.</p> <p>The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 457m from the Park Wood candidate Local Wildlife Site, 726m from the Upper Park Wood Local Nature Reserve and 874m from the Castle Hill Local Nature Reserve. In addition Castel Hill Local Geological Site is located approximately 950m from the site; therefore development here could have a minor negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on greenfield land; therefore a minor negative effect is likely.</p>
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in</p>

SA Objectives	SA Score	Justification
		terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 6: services, 8: leisure and recreation, 10: sustainable transport and 19: climate change. No potential significant negative effects were identified in relation to any of the SA objectives.		

H472: Land at the junction of Lower Denby Lane and Barnsley Road, Denby Dale, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. This site is within 36-40 minutes travel time of the nearest employment node; therefore a negligible effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. This site is within 11-15 minutes travel time of a primary and the majority of the site is within 16-20 minutes of a secondary school (although an area to the south of the site is within 21-25 minutes travel time). A significant positive effect is therefore likely. The site is not within 30 minutes of a further education institute.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health. This site is within 6-10 minutes travel time of a GP, however is more than an hour from a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. This site is not surrounded by existing residential development; however there are a small number of sensitive receptors within 100m of the eastern, southern and western site boundaries, which may be affected by noise

SA Objectives	SA Score	Justification
		during the construction phase. A minor negative effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is within 6-10 minutes travel time of both a local centre and a town/district centre; therefore a minor positive effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is within 600m of an area of semi natural and natural greenspace located approximately 579m to the north west of the site to the western site boundary. In addition there are a number of existing Public Rights of Way within 600m, including one located approximately 40m to the south of the site and one located approximately 199m to the north west. The West Yorkshire Cycle Route is also located approximately 25m to the east of the site. A significant positive effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (2.04ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (2.04ha) on greenfield land; therefore a minor negative effect on this SA objective is likely.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a relatively small site (2.04ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development.</p> <p>The site is not within 500m of the Peak District National Park.</p> <p>The site lies in LCA N2: Cawthron Park and West Barnsley Rolling Wooded Farmland, as identified in the 2015</p>

SA Objectives	SA Score	Justification
		Landscape Character Assessment for Kirklees. This is a landscape of gently undulating and rolling farmland with frequent blocks of mostly deciduous woodland. It is a sparsely settled landscape, with a high level of tranquillity and a traditional rural feel throughout due to the lack of urbanising influences.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	<p>Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on 18, 20 and 22 Lower Denby Lane, Grade II Listed Buildings which lie approximately 60m to the north of the site. The former farmhouse to Tenter House Farm and its adjacent barn 85m to the north of this site are also Grade II Listed. The loss of this area and its subsequent development could harm elements which contribute to the significance of this building.</p> <p>The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	This site is more than 1km from any designated biodiversity sites; therefore development here could have a negligible effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on greenfield land; therefore a minor negative effect is likely.</p>
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five of the eight features assessed. Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: leisure and recreation, 10:		

SA Objectives	SA Score	Justification
sustainable transport and 19: climate change. No potential significant negative effects were identified in relation to any of the SA objectives.		

H473

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>This site is within 31-35 minutes travel time of the nearest employment node (although an area to the west of the site is within 36-40 minutes); therefore a negligible effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	<p>The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.</p>
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of this site is within 6-10 minutes travel time of a primary school (although an area to the west of the site is within 11-15 minutes) and 11-15 minutes of a secondary school (although an area to the south is within 6-10 minutes travel time). A significant positive is therefore likely. The whole site is also within 30 minutes of a further education institute, which will contribute to the significant positive effect.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The majority of the site is within 11-15 minutes travel time of a GP (although an area to the north east is within 6-10 minutes) and within 41-45 minutes of a hospital (although a small area to the north east is within 36-40 minutes travel time); therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is not surrounded by existing residential development; however there are a small number of sensitive receptors within 100m of the eastern site boundary and also an existing residential property located within the site boundary, which may be affected by noise during the construction phase. A minor negative effect on this SA</p>

SA Objectives	SA Score	Justification
		objective is therefore likely.
6. Retain and enhance access to local services and facilities.	0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is within 6-10 minutes travel time of a local centre (although a small area to the west is within 11-15 minutes). Accessibility to a town/district centre varies across the site. An area in the south east is within 11-15 minutes travel time; however a small area in the south west is within 26-30 minutes travel time. In between, journey times vary between these extremes. Despite these variances a negligible effect is likely on this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is within 600m of a number of areas of open space, including three areas of amenity greenspace, located approximately 132m to the north east, 178m to the south and 215m to the east of the site. In addition there is an existing Public Right of Way located directly adjacent to the north and north western site boundaries. A significant positive effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.62ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	+	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (1.62ha) on mainly brownfield land (although nearly half of the site is greenfield); therefore a minor positive effect on this SA objective is likely.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	+?	This site is on mainly brownfield land (although nearly half of the site is greenfield); therefore development here could have a minor positive effect on this SA objective although this is uncertain depending on the design of the development.

SA Objectives	SA Score	Justification
		<p>The site is not within 500m of the Peak District National Park.</p> <p>The site lies in an area classed as 'urban' in the 2015 Landscape Character Assessment for Kirklees.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	<p>Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on 67 and 69 Crossland Hill Road, which are Grade II Listed. The loss of this area and its subsequent development could harm elements which contribute to the significance of these buildings.</p> <p>The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 710m from the Huddersfield Narrow Canal candidate Local Wildlife Site and 812m from the Johnson Wellfield Quarries, a Local Geological Site; therefore development here could have a minor negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	0	This site is on mainly brownfield land (although nearly half of the site is greenfield) and is outside of flood zones 2 and 3; therefore a negligible effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	+?	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on mainly brownfield land (although nearly half of the site is greenfield); therefore a minor positive effect is likely.</p>
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.</p>

SA Objectives	SA Score	Justification
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: leisure and recreation, 10: sustainable transport and 19: climate change. No potential significant negative effects were identified in relation to any of the SA objectives.		

H474: Miry Lane, Thongsbridge, Holmfirth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The site is within 36-40 minutes travel time of the nearest employment node; as such a negligible effect is expected on this SA objective.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The majority of the site is within 6-10 minutes travel time of the nearest primary school (a small part of the site to the west is within 11-15 minutes of the nearest primary school). The site is also within 6-10 minutes travel time of the nearest secondary school. Overall a significant positive effect is expected on this SA objective. The majority of the site is located within 31-35 minutes travel time of the nearest centre for further education.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health. The site is located within 6-10 minutes travel time of a GP. The site is also located within 46-50 minutes travel time from a hospital. Overall a minor positive effect is expected on this SA objective.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. This site is in close proximity to a number of existing residential properties to the south east on Miry Lane. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.

SA Objectives	SA Score	Justification
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The site is located within 6-10 minutes travel time of the nearest local centre. The site is also located within 11-15 minutes of a town/district centre. As such a minor positive effect is expected overall on this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	<p>The site is crossed by a footpath, which could be lost as a result of housing development; therefore a potential significant negative effect is identified. However, the site is also in close proximity to a number of additional open spaces which could be used by residents. The site is adjacent to outdoor sports facilities which are provided to the north west. A semi-natural and natural greenspace is located within 110m to the west of the site. Allotments are located within 130m to the north west. A park is located within 300m of the site to the north east and provision is also made for a children's playground at this location. A mixed (significant positive and potential significant negative) effect is therefore identified.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.44ha); therefore a minor positive effect is likely.</p>
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five out of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (0.44ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is located on Grade 4 Agricultural Land.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a relatively small site (0.44ha) on greenfield land; therefore development here is expected to have a minor negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development.</p> <p>The site is not within close proximity of the Peak District National Park.</p>

SA Objectives	SA Score	Justification
		The site lies in LCA F5: Holme & Hall Dyke (Holmfirth & Meltham), as identified in the 2015 Landscape Character Assessment for Kirklees. This landscape comprises steep incised valleys associated with the upper parts of River Holme and its tributaries. Mixed semi-natural woodlands are found along the waterways and on the steepest slopes of the valleys. There are contrasting levels of tranquillity throughout the LCA, influenced by proximity to development and roads. Perceptions of tranquillity and remoteness are greatest on the fringes of the National Park.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is within 380m of Hagg Wood which has been designated as a Candidate Local Wildlife Site to the north. The relative proximity of the site to this designated biodiversity feature may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is located on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of greenfield land meaning there is likely to be little opportunity to reuse material already onsite; therefore a minor negative effect is likely on this SA objective.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>This site is classed as 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: recreation and leisure (it should be noted that the overall effect recorded for this SA objective was mixed), 10: transport and 19: climate change and potential significant negative effects were identified for this site in relation SA objective 8: recreation and leisure (it should be noted that the overall effect recorded for this SA objective was mixed). These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.</p>		

H475

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>The northern part of the site is located within 16-20 minutes travel time of the nearest employment node. A part of site to the south is located within 6-10 minutes travel time of the nearest employment node. Areas between these two extremes are located at variable travel times from the nearest employment node. As such a significant positive effect is still expected for the entire site on this SA objective.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. 		north west is within 11-15 minutes travel time of the nearest primary school). The majority of the site is also within 11-15 minutes travel time of the nearest secondary school (a small part of the site to the west is located within 16-20 minutes travel of the nearest secondary school). Overall a significant positive effect is expected on this SA objective. The majority of the site is located within 11-15 minutes travel time of the nearest centre for further education (a small part of the site to the west is located within 16-20 minutes travel time of the nearest centre for further education).
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health. The north west part of the site is located within 11-15 minutes travel time of the nearest GP while the southern part of the site is located within 5 minutes travel time of the nearest GP. The majority of the site is also located within 51-55 minutes travel time from a hospital (part of the site to the north west is located 46-50 minutes travel time from a hospital). Overall a minor positive effect is expected on this SA objective.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. This site is in close proximity to a number of existing residential properties to the west on Bromley Bank. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	+/0	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The north western part of the site is within 16-20 minutes travel time of a local centre while the southern part of the site is located within 6-10 minutes travel time of a local centre. The northern part of the site is within 16-20 minutes travel time of a town/district centre while the southern part of the site is within 6-10 minutes travel time of a district centre. Overall a mixed effect (minor positive/negligible) is expected on this SA objective.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their	++	The site is in close proximity to a number of open spaces which could be used by residents. The site is adjacent to a semi-natural and natural greenspace which is located to the west. An amenity greensapce is located within 60m to the west of the site and also provides for a children's playground at this location. A small park is located within 185m to the south east of the site. Outdoor sports facilities are provided within 100m to the south of the site.

SA Objectives	SA Score	Justification
usage.		As such given that the relative close proximity of these open spaces to the site may encourage new residents to make use of them a significant positive effect is expected on this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (4.86ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to seven out of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (4.86ha) on mostly greenfield land (it is noted that a small part of the site to the south has previously been developed); therefore a minor negative effect on this SA objective is likely. The site is located on Grade 4 Agricultural Land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (4.86ha) on mostly greenfield land (it is noted that a small part of the site to the south has previously been developed); therefore development here is expected to have a minor negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development. The site is not within close proximity of the Peak District National Park. The site mainly lies in LCA G10: River Dearne Valley, as identified in the 2015 Landscape Character Assessment for Kirklees. This LCA comprises relatively broad valleys with a high level of broadleaved woodland cover. The main valley floor is densely settled and has a peri-urban feel, while the tributary sections of the LCA are generally more tranquil and rural and are only crossed by minor roads.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	The site is not within close proximity of any designated biodiversity features; Turpin Hill (a Candidate Local Wildlife Site) is the closest of such features but is located 1.04km to the west and as such a negligible effect is recorded on this SA objective. Given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development the effect is noted to be uncertain.

SA Objectives	SA Score	Justification
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is located on mostly greenfield land (it is noted that a small part of the site to the south has previously been developed) and is outside of flood zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of mostly greenfield land (it is noted that a small part of the site to the south has previously been developed) meaning there is likely to be little opportunity to reuse material already onsite; therefore a minor negative effect is likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is classed as 'green' in terms of its access to seven of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: recreation and leisure, 10: transport and 19: climate change. No potential significant negative effects were identified for this site in relation to any of the SA objectives. These issues will need to be considered further in terms of enhancement, which may be achieved through Local Plan policies.		

H476: Land to the west of Slipper Lane, Mirfield Moor

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of the site is within 16-20 minutes travel time of an employment node (a part of the site to the south is

12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	<p>This is a relatively large site (7.83ha) on greenfield land; therefore development here is expected to have a significant negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development.</p>

SA Objectives	SA Score	Justification
		<p>The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is within 840m of Sunny Bank Ponds which has been designated as a Local Wildlife Site and a Local Nature Reserve to the north east. The relative proximity of the site to this designated biodiversity feature may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is located on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>Development at this site would make use of greenfield land meaning there is likely to be little opportunity to reuse material already onsite; therefore a minor negative effect is likely on this SA objective.</p>

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>This site is classed as 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: recreation and leisure, 9: housing, 10: transport and 19: climate change and potential significant negative effects were identified for this site in relation to SA objectives 11: land use and 12: landscape and townscape. These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.</p>		

H477: Chickenley Lane, Chickenley

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>The site is within 16-20 minutes travel time of an employment node. As such a significant positive effect is expected on this SA objective.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The site is within 6-10 minutes travel time of a primary school. The site is also located within 26-30 minutes travel time of a secondary school. Overall a minor positive effect is expected on this SA objective.</p>
4. Improve the health of local	+	The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare

SA Objectives	SA Score	Justification
people and ensure that they can access the health and social care they need.		<p>facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The site is located within 6-10 minutes travel time of the nearest GP. The site is also located within 41-45 minutes travel time of a hospital. Overall a minor positive effect is expected on this SA objective.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is in close proximity to existing properties on all sides: Tolston Street to the north, Deneside to the south, Kingsmead to the east and Hazel crescent to the west. These properties may be affected by noise during the construction phase and a significant negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The site is within 6-10 minutes travel time of a local centre. The site is also located within 16-20 minutes travel time of a town/district centre. Overall a negligible effect is expected on this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	<p>The site is in close proximity to a number of open spaces which could be used by residents. A green corridor is adjacent to the site to the west. A small park is located within 30m also to the west of the site and a children's playground is also provided at this location. Outdoor sports facilities can be access within 400m to the west of the site on the grounds of Chickenley Community School.</p> <p>As such given that the relative close proximity of these open spaces to the site may encourage new residents to make use of them a significant positive effect is expected on this SA objective.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (2.11ha); therefore a minor positive effect is likely.</p>
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five out of the eight features assessed. Therefore, a significant positive effect is likely.</p>

SA Objectives	SA Score	Justification
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (2.11ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is located on mostly Urban Land (the south west corner of the site is located land which is classified as Grade 3 Agricultural Land).</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a relatively small site (2.11ha) on greenfield land; therefore development here is expected to have a minor negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development.</p> <p>The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in an area classed as 'urban' in the 2015 Landscape Character Assessment for Kirklees.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	<p>Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	<p>The site is not within close proximity of any designated biodiversity features; Dogloitch Wood (a Local Wildlife Site) is the closest of such features but is located 1.82km to the north east and as such a negligible effect is recorded on this SA objective. Given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development the effect is noted to be uncertain.</p>
15. Reduce air, water and soil pollution.	0	<p>This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.</p>
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	<p>This site is located on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.</p>
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>Development at this site would make use of greenfield land meaning there is likely to be little opportunity to reuse material already onsite; therefore a minor negative effect is likely on this SA objective.</p>

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. SA Objectives	SA Score	Justification
modes of transport.		of its access to five out of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	+	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (2.47ha) on brownfield land; therefore a minor positive effect on this SA objective is likely. The site is located on Urban Land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	+?	This is a relatively small site (2.47ha) on brownfield land; therefore development here is expected to have a minor positive effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA F4: Colne (Slaithwaite, Marsden), as identified in the 2015 Landscape Character Assessment for Kirklees. This is the deeply incised valley of the River Colne. Woodland cover is found clinging to the steep valley sides and cloughs. There are dense ribbons of urban and industrial development along the valley floors and sides. It is a busy landscape with lots of movement owing to transport corridors and urban development along the valley floor.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is within 440m of Huddersfield Narrow Canal which has been designated as a Candidate Local Wildlife Site to the south. The relative proximity of the site to this designated biodiversity feature may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	0	This site is located on brownfield land and is outside of flood zones 2 and 3; development at this location is unlikely to increase the area of impermeable surfaces in Kirklees and therefore a negligible effect is expected on this SA objective.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	+?	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.

SA Objectives	SA Score	Justification
		Development at this site would make use of brownfield land meaning there is likely to be increased opportunity to reuse material already onsite. A minor positive effect is therefore likely on this SA objective depending on the design of the development.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is classed as 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 8: recreation and leisure, 10: transport and 19: climate change. No potential significant negative effects were identified for this site in relation to any of the SA objectives. These issues will need to be considered further in terms of enhancement, which may be achieved through Local Plan policies.		

H479: Stoney Bank Lane, Thongsbridge

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	-	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of the site is within 41-45 minutes travel time of an employment node (a small part of the site to the north east is within 46-50 minutes travel time of an employment node). As such a minor negative effect is expected on this SA objective.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.

SA Objectives	SA Score	Justification
		The majority of the site is within 16-20 minutes travel time of a primary school (a small part of the site to the south west is located within 11-15 minutes travel time of a primary school). The site is also located within 11-15 minutes travel time of a secondary school. Overall a minor positive effect is expected on this SA objective.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The site is located within 11-15 minutes travel time of the nearest GP. The northern part of the site is located within 46-50 minutes travel time of a hospital while the southern part of the site is located within 56-60 minutes travel time of a hospital. Overall a minor positive effect is expected on this SA objective for the entire site.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is in close proximity to existing properties to the south west on Stoney Bank Road and to the north east on Stoney Bank Lane. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The site is within 11-15 minutes travel time of a local centre. The site is also located within 16-20 minutes travel time of a town/district centre. Overall a negligible effect is expected on this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	<p>The site is in close proximity to a number of open spaces which could be used by residents. Outdoor sports facilities are provided within 25m of the site to the south on Stoney Bank Lane. Further outdoor sports facilities are provided on the grounds of Holmfirth High School which is located to the west within 200m. A semi-natural and natural greenspace is located within 115m also to the west. A small park is located to the north west of the site (which includes provision for a children's playground) within 420m.</p> <p>As such given that the relative close proximity of these open spaces to the site may encourage new residents to make use of them a significant positive effect is expected on this SA objective.</p>
9. Ensure all people are able to live in a decent home	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable

SA Objectives	SA Score	Justification
which meets their needs.		housing. This site is relatively small (0.55ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to three out of the eight features assessed. Therefore, a minor positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (0.55ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is located on Grade 4 Agricultural Land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (0.55ha) on greenfield land; therefore development here is expected to have a minor negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies mainly in LCA F5: Holme & Hall Dyke (Holmfirth & Meltham), as identified in the 2015 Landscape Character Assessment for Kirklees. This landscape comprises steep incised valleys associated with the upper parts of River Holme and its tributaries. Mixed semi-natural woodlands are found along the waterways and on the steepest slopes of the valleys. There are contrasting levels of tranquillity throughout the LCA, influenced by proximity to development and roads. Perceptions of tranquillity and remoteness are greatest on the fringes of the National Park.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is within 705m of Hagg Wood which has been designated as a Candidate Local Wildlife Site to the north west. The relative proximity of the site to this designated biodiversity feature may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not	-	This site is located on greenfield land and is outside of flood zones 2 and 3; development at this location may increase the area of impermeable surfaces in Kirklees and therefore a minor negative effect is expected on this SA objective.

SA Objectives	SA Score	Justification
contribute to increased flood risk for existing property and people.		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of greenfield land meaning there is likely to be little opportunity to reuse material already onsite; therefore a minor negative effect is likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is classed as 'green' in terms of its access to three of the eight features assessed; therefore a minor positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objective 8: recreation and leisure. No potential significant negative effects were identified for this site in relation to any of the SA objectives. These issues will need to be considered further in terms of enhancement, which may be achieved through Local Plan policies.		

H480: Land to the north of Meadow Park, Kirkheaton, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	-	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The whole of this site is within 41-45 minutes travel time of an employment node; therefore a minor negative effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities	+?	The availability of school and college places to serve the growing population will depend in part on whether new places

SA Objectives	SA Score	Justification
are available to all.		are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The majority of this site is within 6-10 minutes travel time of a primary school and 41-45 minutes of a secondary school; therefore a minor positive effect is likely.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	The whole of this site is within 6-10 minutes travel time of a GP and 46-50 minutes from a hospital; therefore a minor positive effect is likely. This site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are several residential properties within 100m north and south of this site which could be exposed to noise and light pollution during construction of the site; therefore a minor negative effect is likely.
6. Retain and enhance access to local services and facilities.	0	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 6-10 minutes travel time of a local centre and 21-25 minutes of a town/district centre. Therefore, a negligible effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is amenity greenspace approximately 110m south of the site. Other recreational facilities and areas of open space include a Local Nature Reserve, semi-natural and natural greenspace, areas for children and young people, outdoor sports facilities and a park and garden. There are also a number of PRow footpaths surrounding the site, one of which is directly adjacent to the south and there is a bridleway and local cycle route to the north. Therefore, a significant positive effect is likely for this SA objective overall.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (1.59ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day.

SA Objectives	SA Score	Justification
encourages people to make use of sustainable and active modes of transport.		In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to three of eight of the features assessed. Therefore, a minor positive effect is likely overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is small (1.59ha) and on greenfield land meaning that there is likely to be a minor negative effect on this objective. The whole of this site is also on grade 3 agricultural land, and this reinforces the negative effect.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This site is small (1.59ha) and on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E7: Emley Moor Northern Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a landscape of gently undulating elevated slopes with abundant woodland cover. The proximity of the urban centres exerts an influence on landscape character with urban fringe land uses evident in many areas.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	There are two biodiversity designations within 1km of this site, including Dalton Bank Local Nature Reserve and approved Local Wildlife Site (approximately 270m to the west) and Sir John Ramsden Canal candidate Local Wildlife Site (approximately 800m north-west). Therefore, a minor negative effect is likely.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to three of eight of the features assessed. Therefore, a minor positive effect is likely overall.
Summary of SA findings: A potential significant positive effect was identified for this site in relation to SA objective 8: recreation and leisure. There were no potential significant negative effects identified for this site.		

H481: Lowdham Leisure, Blackmoorfoot Road, Crosland Hill, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 31-35 minutes travel time of an employment node; therefore a negligible effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The whole of this site is within 6-10 minutes travel time of a primary school and 21-25 minutes of a further education facility, and the majority of the site is within 5 minutes of a secondary school. Therefore a significant positive effect is likely.
4. Improve the health of local people and ensure that they can access the health and	+	The majority of this site is within 11-15 minutes travel time of a GP and 41-45 minutes from a hospital; therefore a minor positive effect is likely. This site is not within or adjacent to an AQMA.

SA Objectives	SA Score	Justification
social care they need.		
5. Protect local amenity including avoiding noise and light pollution.	--	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. This site is directly adjacent to an industrial area (Johnsons Wellfield Quarries) which could result in future residents being exposed to noise pollution over the long term. A significant negative effect is therefore likely. There are also a number of existing residential properties within 100m to the north and west of the site, and these residents could be exposed to noise and light pollution during construction which reinforces the negative effect.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 6-10 minutes travel time of a local centre and 11-15 minutes of a town/district centre. Therefore, a minor positive effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is amenity greenspace directly adjacent to the north of the site. Other recreational facilities and areas of open space include additional amenity greenspace, areas for children and young people, outdoor sports facilities and semi-natural and natural greenspace. There are also a number of PRoW footpaths to the north of the site, and there is a byway to the south. Therefore, a significant positive effect is likely for this SA objective overall.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (3.34ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to six of eight of the features assessed. Therefore, a significant positive effect is likely overall.
11. Secure the efficient and prudent use of land.	+	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is small (3.34ha) and on mostly brownfield land meaning that there is likely to be a minor positive effect on this

SA Objectives	SA Score	Justification
		objective. This site is not in an area of high quality agricultural land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	+?	<p>This site is small (3.34ha) and on mostly brownfield land; therefore development here could have a minor positive effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA E1: Holmfirth-Meltham, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with considerable tree and woodland cover. Although the proximity of the urban centres exerts an influence on landscape character, with urban fringe land uses evident in many areas, there are pockets of relative tranquillity away from the main settlements. There is a strong visual relationship with the moorlands of the National Park.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	There are a number of biodiversity and geodiversity designations within 1km of this site, including Johnsons Wellfield Quarries Local Geological Site (approximately 410m south), Beaumont Park Local Geological Site (approximately 940m east), Delves Wood candidate Local Wildlife Site (approximately 750m south-east) and Huddersfield Narrow Canal candidate Local Wildlife Site (approximately 980m north). Therefore, a minor negative effect is likely for this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	0	This site is on mostly brownfield land and outside flood zone 3; therefore a negligible effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	+?	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on mostly brownfield land therefore a minor positive effect is likely on this SA objective.</p>

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to six of eight of the features assessed. Therefore, a significant positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: recreation and leisure, 10: sustainable transport and 19: climate change. A potential significant negative effect was identified for this site in relation to SA objective 5: amenity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H482: Land to the east of New Lane, Hightown

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. Most of this site is within 16-20 minutes travel time of the nearest employment node, although the area in the south west, which are within 11-15 minutes travel time; therefore a significant positive effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however, this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. Approximately half of this site is within 6-10 minutes travel time to a primary school, while the other half is within 11-15 minutes travel time. Approximately half of this site is within 11-15 minutes travel time to a secondary school, while the other half is within 16-20 minutes travel time to a secondary school. Therefore, it is likely to have a significant positive effect. The site is also within 30 minutes travel time to a further education institute.
4. Improve the health of local	+	The location of housing sites will not affect the number or location of healthcare facilities; however, where healthcare

SA Objectives	SA Score	Justification
people and ensure that they can access the health and social care they need.		facilities are easily accessible from housing sites there will be positive effects on residents' health. Levels of access to local and healthcare vary throughout the site. The whole site is within 6-10 minutes of a GP. However, access to hospitals vary, with the most accessible area is in the south which is within 36-40 minutes, the least accessible area is in the far north of the site, which is within 51-55 travel time. However, the overall a minor positive effect is likely. The site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	--	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are existing residential properties adjacent to the site to the north and south which may be affected by noise during the construction phase. There are also industrial buildings and activities directly to the north which could cause noise effects over the long term. A significant negative effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. Approximately half of the site is within 16-20minutes travel time to a local centre, while the other half is within 11-15 minutes. Approximately half of the site is also within 11-15 minutes travel time to a town/district centre and 6-10 minutes travel time to a town/district centre. Therefore, overall a minor positive effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	The site is located within a semi-natural and natural greenspace, which could be lost as a result of development. However, this site is within 600m of more than three recreational and leisure facilities, including several PROWs, two parks and gardens and two amenity greenspaces. Other areas include three outdoor sports facilities and four areas containing provision for children and young people. However, the outdoor sports facility to the west and north of the site is located within housing option sites H171 and H162 and as such could be lost as a result of development. Therefore, overall a mixed (significant positive and potential significant negative) effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (3.25ha); therefore, a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to six of the eight features assessed. Therefore, a significant positive effect is

SA Objectives	SA Score	Justification
modes of transport.		likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (3.25ha) on mainly greenfield land; therefore, a minor negative effect on this SA objective is likely. Most of the site is designated as grade 3 agricultural quality, although the south-western boundary of the site which is designated as urban.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a small site (3.25 ha) mainly on greenfield land, therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	The site is not within close proximity of any designated biodiversity features; Hanging Wood Local Wildlife/ Candidate Local Wildlife Site is the closest of such features but is located approximately 2.4km to the north east and as such, a negligible effect is recorded on this SA objective. Given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development the effect is noted to be uncertain.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is mainly on greenfield land and is outside of flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is mainly on greenfield land; therefore a potential minor negative effect is identified.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site is classed as mainly or entirely 'green' in terms of its access to six of the eight features assessed; therefore a significant positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: leisure and recreation, 10: sustainable transport and 19: climate change and potential significant negative effects were identified in relation to SA objectives 5: amenity and 8: leisure and recreation. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H483: Land east of Colne Valley High School, Gillroyd Lane, Linthwaite, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	-	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 41-45 minutes travel time of an employment node; therefore a minor negative effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.

SA Objectives	SA Score	Justification
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. Accessibility to education varies across this site. In this way, the western part of the site is within 5 minutes travel time of a primary school, 6-10 minutes of a secondary school and 21-25 minutes of a further education facility, whereas the eastern part of the site is within 11-15 minutes of a primary school and secondary school and 26-30 minutes from a further education facility. Although accessibility to education varies across this site and between these two extremes, overall a significant positive effect is likely for this SA objective.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	The majority of this site is within 11-15 minutes travel time of a GP and the whole site is within 41-45 minutes from a hospital; therefore a minor positive effect is likely. This site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are a number of existing residential properties within 100m north, east and west of this site as well as Linthwaite Ardron Junior and Infant School. These receptors could be exposed to noise and light pollution during the construction of this site, and therefore a minor negative effect is likely.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 11-15 minutes travel time of a local centre and town/district centre. Therefore, a minor positive effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is an outdoor sports facility directly adjacent to the north-west. Other recreational facilities and areas of open space include additional outdoor sports facilities, amenity greenspace, areas for children and young people, semi-natural and natural greenspace cemeteries and allotments. There are also a number of PRow footpaths to the north and east of the site. Therefore, a significant positive effect is likely for this SA objective.

SA Objectives	SA Score	Justification
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (0.79ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to six of eight of the features assessed. Therefore, a significant positive effect is likely overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is small (0.79ha) and on mostly greenfield land meaning that there is likely to be a minor negative effect on this objective. This site is not in an area of high quality agricultural land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This site is small (0.79ha) and on mostly brownfield land; therefore development here could have a minor positive effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA F4: Colne (Slaithwaite, Marsden), as identified in the 2015 Landscape Character Assessment for Kirklees. This is the deeply incised valley of the River Colne. Woodland cover is found clinging to the steep valley sides and cloughs. There are dense ribbons of urban and industrial development along the valley floors and sides. It is a busy landscape with lots of movement owing to transport corridors and urban development along the valley floor.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	There are two biodiversity designations within 1km of this site, including Low Westwood Pond candidate Local Wildlife Site (approximately 790m north-west) and Huddersfield Narrow Canal candidate Local Wildlife Site (approximately 900m north-west). Therefore, a minor negative effect is likely for this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on mostly greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings

SA Objectives	SA Score	Justification
use, recovery and recycling of waste close to source.		and materials although this is uncertain depending on the previous use of the site. This site is on mostly greenfield land therefore a minor negative effect is likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to six of eight of the features assessed. Therefore, a significant positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: recreation and leisure, 10: sustainable transport and 19: climate change. There were no potential significant negative effects identified.		

H484: Woodhead Road, Brockholes, Holmfirth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	+	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The whole of this site is within 26-30 minutes travel time of an employment node; therefore a minor positive effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.

SA Objectives	SA Score	Justification
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Accessibility to education varies across this site. In this way, the north-eastern part of the site is within 5 minutes travel time of a primary school, 6-10 minutes of a secondary school and 21-25 minutes of a further education facility, whereas the western part of the site is within 11-15 minutes of a primary school and secondary school and 26-30 minutes from a further education facility. Although accessibility to education varies across this site and between these two extremes, overall a significant positive effect is likely for this SA objective.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	The whole of this site is within 6-10 minutes travel time of a GP and the majority of the site is within 41-45 minutes from a hospital; therefore a minor positive effect is likely. This site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is directly adjacent to the A6024 (Woodhead Road) and future residents could be exposed to noise pollution over the long term. As a result, a significant negative effect is likely. There is also an industrial building to the north which could also affect future residents in terms of noise. Moreover, there are a number of existing residential properties within 100m to the east and south of the site, and these residents could be exposed to noise and light pollution during construction of the site which reinforces the negative effect.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of this site is within 6-10 minutes travel time of a local centre and 11-15 minutes from a town/district centre. Therefore, a minor positive effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their	++/--?	There is a PRoW footpath runs across the southern part of this site, and it is considered possible that this could be lost of the site is developed. However, there are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is a green corridor directly adjacent to the east of the site. Other recreational facilities and areas of open space include outdoor sports facilities, amenity greenspace, areas for children and young people, semi-natural and natural greenspace cemeteries and parks and gardens. There are also a

SA Objectives	SA Score	Justification
usage.		number of PRow footpaths surrounding the site. Overall, a mixed effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is large (5.4ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to six of eight of the features assessed. Therefore, a significant positive effect is likely overall.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is large (5.4ha) and on greenfield land which is classed as grade 3 agricultural quality; therefore, a significant negative effect is expected on this SA objective.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This site is large (5.4ha) and on greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site mainly lies in LCA G8: Holme River Valley, as identified in the 2015 Landscape Character Assessment for Kirklees. This is the main valley of the River Holme, and it is a densely settled landscape. It is generally low lying and enclosed, with frequent deciduous woodland along watercourses and on the steeper slopes. The site lies mainly in LCA G8: Holme River Valley, as identified in the 2015 Landscape Character Assessment for Kirklees. This is the main valley of the River Holme, and it is a densely settled landscape. It is generally low lying and enclosed, with frequent deciduous woodland along watercourses and on the steeper slopes.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	Hagg Wood candidate Local Wildlife Site is directly adjacent to the south of this site; therefore a significant negative effect is likely.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not	-	This site is on greenfield land and outside flood zone 3 (although the eastern end of the site is adjacent to a flood zone 3 area); therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
contribute to increased flood risk for existing property and people		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to six of eight of the features assessed. <p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: recreation and leisure (part of a mixed effect overall), 9: housing, 10: sustainable transport and 19: climate change. Potential significant negative effects were identified for SA objectives 5: amenity, 8: recreation and leisure (part of a mixed effect overall), 11: use of land (part of a mixed effect overall), 12: character and landscape and 14: biodiversity and geodiversity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H485

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++/0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. Accessibility to employment nodes varies across this site. In this way, the north-western, south-western and south-eastern part of this site is within 11-15 minutes travel time of an employment node, whereas a section of the north-eastern part of the site is within 36-40 minutes of an employment node. In between these two extremes, accessibility to employment nodes varies. Overall, a mixed effect is likely; significant positive for the north-western, south-western and south-eastern parts and negligible for the north-eastern part.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.

SA Objectives	SA Score	Justification
3. Ensure education facilities are available to all.	+?/-?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. Accessibility to education varies across this site. In this way, the south-eastern part of the site is within 11-15 minutes travel time of a primary school, 36-40 minutes of a secondary school and 21-25 minutes of a further education facility, whereas a section at the north-eastern end of the site is within 26-30 minutes of a primary school, 56-60 minutes of a secondary school and 51-55 minutes of a further education facility. In between these two extremes, accessibility to education varies. Overall, a mixed effect is likely for this SA objective; minor positive for the south-western part, and minor negative for the section at the north-eastern end of the site.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+ +/-	Accessibility to healthcare varies across this site. In this way, the south-western and south-eastern parts of the site are within 6-10 minutes travel time from a GP and 16-20 minutes from a hospital, whereas a section at the north-eastern end of the site is within 31-35 minutes from a GP and 36-40 minutes from a hospital. In between these extremes, accessibility to healthcare varies. Overall, a mixed effect is likely; significant positive for the south-western and south-eastern parts, and minor negative for the section at the north-eastern end of the site. This site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	--	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. This site is directly adjacent to the A643 (Lindley Moor Road) and future residents could be exposed to noise pollution over the long term. As a result, a significant negative effect is likely. Moreover, there are a number of existing residential properties within 100m to the west, south and south-east and these residents could be exposed to noise and light pollution during construction of the site which reinforces the negative effect.
6. Retain and enhance access to local services and facilities.	+/--	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. Accessibility to local services varies across this site. In this way, the south-western and south-eastern parts of the site are within 6-10 minutes travel time of a local centre and 11-15 minutes from a town/district centre, whereas a section at the north-eastern end of the site is within 31-35 minutes travel time of a local centre and town/district centre. In between these extremes, accessibility to local services varies. Overall, a mixed effect is likely; minor positive for the south-western and south-eastern parts of the site, and significant negative for the section at the north-eastern end of the site.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance	+ +/--?	There is a PRoW footpath runs across the southern part of this site, and it is considered possible that this could be lost of

SA Objectives	SA Score	Justification
existing and support the provision of new recreation facilities and areas of open space and encourage their usage.		the site is developed. However, there are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which are an outdoor sports facility and area for children and young people directly adjacent to the west of the site. Other recreational facilities and areas of open space include other outdoor sports facilities, semi-natural and natural greenspace, parks and gardens, a cemetery, allotments and amenity greenspace. There are also a number of additional PRoW footpaths surrounding the site. Overall, a mixed effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is large (19.17ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to one of eight of the features assessed. Therefore, a minor positive effect is likely overall.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is large (19.17ha) and on mostly greenfield land; therefore, a significant negative effect is likely. This site is not in an area of quality agricultural land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	<p>This site is large (19.17ha) and on mostly greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park.</p> <p>The site lies mainly in LCA E2: Barkisland-Holywell Green, as identified in the 2015 Landscape Character Assessment for Kirklees. This area comprises steeply rising land with frequent tree and woodland cover. It is an urban fringe landscape. Some areas retain a relative tranquil, rural character despite the proximity of urban development. Increasing urbanisation on the LCA's fringes creates a landscape of transition. The area has an important visual relationship with the National Park.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the 18 th century guide stoop Grade II* Listed Building, and the Grade II Listed Buildings at Haigh Cross on the eastern boundary of this area and the boundary stone outside Peat Ponds Farm at the northern end (the loss of this site and its development could harm elements that contribute to the significance of these assets). The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	Old Lindley Moor Local Geological Site is approximately 225m north-west of the site; therefore a significant negative effect is likely for this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.

SA Objectives	SA Score	Justification
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on mostly greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to one of eight of the features assessed. Therefore, a minor positive effect is likely overall.
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment (part of a mixed effect overall), 3: education (part of a mixed effect overall), 4: health (part of a mixed effect overall), 6: local services (part of a mixed effect overall), 8: recreation and leisure (part of a mixed effect overall) and 9: housing (part of a mixed effect overall). Potential significant negative effects were identified for SA objectives 5: amenity, 6: local services (part of a mixed effect overall), 8: recreation and leisure (part of a mixed effect overall), 11: use of land (part of a mixed effect overall), 12: character and landscape and 14: biodiversity and geodiversity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H486: Land north of Cliffe Lane

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. Most of this site is within 16-20 minutes travel time of the nearest employment node (aside from the far northern area of the site which is within 11-15 minutes travel time); therefore a significant positive effect on this objective is expected.
2. Achieve an economy better capable of growth	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing

SA Objectives	SA Score	Justification
through increasing investment, innovation and Entrepreneurship.		provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	0?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Most of this site is within 16-20 minutes travel time to a primary school (aside from the western boundary which is within 11-15 minutes travel time). This site is also within and within 21-25 minutes to a secondary school; therefore it is likely to have a negligible effect. It is also within 30 minutes of a further education institute.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	0	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Approximately half of this site is within 11-15 minutes travel time of a GP, while the other half is within 16-20 minutes travel time. Whole site is within 36-40 minutes travel time to a hospital; therefore a negligible effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is surrounded by residential properties to the south and north-west and the residents of these may be affected by noise and light pollution during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	0/-	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Levels of access to local and town/district centres, varies throughout the site. The most accessible part of the site is in the south, which is within 6-10 minutes travel time to a local centre and 16-20 minutes of a town/district centre. The least accessible area is in the far northern area of the site, which is within 21-25 minutes travel time to a local centre and 16-20 minutes of a town/district centre. Therefore, a mixed effect is likely- potentially negligible for the south of the site and minor negative for the far northern area of the site.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the

SA Objectives	SA Score	Justification
		effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is within 600m of more than three recreation and leisure facilities including several Public Rights of Way (PRoW). Greenspace designations nearby include, one park and garden, two amenity greenspaces and two semi-natural and natural greenspaces. However, the semi-natural and natural greenspace immediately to the west of the site is within housing option H509 and therefore could be lost as a result of development. Other facilities nearby include two sites containing provision for children and young people, an allotment and two outdoor sports facilities. Therefore, a significant positive effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (1.29 ha); therefore, a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	+	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (1.29 ha) on mainly brownfield; therefore a minor positive effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	+?	This is a small site (1.29ha) mainly on brownfield land; therefore development here could have a minor positive effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies in LCA G11: Batley Fringe Incised Valleys, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a landscape of discrete, small scale tributary valleys with some significant bands of broadleaved riparian woodland. Although mostly undeveloped, there is a strong urban influence, particularly in close proximity to main roads.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for uncertain effects on Lands Farmhouse, Grade II Listed Building which is 165 metres to the east of this site. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	Hunsworth Great Wood and Little Wood Candidate Local Wildlife Site is within 1km north of the site and as such, a minor negative effect is recorded on this SA objective. Given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development the effect is noted to be uncertain.
15. Reduce air, water and	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.

SA Objectives	SA Score	Justification
soil pollution.		
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	0	This site is on brownfield land and although most of the western boundary is within flood 3, this is a small area of the site; therefore a negligible effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	+?	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on brownfield land; therefore a potential positive negative effect is identified.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site is classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 8: leisure and recreation, 10: sustainable transport and 19: climate change. No potential significant negative effects were identified.		

H487: Cumberworth Lane, Denby Dale, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 11-15 minutes of an employment node; therefore a significant positive effect is likely.
2. Achieve an economy better capable of growth through increasing	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA

SA Objectives	SA Score	Justification
investment, innovation and Entrepreneurship.		objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?/?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. Accessibility to education varies across this site. In this way, the far southern part of this site is within 6-10 minutes travel time of a primary school, 11-15 minutes from a secondary school and 11-15 minutes from a further education facility, whereas the central to northern part of the site is within 11-15 minutes travel time of a primary school, 21-25 minutes from a secondary school and 26-0 minutes from a further education facility. In between these two extremes, accessibility to education varies. Overall, a mixed effect is likely for this SA objective; significant positive for the far southern part of the site, and minor positive for the central to northern part.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	The whole of this site is within 6-10 minutes from a GP and the majority of the site is within 56-60 minutes of a hospital. Overall, a minor positive effect is likely. This site is not in or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	--	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. This site is mostly surrounded by existing residential properties, and the residents of these properties could be exposed to noise and light pollution during construction of this site. Therefore, a significant negative effect is likely for this SA objective.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The whole of this site is within 11-15 minutes travel time of a local centre and town/district centre; therefore a minor positive effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	The site contains a PRow which could be disrupted or lost as a result of housing development. However, there are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is an area of semi-natural and natural greenspace approximately 130m south-east of the site. Other recreational facilities and areas of open space include several other semi-natural and natural greenspace areas, outdoor sports facilities, a park and garden, amenity greenspace and areas for children and young people. There are also a number of PRow footpaths to the north, west and south of the site, one of which runs along the western and

SA Objectives	SA Score	Justification
		northern edge of the site. Overall, a significant positive effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (2.79ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to six of eight of the features assessed. Therefore, a significant positive effect is likely overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is small (2.79ha) and on greenfield land; therefore, a minor negative effect is likely. This site is not in an area of quality agricultural land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This site is small (2.79ha) and on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA G10: River Dearne Valley, as identified in the 2015 Landscape Character Assessment for Kirklees. This LCA comprises relatively broad valleys with a high level of broadleaved woodland cover. The main valley floor is densely settled and has a peri-urban feel, while the tributary sections of the LCA are generally more tranquil and rural and are only crossed by minor roads.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	The site is not within 1km of any designated biodiversity or geodiversity sites; therefore a negligible effect on this SA objective is most likely. However, this is uncertain as there may still be effects on non-designated biodiversity, and depending on the design of the development, it may be possible to incorporate biodiversity enhancements.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to six of eight of the features assessed. Therefore, a significant positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education (part of a mixed effect overall), 8: recreation and leisure (part of a mixed effect overall), 10: sustainable transport and 19: climate change. A potential significant negative effect was identified for SA objective 5: amenity and 8: recreation and leisure (part of a mixed effect overall),. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H488: Land south of Back Lane, Clayton West, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The whole of this site is within 6-10 minutes of an employment node; therefore a significant positive effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The whole of this site is within 6-10 minutes travel time from a primary school and 11-15 minutes from a secondary school and further education facility. Therefore, a significant positive effect is likely for this SA objective.

SA Objectives	SA Score	Justification
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	The whole of this site is within 6-10 minutes from a GP and the majority of the site is within 51-55 minutes of a hospital. Overall, a minor positive effect is likely. This site is not in or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are a number of existing residential properties within 100m west and north of this site, and residents of these properties could be exposed to noise and light pollution during construction of the site. Therefore, a minor negative effect is likely for this SA objective.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The whole of this site is within 6-10 minutes travel time of a local centre and town/district centre; therefore a minor positive effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is an area of semi-natural and natural greenspace directly adjacent to the north of the site. Other recreational facilities and areas of open space include outdoor sports facilities, areas for children and young people, allotments, and parks and gardens. There are also a number of PRow footpaths surrounding the site, one of which runs along the western edge of the site. There is also a bridleway runs along the northern edge of the site. Overall, a significant positive effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (0.53ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to seven of eight of the features assessed. Therefore, a significant positive effect is likely overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is small (0.53ha) and on greenfield land which is classed as grade 3 agricultural land; therefore, a minor

SA Objectives	SA Score	Justification
		negative effect is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This site is small (0.53ha) and on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: recreation and leisure, 10: sustainable transport and 19: climate change. There were no potential significant negative effects identified.		

H489: Land at 7 Church Lane, Gomersal, Cleckheaton

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The whole of this site is within 11-15 minutes of an employment node; therefore a significant positive effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The whole of this site is within 5 minutes travel time from a primary school and 11-15 minutes from a further education facility, and the majority of the site is within 6-10 minutes of a secondary school. Therefore, a significant positive effect is likely for this SA objective.
4. Improve the health of local people and ensure that they	+	The whole of this site is within 5 minutes travel time of a GP and within 36-40 minutes of a hospital. Overall, a minor positive effect is likely. This site is not in or adjacent to an AQMA.

SA Objectives	SA Score	Justification
can access the health and social care they need.		
5. Protect local amenity including avoiding noise and light pollution.	--	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. This site is directly adjacent to the A643 (Church Lane), and future residents could be exposed to noise pollution in the long term. Therefore, a significant negative effect is likely. In addition, there are a number of existing residential properties within 100m to the south and west of the site, and Gomersal Middle School is to the north-west. These receptors could be exposed to noise and light pollution during construction, and this reinforces the negative effect.
6. Retain and enhance access to local services and facilities.	++	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The whole of this site is within 5 minutes travel time of a local centre and the majority of the site is within 6-10 minutes of a town/district centre; therefore a significant positive effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is an outdoor sports facility directly adjacent to the north. Other recreational facilities and areas of open space include additional outdoor sports facilities, areas for children and young people, semi-natural and natural greenspace, amenity greenspace and a cemetery. There are also a number of PRoW footpaths to the north, west and south. Overall, a significant positive effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (0.6ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to seven of eight of the features assessed. Therefore, a significant positive effect is likely overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is small (0.6ha) and on mostly greenfield land; therefore, a minor negative effect is likely. The site is not in an area of quality agricultural land.
12. Protect and enhance the	-?	This site is small (0.6ha) and on mostly greenfield land; therefore development here could have a minor negative effect

SA Objectives	SA Score	Justification
character of Kirklees and the quality of the landscape and townscape.		on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site mainly lies in an area classed as 'urban' in the 2015 Landscape Character Assessment for Kirklees.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The only biodiversity designation within 1km of this site is Oakwell Park Local Nature Reserve and approved Local Wildlife Site (approximately 820m north). Therefore, a minor negative effect is likely for this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on mostly greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on mostly greenfield land therefore a minor negative effect is likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to seven of eight of the features assessed. Therefore, a significant positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 6: local services, 8: recreation and leisure, 10: sustainable transport and 19: climate change. A potential significant negative effect was identified for SA objective 5: amenity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H490: Land South-East of Former Roundhill Mill, Cliffe Lane, Gomersal, Cleckheaton

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	+	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 21-25 minutes of an employment node; therefore a minor positive effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?/++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. Accessibility to education varies across this site. In this way, the south-western part of the site is within 11-15 minutes travel time of a primary school, 16-20 minutes from a secondary school and 26-30 minutes from a further education facility, whereas the north-eastern part of the site is within 16-20 minutes travel time of a primary school and secondary school and 36-40 minutes from a further education facility. In between these extremes, accessibility to education varies. Overall, a mixed effect is likely – significant positive for the south-western part of the site and minor positive for the north-eastern part.
4. Improve the health of local people and ensure that they can access the health and social care they need.	0	The majority of this site is within 16-20 minutes travel time of a GP and the whole site is within 46-50 minutes of a hospital. Overall, a negligible effect is likely. This site is not in or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There is an existing residential property within 100m to the north-west of this site, and residents of this property could be exposed to noise and light pollution during construction of the site. A minor negative effect is therefore likely.

SA Objectives	SA Score	Justification
6. Retain and enhance access to local services and facilities.	-	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 21-25 minutes travel time of a local centre and the whole site is within 16-20 minutes of a town/district centre; therefore a minor negative effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is an area of semi-natural and natural greenspace directly adjacent to the south. Other recreational facilities and areas of open space include outdoor sports facilities, an area for children and young people, additional semi-natural and natural greenspace and allotments. There are also a number of PRoW footpaths to the north and west. Overall, a significant positive effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (0.79ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to one of eight of the features assessed. Therefore, a minor positive effect is likely overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is small (0.79ha) and on greenfield land classified as grade 3 agricultural quality; therefore, a minor negative effect is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This site is small (0.79ha) and on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.

SA Objectives	SA Score	Justification
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	The site is not within 1km of any designated biodiversity or geodiversity sites; therefore a negligible effect on this SA objective is most likely. However, this is uncertain as there may still be effects on non-designated biodiversity, and depending on the design of the development, it may be possible to incorporate biodiversity enhancements.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to one of eight of the features assessed. Therefore, a minor positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education (part of a mixed effect overall) and 8: recreation and leisure. There were no potential significant negative effects identified.		

H491: Land North of High Street, Hanging Heaton, Batley

SA Objectives	SA Score	Justification
---------------	----------	---------------

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 11-15 minutes of an employment node; therefore a significant positive effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. people		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to four of eight of the features assessed. Therefore, a significant positive effect is likely overall.
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 8: recreation and leisure, 9: housing, 10: sustainable transport and 19: climate change. Potential significant negative effects were identified for SA objectives 5: amenity, 11: use of land and 12: character and landscape. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H493: Land West of Leeds Road, Soothill, Batley

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++/+	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. Accessibility to employment varies across this site. In this way, the south-eastern part of the site is within 11-15 minutes travel time of an employment node, whereas a section of the north-eastern part of the site is within 21-25 minutes of an employment node. In between these two extremes, accessibility to employment varies. Overall, a mixed effect is likely – significant positive for the south-eastern part of the site and minor positive for the section in the north-eastern part of the site.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.

SA Objectives	SA Score	Justification
3. Ensure education facilities are available to all.	+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. Accessibility to education varies across this site. In this way, the south-eastern part of the site is within 11-15 minutes travel time of a primary school and 21-25 minutes to a secondary school and further education facility, whereas the south-western part of the site is within 6-10 minutes of a primary school and 36-40 minutes of a secondary school and further education facility. Although accessibility to education varies between these two extremes, a minor positive effect is likely overall due to the site's proximity to a primary school.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+/0	Accessibility to healthcare facilities varies across this site. In this way, the northern part of the site is within 11-15 minutes travel time from a GP and 31-35 minutes from a hospital, whereas the south-eastern part of the site is within 16-20 minutes from a GP and 41-45 minutes from a hospital. In between these extremes, accessibility to healthcare facilities varies. Overall, a mixed effect is likely – minor positive for the northern part and negligible for the south-eastern part. The site is not in or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are existing residential properties within 100m north and west of the site, and residents of these properties could be exposed to noise and light pollution during construction of the site. A minor negative effect is therefore likely for this SA objective.
6. Retain and enhance access to local services and facilities.	-	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 21-25 minutes of a local centre and 16-20 minutes from a town/district centre. Therefore, a minor negative effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	A small section of an adjacent PRoW bridleway is within this site, and this section could be lost or disrupted if the site was developed. However, there are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is an outdoor sports facility approximately 80m to the west. Other recreational facilities and areas of open space include other outdoor sports facilities, a park and garden, and semi-natural and natural greenspace. There are also a number of PRoW footpaths and other paths surrounding the site, and one of these PRoW footpaths runs along the southern edge of the site. The remainder of the bridleway which is within the site runs along the eastern edge of the site. Overall, a mixed effect is likely for this SA objective.

SA Objectives	SA Score	Justification
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is large (13.26ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to two of eight of the features assessed. Therefore, a minor positive effect is likely overall.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is large (13.26ha) and on greenfield land. The site is also within an area classed as grade 3 agricultural land; therefore overall a significant negative effect is expected on this SA objective.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This site is large (13.26ha) and on greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	Soothill Wood approved Local Wildlife Site is approximately 230m north-east of the site; therefore a significant negative effect is likely.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings

SA Objectives	SA Score	Justification
use, recovery and recycling of waste close to source.		and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to two of eight of the features assessed. Therefore, a minor positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment (part of a mixed effect overall), 8: recreation and leisure (part of a mixed effect overall) and 9: housing. Potential significant negative effects were identified for SA objectives 8: recreation and leisure (part of a mixed effect overall), 11: use of land, 12: character and landscape and 14: biodiversity and geodiversity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H495: Land east of Colne Valley High School, Gillroyd Lane, Linthwaite, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	-	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 46-50 minutes travel time of an employment node; therefore a minor negative effect is likely for this SA objective.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The majority of this site is within 11-15 minutes of a primary school and secondary school; therefore a significant positive effect is likely.

SA Objectives	SA Score	Justification
4. Improve the health of local people and ensure that they can access the health and social care they need.	+/0	Accessibility to healthcare facilities varies across this site. In this way, the north-western part of the site is within 11-15 minutes of a GP and 41-45 minutes of a hospital whereas the south-eastern part of the site is within 16-20 minutes of a GP and 56-60 minutes of a hospital. In between these two extremes, accessibility to health facilities varies. Overall, a mixed effect is likely – minor positive for the north-western part and negligible for the south-eastern part. The site is not in or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. Colne Valley High School lies within 100m west of this site and there is a farm and a number of existing residential properties to the north. These receptors could be exposed to noise and light pollution during construction of the site, therefore a minor negative effect is likely.
6. Retain and enhance access to local services and facilities.	0	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 11-15 minutes of a local centre, and 16-20 minutes from a town/district centre; therefore a negligible effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is an outdoor sports facility approximately 70m to the east. Other recreational facilities and areas of open space include cemeteries, additional outdoor sports facilities and semi-natural and natural greenspace. There are also a number of PRoW footpaths to the east of the site, and there is a bridleway to the south-east. Overall, a significant positive effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (1.34ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to three of eight of the features assessed. Therefore, a minor positive effect is likely overall.

SA Objectives	SA Score	Justification
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is small (1.34ha) and on greenfield land. Therefore, a minor negative effect is likely. The site is not in an area of quality agricultural land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This site is small (1.34ha) and on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA F4: Colne (Slaithwaite, Marsden), as identified in the 2015 Landscape Character Assessment for Kirklees. This is the deeply incised valley of the River Colne. Woodland cover is found clinging to the steep valley sides and cloughs. There are dense ribbons of urban and industrial development along the valley floors and sides. It is a busy landscape with lots of movement owing to transport corridors and urban development along the valley floor.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	Huddersfield Narrow Canal candidate Local Wildlife Site is the only designation within 1km of this site and is approximately 860m to the north-west. Therefore, a minor negative effect is likely.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to three of eight of the features assessed. Therefore, a minor positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: recreation and leisure, 9: housing, 10: sustainable transport, 11: use of land and 19: climate change. A potential significant negative effect was identified for SA objective 5: amenity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H496: Land east of Colne Valley High School, Gillroyd Lane, Linthwaite, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	-	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 41-45 minutes travel time of an employment node; therefore a minor negative effect is likely for this SA objective.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?/0?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. Accessibility to education varies across this site. In this way, the far north-western part of the site is within 11-15 minutes travel time of a primary school and secondary school and 31-35 minutes from a further education facility, whereas the central part of the site is within 21-25 minutes travel time of a primary school and secondary school and

SA Objectives	SA Score	Justification
		41-45 minutes of a further education facility. Between these two extremes, accessibility to education varies. Overall a mixed effect is likely – significant positive for the north-western part of the site and negligible for the central part.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+/0	Accessibility to healthcare facilities varies across this site. In this way, the north-western part of the site is within 11-15 minutes travel time of a GP and 51-55 minutes of a hospital whereas the south-eastern part of the site is within 21-25 minutes travel time of a GP and 56-60 minutes of a hospital. In between these two extremes, accessibility to health facilities varies. Overall, a mixed effect is likely – minor positive for the north-western part and negligible for the south-eastern part. The site is not in or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. Colne Valley High School lies within 100m west of this site and it is possible that those attending/working at the school could be exposed to noise and light pollution during construction. A minor negative effect is therefore likely for this SA objective.
6. Retain and enhance access to local services and facilities.	+/-	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. Accessibility to local services varies across this site. In this way, the north-western part is within 11-15 minutes travel time of a local centre and town/district centre, whereas the central part is within 21-25 minutes from a local centre and town/district centre. In between these two extremes, accessibility to local services varies. Overall a mixed effect is likely – minor positive for the north-western part and minor negative for the central part.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	A part of a nearby PRoW footpath runs across the southern end of the site and it is possible that this could be lost or disrupted during construction. However, there are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is an outdoor sports facility adjacent to the west. Other recreational facilities and areas of open space include other outdoor sports facilities, amenity greenspace, allotments, parks and gardens and area for children and young people. There are also a number of PRoW footpaths surrounding the site, and there is a bridleway and byway to the east. Overall, a mixed effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (4.59ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day.

SA Objectives	SA Score	Justification
encourages people to make use of sustainable and active modes of transport.		In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to one of eight of the features assessed. Therefore, a minor positive effect is likely overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is relatively small (4.59ha) and on greenfield land. Therefore, a minor negative effect is likely. The site is not in an area of quality agricultural land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This site is relatively small (4.59ha) and on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies mainl in LCA F4: Colne (Slaithwaite, Marsden), as identified in the 2015 Landscape Character Assessment for Kirklees. This is the deeply incised valley of the River Colne. Woodland cover is found clinging to the steep valley sides and cloughs. There are dense ribbons of urban and industrial development along the valley floors and sides. It is a busy landscape with lots of movement owing to transport corridors and urban development along the valley floor.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	Low Westwood Pond candidate Local Wildlife Site is approximately 800m north-west of the site and Huddersfield Narrow Canal candidate Local Wildlife Site is approximately 900m to the north-west. Therefore, a minor negative effect is likely.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to one of eight of the features assessed. Therefore, a minor positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education (part of a mixed effect overall) and 8: recreation and leisure (part of a mixed effect overall). A potential significant negative effect was identified for SA objective 8: part of a mixed effect overall). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H497: Land at Upper Blacup Farm, Halifax Road, Hightown

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. This site is within 11-15 minutes travel time of the nearest employment node; therefore a significant positive effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however, this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. Most of this site is within 11-15 minutes travel time to a primary school, aside from a small area in the south east which is within 6-10 minutes. The whole site is within 11-15 minutes travel time to a secondary school. Therefore, it is likely to have a significant positive effect. The site is also within 30 minutes travel time to a further education institute.
4. Improve the health of local people and ensure that they	+	The location of housing sites will not affect the number or location of healthcare facilities; however, where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.

SA Objectives	SA Score	Justification
can access the health and social care they need.		Most of this site is within 6-10 minutes travel time to a GP, although a small area in the north eastern boundary which is within 11-15 minutes travel time. Most of this site is also within 36-40 minutes travel time to a hospital aside from the far south western area which is within 31-35 minutes travel time to a hospital. However, the overall a minor positive effect is likely. The site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is adjacent to the A649 (Halifax Road) to the south which may mean that residents in these parts of the site east which may be affected by noise during the construction phase. There are existing residential properties adjacent to the site to the east and south of the site which may be affected by noise during the construction phase. There are also industrial buildings and activities directly to the north-east and to the west of the site which could cause noise effects over the long term. A significant negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. Most of the site is within 16-20minutes travel time to a local centre, aside from a small area in the south-western edge of the site, which is within 11-15 minutes travel time. The whole site is also within 11-15 minutes travel time to a town/district centre. Therefore, overall a minor positive effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	The site is located within a semi-natural and natural greenspace, which could be lost as a result of development. However, this site is within 600m of more than three recreational and leisure facilities, including several PROWs, the closest being immediately to the eastern boundary of the site. Open space designations nearby include one park and garden and three amenity greenspaces. Other areas include four outdoor sports facilities and five areas containing provision for children and young people. However, the outdoor sports facility to the south of the site is located within housing option site H198 and as such could be lost as a result of development. Therefore, overall a mixed (significant positive and potential significant negative) effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (0.95ha); therefore, a minor positive effect is likely.
10. Secure an effective and	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of

SA Objectives	SA Score	Justification
safe transport network which encourages people to make use of sustainable and active modes of transport.		transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to six of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (0.95ha) on mainly greenfield land; therefore, a minor negative effect on this SA objective is likely. Most of the site is designated as urban land, aside from the far western corner of the site, which is designated as grade 3 agricultural quality.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a small site (0.95 ha) mainly on greenfield land, therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	The site is not within close proximity of any designated biodiversity features; Hunsworth Great Wood and Little Wood Candidate Local Wildlife Site is the closest of such features but is located approximately 2.5km to the north east and as such, a negligible effect is recorded on this SA objective. Given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development the effect is noted to be uncertain.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is mainly on greenfield land and is outside of flood zones 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.

SA Objectives	SA Score	Justification
		This site is mainly on greenfield land; therefore a potential minor negative effect is identified.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site is classed as mainly or entirely 'green' in terms of its access to six of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: leisure and recreation, 10: sustainable transport and 19: climate change and potential significant negative effects were identified in relation to SA objectives 5: amenity and 8: leisure and recreation. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H498

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The site is within 5 minutes travel time of an employment node. As such a significant positive effect is expected on this SA objective.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The site is within 6-10 minutes travel time of a primary school and within 11-15 minutes travel time of a secondary school. Overall a significant positive effect is expected on this SA objective. The site is within 11-15 minutes travel time

SA Objectives	SA Score	Justification
		of a centre for further education.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The site is located within 6-10 minutes travel time of the nearest GP. The site is also located within 46-50 minutes travel time of a hospital. Overall a minor positive effect is expected on this SA objective.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is in close proximity to existing properties to the east on Pack Horse Close. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The site is within 6-10 minutes travel time of a local centre. The site is also located within 6-10 minutes travel time of a town/district centre. Overall a minor positive effect is expected on this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	<p>The site is on land which has been identified as a semi-natural and natural greenspace, which could be lost as a result of housing development; therefore a potential significant negative effect is identified. Outdoor sports facilities are located within 5m to the south west of the site. A children's playground is located within 95m also to the south west of the site. An allotment is located within 245m also to the south west of the site. The site is located within 390m of a large park which is to the south. A mixed (significant positive and potential significant negative) effect is therefore identified.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.59ha); therefore a minor positive effect is likely.</p>
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to seven out of the eight features assessed. Therefore, a significant positive effect is likely.</p>

SA Objectives	SA Score	Justification
11. Secure the efficient and prudent use of land.	+	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (0.59ha) on brownfield land; therefore a minor positive effect on this SA objective is likely. The site is located on Grade 3 Agricultural Land.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	+?	<p>This is a relatively small site (0.59ha) on brownfield land; therefore development here is expected to have a minor positive effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development.</p> <p>The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA G10: River Dearne Valley, as identified in the 2015 Landscape Character Assessment for Kirklees. This LCA comprises relatively broad valleys with a high level of broadleaved woodland cover. The main valley floor is densely settled and has a peri-urban feel, while the tributary sections of the LCA are generally more tranquil and rural and are only crossed by minor roads.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	<p>Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	<p>The site is within 705m of Cliffe Woods Park Quarry, Clayton West which has been designated as a Local Geological Site to the south west. The relative proximity of the site to this designated biodiversity feature may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.</p>
15. Reduce air, water and soil pollution.	0	<p>This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.</p>
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	0	<p>This site is located on brownfield land and is outside of flood zones 2 and 3; development at this location is unlikely to increase the area of impermeable surfaces in Kirklees and therefore a negligible effect is expected on this SA objective.</p>
17. Increase prevention, re-use, recovery and recycling of waste close to source.	+?	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p>

SA Objectives	SA Score	Justification
		Development at this site would make use of brownfield land meaning there is likely to be increased opportunity to reuse material already onsite. A minor positive effect is therefore likely on this SA objective depending on the design of the development.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is classed as 'green' in terms of its access to seven of the eight features assessed; therefore a significant positive effect is likely.
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: recreation and leisure (although it should be noted that a mixed overall effect was recorded for this SA objective), 10: transport and 19: climate change and potential significant negative effects were identified for this site in relation to SA objective 8 recreation and leisure (although it should be noted that a mixed overall effect was recorded for this SA objective). These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.</p>		

H499: Land to the west of Penistone Road, Fenay Bridge

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of the site is within 11-15 minutes travel time of an employment node (the western part of the site is located within 16-20 minutes of an employment node). As such a significant positive effect is expected on this SA objective.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?/+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects

SA Objectives	SA Score	Justification
		<p>will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of the site is located within 6-10 minutes travel time of a primary school (the western part of the site is located within 11-15 minutes travel time of a primary school). The south eastern part of the site is located within 11-15 minutes travel time of a secondary school while the western edge of the site is located within 21-25 minutes travel time of a secondary school. Areas in between these extremes are located within variable travel times of a secondary school. Overall a mixed effect (significant positive/minor positive) is expected on this SA objective.</p>
<p>4. Improve the health of local people and ensure that they can access the health and social care they need.</p>	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The majority of the site is located within 6-10 minutes of a GP (a small part of the site to the south east is located within 5 minutes travel time of a GP). The western part of the site is located within 41-45 minutes of a hospital while the south eastern part of the site is located within 31-35 minutes of a hospital. Areas between these two extremes are located at variable travel times from a hospital. Overall a minor positive effect is expected on this SA objective for the entire site.</p>
<p>5. Protect local amenity including avoiding noise and light pollution.</p>	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is in close proximity to existing properties to the north east on Penistone Road and to the north on Southfield Road. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.</p>
<p>6. Retain and enhance access to local services and facilities.</p>	+/-0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is within 6-10 minutes travel time of a local centre (a small part of the site to the west is located within 11-15 minutes travel time of a local centre). The south eastern part of the site is located within 6-10 minutes travel time of a town/district centre while the western part of the site is located within 16-20 minutes travel time of a town/district centre. Areas which are between these two extremes are located within variable travel times of a town/district centre. Overall a mixed effect (minor positive/negligible) is expected on this SA objective.</p>
<p>7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.</p>	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>

SA Objectives	SA Score	Justification
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	The site is on land which has been identified as containing a footpath, which could be lost as a result of housing development; therefore a potential significant negative effect is identified. The site is however also within close proximity of open spaces which may be made use of by new residents in the area. A semi-natural and natural greenspace is located to the east of the site within 25m. Further semi-natural and natural greenspace is located within 155m to the north. Fernside Park is located within 350m to the north west of the site. A mixed (significant positive and potential significant negative) effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (3.33ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to seven out of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (3.33ha) on mostly greenfield land (it is noted that the south east corner of the site has previously been developed); therefore a minor negative effect on this SA objective is likely. The site is located on Grade 3 Agricultural Land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (3.33ha) on mostly greenfield land (it is noted that the south east corner of the site has previously been developed); therefore development here is expected to have a minor negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies mainly in LCA E6: Fenay Beck Valley Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with large blocks of tree and woodland cover found on slopes. It is perceived as a tranquil landscape with a traditional rural feel, although this is impacted upon by the main roads and urban development around Shepley.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to uncertain potential impacts which development might have on Fenny Hall which is located to the south west within 350m and is a Grade II* Listed Building. Similarly a number of Grade II Listed Buildings are located around Finthorpe 290m to the west of the site. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to	-?	The site is located within 605m of the Candidate Local Wildlife Site on Wakefield Road, Lepton which is to the north east.

SA Objectives	SA Score	Justification
protect and enhance biodiversity and geodiversity.		Almondbury Common (a Local Wildlife Site) is located within 730m of the site to the south west. The Candidate Local Wildlife Site at Round Wood, Tandem is within 975m to the north of the site. The relative proximity of the site to these designated biodiversity features may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	--	This site is located on mainly greenfield land (it is noted that the south east corner of the site has previously been developed) and a large part to the south east is located within Flood Zones 2 and 3. Development at this location is likely to increase the area of impermeable surfaces in Kirklees as well as increasing the number of properties at high risk of being flooded within the District. As such a significant negative effect is expected on this SA objective.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-?	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of mostly greenfield land (although it is recognised that the south eastern corner of the site has previously been developed) meaning there is likely to be reduced opportunity to reuse materials already onsite. A minor negative effect is therefore likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is classed as 'green' in terms of its access to seven of the eight features assessed; therefore a significant positive effect is likely.
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education (although it should be noted that a mixed overall effect was recorded for this SA objective), 8: recreation and leisure (although it should be noted that a mixed overall effect was recorded for this SA objective), 10: transport and 19: climate change and potential significant negative effects were identified for this site in relation to SA objectives 8: recreation and leisure (although it should be noted that a mixed overall effect was recorded for this SA objective) and 16: flood risk. These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.</p>		

H500: Land West of Leeds Road, Soothill, Batley

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++/--	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>The western part of the site is located more than 60 minutes travel time from the nearest employment node while the eastern part of the site is located within 6-10 minutes travel time of the nearest employment node. Areas of the site between these two extremes are located at variable times from the nearest employment node. Overall a mixed effect (significant positive/significant negative) is expected on this SA objective.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	<p>The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.</p>
3. Ensure education facilities are available to all.	++?/--?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The western part of the site is located more than 60 minutes travel time from the nearest primary school while the eastern part of the site is located within 6-10 minutes travel time of the nearest primary school. The western part of the site is also located more than 60 minutes travel time of the nearest secondary school while the eastern part of the site is located within 11-15 minutes travel time of the nearest secondary school. Areas of the site between these two extremes are located at variable times from the nearest primary and secondary school. Overall a mixed effect (significant positive/significant negative) is expected on this SA objective. The western part of the site is located more than 60 minutes travel time from a centre for further education while the eastern part of the site is located within 16-20 minutes travel time of a centre for further education.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+/--	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The western part of the site is located more than 60 minutes travel time from a GP while the eastern part of the site is located within 11-15 minutes travel time of a GP. The western part of the site is also located more than 60 minutes from a hospital while the eastern part of the site is also located within 36-40 minutes travel time of a hospital. Areas of the site between these two extremes are located at variable times from the nearest GP and hospital. Overall a mixed effect (minor positive/significant negative) is expected on this SA objective.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution</p>

SA Objectives	SA Score	Justification
		<p>affecting residents in the longer term.</p> <p>This site is in close proximity to existing properties to the south on Grange Road and to the east on Leeds Road. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	0/--	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The western part of the site is located more than 60 minutes travel time from a local centre while the eastern part of the site is located within 11-15 minutes travel time of a local centre. The western part of the site is also located more than 60 minutes from a town/district centre while the eastern part of the site is located within 16-20 minutes travel time of a town/district centre. Areas of the site between these two extremes are located at variable times from the nearest local centre and town/district centre. Overall a mixed effect (negligible/significant negative) is expected on this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	<p>The site is in close proximity to a number of open spaces which could be used by residents. Outdoor sports facilities are located to the south within 10m of the site. A small park is also located to the south of the site within 150m which includes provision for two children's playgrounds. A cemetery is located within 410m to the south west at the Parish Church of Saint Paul. Amenity greenspace can be accessed within 300m to the south east of the site at Smallwood Gardens.</p> <p>As such given that the relative close proximity of these open spaces to the site may encourage new residents to make use of them a significant positive effect is expected on this SA objective.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	++	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (10.49ha); therefore a significant positive effect is likely.</p>
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to three out of the eight features assessed. Therefore, a minor positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	--	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p>

SA Objectives	SA Score	Justification
		This is a relatively large site (10.49ha) on greenfield land; therefore a significant negative effect on this SA objective is likely. The site is located on mostly Grade 3 Agricultural Land, with the southern part of the site on land which has been categorised as Urban.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	<p>This is a relatively large site (10.49ha) on greenfield land; therefore development here is expected to have a significant negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development.</p> <p>The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is within 560m of Dunn Wood which has been designated as a Local Wildlife Site to the north east. Soothill Wood is located to the north of the site within 610m and Scargill Wood is located within 730 to the north east of the site. The relative proximity of the site to these designated biodiversity features may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is located on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>Development at this site would make use of greenfield land meaning there are unlikely to be opportunities to reuse</p>

SA Objectives	SA Score	Justification
		materials already onsite. A minor negative effect is therefore likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>This site is classed as 'green' in terms of its access to three of the eight features assessed; therefore a minor positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education (it should be noted that a mixed effect was recorded overall for these two SA objectives), 8: recreation and leisure, and 9: housing and potential significant negative effects were identified for this site in relation to SA objectives 1: employment, 4: health, 6: access to local services (it should be noted that a mixed effect was recorded overall for these three SA objectives), 11: land use and 12: landscape and townscape. These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.</p>		

H501: Land North and East of Ullswater Road, Hanging Heaton

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>The majority of the site is located within 6-10 minutes travel time of an employment node (a small part of the site to the west is located within 11-15 minutes travel time of an employment node). Overall a significant positive effect is expected on this SA objective.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.

SA Objectives	SA Score	Justification
		The majority of the site is located within 5 minutes travel time of the nearest primary school (a small part of the site to the south west is located within 6-10 minutes travel time of the nearest primary school). The site is also located within 21-25 minutes travel time of a secondary school (a small part of the site to the south west is located within 26-30 minutes travel time of a secondary school). Overall a minor positive effect is expected on this SA objective.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The majority of the site is located within 6-10 minutes travel time of a GP (a small part of the site to the south west is located within 11-15 minutes travel time of a GP). The majority of the site is located within 31-35 minutes of a hospital (a small part of the site to the south west is located within 36-40 minutes travel time of a hospital). Overall a minor positive effect is expected on this SA objective.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is in close proximity to existing properties to the south on Ullswater Road and to the north on Commonside and High Street. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The site is located within 16-20 minutes travel time of a local centre. The majority of the site is located within 11-15 minutes travel time of a town/district centre (a small part of the site to the south west is located within 16-20 minutes travel time of a town/district centre). A minor positive effect is expected on this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	The site is on land which includes a number of footpaths, which could be lost as a result of housing development; therefore a potential significant negative effect is identified. However, the site is also in close proximity to a number of additional open spaces which could be used by residents. Outdoor sports facilities are located to the south within 80m of the site at Hanging Heaton Cricket Club. Amenity greenspace can be accessed at Bromey Street which is within 195m to the west of the site. Allotments are located within 280m to the south west of the site on Commonside. A children's playground can be access within 270m to the north of the site on Heaton Green. A mixed (significant positive and potential significant negative) effect is therefore identified.

SA Objectives	SA Score	Justification
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (2.13ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five out of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (2.13ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is located on land which has been categorised as Urban in terms of its Agricultural Land Classification.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (2.13ha) on greenfield land; therefore development here is expected to have a minor negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies mainly in an area classed as 'urban' in the 2015 Landscape Character Assessment for Kirklees.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is located within 700m of the Local Geological Site at Caulms Wood Quarry, Dewsbury which is to the south west. The relative proximity of the site to this designated geodiversity feature may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and	-	This site is located on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.

SA Objectives	SA Score	Justification
people.		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of greenfield land meaning there are unlikely to be opportunities to reuse materials already onsite. A minor negative effect is therefore likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is classed as 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 8: recreation and leisure (it should be noted that a mixed effect was recorded overall for this SA objective), 10: transport and 19: climate change and potential significant negative effects were identified for this site in relation to SA objective 8: recreation and leisure (it should be noted that a mixed effect was recorded overall for this SA objective). These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.		

H502

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of the site is located within 11-15 minutes travel time of an employment node (a small part of the site to the north west is located within 16-20 minutes travel time of an employment node). are available to all.		<p>are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The site is located within 6-10 minutes travel time of the nearest primary school. The site is also located within 6-10 minutes travel time of a secondary school. Overall a significant positive effect is expected on this SA objective. The site is located within 6-10 minutes travel time of a centre for further education.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The majority of the site is located within 6-10 minutes travel time of a GP (a small part of the site to the north west is located within 5 minutes travel time of a GP). The northern part of the site is located within 46-50 minutes travel time of a hospital while the southern part of the site is located within 56-60 minutes travel time of a hospital. Areas in between these two extremes are located at variable travel times from a hospital. Overall a minor positive effect is expected on this SA objective.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is in close proximity to existing properties to the south on Bedale Drive and to the north on Huddersfield Road. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is located within 6-10 minutes travel time of the nearest local centre (a small part of the site to the south is located within 11-15 minutes travel time of the nearest local centre). The majority of the site is located within 6-10 minutes travel time of a town/district centre (a small part of the site to the south is located within 11-15 minutes travel time of a town/district centre). A minor positive effect is expected on this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>

SA Objectives	SA Score	Justification
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	<p>The site is in close proximity to a number of open spaces which could be used by residents. Outdoor sports facilities are located to the west within 60m of the site at Shelley College. Amenity greenspace is accessible on Station Road within 205m to the north east of the site. A cemetery is located within 155m to the east at St Aidan's Church Of England Church.</p> <p>As such given that the relative close proximity of these open spaces to the site may encourage new residents to make use of them a significant positive effect is expected on this SA objective.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (6.65ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to seven out of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	--	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively large site (6.65ha) on greenfield land; therefore a significant negative effect on this SA objective is likely. The site is located on land which has been categorised as Grade 3 Agricultural Land.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	<p>This is a relatively large site (6.65ha) on greenfield land; therefore development here is expected to have a significant negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development.</p> <p>The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA E6: Fenay Beck Valley Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with large blocks of tree and woodland cover found on slopes. It is perceived as a tranquil landscape with a traditional rural feel, although this is impacted upon by the main roads and urban development around Shepley.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is within 750m of Springs Wood which has been identified as a Candidate Local Wildlife Site to the north west. The relative proximity of the site to this designated biodiversity feature may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor

SA Objectives	SA Score	Justification
		negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is located on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of greenfield land meaning there are unlikely to be opportunities to reuse materials already onsite. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is classed as 'green' in terms of its access to seven of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: recreation and leisure, 9: housing, 10: transport and 19: climate change and potential significant negative effects were identified for this site in relation to SA objectives 10: land use and 11: townscape and landscape. These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.		

H503: Land to north and north west of Batley Bulldogs RLFC, Heritage Road, Batley

SA Objectives	SA Score	Justification
1: Increase the number and range of employment	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.

SA Objectives	SA Score	Justification
opportunities available for local people, and ensure that they are accessible.		The site is located within 6-10 minutes travel time of an employment node. Overall a significant positive effect is expected on this SA objective.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of the site is located within 11-15 minutes travel time of the nearest primary school (a small part of the site to the west is located within 6-10 minutes travel time of the nearest primary school). The site is also located within 16-20 minutes travel time of a secondary school. Overall a significant positive effect is expected on this SA objective. The majority of the site is located within 16-20 minutes travel time of a centre for further education (some of the western part of the site is located within 11-15 minutes travel time of a centre for further education).</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+++	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The majority of the site is located within 11-15 minutes travel time of a GP (a small part of the site to the west is located within 6-10 minutes travel time of a GP). The western part of the site is located within 21-25 minutes travel time of a hospital while the eastern part of the site is located within 36-40 minutes travel time of a hospital. Areas in between these two extremes are located at variable travel times from a hospital. Overall a mixed effect (significant positive/minor positive) is expected on this SA objective.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is in close proximity to existing properties to the north on Taylor Street. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.</p>

SA Objectives	SA Score	Justification
6. Retain and enhance access to local services and facilities.	+/0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is located within 11-15 minutes travel time of the nearest local centre (a part of the site to the west is located within 6-10 minutes travel time of the nearest local centre). The western part of the site is located within 5 minutes travel time of a town/district centre while the eastern part of the site is located within 16-20 minutes travel time of a town/district centre. Areas in between these two extremes are located at variable travel times from a town/district centre. A mixed effect (minor positive/negligible) is expected overall on this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	The site is on land which has been identified as an amenity greenspace to the north west and to the south east, which could be lost as a result of housing development; therefore a potential significant negative effect is identified. However, the site is also in close proximity to a number of additional open spaces which could be used by residents. A teenage shelter area is provided adjacent to the site to the south. A semi-natural and natural greenspace is also adjacent to the site to the south east. Also adjacent to the south of the site outdoor sports facilities are provided at Batley Rugby League Club, Hyrstmount Junior School and the cricket ground. Further semi-natural and natural greenspace is provided to the east of the site within 10m. A mixed (significant positive and potential significant negative) effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (3.42ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to six out of the eight features assessed. townscape.		<p>The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in an area classed as 'urban' in the 2015 Landscape Character Assessment for Kirklees.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	The site is not within close proximity of any designated biodiversity features; Morley Spring Wood (a Local Wildlife Site) is the closest of such features but is located 2.11km to the north and as such a negligible effect is recorded on this SA objective. Given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development the effect is noted to be uncertain.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is located on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>Development at this site would make use of greenfield land meaning there are unlikely to be opportunities to reuse materials already onsite. A minor negative effect is therefore likely on this SA objective.</p>

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>This site is classed as 'green' in terms of its access to six of the eight features assessed; therefore a significant positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: recreation and leisure (it should be noted that the overall effect on this SA objective was recorded as mixed), 10: transport and 19: climate change and potential significant negative effects were identified for this site in relation to SA objective 8: recreation and leisure (it should be noted that the overall effect on this SA objective was recorded as mixed). These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.</p>		

H504: Land North and East of Ullswater Road, Hanging Heaton, Batley

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>The site is located within 11-15 minutes travel time of an employment node. Overall a significant positive effect is expected on this SA objective.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?/0?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The western part of the site is located within 5 minutes travel time of a primary school while the eastern part of the site is located within 16-20 minutes travel time of a primary school. The western part of the site is also located within 21-25 minutes travel time of a secondary school while the eastern part of the site is located within 31-35 minutes travel time of</p>

SA Objectives	SA Score	Justification
		a secondary school. Overall a mixed effect (minor positive/negligible) is expected on this SA objective.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The majority of the site is located within 11-15 minutes travel time of a GP (a small part of the site to the east is located within 16-20 minutes travel time of a GP). The majority of the site is located within 36-40 minutes travel time of a hospital (a small part of the site to the west is located within 31-35 minutes travel time of a hospital). Overall a minor positive effect is expected on this SA objective.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is in close proximity to existing properties to the west on Commonsides and to the east on Ullswater Road. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+/-	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is located within 16-20 minutes travel time of the nearest local centre (a part of the site to the south is located within 11-15 minutes travel time of the nearest local centre). The western part of the site is located within 6-10 minutes travel time of a town/district centre while the eastern part of the site is located within 21-25 minutes travel time of a town/district centre. Areas in between these two extremes are located at variable travel times from a town/district centre. A mixed effect (minor positive/minor negative) is expected overall on this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	The site is on land which includes a number of footpaths, which could be lost as a result of housing development; therefore a potential significant negative effect is identified. However, the site is also in close proximity to a number of additional open spaces which could be used by residents. Adjacent to the south of the site allotments are provided on Richmond Road. Amenity greenspace is accessible within 40m to the west of the site on Commonsides. Hanging Heaton Golf Club provides outdoor sports facilities adjacent to the site to the south and south east. A mixed (significant positive and potential significant negative) effect is therefore identified.
9. Ensure all people are able to live in a decent home	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable

SA Objectives	SA Score	Justification
which meets their needs.		housing. This site is relatively large (5.69ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to three out of the eight features assessed. Therefore, a minor positive effect is likely.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively large site (5.69ha) on greenfield land; therefore a significant negative effect on this SA objective is likely. The site is located on land which has been categorised as Urban Land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This is a relatively large site (5.69ha) on greenfield land; therefore development here is expected to have a significant negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in an area classed as 'urban' in the 2015 Landscape Character Assessment for Kirklees.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is within 445m of Caulms Wood Quarry, Dewsbury which has been identified as a Local Geological Site to the south. The relative proximity of the site to this designated biodiversity feature may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is located on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings

SA Objectives	SA Score	Justification
use, recovery and recycling of waste close to source.		and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of greenfield land meaning there are unlikely to be opportunities to reuse materials already onsite. A minor negative effect is therefore likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is classed as 'green' in terms of its access to three of the eight features assessed; therefore a minor positive effect is likely.
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 8: recreation and leisure (it should be noted that the overall effect on this SA objective was recorded as mixed), 9: housing and potential significant negative effects were identified for this site in relation to SA objectives 8: recreation and leisure (it should be noted that the overall effect on this SA objective was recorded as mixed), 11: land use and 12: landscape and townscape. These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.</p>		

H505: Land West of Leeds Road, Soothill

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++/--	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The northern part of the site is located more than 60 minutes travel time from the nearest employment node while the southern part of the site is located within 11-15 minutes travel time of the nearest employment node. Areas in between these two extremes are located at variable travel times from the nearest employment node. Overall a mixed effect (significant positive/significant negative) is expected on this SA objective.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities	+?/--?	The availability of school and college places to serve the growing population will depend in part on whether new places

SA Objectives	SA Score	Justification
are available to all.		<p>are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The western part of the site is located more than 60 minutes travel time from a primary school while the north western corner of the site is located within 6-10 minutes travel time of a primary school. The western part of the site is also located more than 60 minutes travel time of a secondary school while the southern part of the site is located within 26-30 minutes travel time of a secondary school. Areas in between these two extremes are located at variable travel times from the nearest primary and secondary school. Overall a mixed effect (minor positive/significant negative) is expected on this SA objective.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	0/--	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The western part of the site is located more than 60 minutes travel time from a GP while the southern part of the site is located within 16-20 minutes travel time of a GP. The western part of the site also is located more than 60 minutes travel time from a hospital while the southern part of the site is located within 41-45 minutes travel time of a hospital. Overall a mixed effect (negligible/significant negative) is expected on this SA objective.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is in adjacent to an industrial/warehouse unit to the south west on Challenge Way. Given that siting residential development at this location may result in noise pollution affecting residents in the longer term a significant negative impact on this SA objective is expected.</p>
6. Retain and enhance access to local services and facilities.	0/--	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The western part of the site is located more than 60 minutes travel time from a local centre while the south eastern part of the site is located within 11-15 minutes travel time of a local centre. Areas in between these two extremes are located at variable travel times from a local centre and town/district centre. A mixed effect (negligible/significant negative) is expected overall on this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced</p>

SA Objectives	SA Score	Justification
of crime.		by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	<p>The site is in close proximity to a number of open spaces which could be used by residents. Outdoor sports facilities are located to the north west within 65m of the site at Lydgate Junior and Infant School. Further outdoor sports facilities are accessible within 175m to the south east on Leeds Road. A cemetery is accessible with 410m to the south of the site at Parish Church of Saint Paul.</p> <p>As such given that the relative close proximity of these open spaces to the site may encourage new residents to make use of them a significant positive effect is expected on this SA objective.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (10.29ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	--	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was not classed as 'green' in terms of its access to any of the eight features assessed. Therefore, a significant negative effect is likely.</p>
11. Secure the efficient and prudent use of land.	--	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively large site (10.29ha) on greenfield land; therefore a significant negative effect on this SA objective is likely. The site is located on Grade 3 Agricultural Land.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	<p>This is a relatively large site (10.29ha) on greenfield land; therefore development here is expected to have a significant negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development.</p> <p>The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.

SA Objectives	SA Score	Justification
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is within 700m of Soothill Wood which has been identified as a Local Wildlife Site to the north east. Dunn Wood (a Local Wildlife Site) is within 910m to the north east of the site and Scargill Wood (another Local Wildlife Site) is within 975m also to the north east of the site. The relative proximity of the site to this designated biodiversity feature may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is located on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of greenfield land meaning there are unlikely to be opportunities to reuse materials already onsite. A minor negative effect is therefore likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	--	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. <p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment (it should be noted that the overall effect on this SA objective was recorded as mixed), 8: recreation and leisure and 9: housing and potential significant negative effects were identified for this site in relation to SA objectives 1: employment, 3: education, 4: health (it should be noted that the overall effect on these three SA objectives were recorded as mixed), 5: amenity, 6: access to local services (it should be noted that the overall effect on this SA objective was recorded as mixed), 10: transport, 11: land use, 12: landscape and townscape and 19: climate change. These issues will need to be considered further in terms of enhancement and/or mitigation, which may be</p>		

SA Objectives	SA Score	Justification
achieved through Local Plan policies.		

H506: Carters Farm, Hollins Lane, Slaithwaite

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	-	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>The majority of the site is located within 41-45 minutes travel time of the nearest employment node (the southern and north eastern corners of the site are located within 46-50 minutes travel time of the nearest employment node). A minor negative effect is expected on this SA objective.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of the site is located within 6-10 minutes travel time of the nearest primary school (the southern and north eastern corners of the site are located within 11-15 minutes travel time of the nearest primary school). The majority of the site is located within 16-20 minutes travel time of the nearest secondary school (the southern western corner of the site is located within 11-15 minutes travel time of the nearest secondary school). Overall a significant positive effect is expected on this SA objective. The site is located at variable travel times from the nearest centre for further education. The western part of the site is located within 26-30 minutes travel time of the nearest centre for further education while the eastern part of the site is located within 41-45 minutes travel time of the nearest centre for further education.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The majority of the site is located within 6-10 minutes travel time of the nearest GP (the southern and north eastern corners of the site are located within 11-15 minutes travel time of the nearest GP). The site is located at variable travel times from the nearest hospital. The western part of the site is located within 46-50 minutes travel time of the nearest hospital while the southern eastern part of the site is located within 56-60 minutes of the nearest hospital. Areas between these extremes are located at varying times from a hospital. Overall a minor positive effect is expected on this SA objective for the entire site.</p>

SA Objectives	SA Score	Justification
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is in adjacent to the A62 to the west. Given that siting residential development at this location may result in noise pollution affecting residents in the longer term a significant negative impact on this SA objective is expected.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The western part of the site is located within 6-10 minutes travel time of a local centre while the south eastern and north eastern corners of the site are located within 21-25 minutes travel time of a local centre. The majority of the site is located within 11-15 minutes travel time of a town/district centre (a small part of the site to the west is located within 6-10 minutes travel time of a town/district centre). A minor positive effect is expected overall on this SA objective for the entire site.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	The site is on land which includes a number of footpaths, which could be lost as a result of housing development; therefore a potential significant negative effect is identified. However, the site is also in close proximity to a number of additional open spaces which could be used by residents. A semi-natural and natural greenspace is provided within 220m to the north east of the site. Amenity greenspace is provided within 300m also to the north east of the site on Springfield Avenue. A children's playground is also provided at this location. Nields Primary and Nursery School provides outdoor sports facilities to the north east of the site within 480m. A mixed (significant positive and potential significant negative) effect overall is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (3.79ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.

SA Objectives	SA Score	Justification
		This is a relatively small site (3.79ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is located on Grade 4 Agricultural Land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a relatively small site (3.79ha) on greenfield land; therefore development here is expected to have a minor negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development.</p> <p>The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA F4: Colne (Slaithwaite, Marsden), as identified in the 2015 Landscape Character Assessment for Kirklees. This is the deeply incised valley of the River Colne. Woodland cover is found clinging to the steep valley sides and cloughs. There are dense ribbons of urban and industrial development along the valley floors and sides. It is a busy landscape with lots of movement owing to transport corridors and urban development along the valley floor.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	<p>Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the Grade II Listed Buildings Lingards Mission Church and Hill Top and its adjacent barn. The allocation of this site would bring development to within 25 metres of these buildings.</p> <p>The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	The site is not within close proximity of any designated biodiversity features; Drop Clough (a Local Wildlife Site) is the closest of such features but is located 1.39km to the south west and as such a negligible effect is recorded on this SA objective. Given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development the effect is noted to be uncertain.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is located on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>Development at this site would make use of greenfield land meaning there are unlikely to be opportunities to reuse materials already onsite. A minor negative effect is therefore likely on this SA objective.</p>

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>This site is classed as 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: recreation and leisure (it should be noted that the overall effect on this SA objective was recorded as mixed), 10: transport and 19: climate change and potential significant negative effects were identified for this site in relation to SA objectives 5: amenity and 8: recreation and leisure (it should be noted that the overall effect on this SA objective was recorded as mixed). These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.</p>		

H507: Southern Varley Road, Slaithwaite

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	-	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>The majority of the site is located within 41-45 minutes travel time of the nearest employment node (the southern part of the site is located within 46-50 minutes travel time of the nearest employment node). A minor negative effect is expected on this SA objective.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The site is located within 6-10 minutes travel time of the nearest primary school. The majority of the site is located within 16-20 minutes travel time of the nearest secondary school (a small part of the site to the south west is located</p>

SA Objectives	SA Score	Justification
		within 21-25 minutes travel time of the nearest secondary school). A significant positive effect is expected on this SA objective. The majority of the site is located within 31-35 minutes travel time of the nearest centre for further education (the northern part of the site is located within 26-30 minutes travel time of the nearest centre for further education).
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The site is located within 6-10 minutes travel time of the nearest GP. The majority of the site is located within 51-55 minutes travel time of the nearest hospital (the northern part of the site is located within 46-50 minute travel time of the nearest hospital). Overall a minor positive effect is expected on this SA objective..</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is adjacent to Varley Road and a number of existing properties are already located here. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The site is located within 11-15 minutes travel time of a local centre. The majority of the site is located within 6-10 minutes travel time of a town/district centre (the northern part of the site is located within 5 minutes travel time of a town/district centre). A minor positive effect is expected overall on this SA objective for the entire site.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	<p>The site is in close proximity to a number of open spaces which could be used by residents. Outdoor sports facilities are located to the east within 10m of the site at Hollins Glen. A semi-natural and natural greenspace is located within 25m to the north of the site. A cemetery is located within 35m to the north east of the site.</p> <p>As such given that the relative close proximity of these open spaces to the site may encourage new residents to make use of them a significant positive effect is expected on this SA objective.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.9ha); therefore a minor positive effect is likely.
10. Secure an effective and	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of

SA Objectives	SA Score	Justification
safe transport network which encourages people to make use of sustainable and active modes of transport.		transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (0.9ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is located on mostly Urban Land (a small part of the site to the south east has been categorised as Grade 4 Agricultural Land).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (0.9ha) on greenfield land; therefore development here is expected to have a minor negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA F4: Colne (Slaithwaite, Marsden), as identified in the 2015 Landscape Character Assessment for Kirklees. This is the deeply incised valley of the River Colne. Woodland cover is found clinging to the steep valley sides and cloughs. There are dense ribbons of urban and industrial development along the valley floors and sides. It is a busy landscape with lots of movement owing to transport corridors and urban development along the valley floor.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is within 425m of Huddersfield Narrow Canal which has been identified as a Candidate Local Wildlife Site to the north west. The relative proximity of the site to this designated biodiversity feature may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and	-	This site is located on greenfield land and is mostly outside of Flood Zones 2 and 3 (a very small part of the eastern edge of the site falls within Flood Zone 3); therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.

SA Objectives	SA Score	Justification
people.		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of greenfield land meaning there are unlikely to be opportunities to reuse materials already onsite. A minor negative effect is therefore likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is classed as 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: recreation and leisure, 10: transport and 19: climate change. No potential significant negative effects were identified for this site for any of the SA objectives. These issues will need to be considered further in terms of enhancement, which may be achieved through Local Plan policies.		

H508

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of the site is located within 16-20 minutes travel time of the nearest employment node (the southern part of the site is located within 11-15 minutes travel time of the nearest employment node). A significant positive effect is expected on this SA objective.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how

SA Objectives	SA Score	Justification
		<p>accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of the site is located within 6-10 minutes travel time of the nearest primary school (a small part of the site to the east is located within 5 minutes travel time of the nearest primary school). The northern part of the site is located within 11-15 minutes travel time of the nearest secondary school while the southern part of the site is located within 5 minutes travel time of the nearest secondary school. Areas between these two extremes are located within variable travel times of the nearest secondary school. Overall a significant positive effect is expected on this SA objective for all areas of the site. The site is located within variable travel times of the nearest centre for further education. The northern part of the site is located within 31-35 minutes travel time of the nearest centre for further education while the southern part of the site is located within 16-20 minutes travel time of the nearest centre for further education.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+ / 0	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The northern part of the site is located within 16-20 minutes travel time of the nearest GP while the southern part of the site is located within 6-10 minutes travel time of the nearest GP. The northern part of the site is also located within 56-60 minutes travel time of the nearest hospital and within 41-45 minutes travel time of the nearest hospital. Areas between these extremes are located at variable travel times from a GP or hospital. Overall a mixed effect (minor positive/negligible) is expected on this SA objective.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is in adjacent to the M606 to the west. Given that siting residential development at this location may result in noise pollution affecting residents in the longer term a significant negative impact on this SA objective is expected.</p>
6. Retain and enhance access to local services and facilities.	+ / 0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is located within 6-10 minutes travel time of a local centre (the northern part of the site is located within 11-15 minutes travel time of a local centre). The north part of the site is located within 16-20 minutes travel time of a town/district centre while the southern part of the site is located within 6-10 minute travel time of a town/district centre. Areas between these two extremes are located at variable travel times from a town/district centre. A mixed effect (minor positive/negligible) is expected overall for this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced</p>

SA Objectives	SA Score	Justification
of crime.		by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	The site is on land which has a number of footpaths running through it, which could be lost as a result of housing development; therefore a potential significant negative effect is identified. However, the site is also in close proximity to a number of additional open spaces which could be used by residents. Whitechapel Primary School provides outdoor sports facilities adjacent to the site to the north east. A cemetery is located adjacent to the site to the south at Whitechapel Church. Whitcliffe Mount Sports Centre provides further outdoor sports facilities to the south of the site within 15m. West End Park is located to the south east of the site within 355m. A mixed (significant positive and potential significant negative) effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (4.44ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (4.44ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is located on mostly Grade 3 Agricultural Land (a small part of the site to the south has been categorised as Urban Land).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (4.44ha) on greenfield land; therefore development here is expected to have a minor negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies mainly in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the Grade II Listed Building Whitechapel Church which is to the south of the site. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.

SA Objectives	SA Score	Justification
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is within 990m of Hanging Wood which has been identified as a Candidate Local Wildlife Site to the north. The relative proximity of the site to this designated biodiversity feature may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is located on greenfield land and is not within Flood Zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of greenfield land meaning there are unlikely to be opportunities to reuse materials already onsite. A minor negative effect is therefore likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is classed as 'green' in terms of its access to seven of the eight features assessed; therefore a significant positive effect is likely.
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: recreation and leisure (it should be noted that an overall mixed effect was recorded for this SA objective), 10: transport and 19: climate change and potential significant negative effects were identified for this site in relation to SA objectives 5: amenity and 8: recreation and leisure (it should be noted that the overall effect on this SA objective was recorded as mixed). These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.</p>		

H509: Land north of Cliffe Lane

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Approximately half of this site is within 11-15 minutes travel time of the nearest employment node while the other half is within 16-20 minutes travel time; therefore a significant positive effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?/+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Levels of access to education facilities vary throughout the site. The most accessible area is in the lower western area of the site, which is within 11-15 minutes travel times to a primary school and secondary school. The least accessible area is in the far north eastern edge, which is within 11-15 minutes travel time to a primary school and 21-25 minutes travel time to a secondary school. Travel times to education facilities vary in between these two extremes. . Therefore, overall, a mixed effect is expected- significant positive for the lower western area of the site and minor positive effect for the north eastern edge. It is also within 30 minutes of a further education institute.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 11-15 minutes travel time of a GP. Most of this site is also within 36-40 minutes of a hospital (aside from the western area of the site which is within 31-35 minutes travel time); therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is surrounded by residential properties along the northern, eastern and western boundaries and the residents of these may be affected by noise and light pollution during the construction phase. There are also industrial buildings and activities directly to the south which could cause noise effects over the long term A significant negative effect on this SA objective is therefore likely.</p>

SA Objectives	SA Score	Justification
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is within 6-10 minutes travel time of a local centre and within 11-15 minutes of a town/district centre (aside from a far north eastern edge, which is within 16-20 minutes travel time to a town/district centre); therefore a minor positive effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	--?/++	<p>This site contains a semi-natural and natural greenspace which could be lost as a result of development. However, the site is within 600m of more than three other recreation and leisure facilities including two other semi-natural and natural greenspace, one park and garden and two amenity greenspaces. There are also several PRoW although some of these are contained within housing site options and therefore could be lost as a result of this development. Other facilities nearby include two sites containing provision for children and young people and two outdoor sports facilities. Therefore, overall a mixed (significant positive and potential significant negative) effect is therefore identified.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (0.62 ha); therefore, a minor positive effect is likely.</p>
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (0.62 ha) on mainly greenfield; therefore a minor negative effect on this SA objective is likely. The land is designated as urban land quality.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a small site (0.62ha) mainly on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park.</p> <p>The site lies in LCA G11: Batley Fringe Incised Valleys, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a landscape of discrete, small scale tributary valleys with some significant bands of broadleaved riparian woodland. Although mostly undeveloped, there is a strong urban influence, particularly in close proximity to main roads.</p>

SA Objectives	SA Score	Justification
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	Hunsworth Great Wood and Little Wood Candidate Local Wildlife Site are within 1km north of the site and as such, a minor negative effect is recorded on this SA objective. Given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development the effect is noted to be uncertain.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	--	This site is on greenfield land and flood zones 3 run from the south to north of the site; therefore a significant negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a potential minor negative effect is identified.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such as the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site is classed as mainly or entirely 'green' in terms of its access to seven of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: leisure and recreation, 10: sustainable transport and 19: climate change, and potential significant negative effects were identified in relation to SA objectives 5: pollution, 8: leisure and recreation and 16: flood risk. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H510: Land to the north of Fenay Lane, Almondbury, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	+ / 0	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Levels of access to an employment node vary throughout this site. The eastern part of the site is within 21-25 minutes travel time of the nearest employment node and the western part of the site is within 36-40 minutes of the nearest employment node. In between those areas journey times to an employment node vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially minor positive for the eastern part and potentially negligible for the western part of the site.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	<p>The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.</p>
3. Ensure education facilities are available to all.	+ ? / 0 ?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The site is within 16-20 minutes travel time of the nearest primary school; however levels of access to a secondary school vary throughout this site. The western part of the site is within 11-15 minutes from a secondary school and the eastern part is within 21-25 minutes. In between those areas journey times to education facilities vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially minor positive for the western part and potentially negligible for the eastern part of the site. The site is also within 31-35 minutes of a further education institute.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The site is within 11-15 minutes travel time of the nearest GP and the site within 41-45 minutes from the nearest hospital; therefore a minor positive effect on this objective is expected. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties within close proximity to the west and east of the site. A minor negative effect on this SA objective is therefore likely.</p>

SA Objectives	SA Score	Justification
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is within 11-15 minutes travel time of the nearest local centre (with a small section in the south west within 16-20 minutes) and within 11-15 minutes from the nearest town/district centre (with a small section in the west within 6-10 minutes); therefore a minor positive effect on this objective is expected.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	The site is adjacent to an area of amenity greenspace which contains a children's play area (approximately 60m from the site). Approximately 205m to the north of the site is an area of school grounds and playing fields. In addition, to the north of the site approximately 90m away is a PRoW byway and approximately 140m away is a PRoW footpath. Approximately 270m north of the site is an area of semi-natural and natural greenspace and approximately 350m north of the site is an area of park and gardens which includes an area of children's play provision and is adjacent to a multiuse games area and another children's play area. Within 600m west of the site is a public bowling green, an area of semi-natural and natural greenspace and an area of allotments. Also, approximately 420m south west of the site is an area of school grounds and playing fields. Almondbury Sports Hall is approximately 560m north of the site. Therefore a significant positive effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.62ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (1.62ha) and is on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land (the land is classed as urban).</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and	-?	This is a relatively small site (1.62ha) and is on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development.

SA Objectives	SA Score	Justification
townscape.		<p>The site is not within close proximity of the Peak District National Park.</p> <p>The site lies mainly in LCA E6: Fenay Beck Valley Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with large blocks of tree and woodland cover found on slopes. It is perceived as a tranquil landscape with a traditional rural feel, although this is impacted upon by the main roads and urban development around Shepley.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	<p>Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the open countryside which contributes to the setting of the Scheduled Monument at Castle Hill and Thorpe Farm Barn, 95m to the north of this area, and Fenny Hall 175m to the south-east of this site which are Grade II* Listed buildings.</p> <p>The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	<p>This site is approximately 590m from Almondbury Common Local Wildlife Site, 800m from Arkenley Lane Local Wildlife Site and 840m from Carr Wood Local Wildlife Site; therefore development here could have a minor negative effect on this SA Objective.</p>
15. Reduce air, water and soil pollution.	0	<p>This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.</p>
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	<p>The site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.</p>
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>The site is on greenfield land; therefore a minor negative effect is likely.</p>

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.</p>
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 8: leisure and recreation, 10: sustainable transport and 19: climate change. No potential significant negative effects were identified in relation to any of the SA objectives.		

H511: Land east of Cumberworth Lane, Lower Cumberworth, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>The site is within 16-20 minutes travel time of the nearest employment node; therefore a significant positive effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Therefore a significant positive effect is expected for this objective. The site is also within 11-15 minutes of a further education institute.</p>

SA Objectives	SA Score	Justification
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The site is within 6-10 minutes travel time of the nearest GP and within 56-60 minutes from the nearest hospital; therefore a minor positive effect on this objective is expected. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	0	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>The site is not within 100m of any existing residential development or other sensitive receptors; therefore a negligible effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The site is within 11-15 minutes travel time of both the nearest local centre and town/district centre; therefore a minor positive effect on this objective is expected.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	<p>The site is adjacent to an area of park and gardens which contain a children's play area (approximately 10m from the site) however this is located within another housing site option. Approximately 145m south east of the site is an area of semi-natural and natural greenspace. To the south west of the site is an area of amenity greenspace which contains a children's play area approximately 240m away. To the north west approximately 290m from the site is a cricket ground. In addition, within 15m west of the site is a PRow footpath. Therefore a significant positive effect is expected for this objective.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.4ha); therefore a minor positive effect is likely.</p>
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as entirely 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.</p>

SA Objectives	SA Score	Justification
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (0.4ha) and the majority of the site is on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land (the land is classed as grade 4).</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a relatively small site (0.4ha) and the majority of the site is on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development.</p> <p>The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA E6: Fenay Beck Valley Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: leisure and recreation, 10: sustainable transport and 19: climate change. No potential significant negative effects were identified in relation to any of the SA objectives.		

H512: POL Stoney Bank Lane, Thongsbridge, Holmfirth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0/-	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Levels of access to an employment node vary throughout the site. The most accessible part of the site is the northern edge which is within 31-35 minutes of the nearest employment node whereas the south is the least accessible as it is within 41-45 minutes. In between those areas journey times to an employment node vary in between those two extremes. Therefore a mixed effect on this objective is expected – negligible for the northern edge and minor negative for the south of the site.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?/+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.

SA Objectives	SA Score	Justification
		Levels of access to education facilities vary across the site. The most accessible part of the site is the northern edge which is within 6-10 minutes travel time of the nearest primary school and within 11-15 minutes of a secondary school. However the least accessible part of the site is an area in the east which is within 16-20 minutes from the nearest primary school, within 11-15 minutes of a secondary school. In between those areas journey times to education facilities vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially significant positive for the northern edge and potentially minor positive for the area in the east of the site. Journey times to the nearest further education institute also vary throughout the site.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The site is within 11-15 minutes travel time of the nearest GP however levels of access to a hospital vary throughout this site. The northern part of the site is within 41-45 minutes of a hospital and the southern part of the site is within 56-60 minutes. However, overall a minor positive effect is expected for this objective. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties within close proximity of the site to the south and east of the site. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is within 11-15 minutes travel time of the nearest local centre (with an area in the north within 6-10 minutes) and within 16-20 minutes from the nearest town/district centre (with an area in the north within 11-15 minutes); therefore a negligible effect on this objective is expected.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open	++	Holmfirth Sport Centre is approximately 275m south west of the site. Within 10m north of the site is a PRoW footpath however there is a river separating the footpath from the site making it less easily accessible. Approximately 25m to the east of the site is a PRoW footpath. The site is adjacent to an area of semi-natural and natural greenspace however the open space is located within another housing site option. To the south of the site approximately 75m away is an area of

SA Objectives	SA Score	Justification
space and encourage their usage.		public playing fields. In addition, approximately 320m to the north west of the site is an area of park and gardens which contains three areas of children's play provision. Approximately 300m south east of the site is another area of semi-natural and natural greenspace which is located within another housing site option. To the south west of the site approximately 300m away is an area of public playing fields which contains two children's play areas. Therefore a significant positive effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (2.03ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (2.03ha) and is on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land (the land is classed as grade 4).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (2.03ha) and is on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site mainly lies in LCA F5: Holme & Hall Dyke (Holmfirth & Meltham), as identified in the 2015 Landscape Character Assessment for Kirklees. This landscape comprises steep incised valleys associated with the upper parts of River Holme and its tributaries. Mixed semi-natural woodlands are found along the waterways and on the steepest slopes of the valleys. There are contrasting levels of tranquillity throughout the LCA, influenced by proximity to development and roads. Perceptions of tranquillity and remoteness are greatest on the fringes of the National Park.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 600m from Hagg Wood Local Wildlife Site and approximately 700m from Round Wood, Brockholes Local Wildlife Site; therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.

SA Objectives	SA Score	Justification
soil pollution.		
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	The site is on greenfield land and the majority of the site is outside of flood zones 2 and 3 (with a small section in the north of the site within flood zone 3); therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. The site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as entirely 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education (part of a mixed effect), 8: leisure and recreation, 10: sustainable transport and 19: climate change. No potential significant negative effects were identified in relation to any of the SA objectives.		

H513: Carters Farm, Hollins Lane, Slaithwaite, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	-	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of the site is within 41-45 minutes travel time of the nearest employment node (with a small section to the south east within 46-50 minutes); therefore a minor negative effect on this objective is expected.

SA Objectives	SA Score	Justification
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of the site is within 6-10 minutes travel time of the nearest primary school (with a small section in the south east within 11-15 minutes) and within 16-20 minutes of a secondary school (with an area in the north within 11-15 minutes). Therefore a significant positive effect is expected for this objective. Also, the north western part of the site is within 26-30 minutes of a further education institute whereas the south eastern part is within 41-45 minutes.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Levels of access to a GP vary throughout this site. The northern part of the site is within 5 minutes of a GP and the south eastern part of the site is within 11-15 minutes. The site is within 46-50 minutes travel time from the nearest hospital. In between the far northern and south eastern parts of the site, journey times to healthcare facilities vary in between those two extremes. However, overall a minor positive effect is expected for this objective. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties within close proximity of the site to the north and south of the site. In addition, the northern boundary of the site is adjacent to the A62 (Manchester Road) which may result in noise pollution affecting residents in the longer-term. A significant negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Levels of access to a local services and facilities vary throughout this site. The north western part of the site is within 6-10 minutes travel time of the nearest local centre and the south eastern part of the site is within 26-30 minutes. The majority of the site is 11-15 minutes from the nearest town/district centre (with an area in the north within 6-10</p>

SA Objectives	SA Score	Justification
		minutes). In between the far north western and south eastern parts of the site, journey times to a local and town/district centre vary in between those two extremes. However, overall a minor positive effect is expected for this objective.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	There is a PRoW footpath that runs through the south eastern part of the site and then runs adjacent the north eastern boundary which could be lost as a result of housing development. However, approximately 175m to the east of the site is an area of semi-natural and natural greenspace but it is located within another housing site option. Approximately 65m to the west of the site is PRoW footpath. In addition approximately 245m to the east of the site is an area of amenity greenspace which includes a children's play area. Also, to the east of the site approximately 445m away is an area of school grounds and playing fields. Within 120m to the south of the site there are two more PRoW footpaths. To the north of the site approximately 545m north of the site is an area of schools grounds and playing fields. Therefore a mixed significant positive and significant negative effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (2.18ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (2.18ha) and is on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land (the land is classed as grade 4).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (2.18ha) and is on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA F4: Colne (Slaitwaite, Marsden), as identified in the 2015 Landscape Character Assessment for Kirklees. This is the deeply incised valley of the River Colne. Woodland cover is found clinging to the steep valley sides and cloughs. There are dense ribbons of urban and industrial development along the valley floors and sides. It is a busy landscape with lots of movement owing to transport corridors and urban development along the valley floor.

SA Objectives	SA Score	Justification
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the Lingards Mission Church and Hill Top and its adjacent barn which are Grade II Listed Buildings. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	This site is approximately 145m from Huddersfield Narrow Canal Local Wildlife Site; therefore development here could have a significant negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	The site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. The site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such as the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education (part of a mixed effect), 8: leisure and recreation (part of a mixed effect), 10: sustainable transport and 19: climate change. Potential significant negative effects were identified in relation to SA objectives 5: amenity, 8: leisure and recreation (part of a mixed effect) and 14: biodiversity and geodiversity. These issues will need to be considered further in		

SA Objectives	SA Score	Justification
		terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.

H514: Land West of Parkwood Road, Golcar, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of the site is within 36-40 minutes travel time of the nearest employment node (with a small section to the south east within 31-35 minutes); therefore a negligible effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The majority of the site is within 6-10 minutes travel time of the nearest primary school (with a small section in the south east within 5 minutes) and within 41-45 minutes of a secondary school (with an area in the south east within 36-40 minutes). Therefore a minor positive effect is expected for this objective. The site is also within 21-25 minutes travel time of a further education institute.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health. The majority of the site is within 6-10 minutes travel time of the nearest GP (with an area in the south east within 5 minutes) and is within 41-45 minutes of the nearest hospital (with an area in the south east within 36-40 minutes). Therefore a minor positive effect is expected for this objective. The site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.

SA Objectives	SA Score	Justification
		There are a number of existing residential properties within close proximity of the site to the south and east of the site. A minor negative effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is within 6-10 minutes travel time of the nearest local centre (with a small section in the south east within 5 minutes) and within 11-15 minutes of a town/district centre (with a small area in the south east within 6-10 minutes). Therefore a minor positive effect is expected for this objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There is a PRow footpath that runs parallel to the southern boundary of the site. To the north east of the site there is a bridleway approximately 25m away. Approximately 155m north of the site is another PRow footpath however there is a brook running between the site and the footpath which makes it less easily accessible. In addition there is a PRow footpath approximately 120m to the west of the site. Approximately 315m to the east of the site is an area of park and gardens which contains two areas of children's play provision. Within 10m south east of the site is a private cricket ground. Also, to the south east of the site is a private bowling green approximately 140m away. To the south of the site, approximately 190m away is an area of semi-natural and natural greenspace however this is located within another housing site option. This area of open space is also adjacent to an area of allotments and an area of amenity greenspace. There is an area of school grounds and playing fields approximately 245m south east of the site which is adjacent to an area of public playing fields which includes a children's play area. Therefore a significant positive effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (7.24ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as entirely 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	--	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively large site (7.24ha) and is on greenfield land; therefore a significant negative effect on this SA objective</p>

SA Objectives	SA Score	Justification
		is likely. The site is not within an area of high quality agricultural land (the land is classed as grade 4 and a small area of urban land to the north east).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	<p>This is a relatively large site (7.24ha) and is on greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development.</p> <p>The site is not within close proximity of the Peak District National Park.</p> <p>The site mainly lies in LCA E2: Barkisland-Holywell Green, as identified in the 2015 Landscape Character Assessment for Kirklees. This area comprises steeply rising land with frequent tree and woodland cover. It is an urban fringe landscape. Some areas retain a relative tranquil, rural character despite the proximity of urban development. Increasing urbanisation on the LCA's fringes creates a landscape of transition. The area has an important visual relationship with the National Park.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	<p>Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on 278 to 282 Leymoor Road and 14 and 16 Parkwood Road which are Grade II Listed Buildings.</p> <p>The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 835m from Longwood Edge Quarry, Huddersfield Local Geological Site; therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	The site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>The site is on greenfield land; therefore a minor negative effect is likely.</p>

SA Objectives	SA Score	Justification
18. <p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 8: leisure and recreation, 9: affordable housing, 10: sustainable transport and 19: climate change and potential significant negative effects were identified in relation to SA objectives 11: use of land and 12: character. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H515

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>The majority of the site is within 16-20 minutes travel time of the nearest employment node (with a section to the south within 21-25 minutes); therefore a significant positive effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of the site is within 6-10 minutes travel time of the nearest primary school (with a section in the south within 11-15 minutes); however levels of access to a secondary school vary throughout this site. The most accessible</p>

SA Objectives	SA Score	Justification
		part of the site is the north western part which is within 21-25 minutes travel time of a secondary school, whereas the south eastern part of the site is the least accessible as it is within 31-35 minutes. However overall a minor positive effect is expected for this objective. Travel times to the nearest further education institute also vary across the site.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Levels of access to healthcare facilities vary throughout this site. The northern part of the site is within 5 minutes of a GP and within 31-35 minutes travel time of the nearest hospital however the southern part of the site is within 11-15 minutes of a GP and within 51-55 minutes of a hospital. In between those areas journey times to healthcare facilities vary in between those two extremes. However, overall a minor positive effect is expected for this objective. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties including a care home within close proximity surrounding the site. In addition, part of the northern boundary is also adjacent to the A642 (Wakefield Road) which may result in noise pollution affecting residents in the longer-term. A significant negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	++/0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Levels of access to local and town/district centre facilities vary throughout this site. The northern part of the site is within 5 minutes of a Local centre and within 6-10 minutes travel time of the nearest town/district centre however the southern part of the site is within 11-15 minutes of a local centre and within 21-25 minutes of a town/district centre. In between those areas journey times to local services and facilities vary in between those two extremes. Therefore a mixed effect is expected for this objective; significant positive for the northern part of the site and negligible for the southern part of the site.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation	++/--?	The site contains an area of Green corridor/pedestrian/cycleway which could be lost as a result of housing development. However, there is a bridleway within 20m and a PRoW footpath within 30m south west of the site, there is also a PRoW footpath approximately 30m to the south east of the site. Approximately 65m to the south west of the site is an area of

SA Objectives	SA Score	Justification
facilities and areas of open space and encourage their usage.		semi-natural and natural greenspace which contains a children's play area. To the west of the site approximately 410m away is an area of allotments which is also adjacent to an area of amenity greenspace. In addition, approximately 245m to the north west of the site is an area of semi-natural and natural greenspace. Within 480m south east of the site are six children's play areas. To the north of the site there is an area of semi-natural and natural greenspace approximately 330m away and an area of amenity greenspace approximately 520m away. Therefore a mixed significant positive and significant negative effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (2.09ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to six of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (2.09ha) and the majority of the site is on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land (the land is classed as urban).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (2.09ha) and the majority is on greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA M1: Calder Valley Floor, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a valley landscape with limited woodland cover, and agricultural land cover is very limited due to urban development. This is a heavily urbanised area with little tranquillity, although the area has more of a rural feel in the east.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	This site is within 135m of Wakefield Road, Lepton Local Wildlife Site, within 625m of Round Wood, Tandem Local Wildlife Site and approximately 910m from Gawthorpe Lower Wood Local Wildlife Site; therefore development here could have a significant negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.

SA Objectives	SA Score	Justification
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	The majority of the site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. The majority of the site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such as the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to six of the eight features assessed; therefore a significant positive effect is likely.
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 6: local services and facilities (part of a mixed effect), 8: leisure and recreation (part of a mixed effect), 10: sustainable transport and 19: climate change. Potential significant negative effects were identified in relation to SA objectives 5: amenity, 8: leisure and recreation (part of a mixed effect) and 14: biodiversity and geodiversity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H516: Land east of Cumberworth Lane, Lower Cumberworth, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The site is within 16-20 minutes travel time of the nearest employment node; therefore a significant positive effect on this objective is expected.

SA Objectives	SA Score	Justification
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of the site is within 6-10 minutes travel time of the nearest primary school (within a section in the north east within 11-15 minutes), within 11-15 minutes of a secondary school (with an area in the north east within 16-20 minutes) and within 11-15 minutes of a further education institute (with an area in the north east within 16-20 minutes). Therefore a significant positive effect is expected for this objective.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The majority of the site is within 6-10 minutes travel time of the nearest GP (with an area in the north east within 11-15 minutes) and the site is within 56-60 minutes from the nearest hospital; therefore a minor positive effect on this objective is expected. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties to the north of the site; therefore a minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is within 11-15 minutes travel time of the nearest local centre (with an area in the east within 16-20 minutes) and within 11-15 minutes from the nearest town/district centre (with an area in the east within 16-20 minutes); therefore a minor positive effect on this objective is expected.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced

SA Objectives	SA Score	Justification
of crime.		by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	The eastern boundary of the site is adjacent to an area of semi-natural and natural greenspace. The site is approximately 20m from an area of park and gardens which contain a children's play area however this is located within another housing site option. To the south west of the site is an area of amenity greenspace which contains a children's play area approximately 210m away. To the north west approximately 405m from the site is a cricket ground. In addition, within 75m west of the site is a PRow footpath and approximately 500m to the east of the site is a bridleway. Therefore a significant positive effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (4.97ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (4.97ha) and is on greenfield land; therefore a minor negative effect on this SA objective is likely. The majority of the site is within an area of high quality agricultural land (the land is classed as grade 3 with an area of grade 4 to the south).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (4.97ha) and is on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E6: Fenay Beck Valley Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with large blocks of tree and woodland cover found on slopes. It is perceived as a tranquil landscape with a traditional rural feel, although this is impacted upon by the main roads and urban development around Shepley.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to	0?	This site is over 1km from any designated biodiversity or geodiversity site; therefore development here could have a

SA Objectives	SA Score	Justification
protect and enhance biodiversity and geodiversity.		negligible effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	The site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. The site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to seven of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: leisure and recreation, 10: sustainable transport and 19: climate change. No potential significant negative effects were identified in relation to any of the SA objectives.		

H517: Land West of Leeds Road, Soothill, Batley

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for	++/+	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.

SA Objectives	SA Score	Justification
local people, and ensure that they are accessible.		Levels of access to an employment node vary throughout this site. The eastern part of the site is within 6-10 minutes travel time of the nearest employment node whereas two areas in the north and west of the site are 21-25 minutes away. In between those areas journey times to an employment node vary in between those extremes. Therefore a mixed effect on this objective is expected – potentially significant positive for the eastern part and potentially minor positive for the northern and western areas of the site.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?/+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of the site is within 6-10 minutes travel time of the nearest primary school (with a section in the south west within 11-15 minutes) however levels of access to a secondary school and a further education institute vary throughout this site. The most accessible part of the site is the eastern part of the site which is within 16-20 minutes travel time of a secondary school, whereas the western part of the site is the least accessible as it is within 36-40 minutes of a secondary school. In between those areas journey times to education facilities vary in between those two extremes. Therefore a mixed effect is expected for this objective: potentially significant positive for the eastern part of the site and potentially minor positive for the western part of the site. Travel times to a further education institute also vary across the site.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+/0	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Levels of access to healthcare facilities vary throughout this site. The most accessible part of the site is the north western part which is 11-15 minutes travel time from the nearest GP and within 31-35 minutes of a hospital, whereas the south western part of the site is the least accessible as it is 16-20 minutes from a GP and 41-45 minutes from a hospital. In between those areas journey times to healthcare facilities vary in between those two extremes. Therefore a mixed effect is expected for this objective; potentially minor positive for the north western part and potentially negligible for the south western part of the site. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties to the north and east of the site; therefore a minor negative effect</p>

SA Objectives	SA Score	Justification
		on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	0/-	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Levels of access to local and town/district services and facilities vary throughout this site. The most accessible part of the site is the south eastern corner which is 6-10 minutes travel time from the nearest local centre and 16-20 minutes from a town/district centre. The least accessible part of the site is north western part of the site which is 21-25 minutes from the nearest local centre and 16-20 minutes from the nearest town/district centre. In between those areas journey times to local services and facilities vary in between those two extremes. Therefore a mixed effect is expected for this objective; potentially negligible for the south eastern corner and potentially minor negative for the north western part.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There is a bridleway adjacent to the western boundary and a PRoW footpath adjacent to the southern boundary of the site. These could be lost or disrupted as a result of housing development. Approximately 345m south of the site is an area of public playing fields which is adjacent to an area of park and gardens that contains two children's play areas and a multiuse games area. In addition approximately 360m to the west of the site is an area of school grounds and playing fields. Also, approximately 560m to the south of the site is an area of amenity greenspace. Therefore a significant positive effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (19.82ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	--	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively large site (19.82ha) and is on greenfield land; therefore a significant negative effect on this SA objective is likely. The site is also within an area of high quality agricultural land (the land is classed as grade 3 with very small area of urban land to the south).</p>
12. Protect and enhance the	--?	This is a relatively large site (19.82ha) and is on greenfield land; therefore development here could have a significant

Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of the site is within 5 minutes travel time of the nearest primary school (with a section in the south within 6-</p>

SA Objectives	SA Score	Justification
		10 minutes) and within 11-15 minutes of a secondary school (with a section in the North within 6-10 minutes). Therefore significant positive effect is expected for this objective. The majority of the site is also within 31-35 minutes of a further education institute (with a section in the north within 26-30 minutes).
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The site is within 11-15 minutes travel time from the nearest GP and the majority of the site is within 41-45 minutes of a hospital (with a small section in the south within 46-50 minutes). Therefore a minor positive effect is expected for this objective. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties to the north, east and west of the site; therefore a minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The site is within 16-20 minutes travel time of the nearest local centre and the majority of the site is within 11-15 minutes travel time of a town/district centre (with an area in the north within 6-10 minutes). Therefore a minor positive effect is expected for this objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	To the west of the site approximately 310m away is an area of public playing fields which includes a children's play area. Approximately 90m to the east of the site is an area of semi-natural and natural greenspace. In addition, approximately 50m north of the site is an area of semi-natural and natural greenspace which is adjacent to a private bowling green however these areas of open space are within another housing site option. Therefore a significant positive effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small large (1.17ha); therefore a minor positive effect is likely.

SA Objectives	SA Score	Justification
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	+	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (1.17ha) and is on brownfield land; therefore a minor positive effect on this SA objective is likely. The site is not within an area of high quality agricultural land (the land is classed as grade 4).</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	+?	<p>This is a relatively small site (1.17ha) and is on brownfield land; therefore development here could have a minor positive effect on this SA objective although this is uncertain depending on the design of the development.</p> <p>The site is not within close proximity of the Peak District National Park.</p> <p>The site mainly lies in LCA E6: Fenay Beck Valley Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with large blocks of tree and woodland cover found on slopes. It is perceived as a tranquil landscape with a traditional rural feel, although this is impacted upon by the main roads and urban development around Shepley.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	<p>Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the Farnley Tyas Conservation Area, a number of Grade II Listed Buildings to the north of the site and The Church of St Lucius to the west of the site which is also Grade II Listed.</p> <p>The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	<p>This site is approximately 535m from Woodview Meadows Farnley Tyas Local Wildlife Site and approximately 670m from Hey Wood/West Wood Local Wildlife Site; therefore development here could have a minor negative effect on this SA Objective.</p>
15. Reduce air, water and soil pollution.	0	<p>This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.</p>
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	0	<p>The site is on brownfield land and is outside of flood zones 2 and 3; therefore a negligible effect is likely.</p>

SA Objectives	SA Score	Justification
17. Increase prevention, re-use, recovery and recycling of waste close to source.	+	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. The site is on brownfield land; therefore a minor positive effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such as the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: leisure and recreation, 10: sustainable transport and 19: climate change. No potential significant negative effects were identified in relation to any of the SA objectives.		

H519: Land north and west of Gernhill Avenue, Fixby

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	+	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. Approximately half of this site is within 21-25 minutes travel time of the nearest employment node while the other half is within 26-30 minutes travel time; therefore a minor positive effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?/+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.

SA Objectives	SA Score	Justification
		Access to education facilities vary across the site. The most accessible area is in the far north-eastern corner of the site, which is within 6-10 minutes travel time to a primary school and 11-15 minutes travel time to a secondary school. The least accessible area is in the far south-western area of the site which is within 6-10 minutes travel time to a primary school and within 21-25 minutes travel time to a secondary school. In between these two extremes, travel times to education facilities vary. Therefore, a mixed effect is likely, potentially significant positive effect the far north-eastern corner of the site and minor positive for the far south-western area of the site. The site is also within 30 minutes travel time to a further education institute.
4. Improve the health of local people and ensure that they can access the health and social care they need.	0	The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health. This site is within 16-20 minutes travel time of a GP. The site is also within 51-55 minutes of a hospital; therefore a negligible effect is likely. The site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	--	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. This site is adjacent to the A6107 (Clough Lane) and approximately 130m south of the A58 (Whitehall Road West), which may mean that residents in these parts of the site are affected by road noise. There are also existing residential properties adjacent to the site to the east and south of the site which may be affected by noise during the construction phase. A significant negative effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	-	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. This site is within 16-20 minutes travel time of a local centre and within 21-25 minutes of a town/district centre; therefore a minor negative effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their	++/--?	This site contains a Public Right of Way (PRoW), which could be lost as a result of development. However this site is also within 600m of more than three recreational facilities. There are several PRoW surrounding the site and a national cycle route. Open space designations include, one amenity greenspace, one semi-natural and natural greenspace and two outdoor sports facilities. A mixed effect has therefore been identified (significantly positive and significantly negative) for this SA objective.

SA Objectives	SA Score	Justification
usage.		
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is large (9.32ha); therefore, a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to three of the eight features assessed. Therefore, a minor positive effect is likely.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively large site (9.32 ha) on mainly greenfield land; therefore a significant negative effect on this SA objective is likely. This site is located on land designated as a mixture of urban land and land designated as Grade 3 and 4 agricultural quality.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This is a large site (9.32 ha) mainly on greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies mainly in LCA E2: Barkisland-Holywell Green, as identified in the 2015 Landscape Character Assessment for Kirklees. This area comprises steeply rising land with frequent tree and woodland cover. It is an urban fringe landscape. Some areas retain a relative tranquil, rural character despite the proximity of urban development. Increasing urbanisation on the LCA's fringes creates a landscape of transition. The area has an important visual relationship with the National Park.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	Grimescar Wood Local Wildlife Site is 925m south of the site and as such, a minor negative effect is recorded on this SA objective. Given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development the effect is noted to be uncertain.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure	-	This site is mainly on greenfield land and is outside of flood zones 3; therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
development does not contribute to increased flood risk for existing property and people		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is mainly on brownfield land; therefore a potential minor negative effect is identified.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site is classed as mainly or entirely 'green' in terms of its access to three of the eight features assessed: therefore a minor positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: leisure and recreation, 9: housing and potential significant negative effects were identified in relation to SA objective 5: pollution, 8: leisure and recreation, 11:land use and 12: landscape character. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H520

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++/--	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. Levels of access to an employment node vary across the site. The south western part of this site is within 11-15 minutes travel time of the nearest employment node whereas the north western part of the site is over 60 minutes away from employment. In between those areas journey times to an employment node vary in between those two extremes. Therefore a mixed effect on this objective is expected – significant positive for the south western part and significant negative for the north western part of the site.
2. Achieve an economy better capable of growth through increasing	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA

SA Objectives	SA Score	Justification
investment, innovation and Entrepreneurship.		objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?/--?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Levels of access to education facilities vary throughout the site. The southern part of this site is within 6-10 minutes travel time of the nearest primary school, within 11-15 minutes from a secondary school and within 21-25 further education institute whereas the north western part of the site is over 60 minutes from the nearest primary school, secondary school and further education institute. In between those areas journey times to education facilities vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially significant positive for the southern part of the site and potentially significant negative for the north western part of the site.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+/--	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Levels of access to healthcare facilities vary across the site. The southern part of this site is within 6-10 minutes travel time of the nearest GP and within 36-40 minutes from a hospital and the north western part of the site is over 60 minutes travel time from both the nearest GP and hospital. In between those areas journey times to healthcare facilities vary in between those two extremes. Therefore a mixed effect is expected for this objective; minor positive for the southern part of the site and significant negative for the north western part of the site. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties within close proximity to the east and south of the site. In addition, there is an industrial area immediately to the north of the site which may result in noise pollution affecting residents in the longer-term. A significant negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+/--	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Levels of access to local services and facilities vary across the site. The southern part of the site is within 11-15 minutes travel time of the nearest local centre and 11-15 minutes from a town/district centre however the north western part of the site is over 60 minutes from both local and town/district centres. In between those areas journey times to local services and facilities vary in between those two extremes. Therefore a mixed effect on this objective is expected – minor</p>

SA Objectives	SA Score	Justification
		positive for the southern part and significant negative for the central part of the site.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	The site is within an area of semi-natural and natural greenspace and has a PRoW footpath running down through the site and both could be lost or disrupted as a result of housing development. However, there are three children's play areas approximately 235m, 250m and 290m south of the site. Approximately 180m south west of the site is an area of park and gardens. In addition, approximately 340m east of the site is a green corridor which contains a national cycle route. Also, approximately 465m north of the site is an area of park and gardens that contains a children's play area. There is also a PRoW footpath which runs parallel to the north western boundary of the site. Therefore a mixed significant negative and significant positive effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (13.37ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively large site (13.37ha) on greenfield land; therefore a significant negative effect on this SA objective is likely. The site is within an area of high quality agricultural land (the land is classed as grade 3).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This is a relatively large site (13.37ha) on greenfield land; therefore development here could have a significant positive effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the

SA Objectives	SA Score	Justification
the historic environment, heritage assets and their settings.		uncertain potential impacts on Lower Blacup Farmhouse and 2 and 3 Quaker Lane which are Grade II Listed. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	This site is over 1km from any designated biodiversity or geodiversity site; therefore development here could have a negligible effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3 (a small section of the northern edge encroaches on an area of flood zone 2); therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objective 1: employment, 3: education, 8: leisure and recreation which were all part of a mixed effect overall and objectives 9: affordable housing, 10: sustainable transport and 19: climate change. Potential significant negative effects were identified in relation to SA objectives 5: amenity, 8: recreation and leisure (part of a mixed effect), 11: land use and 12: character. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H521

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people’s ability to access jobs.</p> <p>The majority of the site is located within 31-35 minutes travel time of the nearest employment node (the southern part of the site is located within 26-30 minutes travel time of the nearest employment node). A negligible effect is expected on this SA objective.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	<p>The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.</p>
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of the site is located within 6-10 minutes travel time of the nearest primary school (the north eastern part of the site is located within 11-15 minutes travel time of the nearest primary school). The majority of the site is located within 16-20 minutes travel time of a secondary school (a small part of the site to the east is located within 11-15 minutes travel time of a secondary school). Overall a significant positive effect is expected on this SA objective. The majority of the site is also located within 31-35 minutes travel time of a centre for further education (the north west of the site is located within 36-40 minutes travel time of a centre for further education).</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents’ health.</p> <p>The majority of the site is located within 6-10 minutes travel time of the nearest GP (a part of the site to the east is located within 5 minutes of the nearest GP). The majority of the site is also located within 41-45 minutes travel time of the nearest hospital (a small part of the site to the north east is located within 46-50 minutes travel time of the nearest hospital). Overall a minor positive effect is expected on this SA objective.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is in close proximity to existing properties to the east on Clough Road, to the west on Mona Street and to the south on Crimble Bank. These properties may be affected by noise during the construction phase and a minor negative</p>

SA Objectives	SA Score	Justification
		effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is located within 11-15 minutes travel time of a local centre (the north western and southern parts of the site are located within 16-20 minutes travel time of a local centre). The site is also located within 6-10 minutes travel time of a town/district centre. Overall a minor positive effect is expected for this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	The site is on land which has been designated as allotments as well as a semi-natural and natural greenspace, which could be lost as a result of housing development; therefore a potential significant negative effect is identified. However, the site is also in close proximity to a number of additional open spaces which could be used by residents. A small park and children's playground is located to the north of Mona Street within 60m of the site to the west. Further to the west outdoor sports facilities are located within 240m of the site at Slaithwaite Cricket and Bowling Club. Allotments are also provided on Hawthorn Road to the west of the site within 330m. Overall a mixed (significant positive and potential significant negative) effect is therefore identified on this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (4.33ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (4.33ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is located on mainly Urban Land (the northern part of the site is located on Grade 4 Agricultural Land).</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a relatively small site (4.33ha) on greenfield land; therefore development here is expected to have a minor negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development.</p> <p>The site is not within close proximity of the Peak District National Park.</p>

SA Objectives	SA Score	Justification
		The site lies in LCA F4: Colne (Slaithwaite, Marsden), as identified in the 2015 Landscape Character Assessment for Kirklees. This is the deeply incised valley of the River Colne. Woodland cover is found clinging to the steep valley sides and cloughs. There are dense ribbons of urban and industrial development along the valley floors and sides. It is a busy landscape with lots of movement owing to transport corridors and urban development along the valley floor.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	The site is within 250m of Hanging Wood which has been identified as a Candidate Local Wildlife Site to the south. The proximity of the site to this designated biodiversity feature may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a significant negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is located on greenfield land and is not within Flood Zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of greenfield land meaning there are unlikely to be opportunities to reuse materials already onsite. A minor negative effect is therefore likely on this SA objective.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>This site is classed as 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: recreation and leisure (it should be noted that overall a mixed effect was recorded for this SA objective), 10: transport and 19: climate change and potential significant negative effects were identified for this site in relation to SA objectives 8: recreation and leisure (it should be noted that overall a mixed effect was recorded for this SA objective) and 14: biodiversity and geodiversity. These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.</p>		

H522: Land at 141 – 145 Toftshaw Lane, East Bierley

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>This site is within 16-20 minutes travel time of the nearest employment node; therefore a significant positive effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Most of this site is within 6-10 minutes travel time to a primary school (aside from a small area in the south west which is within 5 minutes). Most of this site is also within 16-20 minutes travel time to a secondary school, except for a small</p>

SA Objectives	SA Score	Justification
		area in the south which is within 11-15 minutes travel time. Therefore, a significant positive effect is likely. It is also within 25 minutes of a further education institute.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health. This site is within 6-10 minutes travel time of a GP and 46-50 minutes of a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are existing residential properties adjacent to the site to the north and south of the site which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	-	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. Approximately half of this site is within 16-20 minutes travel time of a local centre, while the other half is within 21-25 minutes travel time to a local centre. The whole site is within and within 21-25 minutes of a town/district centre; therefore a minor negative effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is within 600m of three recreational facilities. There are five Public Rights of Way (PRoW), the closest being immediately south of the site. There are also two outdoor sports facilities. Therefore, a significant positive effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (1.08ha); therefore, a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.

SA Objectives	SA Score	Justification
use of sustainable and active modes of transport.		In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (1.08 ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The land is designated as grade 3 agricultural quality.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a small site (1.08 ha) mainly on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies in LCA K1: Thornton-Queensbury, as identified in the 2015 Landscape Character Assessment for Kirklees. The LCA comprises pockets of higher gently undulating ground. Woodland cover is generally marginal. Although this area is predominantly farmland with relatively small settlements, the surrounding urban centres and major transport corridors have a pervading influence, reducing levels of tranquillity.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible but uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	Tong Moor Local Nature Reserve is approximately 930m east of the site and as such, a minor negative effect is recorded on this SA objective. Given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development the effect is noted to be uncertain.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is mainly on greenfield land and is outside of flood zones 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a potential minor negative effect is identified.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site is classed as mainly or entirely 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.</p>
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: leisure and recreation, 10: sustainable transport and 19: Climate change. No potential significant negative effects were identified.		

H523: Land at Fieldhead Farm, White Lee Road, White Lee, Batley

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Accessibility to the nearest employment node varies across this site. The south west area is within 16-20 minutes travel time of an employment node, whereas an area to the north west and to the east of the site is within 6-10 minutes travel time. Despite these variances a significant positive effect is likely on this SA objective, across the whole site.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of this site is within 6-10 minutes travel time of a primary school (although an area to the north west and an area to the south are both within 11-15 minutes travel time). Access to secondary school facilities varies across the site. The south west area is within 16-20 minutes travel times from a secondary school; however the north western area is within 6-10 minutes. Despite these variances a significant positive effect is likely on this SA objective, across</p>

SA Objectives	SA Score	Justification
		the whole site. The site is also within 10 minutes of a further education institute, which will contribute to the significant positive effect.
4. Improve the health of local people and ensure that they can access the health and social care they need.	++/+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 11-15 minutes travel time of a GP; however access to hospital facilities varies across the site. A small area to the north west of the site is within 16-20 minutes travel time of a hospital, whereas a small area to the south east is within 31-35 minutes travel time. In between, journey times vary between these extremes. Therefore a mixed effect is likely – significant positive in the north west and minor positive in the south east. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is not surrounded by existing residential development; however there are a number of sensitive receptors directly adjacent to the north eastern, northern and part of the western site boundaries, which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of this site is within 6-10 minutes travel time of a local centre (although an area to the north west is within 11-15 minutes travel time) and within 16-20 minutes of a town/district centre (although an area to the south is within 21-25 minutes travel time); therefore a negligible effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	This site is partially within an area of semi-natural and natural greenspace, which could be lost as a result of housing development. However, it is part of a much larger area of greenspace, most of which is outside of the site. There are a number of other areas of open space within 600m of the site, including an area of amenity green space with a children's playground, directly adjacent to the western boundary and a second area of amenity green space approximately 283m to the south west. In addition there is an existing Public Right of Way located directly adjacent to the southern site boundary. A mixed (significant positive and potential significant negative) effect is therefore identified.
9. Ensure all people are able to live in a decent home	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable

SA Objectives	SA Score	Justification
which meets their needs.		housing. This site is relatively small (3.88ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' or mainly 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (3.88ha) on mainly greenfield land (although there are a small number of existing structures (possibly sheds) within the site area); therefore a minor negative effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (3.88ha) on mainly greenfield land (although there are a small number of existing structures (possibly sheds) within the site area); therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies mainly in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, as the development of this site is unlikely to result in harm to any designated asset. The effect on this SA objective is therefore negligible but uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	This site is more than 1km from any designated biodiversity sites; therefore development here could have a negligible effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and	-	This site is on mainly greenfield land (although there are a small number of existing structures (possibly sheds) within the site area); and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
people.		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on mainly greenfield land (although there are a small number of existing structures (possibly sheds) within the site area); therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' or mainly 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 4: health (part of an overall mixed effect), 8: leisure and recreation (part of an overall mixed effect), 10: sustainable transport and 19: climate change, and a potential significant negative effect was identified in relation to SA objective 8: leisure and recreation (part of an overall mixed effect). This issue will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H524: Land at Fieldhead Farm, White Lee Road, White Lee, Batley

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 11-15 minutes travel time of the nearest employment node (although an area in the north is within 16-20 minutes); therefore a significant positive effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how

		<p>accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of this site is within 6-10 minutes travel time of a primary school (although an area in the north within 11-15 minutes) and within 11-15 minutes of a secondary school (although an area in the north is within 16-20 minutes). A significant positive effect is therefore likely. Most of the site is also within 11-15 minutes of a further education institute (although an area in the north is within 6-10 minutes), which will contribute to the significant positive effect.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	++	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The whole of this site is within 11-15 minutes travel time of a GP and the majority of the site is within 11-15 minutes of a hospital (although an area around the north, east and south east is within 16-20 minutes travel time); therefore a significant positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is not surrounded by existing residential development; however there are a number of sensitive receptors within 100m of the north, south and west site boundaries, which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is within 6-10 minutes travel time of a local centre (although an area to the south east is within 11-15 minutes) and the whole site is within 21-25 minutes of a town/district centre; therefore a negligible effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	<p>This site is wholly within an area of semi-natural and natural greenspace, which could be lost as a result of housing development. However, it is part of a much larger area of greenspace, most of which is outside of the site. This site is also diagonally bisected by an existing Public Right of Way which may also be lost due to development. This site is within 600m of a number of areas of open space, including two areas of amenity greenspace; one located approximately 219m to the west of the site and one (which includes a children's playground) located approximately 131m to the north. In addition, there is an existing Public Right of Way directly adjacent to the northern boundary. A mixed (significant</p>

		positive and potential significant negative) effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (2.23ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (2.23ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (2.23ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site mainly lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, as the development of this site is unlikely to result in harm to any designated asset. The effect on this SA objective is therefore negligible but uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	This site is not within 1km of any designated biodiversity sites; therefore development here could have a negligible effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.

people.		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 4: health, 8: leisure and recreation (part of an overall mixed effect), 10: sustainable transport and 19: climate change, and a potential significant negative effect was identified in relation to SA objective 8: leisure and recreation (part of an overall mixed effect). This issue will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H525: Land at Fieldhead Farm, White Lee Road, White Lee, Batley

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 11-15 minutes travel time of the nearest employment node (although a small area to the north west is within 16-20 minutes travel time); therefore a significant positive effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.

SA Objectives	SA Score	Justification
		The majority of this site is within 11-15 minutes travel time of both a primary school and secondary school (although a small area to the west is within 6-10 minutes travel time of a primary school, and an area to the north west is within 16-20 minutes travel time of a secondary) and so is likely to have a significant positive effect. The whole site is also within 15 minutes of a further education institute, which will contribute to the significant positive effect.
4. Improve the health of local people and ensure that they can access the health and social care they need.	++/+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The majority of this site is within 11-15 minutes travel time of a GP (although a small area to the south east is within 16-20 minutes travel time). Accessibility to hospital facilities varies across the site; an area to the west is within 16-20 minutes travel time, however an area to the north east is within 31-35 minutes. In between, journey times vary between these extremes. A mixed effect is therefore likely – significant positive to the west of the site and minor positive to the north east. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is not surrounded by existing residential development; however there are a number of sensitive receptors directly adjacent to the southern and part of the western site boundaries, which may be affected by noise during the construction phase. There is also an existing residential property directly adjacent to the north west corner of the site. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	0/-	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Accessibility to a local centre varies across this site; an area to the north west is within 6-10 minutes travel time, however an area to the south east is within 16-20 minutes. In between, journey times vary between these extremes. The whole site is within 21-25 minutes travel time of a town/district centre. A mixed effect is therefore likely – negligible in the north west of the site and minor negative in the south east.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation	++/--?	This site is wholly within an area of semi-natural and natural greenspace, which could be lost as a result of housing development. However, it is part of a much larger area of greenspace, most of which is outside of the site. This site is within 600m of a number of areas of open space, including two areas of amenity greenspace; one located approximately

SA Objectives	SA Score	Justification
facilities and areas of open space and encourage their usage.		341m to the west of the site and one (which includes a children's playground) located approximately 133m to the north. In addition, there is an existing Public Right of Way directly adjacent to the south western boundary, with a second PRow approximately 31m north of the north west corner of the site. A mixed (significant positive and potential significant negative) effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (2.92ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (2.92ha) on greenfield land; therefore a minor negative effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (2.92ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies mainly in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, as the development of this site is unlikely to result in harm to any designated asset. The effect on this SA objective is therefore negligible but uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	This site is not within 1km of any designated biodiversity sites; therefore development here could have a negligible effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
areas and ensure development does not contribute to increased flood risk for existing property and people.		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 4: health (part of an overall mixed effect), 8: leisure and recreation (part of an overall mixed effect), 10: sustainable transport and 19: climate change, and a potential significant negative effect was identified in relation to SA objective 8: leisure and recreation (part of an overall mixed effect). This issue will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H526: POL, Bankfield Lane, Kirkheaton, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of the site is within 36-40 minutes travel time of the nearest employment node, with a small section to the north west within 41-45 minutes travel time; therefore a negligible effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment,	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA

SA Objectives	SA Score	Justification
innovation and Entrepreneurship.		objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of the site is within 6-10 minutes of a primary school however, two small areas to the north west and west of the site are within 11-15 minutes of a primary school. The northern half of the site is within 36-40 minutes travel time of a secondary school, while the southern half of the site is within 31-35 minutes travel time of a secondary school. Similarly, the northern half of the site is within 36-40 minutes travel time of a further education institute, while the southern half is within 31-35 minutes travel time of a further education institute.</p> <p>Therefore, development of the site could have a minor positive effect on this SA objective.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Half of the site, to the east and north, is within 6-10 minutes travel time of a GP, while the other half, to the west and south, is within 11-15 minutes travel time of a GP. The majority of the site is within 41-45 minutes travel time to a hospital, however, the northern portion of the site is within 46-50 minutes travel time to a hospital. The site is not within or adjacent to an AQMA. Therefore, a minor positive effect is expected.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>The north east of the site is adjacent to an existing residential development along Bankfield Lane and Stead Lane. The east and south east of the site is within close proximity to existing residential developments, particularly St Peters Crescent, which may be affected by noise during the construction phase. Furthermore, to the south of the site is a large farmhouse and steading buildings. Therefore, a minor negative effect on this SA objective is likely.</p>
6. Retain and enhance access to local services and facilities.	0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is within 6-10 minutes travel time of a local centre. In addition, the majority of the site is within 16-20 minutes of a town/district centre, with a large portion of the south of the site within 11-15 minutes travel time of a town/district centre. Therefore, a negligible effect on this SA objective is predicted.</p>
7. Make our communities	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the

SA Objectives	SA Score	Justification
safer by reducing crime, anti-social behaviour and the fear of crime.		incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	To the north of the site, on the opposite side of the Bankfield Lane (within 7m), are 3 amenity greenspaces and a children's playground (40m). To the north east of the site, approximately 365m distance, are allotments and amenity greenspace. To the south west and west of the site, there are several areas of semi-natural and natural greenspace with the closest approximately 445m distance, in addition to amenity greenspace (450m), a green corridor (370m), and a cemetery (270m). The site is adjacent to a footpath along Stead Lane and is also within 25m of a local cycle path (to the east of the site). A significant positive effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (2.31ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to three of the eight features assessed. Therefore, a minor positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (2.31ha) on greenfield land. Furthermore, the site is not within an area of high quality agricultural land (it is classed as Grade 4). Therefore a minor negative effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (2.31ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E7: Emley Moor Northern Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a landscape of gently undulating elevated slopes with abundant woodland cover. The proximity of the urban centres exerts an influence on landscape character with urban fringe land uses evident in many areas.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that the development of the site is unlikely to result in harm to any designated heritage asset; therefore a negligible effect on this SA objective is likely.
14. Maximise opportunities to	-?	The site is within approximately 670 meters of the Dalton Bank Local Nature Reserve and Local Wildlife Site. Therefore,

SA Objectives	SA Score	Justification
protect and enhance biodiversity and geodiversity.		development could have a minor negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site is classed as 'green' in terms of its access to three of the eight features assessed; therefore a minor positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objective 8: leisure and recreation, with no potential significant negative effects predicted. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H527

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. This site is within 6-10 minutes travel time of the nearest employment node; therefore a significant positive effect on

SA Objectives	SA Score	Justification
they are accessible.		this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of this site is within 6-10 minutes travel time of a primary school (although an area to the south east is within 5 minutes) and the whole site is within 6-10 minutes travel time of a secondary school. A significant positive effect is therefore likely. The whole site is also within 10 minutes of a further education institute, which will contribute to the significant positive effect.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	++	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 6-10 minutes travel time of a GP and within 11-15 minutes of a hospital; therefore a significant positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is not surrounded by existing residential development; however there are a number of sensitive receptors directly adjacent to the southern site boundary and within 100m of north, east and western boundaries, which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The whole site is within 5 minutes travel time of a local centre and the majority of the site is within 16-20 minutes travel time of a town/district centre (although an area to the south is within 11-15 minutes); therefore a minor positive effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced

SA Objectives	SA Score	Justification
of crime.		by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is within 600m of a number of areas of open space including two areas of amenity greenspace located approximately 93m to the north of the site and 174m to the north west and a public park located approximately 174m to the south of the site. In addition there is a public playing field located approximately 65m to the south east. A significant positive effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.67ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	+	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (0.67ha) on brownfield land; therefore a minor positive effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This site is on brownfield land; therefore development here could have a minor positive effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies in an area classed as 'urban' in the 2015 Landscape Character Assessment for Kirklees.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, as the development of this site is unlikely to result in harm to any designated asset. The effect on this SA objective is therefore negligible but uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	This site is not within 1km of any designated biodiversity sites; therefore development here could have a negligible effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk	0	This site is on brownfield land and is outside of flood zones 2 and 3; therefore a negligible effect is likely.

SA Objectives	SA Score	Justification
areas and ensure development does not contribute to increased flood risk for existing property and people.		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	+?	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on brownfield land; therefore a minor positive effect is likely. The positive effect is uncertain depending on materials onsite which is unknown at this stage.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 4: health, 8: leisure and recreation, 10: sustainable transport and 19: climate change. No potential significant negative effects were identified in relation to any of the SA objectives.		

H528: Land between Hassocks Lane and Meltham Road, Honley, Holmfirth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	-	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 41-45 minutes travel time of the nearest employment node (although an area to the north is over an hour travel time); therefore a minor negative effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.

SA Objectives	SA Score	Justification
Entrepreneurship.		
3. Ensure education facilities are available to all.	0?/--?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Accessibility to education facilities varies across this site. An area to the south west of the site is within 21-25 minutes of a primary school and 26-30 minutes of a secondary school; however the northern area is over an hour travel time from both. In between, journey times vary between these extremes. A mixed effect is therefore likely – negligible in the south west of the site and significant negative in the north.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	-/--	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Accessibility to a GP varies across the site. An area to the south west is within 21-25 minutes travel time; however the northern area is over an hour travel time from a GP. In between, journey times vary between these two extremes. The whole site is over an hour travel time from a hospital. A mixed effect is therefore likely – minor negative in the south west and significant negative in the north. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is not surrounded by existing residential development; however there are a number of sensitive receptors within 100m of the eastern site boundary and an existing residential property within 100m of south west corner of the site, which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	-/--	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Accessibility to local and town/district centres varies across the site. An area to the south west is within 26-30 minutes travel time from a local centre and within 21-25 minutes of a town/district centre; however the northern part of the site is over an hour travel time from both a local centre and a town/district centre. A mixed effect is therefore likely – minor negative in the south west and significant negative in the north.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the</p>

SA Objectives	SA Score	Justification
		effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is within 600m of a number of areas of open space including an area of semi natural and natural greenspace approximately 83m to the north west of the site, a public playing field approximately 164m to the south east of the site and an area of amenity greenspace located approximately 488m to the south east of the site. In addition there are two Public Rights of Way directly adjacent to the western and eastern site boundary. A significant positive effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (2.71ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	--	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to none of the eight features assessed. Therefore, a significant negative effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (2.71ha) on greenfield land, which is classified as Grade 3 Agricultural Land; therefore a minor negative effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (2.71ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies in LCA E1: Holmfirth-Meltham, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with considerable tree and woodland cover. Although the proximity of the urban centres exerts an influence on landscape character, with urban fringe land uses evident in many areas, there are pockets of relative tranquillity away from the main settlements. There is a strong visual relationship with the moorlands of the National Park.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, as the development of this site is unlikely to result in harm to any designated asset. The effect on this SA objective is therefore negligible but uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	This site is approximately 57m from the Honley Wood candidate Local Wildlife Site and 344m from the Spring Wood Honley Local Wildlife Site; therefore development here could have a significant negative effect on this SA objective.

SA Objectives	SA Score	Justification
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	--	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to none of the eight features assessed. Therefore, a significant negative effect is likely.
<p>Summary of SA findings: A potential significant positive effect was identified for this site in relation to SA objective 8: leisure and recreation, and potential significant negative effects were identified in relation to SA objectives 3: education (part of an overall mixed effect), 4: health, (part of an overall mixed effect), 6: services (part of an overall mixed effect), 10: sustainable transport, 14: biodiversity and 19: climate change. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H529: Service Reservoir, Gilroyd Lane, Linthwaite, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. This site is within 36-40 minutes travel time of the nearest employment node; therefore a negligible effect on this objective is expected.

SA Objectives	SA Score	Justification
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of this site is within 6-10 minutes travel time of a primary school (although there is a small area to the west within 5 minutes travel time) and the whole site is within 6-10 minutes travel time of a secondary school. A significant positive effect is therefore likely. It is also within 30 minutes of a further education institute, which will contribute to the significant positive effect.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The majority of this site is within 6-10 minutes travel time of a GP (although an area to the north is within 11-15 minutes travel time) and the whole site is within 46-50 minutes of a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is not surrounded by existing residential development; however there are a number of sensitive receptors within 100m of the north eastern and southern site boundaries, which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This whole site is within 6-10 minutes travel time of a local centre and the majority is within 11-15 minutes of a town/district centre (although an area to the south is within 6-10 minutes travel time of a town/district centre); therefore a minor positive effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced

SA Objectives	SA Score	Justification
of crime.		by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is within 600m of a number of areas of open space including a recreation ground approximately 278m to the west of the site and a children's playground 325m to the north west. In addition there is a Public Right of Way approximately 99m from the north western site boundary. A significant positive effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.14ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to six of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (1.14ha) on mainly greenfield land (although there is an existing access track and parking area in the centre of the site, presumably related to the covered reservoir); therefore a minor negative effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (1.14ha) on mainly greenfield land (although there is an existing access track and parking area in the centre of the site, presumably related to the covered reservoir); therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies in LCA F4: Colne (Slaithwaite, Marsden), as identified in the 2015 Landscape Character Assessment for Kirklees. This is the deeply incised valley of the River Colne. Woodland cover is found clinging to the steep valley sides and cloughs. There are dense ribbons of urban and industrial development along the valley floors and sides. It is a busy landscape with lots of movement owing to transport corridors and urban development along the valley floor.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on 49 Blackmoorfoot Road and the adjacent barn which are Grade II Listed Buildings. The loss of this area and its subsequent development could harm elements which contribute to the significance of these buildings. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend

SA Objectives	SA Score	Justification
		on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	This site is not within 1km of any designated biodiversity sites; therefore development here could have a negligible effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on mainly greenfield land (although there is an existing access track and parking area in the centre of the site, presumably related to the covered reservoir) and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on mainly greenfield land (although there is an existing access track and parking area in the centre of the site, presumably related to the covered reservoir); therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to six of the eight features assessed. Therefore, a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: leisure and recreation, 10: sustainable transport and 19: climate change. No potential significant negative effects were identified in relation to any of the SA objectives.		

H530: Former Quarry, Holmfirth Road, Meltham, Holmfirth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment	0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.

SA Objectives	SA Score	Justification
opportunities available for local people, and ensure that they are accessible.		The site is located within 36-40 minutes travel time of the nearest employment node. A negligible effect is expected on this SA objective.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The site is located within 5 minutes travel time of the nearest primary school. The site is located within 11-15 minutes travel time of a secondary school. Overall a significant positive effect is expected on this SA objective. The site is also located within 26-30 minutes travel time of a centre for further education.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The site is located within 5 minutes travel time of the nearest GP. The site is also located within 51-55 minutes travel time of the nearest hospital. Overall a minor positive effect is expected on this SA objective.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is in close proximity to existing properties to the east on The Grove. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The site is located within 11-15 minutes travel time of a local centre. The site is also located within 5 minutes travel time of a town/district centre. Overall a minor positive effect is expected for this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the

SA Objectives	SA Score	Justification
		effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	The northern part of the site is on land which has been designated as a semi-natural and natural greenspace, which could be lost as a result of housing development; therefore a potential significant negative effect is identified. However, the site is also in close proximity to a number of additional open spaces which could be used by residents. Outdoor sports facilities are located within 155m to the east of the site at Meltham Golf Club. Further outdoor sports facilities are provided to the north west of the site within 105m at Meltham Church Of England Primary School. A semi-natural and natural greenspace is located within 480m to the west of the site. Overall a mixed (significant positive and potential significant negative) effect is therefore identified on this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.4ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to six of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (0.4ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is located on mainly Grade 4 Agricultural Land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (0.4ha) on greenfield land; therefore development here is expected to have a minor negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies mainly in LCA F5: Holme & Hall Dyke (Holmfirth & Meltham), as identified in the 2015 Landscape Character Assessment for Kirklees. This landscape comprises steep incised valleys associated with the upper parts of River Holme and its tributaries. Mixed semi-natural woodlands are found along the waterways and on the steepest slopes of the valleys. There are contrasting levels of tranquillity throughout the LCA, influenced by proximity to development and roads. Perceptions of tranquillity and remoteness are greatest on the fringes of the National Park.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to	-?	The site is within 635m of Honley Wood which has been identified as a Candidate Local Wildlife Site to the north east.

SA Objectives	SA Score	Justification
protect and enhance biodiversity and geodiversity.		The proximity of the site to this designated biodiversity feature may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is located on greenfield land and is not within Flood Zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of greenfield land meaning there are unlikely to be opportunities to reuse materials already onsite. A minor negative effect is therefore likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is classed as 'green' in terms of its access to six of the eight features assessed; therefore a significant positive effect is likely.
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: recreation and leisure (it should be noted that overall a mixed effect was recorded for this SA objective), 10: transport and 19: climate change and potential significant negative effects were identified for this site in relation to SA objective 8: recreation and leisure (it should be noted that overall a mixed effect was recorded for this SA objective). These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.</p>		

H531: Land South-West of Soureby Cross Way, East Bierley

SA Objectives	SA Score	Justification
---------------	----------	---------------

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>This site is within 16-20 minutes travel time of the nearest employment node; therefore a significant positive effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?/+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Most of this site is within 5 minutes travel time to a primary school (aside from a small area in the south which is within 6-10 minutes). However, travel times to the nearest secondary school vary throughout the site. The most accessible part of the site is the north which is within 11-15 minutes of a secondary school whereas the southern edge is the least accessible as it is within 21-25 minutes of a secondary school. Therefore a mixed effect is likely for this objective: potentially significant positive for the north of the site and potentially minor positive for the southern edge of the site. It is also within 20 minutes of a further education institute.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Most of this site is within 6-10 minutes travel time of a GP (aside from a small area in the south which is within 11-15 minutes travel time). The site is also within 46-50 minutes travel time to a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are existing residential properties adjacent to the site to the north, east and west and a football pitch to the south which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>

SA Objectives	SA Score	Justification
6. Retain and enhance access to local services and facilities.	-	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Travel times to local and district/ town centres vary throughout the site. The most accessible area of the site is in the north, which is within 16-20 minutes to a local and district/ town centres. The least accessible area is in the south west of the site, which is within 21-25 minutes travel time to a local centre and 26-30 minutes travel time to a town/district centre. Travel times to local and district/ town centres vary between these two extremes. However overall a minor negative effect is likely for the whole site.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is within 600m of three recreational facilities. There are four Public Rights of Way (PRoW), three parks and gardens, a semi-natural and natural green space and two amenity green spaces. Other sites nearby include four sports facilities, one allotment and one site containing provision for children and young people. Therefore, a significant positive effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (1.8ha); therefore, a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (1.8 ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The land is designated as grade 3 agricultural land quality.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a small site (1.8ha) mainly on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development.</p> <p>The site is not within 500m of the Peak District National Park.</p>

SA Objectives	SA Score	Justification
		The site lies in LCA K1: Thornton-Queensbury, as identified in the 2015 Landscape Character Assessment for Kirklees. The LCA comprises pockets of higher gently undulating ground. Woodland cover is generally marginal. Although this area is predominantly farmland with relatively small settlements, the surrounding urban centres and major transport corridors have a pervading influence, reducing levels of tranquillity.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible but uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	Tong Moor Local Nature Reserve is approximately 480m south of the site and as such, a minor negative effect is recorded on this SA objective. Given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development the effect is noted to be uncertain.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is mainly on greenfield land and is outside of flood zones 3; therefore given that housing development at this location would increase the area of impermeable surfaces in Kirklees a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a potential minor negative effect is identified.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site is classed as mainly or entirely 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.</p>
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education (part of a mixed effect), 8: leisure and recreation, 10: sustainable transport and 19: Climate change. No potential significant negative effects were identified.		

H532: Quarry Road, Crosland Hill, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>The majority of this site is within 31-35 minutes travel time of the nearest employment node (although an area to the north west is within 36-40 minutes); therefore a negligible effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of this site is within 6-10 minutes travel time of a primary school (although an area to the north west is within 11-15 minutes travel time). Accessibility to secondary education varies across the site. An area to the south and south east is within 6-10 minutes travel time of a secondary school; however an area to the north west is within 16-20 minutes travel time). Despite these variances a significant positive effect is likely. The whole site is also within 25 minutes of a further education institute, which will contribute to the significant positive effect.</p>

SA Objectives	SA Score	Justification
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 11-15 minutes travel time of a GP and within 41-45 minutes of a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>Part of the western site boundary of this site is directly adjacent to an existing industrial area, which may mean that residents in this part of the site are affected by noise. There are also a number of residential properties adjacent to the site to the south eastern and eastern site boundaries which may be affected by noise during the construction phase. A significant negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+/0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of this site is within 6-10 minutes travel time of a local centre (although an area to the north west is within 11-15 minutes). Accessibility to a town/district centre varies across the site. An area to the south is within 11-15 minutes of a town/district centre; however an area to the north west is within 26-30 minutes travel time. In between, journey times vary between these two extremes. A mixed effect is therefore likely – minor positive in the south and negligible in the north west.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	<p>This site is within 600m of a number of areas of open space including three areas of amenity greenspace, located approximately 188m and 242m to the north east of the site and 60m to the south. In addition there is a children's playground located approximately 114m to the east of the site. A significant positive effect is therefore identified.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (3.12ha); therefore a minor positive effect is likely.</p>
10. Secure an effective and	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of</p>

SA Objectives	SA Score	Justification
safe transport network which encourages people to make use of sustainable and active modes of transport.		transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. This site is classed as 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (3.12ha) on mainly greenfield land (although there is a very small area to the east of the site currently occupied by sheds); therefore a minor negative effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (3.12ha) on mainly greenfield land (although there is a very small area to the east of the site currently occupied by sheds); therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies mainly in LCA E1: Holmfirth-Meltham, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with considerable tree and woodland cover. Although the proximity of the urban centres exerts an influence on landscape character, with urban fringe land uses evident in many areas, there are pockets of relative tranquillity away from the main settlements. There is a strong visual relationship with the moorlands of the National Park.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, as the development of this site is unlikely to result in harm to any designated asset. The effect on this SA objective is therefore negligible but uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 640m from the Johnson Wellfield Quarries Local Geological Site, 823m from the Huddersfield Narrow Canal and 977m from the Delves Wood candidate Local Wildlife Sites; therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on mainly greenfield land (although there is a very small area to the east of the site currently occupied by sheds); and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing

SA Objectives	SA Score	Justification
use, recovery and recycling of waste close to source.		buildings and materials although this is uncertain depending on the previous use of the site. This site is on mainly greenfield land (although there is a very small area to the east of the site currently occupied by sheds); therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is classed as 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: leisure and recreation, 10: sustainable transport and 19: climate change, and a potential significant negative effect was identified in relation to SA objective 5: amenity and 8: leisure and recreation. This issue will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H533

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0/-	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. Accessibility to the nearest employment node varies across this site. An area to the east of the site is within 31-35 minutes travel time of an employment node; however an area to the north west is within 46-50 minutes. A mixed effect is therefore likely – negligible to the east of the site and minor negative to the north west.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.

SA Objectives	SA Score	Justification
		The majority of this site is within 6-10 minutes travel time of a primary school (although a large area to the north is within 11-15 minutes travel time). Accessibility to secondary education varies across the site. An area to the north west is within 16-20 minutes; however an area to the south east is within 5 minutes travel time. Despite these variances a significant positive effect is likely for the whole site. The majority of the site is also within 30 minutes of a further education institute, which will contribute to the significant positive effect.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+/0	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Accessibility to GP and hospital facilities varies across the site. An area to the south west of the site is within 6-10 minutes travel time of a GP; however an area to the north is within 16-20 minutes. The area to the north is also within 56-60 minutes travel time of a hospital; however a small area to the east is within 36-40 minutes. In between, journey times vary between these extremes. A mixed effect is therefore likely – minor positive to the south west of the site and negligible to the north. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is not surrounded by existing residential development; however there are a number of sensitive receptors directly adjacent to the eastern site boundary and within 100m of parts of the southern and western site boundaries, which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+/0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of this site is within 6-10 minutes travel time of a local centre (although a large area to the north of the site is within 11-15 minutes travel time). Accessibility to a town/district centre varies across the site. An area to the south west is within 6-10 minutes travel time of a local/town centre; however an area to the north east is within 26-30 minutes travel time. In between, journey times vary between these extremes. A mixed effect is therefore likely - minor positive to the south west and negligible to the north.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance	+ +/--?	The north western area of this site is partially bisected by two existing Public Rights of Way, which could be lost as a

SA Objectives	SA Score	Justification
existing and support the provision of new recreation facilities and areas of open space and encourage their usage.		result of housing development. However the site is also within 600m of a number of areas of open space, including a golf course directly adjacent to the western site boundary and an area of amenity greenspace approximately 55m to the west which includes a children's playground. In addition there is a Public Right of Way located approximately 15m to the north of the site. A mixed (significant positive and potential significant negative) effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (45.14ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' or mainly 'green' in terms of its access to six of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	++	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively large site (45.14ha) on mainly brownfield land (although a peripheral area around the existing industrial estate is greenfield land); therefore a significant positive effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	+?	This site is on mainly brownfield land (although a peripheral area around the existing industrial estate is greenfield land); therefore development here could have a minor positive effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies across LCA E1: Holmfirth-Meltham, LCA F4: Colne (Slaithwaite, Marsden) and the 'urban' area as identified in the 2015 Landscape Character Assessment for Kirklees. LCA E1: Holmfirth-Meltham is a gently undulating plateau with considerable tree and woodland cover. Although the proximity of the urban centres exerts an influence on landscape character, with urban fringe land uses evident in many areas, there are pockets of relative tranquillity away from the main settlements. There is a strong visual relationship with the moorlands of the National Park. LCA F4: Colne (Slaithwaite, Marsden) is the deeply incised valley of the River Colne. Woodland cover is found clinging to the steep valley sides and cloughs. There are dense ribbons of urban and industrial development along the valley floors and sides. It is a busy landscape with lots of movement owing to transport corridors and urban development along the valley floor.
13. Conserve and enhance	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, as the

SA Objectives	SA Score	Justification
the historic environment, heritage assets and their settings.		development of this site is unlikely to result in harm to any designated asset. The effect on this SA objective is therefore negligible but uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 351m from the Johnson Wellfield Quarries Local Geological Site, 678m from the Huddersfield Narrow Canal candidate Local Wildlife Site and 977m from the Delves Wood candidate Local Wildlife Sites; therefore development here could have a minor negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	0	This site is on mainly brownfield land (although a peripheral area around the existing industrial estate is greenfield land) and is outside of flood zones 2 and 3; therefore a negligible effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	+?	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on mainly brownfield land (although a peripheral area around the existing industrial estate is greenfield land); therefore a minor positive effect is likely. The positive effect is uncertain given that the materials currently onsite are unknown at this stage.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' or mainly 'green' in terms of its access to six of the eight features assessed. Therefore, a significant positive effect is likely.
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: leisure and recreation (part of a mixed overall effect), 9: housing, 10: sustainable transport, 11: land use and 19: climate change, and a potential significant negative effect was identified in relation to SA objective 8: leisure and recreation (part of a mixed overall effect). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H534: Former Mitchell Laithes Hospital, Long Lane, Earlsheaton, Dewsbury

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	--	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>The majority of this site is over an hour travel time from the nearest employment node (although a small area to the north is within 16-20 minutes travel time); therefore a significant negative effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	<p>The location of housing sites will not affect the success of the local economy. SA Objectives	SA Score	Justification
		occupied by small villages.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, as the development of this site is unlikely to result in harm to any designated asset. The effect on this SA objective is therefore negligible but uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	This site is not within 1km of any designated biodiversity sites; therefore development here could have a negligible effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3 (although there is an area in close proximity of the western site boundary which is designated as Flood Zone 3) ; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	--	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' or mainly green in terms of its access to none of the eight features assessed. Therefore, a significant negative effect is likely.
Summary of SA findings: A potential significant positive effect was identified for this site in relation to SA objective 8: leisure and recreation, and potential significant negative effects were identified in relation to SA objectives 1: employment, 3: education, 4: health, 6: services, 10: sustainable transport and 19: climate change. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H535: Land to the west of Slipper Lane, Mirfield Moor

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	+	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Most of this site is within 21-25 minutes travel time of an employment node (aside from the southern area of the site, which is within 16-20 minutes travel time of an employment node). A minor positive effect is expected on this SA objective.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Most of this site is within 6-10 minutes travel time to a primary school (aside from the north-eastern area which is within 11-15 minutes travel time). The site is also located within 11-15 minutes travel time to a secondary school; therefore, a significant positive effect is expected on this SA objective. Most of this site is also within 16-20 minutes of a centre for further education (aside from the far northern edge, which is within 16-20 minutes travel time).</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Most of this site is located within 11-15 minutes travel time of the nearest GP (aside from a small area in the south which is within 6-10 minutes travel time). Most of this site is located within 41-45 minutes travel time to a hospital (aside from the north-eastern area which is within 46-50 minutes travel time to a hospital). Therefore a minor positive effect is likely. This site is not adjacent to or within an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is in close proximity to a number of existing residential properties to the west on Bracken Hill and Bracken Close. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.</p>

SA Objectives	SA Score	Justification
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The site is within 6-10 minutes travel time of a local centre. Most of the site is also within 11-15 minutes travel time to a town/district centre (aside from part of the far north of the site, which is within 16-20 minutes travel time). Therefore, a minor positive effect is likely for this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	The site is within 600m of more than three recreational and leisure spaces. There are six Public Rights of Way (PRoW). Open space designations nearby include a small park with provision for a children's playground, an area of semi-natural and natural greenspace and one amenity greenspace. Other sites nearby include six outdoor sports facilities. Therefore, a significant positive effect is expected on this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.62ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to six out of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (1.62ha) on greenfield land; therefore, a minor negative effect on this SA objective is likely. Most of this site is designated as urban land except for the east of the site which is on designated Grade 3 Agricultural Land.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a relatively small site (1.62ha) on greenfield land; therefore, development here is expected to have a minor negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development.</p> <p>The site is not within 500m of the Peak District National Park.</p>

SA Objectives	SA Score	Justification
		The site lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is approximately 990m west of Sunny Bank Ponds Local Wildlife Site, therefore a minor negative effect is likely. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is located on greenfield land and is outside of flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is mainly on greenfield land; therefore, a potential minor negative effect is identified.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>This site is classed as 'green' in terms of its access to six of the eight features assessed; therefore a significant positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: recreation and leisure, 10: sustainable transport and 19: climate change. No and potential significant negative effects were identified.</p>		

H536: Church Street, Longwood, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	+	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>This site is within 26-30 minutes travel time of the nearest employment node; therefore a minor positive effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of this site is within 6-10 minutes travel time of a primary (although a small area to the south is within 5 minutes travel time) and within 36-40 minutes travel time of a secondary school (although a small area to the south is within 31-35 minutes travel time). A minor positive effect is therefore likely.</p>
4. Improve the health of local people and ensure that they	+	The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.

SA Objectives	SA Score	Justification
can access the health and social care they need.		The whole of this site is within 5 minutes travel time of a GP and the majority is within 31-35 minutes of a hospital (although an area to the north is 36-40 minutes travel time of a hospital); therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	--	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. This site is surrounded by existing sensitive receptors which may be affected by noise during the construction phase. A significant negative effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. This site is within 6-10 minutes travel time of both a local centre and a town/district centre: therefore a minor positive effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is within 600m of a number of areas of open space including an area of semi natural and natural greenspace located 80m to the north west of the site and a public playing field, located approximately 197m to the south. In addition there is a Public Right of Way located approximately 10m to the east of the site. A significant positive effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.42ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of

SA Objectives	SA Score	Justification
prudent use of land.		land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (0.42ha) on greenfield land; therefore a minor negative effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (0.42ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies in LCA F4: Colne (Slaithwaite, Marsden), as identified in the 2015 Landscape Character Assessment for Kirklees. This is the deeply incised valley of the River Colne. Woodland cover is found clinging to the steep valley sides and cloughs. There are dense ribbons of urban and industrial development along the valley floors and sides. It is a busy landscape with lots of movement owing to transport corridors and urban development along the valley floor.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, as the development of this site is unlikely to result in harm to any designated asset. The effect on this SA objective is therefore negligible but uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 693m from the Huddersfield Narrow Canal candidate Local Wildlife Site; therefore development here could have a minor negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.

SA Objectives	SA Score	Justification
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 8: leisure and recreation, 10: sustainable transport and 19: climate change, and a potential significant negative effect was identified in relation to SA objective 5: amenity. This issue will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H537: Land east of Springwood Road, Thongsbridge, Holmfirth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	-	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>The majority of the site is within 41-45 minutes travel time of the nearest employment node (with a section to the north and the southern tip of the site within 36-40 minutes); therefore a minor negative effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	<p>The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.</p>
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of the site is within 11-15 minutes travel time of a primary school (with an area to the west within 6-10 minutes) and within 11-15 minutes of a secondary school (with an area to the west within 6-10 minutes). Therefore a significant positive effect is expected for this objective. Travel times to the nearest further education institute also vary across the site - the northern and south western parts of the site are within 31-35 minutes and the central part of the site is within 36-40 minutes.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+/0	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Levels of access to healthcare facilities vary across the site. The most accessible part of the site is the southern tip of</p>

SA Objectives	SA Score	Justification
		the site of which is within 11-15 minutes of a GP and within 56-60 minutes from a hospital. The least accessible part of the site is the northern edge which is within 16-20 minutes travel time of a GP and within 46-50 minutes of a hospital. In between those areas journey times to healthcare facilities vary in between those two extremes. Therefore a mixed effect is expected for this objective; minor positive for the southern tip of the site and negligible for the northern edge of the site. The site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are a number of existing residential properties within close proximity of the site to the south and west of the site. A minor negative effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	0	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of the site is within 11-15 minutes travel time of the nearest local centre (with an area in the north west and the southern tip of the site within 6-10 minutes) and within 16-20 minutes from the nearest town/district centre (with small areas in the west and south west within 11-15 minutes); therefore a negligible effect on this objective is expected.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	The site is located within an area of semi-natural and natural greenspace which could be lost as a result of housing development. However, there is Holmfirth Sport Centre is approximately 165m south west of the site which is located within an area of school grounds and playing fields. This area of open space is also adjacent to an area of public playing fields which includes two children's play areas. Within 65m north of the site is a PRoW footpath however there is a river separating the footpath from the site making it less easily accessible. Approximately 125m to the east of the site is a PRoW footpath. To the south of the site approximately 140m away is an area of public playing fields. In addition, approximately 200m to the north west of the site is an area of park and gardens which contains three areas of children's play provision. Approximately 390m south east of the site is another area of semi-natural and natural greenspace which is located within another housing site option. To the north of the site approximately 450m there is an area of Green corridor/pedestrian/cycleway. Therefore a mixed significant positive and significant negative effect is expected for this objective.
9. Ensure all people are able to live in a decent home	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable

SA Objectives	SA Score	Justification
which meets their needs.		housing. This site is relatively small (3.29ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (3.29ha) and is on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land (the land is classed as grade 4).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (3.29ha) and is on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA F5: Holme & Hall Dyke (Holmfirth & Meltham), as identified in the 2015 Landscape Character Assessment for Kirklees. This landscape comprises steep incised valleys associated with the upper parts of River Holme and its tributaries. Mixed semi-natural woodlands are found along the waterways and on the steepest slopes of the valleys. There are contrasting levels of tranquillity throughout the LCA, influenced by proximity to development and roads. Perceptions of tranquillity and remoteness are greatest on the fringes of the National Park.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 490m from Hagg Wood Local Wildlife Site and approximately 695m from Round Wood, Brockholes Local Wildlife Site; therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and	-	The site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
people.		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. The site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as entirely 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: leisure and recreation (part of a mixed effect), 10: sustainable transport and 19: climate change. A potential significant negative effect was identified in relation to the SA objective 8: leisure and recreation (part of a mixed effect). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H538: Cross Lane (west), Stocksmoor

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The site is located within 36-40 minutes travel time of the nearest employment node. A negligible effect is expected on this SA objective.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects

SA Objectives	SA Score	Justification
		<p>will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The site is located within 6-10 minutes travel time of the nearest primary school. The site is located within 16-20 minutes travel time of a secondary school. Overall a significant positive effect is expected on this SA objective. The site is also located within 31-35 minutes travel time of a centre for further education.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	0	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The site is located within 21-25 minutes travel time of the nearest GP. The site is also located within 46-50 minutes travel time of the nearest hospital. Overall a negligible effect is expected on this SA objective.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is in close proximity to existing properties to the north, east and west on Cross Lane. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	-	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The site is located within 21-25 minutes travel time of a local centre. The site is also located within 21-25 minutes travel time of a town/district centre. Overall a minor negative effect is expected for this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	<p>The site is in close proximity to a number of open spaces which could be used by residents. A small park with inclusion for a children's playground is located to the north of the site within 110m. Allotments are also located to the north of the site within 120m. A footpath is accessible within 30m of the site to the south.</p> <p>As such given that the relative close proximity of these open spaces to the site may encourage new residents to make use of them a significant positive effect is expected on this SA objective.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.72ha); therefore a minor positive effect is likely.</p>
10. Secure an effective and	+	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of</p>

SA Objectives	SA Score	Justification
safe transport network which encourages people to make use of sustainable and active modes of transport.		transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to two of the eight features assessed. Therefore, a minor positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (0.72ha) on mainly greenfield land (the south eastern corner of the site appears to have been previously developed); therefore a minor negative effect on this SA objective is likely. The site is located on Grade 4 Agricultural Land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (0.72ha) on greenfield land (the south eastern corner of the site appears to have been previously developed); therefore development here is expected to have a minor negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E6: Fenay Beck Valley Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with large blocks of tree and woodland cover found on slopes. It is perceived as a tranquil landscape with a traditional rural feel, although this is impacted upon by the main roads and urban development around Shepley.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	The site is within 180m of Stocksmoor Grasslands which has been identified as a Candidate Local Wildlife Site to the north. Browns Knoll Meadows, a Local Wildlife Site is located further to the north of the site within 230m of the site. To the south of the site within 350m Upper and Lower Stones Wood has been designated as a Local Wildlife Site (part of the wood has been designated as a Local Geological Site). Birks Wood is within 540m of the site to the north east and has been identified as a Candidate Local Wildlife Site. The proximity of the site to these designated biodiversity and geodiversity features may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a significant negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood	-	This site is located on mostly greenfield land (the south eastern corner of the site appears to have been previously developed) and is not within Flood Zones 2 and 3; therefore a minor negative effect is likely given that the development

SA Objectives	SA Score	Justification
risk areas and ensure development does not contribute to increased flood risk for existing property and people.		of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of mostly greenfield land (the south eastern corner of the site appears to have been previously developed) meaning there are unlikely to be opportunities to reuse materials already onsite. A minor negative effect is therefore likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is classed as 'green' in terms of its access to two of the eight features assessed; therefore a minor positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education and 8: recreation and leisure and potential significant negative effects were identified for this site in relation to SA objective 14: biodiversity and geodiversity. These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.		

H539: Yew Tree Road / Burn Road, Birchencliffe

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of the site is located within 16-20 minutes travel time of the nearest employment node (the southern part of the site is located within 11-15 minutes travel time of the nearest employment node). A significant positive effect is expected on this SA objective.
2. Achieve an economy better capable of growth	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing

SA Objectives	SA Score	Justification
through increasing investment, innovation and Entrepreneurship.		provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The site is located within 11-15 minutes travel time of the nearest primary school. The majority of the site is located within 16-20 minutes travel time of a secondary school (a small part of the site to the south is located within 21-25 minutes of a secondary school). Overall a significant positive effect is expected on this SA objective. The site is also located within 16-20 minutes travel time of a centre for further education.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	++	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The site is located within 11-15 minutes travel time of the nearest GP. The majority of the site is also located within 21-25 minutes travel time of the nearest hospital (the northern part of the site is located within 16-20 minutes travel time of the nearest hospital). Overall a significant positive is expected on this SA objective.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is in close proximity to existing properties to the east on Prince Wood Lane. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is located within 6-10 minutes travel time of a local centre (the south western corner of the site is located within 5 minutes travel time of a local centre). The site is also located within 11-15 minutes travel time of a town/district centre. Overall a minor positive effect is expected for this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance	++/--?	The site is on land which has a footpath running through it, which could be lost as a result of housing development;

SA Objectives	SA Score	Justification
existing and support the provision of new recreation facilities and areas of open space and encourage their usage.		therefore a potential significant negative effect is identified. However, the site is also in close proximity to a number of additional open spaces which could be used by residents. The site is within 55m of a cemetery which is located to the west. A semi-natural and natural greenspace is located to the south of the site within 130m. A small park, children's playground and allotments are located within 240m to the north west of the site. Overall a mixed (significant positive and potential significant negative) effect is therefore identified on this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (5.16ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to eight of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively large site (5.16ha) on mainly greenfield land (a small part of the western side of the site appears to have been previously developed); therefore a significant negative effect on this SA objective is likely. The site is located on mostly Grade 4 Agricultural Land (the south western part of the site is located on Urban Land).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This is a relatively large site (5.16ha) on mostly greenfield land (a small part of the western side of the site appears to have been previously developed); therefore development here is expected to have a significant negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies mainly in an area classed as 'urban' in the 2015 Landscape Character Assessment for Kirklees.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is within 320m of Grimescar Wood which has been identified as a Candidate Local Wildlife Site to the north east. The relative proximity of the site to these designated biodiversity features may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.

SA Objectives	SA Score	Justification
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is located on mostly greenfield land (a small part of the western side of the site appears to have been previously developed) and is not within Flood Zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.</p>		

H540: Kirkbridge Coal Yard, Kirkbridge Lane, New Mill

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that	0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The site is located within 31-35 minutes travel time of the nearest employment node. A negligible effect is expected on

SA Objectives	SA Score	Justification
they are accessible.		this SA objective.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of the site is within 6-10 minutes travel time of the nearest primary school (a small part of the site to the south is located within 11-15 minutes travel time of the nearest primary school). The site is also located within 11-15 minutes travel time of the nearest secondary school. A significant positive effect is expected on this SA objective. The majority of the site is located within 26-30 minutes travel time of the nearest centre for further education (a small part of the site to the south is located within 31-35 minutes travel time of the nearest centre for further education).</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	0	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The site is located within 16-20 minutes travel time of the nearest GP. The site is also located within 46-50 minutes travel time of the nearest hospital. Overall a negligible effect is expected on this SA objective.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>The site is directly adjacent to the A616 along its eastern edge. It is considered that the close proximity of this major road may result in increased noise pollution affecting new residents at the site in the longer term and as such a significant negative impact on this SA objective is expected.</p>
6. Retain and enhance access to local services and facilities.	0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The site is located within 6-10 minutes travel time of a local centre. The site is also located within 16-20 minutes travel time of a town/district centre. Overall a negligible effect is expected for this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced

SA Objectives	SA Score	Justification
of crime.		by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	<p>The site is in close proximity to a number of open spaces which could be used by residents. A semi-natural and natural green space is accessible to the west of the site within 40m. Outdoor sports facilities are located to the north west of the site within 240m. Lydgate School provides further outdoor sports facilities within 280m to the west of the site. Outdoor sports facilities are also provided at Wooldale Junior School within 210m to the south west of the site.</p> <p>As such given that the relative close proximity of these open spaces to the site may encourage new residents to make use of them a significant positive effect is expected on this SA objective.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.54ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (0.54ha) on mostly greenfield land (it is recognised that the most northerly part of the site is on brownfield land); therefore a minor negative effect on this SA objective is likely. The site is located on Grade 4 Agricultural Land.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a relatively small site (0.54ha) on mostly greenfield land (it is recognised that the most northerly part of the site is on brownfield land); therefore development here is expected to have a minor negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development.</p> <p>The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA G8: Holme River Valley, as identified in the 2015 Landscape Character Assessment for Kirklees. This is the main valley of the River Holme, and it is a densely settled landscape. It is generally low lying and enclosed, with frequent deciduous woodland along watercourses and on the steeper slopes.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to	0?	The site is not within close proximity of any designated biodiversity features; Round Wood, Brockholes (a Local Wildlife

SA Objectives	SA Score	Justification
protect and enhance biodiversity and geodiversity.		Site) is the closest of such features but is located 1.25km to the north and as such a negligible effect is recorded on this SA objective. Given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development the effect is noted to be uncertain.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	--	This site is located on greenfield land and its majority is also located within Flood Zone 3 (it is recognised that the south eastern part of the site is not within Flood Zone 3); therefore a significant negative effect is likely given that the development of new housing on this greenfield land would increase the number of houses at high risk of flooding in the District as well as increasing the area of impermeable surfaces in Kirklees.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of greenfield land meaning there are unlikely to be opportunities to reuse materials already onsite. A minor negative effect is therefore likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is classed as 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: recreation and leisure, 10: transport and 19: climate change and potential significant negative effects were identified for this site in relation to SA objectives 5: amenity and 16: flood risk. These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.		

H541: Land at junction of Station Road and New Mill Road, Honley, Homfirth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment	+	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.

SA Objectives	SA Score	Justification
opportunities available for local people, and ensure that they are accessible.		This site is largely within 21 – 25 minutes travel time of the nearest employment node, whilst a small portion is within 16 – 20 minutes; therefore a minor positive effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>This site is within 6 - 10 minutes travel time of a primary and within 5 minutes of a secondary school. The site is also mainly within 11 – 15 minutes of a further education institute, although a small part in the south-west is within 6 – 10 minutes. Overall, there is likely to be a significant positive effect.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 6 - 10 minutes travel time of a GP and is mainly 41 – 45 minutes of a hospital, while a smaller part is within 36 – 40 minutes; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of residential properties around this site which may be affected by noise during the construction phase, including properties directly adjacent to the eastern boundary of the site. In addition, the site is located adjacent to an A road. A significant negative effect on this SA objective is therefore likely.</p>

SA Objectives	SA Score	Justification
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is within 6 – 10 minutes travel time of a local centre and mainly within 5 minutes of a town/district centre, although a small part in the west is located within 6 -10 minutes from a town/district centre; therefore a minor positive effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	<p>This site located within 600m of five outdoor sports facilities, four semi-natural and natural greenspaces, five areas with provision for children and young people, a green corridor and amenity greenspace. The site is not located within any area currently designated as open space and therefore a significant positive effect is likely.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing.</p> <p>This site is relatively small site (1.68ha); therefore a minor positive effect is likely.</p>
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to six of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (1.68ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is located on Grade 3 Agricultural Land.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a relatively small site (1.68ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development.</p> <p>The site is not located within close proximity of the Peak District National Park.</p>

SA Objectives	SA Score	Justification
		The site lies in LCA G8: Holme River Valley, as identified in the 2015 Landscape Character Assessment for Kirklees. This is the main valley of the River Holme, and it is a densely settled landscape. It is generally low lying and enclosed, with frequent deciduous woodland along watercourses and on the steeper slopes.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is located between 250 – 1000m of the Honley Station Cutting SSSI, the Hey Wood/West Wood candidate Local Wildlife Site and the Cliff Wood Candidate Local Wildlife Site; therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and is almost entirely within flood zone 2 (none of the land on which the site lies falls within flood one 3); therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative is likely.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to six of the eight features assessed. Therefore, a significant positive effect is likely</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: culture and recreation facilities, 10: sustainable transport and 19: climate change, and a potential significant negative effect was identified in relation to SA objective 5: amenity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H542

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++/--	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Levels of access to an employment node vary greatly throughout the site, from 16 – 20 minutes in central parts to more than 60 minutes in the north-east. In between these parts of the site, journey times to employment nodes vary in between those two extremes. Overall a mixed effect is likely, being significant positive for the central part of the site and significant negative for the north-eastern part.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?/--?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Levels of access to education facilities vary greatly throughout this site. The majority of the site is 11–15 minutes travel</p>

SA Objectives	SA Score	Justification
		<p>time to a primary school, while a small part in the west is within 6 – 10 minutes of the site and the north-east is over 60 minutes travel time. For secondary schools the journey time is between 41 - 45 minutes in the majority of the site, whilst a part in the south is within 46 – 50 and a part in the north-east is over 60 minutes travel time. A central part of the site is within 36 – 40 minutes a further education institute while journey times are over 60 minutes for north-eastern parts. On balance, the overall most accessible part of the site is the central area and the least accessible part is the north-eastern corner. In between those parts of the site, journey times to education facilities vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially minor positive for the central part of the site it and potentially significant negative for the north-eastern part.</p>
<p>4. Improve the health of local people and ensure that they can access the health and social care they need.</p>	0	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Levels of access to healthcare facilities vary throughout this site. The site is mainly within 16 – 20 minutes of a GP, while a small part is over 60 minutes. The site varies for access to hospitals, with a central part being within 41 – 45 minutes, the south and north-west within 46 – 50 minutes and the north-east being over 60 minutes travel time to a hospital. Overall a negligible effect is likely. The site is not within or adjacent to an AQMA.</p>
<p>5. Protect local amenity including avoiding noise and light pollution.</p>	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are existing residential properties adjacent to the site, which may be affected by noise during the construction phase. In, addition the site is in close proximity to a factory site. A significant negative effect on this SA objective is therefore likely.</p>
<p>6. Retain and enhance access to local services and facilities.</p>	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Levels of access to local centres and town/district centres vary throughout this site. The site is mainly within 6 - 10 minutes of a local centre, while a north-eastern part south eastern part of the site is more than 60 minutes from a local centre. Access to town/district centres is more varied, mainly being within 11 – 15 minutes of a town/district centre, while a small part in the west within 6 – 10 minutes and a part in the north-east is over 60 minutes from a town/district centre. Overall, a minor positive effect on this objective is expected for the site.</p>
<p>7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.</p>	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>

SA Objectives	SA Score	Justification
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	There are a number of footpaths and areas of open space within walking distance (600m) of the site which could be used by residents for sports and recreation, including three areas of natural and semi natural greenspace, an allotment, two outdoor sports facilities and five public footpaths. However, the site is also includes a Public Rights of Way footpath which could be lost as a result of housing development at this location. A mixed effect is therefore likely – a significant positive effect due to the number of recreational facilities, but a potential significant negative due to the potential loss of a footpath.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large site (15.51ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was assessed as being entirely or mainly 'green' for three of the eight features assessed. Therefore, a minor positive effect is likely.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively large site (15.51ha) on mainly greenfield land; therefore a significant negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land (the land is mainly classed as Grade 3, while the northern part of the site is classed as Urban Land).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This is a relatively large site (15.51ha) on mainly greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies mainly in LCA E7: Emley Moor Northern Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a landscape of gently undulating elevated slopes with abundant woodland cover. The proximity of the urban centres exerts an influence on landscape character with urban fringe land uses evident in many areas.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on Sheep Ings Farmhouse and the attached barn at the northern end of this site which are Grade II Listed Buildings. The loss of this area and its subsequent development could harm elements which contribute to the significance of these buildings. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance	--?	This site is contains the Briery Bank Wood Local Wildlife Site. There are also four others within 250 – 1000m, including Covey Clough Wood, Gregory Spring, Whitely wood and Liley Wood. Overall, due to the site containing a Local Wildlife

SA Objectives	SA Score	Justification
biodiversity and geodiversity.		Site, a significant negative effect is likely.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is located on greenfield land however most of the site is not within flood zones 2 and 3 (only a small area to the most northerly part of the site is located within flood zone 2 and 3); therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was assessed as being entirely or mainly 'green' for three of the eight features assessed. Therefore, a minor positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objective 9: affordable housing as well as SA objectives 1: employment, and 8: leisure and recreation (as part of a mixed overall effect), and potential significant negative effects were identified in relation to 5: amenity, 11: use of land, 12: character and 14: biodiversity and geodiversity as well as SA objectives 1: employment, 3: education and 8: leisure and recreation (as part of a mixed overall effect). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for	++/--	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.

SA Objectives	SA Score	Justification
local people, and ensure that they are accessible.		Access to an employment node varies across the site. A part of the site to the north is located within 6-10 minutes travel time of the nearest employment while the western part of the site is located more than 60 minutes travel time of the nearest employment node. Overall a mixed effect (significant positive/significant negative) is expected on this SA objective.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?/--?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The site is located within variable travel times of the nearest primary school and secondary school. The eastern part of the site is located within 6-10 minutes travel time of a primary school while the western part of the site is located within 60 minutes travel time of a primary school. The eastern part of the site is located within 16-20 minutes travel time of a secondary school while the western part of the site is located more than 60 minutes travel time of the nearest secondary school. Overall a mixed effect (significant positive/significant negative) is expected on this SA objective.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	++/--	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The site is located within variable travel times of the nearest GP and hospital. The eastern part of the site is located within 5 minutes travel time of a GP while the eastern part of the site is located more than 60 minutes travel time of a GP. The eastern part of the site is located within 21-25 minutes travel time of a hospital while the western part of the site is located more than 60 minutes travel time of a hospital. Overall a mixed effect (significant positive/significant negative) is expected on this SA objective.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is in close proximity to existing residential properties to the north on Ravensthorpe Road and Lees Hall Road. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.</p>

SA Objectives	SA Score	Justification
6. Retain and enhance access to local services and facilities.	++/--	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The site is located within variable travel times of a local centre and town/district centre. The eastern part of the site is located within 5 minutes travel time of a local centre while the western part of the site is located more than 60 minutes travel time of a local centre. Parts of the site to the north and to the east are located within 11-15 minutes travel time of a town/district centre while the western part of the site is located more than 60 minutes travel time of a town/district centre. Overall a mixed effect (significant positive/significant negative) is expected for this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	The site is on land which has been designated as allotments to the east and which also contains a number of access routes all of which could potentially be lost as a result of housing development; therefore a potential significant negative effect is identified. However, the site is also in close proximity to a number of additional open spaces which could be used by residents. Outdoor sports facilities, allotments and an amenity greenspace are all located adjacent to the site to the north by Ravenscourt Road. A semi-natural and natural greenspace is located to the north of the site within 200m on the other side of Ravenscourt Road. The closest children's playground to the site is located within 175m by Lees Holm. Overall a mixed (significant positive and potential significant negative) effect is therefore identified on this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (156.02ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to one of the eight features assessed. Therefore, a minor positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	--	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively large site (156.02ha) on greenfield land; therefore a significant negative effect on this SA objective is likely. The site is mostly located on land which has been identified as Grade 3 Agricultural Land (small parts of the site to the north east and south and east have been identified as Urban Land and Grade 4Agricultural Land respectively).</p>
12. Protect and enhance the character of Kirklees and the	--?	This is a relatively large site (156.02ha) on greenfield land; therefore development here is expected to have a significant negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the

SA Objectives	SA Score	Justification
quality of the landscape and townscape.		development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E7: Emley Moor Northern Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a landscape of gently undulating elevated slopes with abundant woodland cover. The proximity of the urban centres exerts an influence on landscape character with urban fringe land uses evident in many areas.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	Jordan Wood and Oliver Wood is a Local Wildlife Site located adjacent to the site to the west. Whitley Wood another Local Wildlife Site is to the west of the site within 85m. The site is also located within 640m of Sparrow Wood which has been designated as a Local Wildlife Site and a Local Nature Reserve to the north. The relative proximity of the site to these designated biodiversity features may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a significant negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is located on greenfield land and is not within Flood Zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of greenfield land meaning there are unlikely to be opportunities to reuse materials already onsite. A minor negative effect is therefore likely on this SA objective.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>This site is classed as 'green' in terms of its access to one of the eight features assessed; therefore a minor positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 4: health, 6: access to local services and 8: recreation and leisure (it should be noted that the overall scores for these five SA objectives were recorded as mixed), and potential significant negative effects were identified for this site in relation to SA objectives 1: employment, 3: education, 4: health, 6: access to local services, 8: recreation and leisure (it should be noted that the overall scores for these five SA objectives were recorded as mixed), 11: land use, 12: landscape and townscape and 14: biodiversity and geodiversity. These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.</p>		

H545: Land to the south of Cockley Hill Lane, Kirkheaton, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>This site is within 36-40 minutes travel time of the nearest employment node; therefore a negligible effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. SA Objectives	SA Score	Justification
		15 minutes of a primary school. The site is also within 36-40 minutes travel time to a secondary school and a further education institute. Therefore, development of the site could have a minor positive effect on this SA objective.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 5 minutes travel time of a GP. The majority of the site is within 41-45 minutes travel time of a hospital, with a portion to the east of the site within 46-50 minutes. The site is not within or adjacent to an AQMA. Therefore, a minor positive effect on this SA objective is expected.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>The north of the site is adjacent to several residential properties which may be affected by noise during the construction phase. In addition, adjacent to the south west of the site, is a large farmhouse. Therefore, a minor negative effect on this SA objective is predicted.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is within 5 minutes travel time of a local centre, with a small area to the east within 6-10 minutes travel time to a local centre. In addition, the site is within 16-20 minutes of a town/district centre. Therefore, a minor positive effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	Several areas of open space and recreation facilities are present to the north west of the site – an area of semi-natural and natural greenspace (205m), allotments (210m), amenity greenspace (260m), a park and garden (435m), and a children's playground (460m). A PRoW is present along the western boundary of the site. Therefore, a significant positive effect on this SA objective is predicted.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.14ha); therefore a minor positive effect is likely.
10. Secure an effective and	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of

SA Objectives	SA Score	Justification
safe transport network which encourages people to make use of sustainable and active modes of transport.		transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to three of the eight features assessed. Therefore, a minor positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (1.14ha) on greenfield land and it is not within an area of high quality agricultural land (it is classed as Grade 4). Therefore, a minor negative effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (1.14ha) on greenfield land and is not within close proximity of the Peak District National Park. Therefore, development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site lies in LCA E7: Emley Moor Northern Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a landscape of gently undulating elevated slopes with abundant woodland cover. The proximity of the urban centres exerts an influence on landscape character with urban fringe land uses evident in many areas.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that the development of the site is unlikely to result in harm to any designated heritage asset; therefore a negligible effect on this SA objective is likely.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	The site is 1.1km from the nearest designated sites - the Dalton Bank Local Nature Reserve and (Approved) Local Wildlife Site to the north west, and Hutchin Wood (Candidate) Local Wildlife Site to the south east of the site. Therefore, development may have a negligible effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site is classed as 'green' in terms of its access to three of the eight features assessed; therefore a minor positive effect is likely.</p>
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objective 8: leisure and recreation, with no potential significant negative effects predicted. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H546: Land to the north-west of 636-646 Halifax Road, Hightown

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>This site is within 11-15 minutes travel time of the nearest employment node; therefore a significant positive effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however, this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>This site is within 6-10 minutes travel time to a primary school and within 11-15 minutes travel time to a secondary school. Therefore, it is likely to have a significant positive effect. The site is also within 25 minutes travel time to a further education institute.</p>
4. Improve the health of local	+	The location of housing sites will not affect the number or location of healthcare facilities; however, where healthcare

SA Objectives	SA Score	Justification
people and ensure that they can access the health and social care they need.		<p>facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 6-10 minutes travel time to a GP and within 31-35 minutes travel time to a hospital aside from the far south western area which is within 31-35 minutes travel time to a hospital. However, the overall a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is adjacent to the A649 (Halifax Road) to the south which may mean that residents in these parts of the site east which may be affected by noise during the construction phase. There are existing residential properties adjacent to the site to the east and north of the site which may be affected by noise during the construction phase. A significant negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is within 11-15 minutes travel time to a local centre, and a town/district centre. Therefore, overall a minor positive effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	<p>The site is located within a semi-natural and natural greenspace, which could be lost as a result of development. However, this site is within 600m of more than three recreational and leisure facilities, including several PROWs, the closest being immediately north of the site. Open space designations nearby include one park and garden and two amenity greenspaces. Other areas include four outdoor sports facilities and four areas containing provision for children and young people. However, the outdoor sports facility to the south of the site is located within housing option site H198 and as such could be lost as a result of development. Therefore, overall a mixed (significant positive and potential significant negative) effect is therefore identified.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (0.4 ha); therefore, a minor positive effect is likely.</p>
10. Secure an effective and safe transport network which	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p>

SA Objectives	SA Score	Justification
encourages people to make use of sustainable and active modes of transport.		In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (0.4 ha) on mainly greenfield land; therefore, a minor negative effect on this SA objective is likely. This site is designated as urban land quality.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a small site (0.4 ha) mainly on greenfield land, therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	The site is not within close proximity of any designated biodiversity features; Hunsworth Great Wood and Little Wood Candidate Local Wildlife Site is the closest of such features but is located approximately 2.6 km to the north east and as such, a negligible effect is recorded on this SA objective. Given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development the effect is noted to be uncertain.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is mainly on greenfield land and is outside of flood zone 3; therefore, a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.

SA Objectives	SA Score	Justification
of waste close to source.		This site is mainly on greenfield land; therefore, a potential minor negative effect is identified.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site is classed as mainly or entirely 'green' in terms of its access to seven of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: leisure and recreation, 10: sustainable transport and 19: climate change and potential significant negative effects were identified in relation to SA objectives 5: amenity and 8: leisure and recreation. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H547: POL Parkwood Road, Golcar, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The site is within 36-40 minutes travel time of the nearest employment node; therefore a negligible effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.

SA Objectives	SA Score	Justification
		The site is within 11-15 minutes travel time of the nearest primary school and the majority of the site is within 41-45 minutes of a secondary school (with an area in the west within 46-50 minutes). Therefore a minor positive effect is expected for this objective. The majority of the site is also within 26-30 minutes travel time of a further education institute (with a small area in the south east within 21-25 minutes).
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health. The site is within 11-15 minutes travel time of the nearest GP and the majority of the site is within 41-45 minutes of the nearest hospital (with an area in the west within 46-50 minutes). Therefore a minor positive effect is expected for this objective. The site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are a number of existing residential properties within close proximity of the site to the south and east of the site. A minor negative effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	0	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The site is within 11-15 minutes travel time of the nearest local centre and the majority of the site is within 16-20 minutes of a town/district centre (with an area in the south east within 11-15 minutes). Therefore a negligible effect is expected for this objective.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	Approximately 70m north of the site is a bridleway. In addition there is a PRow footpath approximately 95m to the east of the site. Approximately 130m to the east of the site is an area of park and gardens which contains two areas of children's play provision. Also, approximately 245m south east of the site is a private cricket ground. There is also a private bowling green approximately 160m to the north east of the site. To the east of the site is an area of allotments however this is located within another housing site option. Approximately 340m to the east of the site is an area of amenity greenspace which is adjacent to an area of semi-natural and natural greenspace (which is within another housing site option). Therefore a significant positive effect is expected for this objective.
9. Ensure all people are able	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the

SA Objectives	SA Score	Justification
to live in a decent home which meets their needs.		proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.98ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as entirely 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (0.98ha) and is on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land (the land is classed as urban).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (0.98ha) and is on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in an area classed as 'urban' in the 2015 Landscape Character Assessment for Kirklees.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the adjoining Longwood Edge Conservation Area and 1-5 Parkwood Road which are Grade II Listed Buildings. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 820m from Longwood Edge Quarry, Huddersfield Local Geodiversity Site; therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	The site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings

SA Objectives	SA Score	Justification
use, recovery and recycling of waste close to source.		and materials although this is uncertain depending on the previous use of the site. The site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as entirely 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 8: leisure and recreation, 10: sustainable transport and 19: climate change. No potential significant negative effects were identified in relation to any of the SA objectives.		

H548: Land east of Abbey Road North, Shepley, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++/+	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. Levels of access to an employment node vary throughout the site, from 16 - 20 minutes in the north to 26 – 30 minutes in central and eastern parts. In between these parts of the site, journey times to employment opportunities vary in between those two extremes. Overall a mixed effect is likely, being significant positive for the north of the site and minor positive for the rest of the site.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?/0?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects

SA Objectives	SA Score	Justification
		<p>will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Levels of access to education facilities vary throughout this site from 6 - 10 minutes travel time to a primary school in the north, to 16 – 20 minutes for eastern parts. For secondary schools the journey time is 21 – 25 minutes throughout the site, whilst the journey time is mainly 31 – 35 minutes for further education facilities, although a smaller part is within 36 – 40 minutes. Therefore a mixed effect on this objective is expected – potentially minor positive for the north and potentially negligible for the least accessible parts.</p>
<p>4. Improve the health of local people and ensure that they can access the health and social care they need.</p>	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is mainly 11 -15 minutes travel time of a GP, while a smaller part is within 6 – 10 minutes. The site is mainly within 51 – 55 minutes of a hospital while a smaller part is within 46 – 50 minutes. Therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
<p>5. Protect local amenity including avoiding noise and light pollution.</p>	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are existing residential properties in close proximity the site, which may be affected by noise during the construction phase. In addition, there are two separate industrial site in close proximity or adjacent to the site boundary, whilst an A road bounds the western periphery and a railway is in close proximity to the north. A significant negative effect on this SA objective is therefore likely.</p>
<p>6. Retain and enhance access to local services and facilities.</p>	+/-	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Levels of access to local centres and town/district centres vary throughout this site. The northern and southern parts of the site are within 5 minutes of a local centre and the eastern and central part is 11 -15 minutes from a local centre. The northern part of this site is within 21 – 25 minutes of a town/district centre, whilst the eastern and central parts are over 31 – 35 minutes from a town/district centre. In between these areas, journey times to local and town/district centres vary in between those two extremes. Overall, a mixed effect is expected, a minor positive effect on this objective is expected in north and south and a minor negative for the least accessible areas in the eastern and central parts of the site.</p>
<p>7. Make our communities safer by reducing crime, anti-social behaviour and the fear</p>	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced</p>

SA Objectives	SA Score	Justification
of crime.		by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There is an area of semi-natural and natural greenspace and also an area of amenity greenspace approx. 280m south-west. There is also a outdoor sports facility with associated provision for children and young people approx. 360m to the south-west of this site. In addition, there is an allotment approx. 540m south-west, whilst there are also two PRow's in close proximity to the east of the site. A significant positive effect is therefore likely.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small site (3.56ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was assessed as being entirely or mainly 'green' for three of the eight features assessed. Therefore, a minor positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (3.56ha) on mainly greenfield land. The site is located on Grade 3 Agricultural Land); therefore a minor negative effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (3.56ha) on mainly greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E6: Fenay Beck Valley Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with large blocks of tree and woodland cover found on slopes. It is perceived as a tranquil landscape with a traditional rural feel, although this is impacted upon by the main roads and urban development around Shepley.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance	-?	This site is approximately 320m from the Yew Tree Wood Local Wildlife Site and; therefore development here could have a minor negative effect on this SA Objective.

SA Objectives	SA Score	Justification
biodiversity and geodiversity.		
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is mainly on greenfield land and but is not located within flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was assessed as being entirely or mainly 'green' for three of the eight features assessed. Therefore, a minor positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 8: leisure and recreation and also 1: employment (as part of a mixed effect). Potential significant negative effects were identified in relation to SA objective 5: amenity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H549: POL, Swallow Lane, Golcar, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that	0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. This site is 36 - 40 minutes travel time of the nearest employment node; therefore a negligible effect on this objective is

SA Objectives	SA Score	Justification
they are accessible.		expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>This site is within 6-10 minutes travel time of a primary and 31 – 35 minutes of a secondary school. The site is also within 21 – 25 minutes of a higher education facility so is likely to have a minor positive effect.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 6-10 minutes travel time of a GP and within 41 - 45 minutes of a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are residential properties within 100m which may be affected by noise during the construction phase, including properties directly adjacent to the northern and western boundary of the site. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is within 6 – 10 minutes travel time of a local centre and within 11 -15 minutes of a town/district centre; therefore a minor positive effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.

SA Objectives	SA Score	Justification
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site located adjacent to an outdoor sports facility and within 60m of amenity greenspace. There is an area with provision for children and young people and a park and garden approx. 550m to the southeast. In addition, there is an area of semi natural and natural greenspace approximately 420m to the north-west and further areas which provide for children and young people as well as amenity greenspace 530 and 540m to the north-west respectively. The site is not located within any area currently designated as open space and therefore a significant positive effect is likely.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.41ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (1.41ha) on mainly greenfield land and is of lower quality agricultural land (the western part of the site is located on Grade Agricultural Land and the eastern part of the site is located on Urban Land); therefore a minor negative effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (1.41ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not in close proximity to the Peak District National Park. The site lies in LCA F4: Colne (Slaithwaite, Marsden), as identified in the 2015 Landscape Character Assessment for Kirklees. This is the deeply incised valley of the River Colne. Woodland cover is found clinging to the steep valley sides and cloughs. There are dense ribbons of urban and industrial development along the valley floors and sides. It is a busy landscape with lots of movement owing to transport corridors and urban development along the valley floor.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to	0?	The closest site designated for its biodiversity and geodiversity interests is the Shaw Wood Local Wildlife Site which is

SA Objectives	SA Score	Justification
protect and enhance biodiversity and geodiversity.		over 1500m from the site; therefore development here could have a negligible effect on this SA Objective. The negative effect is recorded as uncertain given that development at this location may allow for increased habitat connectivity etc through measures sure as the provision of green infrastructure.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is mainly on greenfield land but is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is mainly on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 8: leisure and recreation facilities, 10: sustainable transport and 19: climate change. No potential significant negative effects for this site in relation to any of the SA objectives were identified.		

H550: Carr Top Lane, Golcar, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that	0	While the location of housing sites will not influence, the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. Most of this site is within 36-40 minutes travel time of the nearest employment node, although the northern part is

SA Objectives	SA Score	Justification
they are accessible.		within 31-35 minutes. Therefore a negligible effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The site is within 6-10 minutes travel time of a primary school and within 31-35 minutes of a secondary school, as well as being within 21-25 minutes of a further education institute. Therefore a minor positive effect on this objective is likely.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The site is within 6-10 minutes travel time of a GP and is mainly within 36-40 minutes of a hospital (although an area in the north is within 31-35 minutes). Therefore a minor positive effect on this objective is expected. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are residential properties adjacent to the west and north of the site which may be affected by noise during the construction phase; therefore a minor negative effect on this SA objective is expected.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Just over half of the site is within 6-10 minutes travel time of a local centre and the northern part is within 5 minutes travel time to a local centre. The entire site is within 6-10 of a town/district centre. Therefore a minor positive effect on this objective is expected overall.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the

SA Objectives	SA Score	Justification
		effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	<p>As this site currently appears to comprise of allotments, there could be a significant negative effect if the development of the site results in the loss of this open space.</p> <p>However, there are a variety of open spaces available within 600 m of the site, including amenity greenspace, outdoor sports facilities, provisions for young children, parks and gardens and semi-natural greenspaces, most of which are within approximately 300 m north of the site. In addition, there is a public footpath along the eastern boundary of the site and a number of others within 600 m. Therefore, a significant positive effect is also likely in relation to access to recreation and a mixed effect is likely overall.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is quite small (0.41 ha); therefore a minor positive effect is expected.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as 'green' in terms of its access to five out of eight features assessed. Therefore, a significant positive effect on this objective is expected.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (0.41 ha) on greenfield land; therefore a minor negative is expected. The site is not within an area of high quality agricultural land, being classed as 'urban' land.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a small site (0.41 ha) on a low-density allotment; therefore development here could have a minor negative effect.</p> <p>However, the site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA F4: Colne (Slaithwaite, Marsden), as identified in the 2015 Landscape Character Assessment for Kirklees. This is the deeply incised valley of the River Colne. Woodland cover is found clinging to the steep valley sides and cloughs. There are dense ribbons of urban and industrial development along the valley floors and sides. It is a busy landscape with lots of movement owing to transport corridors and urban development along the valley floor.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	<p>Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the Grade II Listed Buildings on Brook Lane, southeast of the site, and on Clay Well, to the northeast. The loss of this area and its subsequent development could harm elements which contribute to the significance of these buildings.</p> <p>The site is also within the boundary of the Golcar Conservation Area. The loss of this, currently, open area and its subsequent development could harm elements which contribute to the significance of this area.</p>

SA Objectives	SA Score	Justification
		The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is within approximately 625 m of Huddersfield Narrow Canal Local Wildlife Site; therefore development here could have a minor negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is expected.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five out of the eight features assessed. Therefore, a significant positive effect on this objective is expected.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 8: access to recreation (part of a mixed effect overall), 10: sustainable transport, and 19: contribution to climate change; and a potential significant negative effect was identified in relation to SA objective 8: access to recreation (as part of a mixed effect overall). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H551: Holme Avenue, Dalton, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	+	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Most of this site is within 26-30 minutes travel time of the nearest employment node, although the north-eastern corner is within 21-25 minutes. Therefore a minor positive effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Most of this site is within 6-10 minutes travel time of a primary school, though the eastern part is within 11-15 minutes. The site is also within 21-25 minutes of a secondary school. So a minor positive effect is likely.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 10 minutes travel time of a GP and most of the site is within 36-40 minutes of a hospital, though a narrow sliver of the site to the north is within 31-35 minutes of a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is immediately surrounded on three sides by residential properties which may be affected by noise during the construction phase. Therefore a significant negative effect on this SA objective is therefore likely.</p>

SA Objectives	SA Score	Justification
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Most of this site is within 11-15 minutes travel time of a local centre (though the northern corner is within 10 minutes) and most of the site is within 6-10 minutes of a town/district centre (though the eastern corner is within 15 minutes); therefore a minor positive effect is expected.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There is a variety of open spaces available within 600 m of the site, including several, large semi-natural/natural greenspaces to the south and west, allotments to the north and west, a large park to the north and various MUGA and private bowling greens. In addition, there is a public footpath along the eastern boundary of the site and a number of others within 600 m of the site. Therefore, a significant positive effect is expected in relation to this SA objective given that the relative proximity of these facilities to the site may encourage new residents to make use of them.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.65 ha); therefore a minor positive effect is expected.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (0.65 ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land, being classed as 'urban' land.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a relatively small site (0.65 ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development.</p> <p>The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in an area classed as 'urban' in the 2015 Landscape Character Assessment for Kirklees.</p>
13. Conserve and enhance	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, as

SA Objectives	SA Score	Justification
the historic environment, heritage assets and their settings.		development is unlikely to result in harm to any designated heritage asset. The effect on this SA objective could be negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is generally more than 250 m away from any designated sites and more than 1 km from an statutory designated sites. The site is within 250 m of several small National Forest Inventory woodlands and within 1 km of an Ancient Woodland Inventory forest. It is also just within (approximately 975 m) of a Candidate Local Wildlife Site (Hey Lane). Therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is classed as 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives: 8: leisure and recreation, 10: sustainable transport, and 19: climate change. No potential significant negative effect were identified for this site in relation to any of the SA objectives it was scored against. These issues will need to be considered further in terms of enhancement, which may be achieved through Local Plan policies.		

H552: Land to the north of 271 Cliffe Lane, Gomersal, Cleckheaton

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Most of the site is within 16-20 minutes travel time of the nearest employment node, though the north-western corner is within 21-25 minutes travel time; therefore a significant positive effect overall on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	<p>The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.</p>
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Levels of access to education facilities vary within this site. The majority of this site is within 11-15 minutes of the nearest primary school and is also within 11-15 minutes of the nearest secondary school (although a small area in the north-western corner of the site is 16-20 minutes from a primary school and 16-20 minutes from a secondary school). Therefore, a potentially significant positive effect is likely overall.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The majority of this site is within 11-15 minutes of a GP and 46-50 minutes of a hospital (although an area in the south is within 6-10 minutes of a GP and 41-45 minutes of a hospital). Therefore, a minor positive effect is likely overall.</p> <p>The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is within 100 m of residential properties which may be affected by noise during construction. It is also adjacent, along the western boundary, to what appear to be industrial units which may mean the residents of the site could be affected by industrial noise. Therefore, a significant negative effect is identified.</p>

SA Objectives	SA Score	Justification
6. Retain and enhance access to local services and facilities.	+/-	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Levels of access to local and town/district centres vary within this site. The southern edge of the site is within 11-15 minutes of a local centre, while the north-western tip is within 26-30 minutes and travel times between those parts of the site vary between those extremes. The southern part of the site is also within 11-15 minutes of a town/district centre, while the central and northern parts of the site are within 16-20 minutes of a town/district centre. Therefore a mixed effect is likely overall – minor positive for the southern edge of the site and minor negative for the northwest.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	A public footpath runs through the site from south to north and if development was to proceed at this location this access route could be lost. As a result a potential significant negative effect is recorded for this SA objective. There are however also several open areas located within 600 m of the site, primarily to the south of the site, including cemeteries, amenity greenspace, small areas which provide for children and young people, and semi-natural/natural greenspace. This variety of greenspaces within close proximity of the site could result in significant positive effect given that new residents may be more likely to make use of these facilities. Overall a mixed effect (significant positive/potential significant negative) is expected on this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.74 ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mostly 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a small site (1.74 ha) on greenfield land with less than half of it (the northern area) being classified as Grade 3 agricultural land the majority of the site being classified as 'urban'. A minor negative effect is therefore expected.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a relatively small site (1.74 ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective, although this is uncertain depending on the design of the development.</p> <p>The site is not within close proximity of the Peak District National Park.</p>

SA Objectives	SA Score	Justification
		The site lies mainly in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, because this area lies close to the boundary of the Gomersal Conservation Area. The loss of this currently-open area and its subsequent development could harm elements which contribute to the significance of this area. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 880 m from the Oakwell Park Local Nature Reserve. Therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: leisure and recreation (part of a mixed effect overall), 10: sustainable transport and 19: climate change. Potential significant negative effects were identified in relation to SA objectives 5: noise and 8: leisure and recreation (part of a mixed effect overall). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H553

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Most of this site is within 36-40 minutes travel time of the nearest employment node (although a small area at the northern tip is within 31-35 minutes); therefore a negligible effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Just over half of this site is within 11-15 minutes travel time of a primary school (although an area in the north is within 6-10 minutes). Most of the site is also within 31-35 minutes of a secondary school (although an area in the north is within 36-40 minutes); therefore a minor positive effect is likely overall.</p>

SA Objectives	SA Score	Justification
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Levels of access to healthcare facilities vary throughout this site. The northern part of the site is within 5 minutes travel time of a GP, while the southern tip is within 11-15 minutes and the centre is within 6-10 minutes. Most of the site is within 41-45 minutes of a hospital, with a small area in the north being within 46-50 minutes travel time. Despite the variations in time, overall the whole site is likely to have a minor positive effect. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is immediately adjacent to residential properties, on the north and southwest boundaries which may mean that residents in those parts of the site are affected by construction noise in the short term. There is also a clay quarry within approximately 150 m of the southeast tip of the site. Therefore, the effect on this SA objective is likely to be minor negative overall.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Most of the site is within 6-10 minutes travel time of a local centre, with the northern area being within 5 minutes, and most of the site is within 11-15 minutes of a town/district centre, with a small area in the north being within 16-20 minutes; therefore a minor positive effect is expected.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	<p>A small area of land within the site, in the north, is used as allotments with a semi-natural greenspace bordering it. Therefore, there could be a significant negative effect on this SA objective if that land use is lost as part of the development of the site although this is not yet known. There are also several outdoor sports facilities within 600 m, including immediately adjacent to the allotments in the north, in addition to parks and gardens, amenity greenspace and provisions for young people within 600 m. Additionally, there are at least three public footpaths crossing the site itself. A mixed (significant positive and potential significant negative) effect is therefore identified.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (2.06 ha); therefore a minor positive effect is likely.</p>

SA Objectives	SA Score	Justification
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (2.06 ha) on greenfield land; therefore a minor negative effect on this SA objective is likely.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a relatively small site (2.06 ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development.</p> <p>The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA E7: Emley Moor Northern Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a landscape of gently undulating elevated slopes with abundant woodland cover. The proximity of the urban centres exerts an influence on landscape character with urban fringe land uses evident in many areas.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	<p>Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment.</p> <p>The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	<p>This site is within 850 m from the Dalton Bank Local Nature and just about 1 km from the Round Wood Local Wildlife Site; therefore development here could have a minor negative effect on this SA Objective.</p>
15. Reduce air, water and soil pollution.	0	<p>This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.</p>
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	<p>This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.</p>
17. <p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 8: leisure and recreation (as part of a mixed effect), 10: sustainable transport and 19: climate change; and a potential significant negative effect was identified in relation to SA objective 8: leisure and recreation (as part of a mixed effect). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H554: Land east of Springwood Road, Thongsbridge, Holmfirth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	-	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Most of the site is within 41-45 minutes travel time of the nearest employment node, though a small area at the southern tip is within 36-40 minutes; therefore a minor negligible effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Most of this site is within 11-15 minutes travel time of a primary school, with the area in the southwest being within 6-10 minutes. Similarly most of the site is within 6-10 minutes of a secondary school, with a small area along the</p>

SA Objectives	SA Score	Justification
		northeast boundary being within 11-15 minutes. So a significant positive effect could be likely.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Most of the site is within 6-10 minutes travel time of a GP, with the north-eastern area being within 15 minutes, and most of the site is within 56-60 minutes of a hospital, with the southern tip being within 55 minutes; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of residential properties near the site to the southeast, and one property to the northwest, which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Most of the site is within 11-15 minutes travel time of a local centre, with the southern tip being within 6-10 minutes, and most of the site is within 11-15 minutes of a town/district centre, with the north-eastern area being within 20 minutes; therefore a minor positive effect is expected.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	This site is wholly within an area of semi-natural and natural greenspace, which could be lost as a result of housing development. However, it is part of a much larger area of greenspace, most of which is outside of the site. In addition, there are more than 5 outdoor sports facilities and more than 5 other semi-natural/natural greenspaces nearby, a couple of indoor sports facilities, a couple of areas for children and a footpath to the east of the site, much of this within 300-400 m on all sides. A mixed (significant positive and potential significant negative) effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (0.74 ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.

SA Objectives	SA Score	Justification
use of sustainable and active modes of transport.		In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mostly 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a small site (0.74 ha) entirely on greenfield land (Agricultural Classification Grade 4); therefore a minor negative effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a small site (0.74 ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA F5: Holme & Hall Dyke (Holmfirth & Meltham), as identified in the 2015 Landscape Character Assessment for Kirklees. This landscape comprises steep incised valleys associated with the upper parts of River Holme and its tributaries. Mixed semi-natural woodlands are found along the waterways and on the steepest slopes of the valleys. There are contrasting levels of tranquillity throughout the LCA, influenced by proximity to development and roads. Perceptions of tranquillity and remoteness are greatest on the fringes of the National Park.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is within 150 m and 400 m of National Forest Inventory and Ancient Woodland Inventory sites. It is also approximately 600 m from the Hagg Wood candidate Local Wildlife Site and within 1 km of the Round Wood, Brockholes Local Wildlife Site; therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land but is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>This site is classed as mostly 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives: 3: education, 8: leisure and recreation (as part of a mixed result), 10: sustainable transport, and 19: climate change; and potential significant negative effects were identified in relation to SA objective 8: leisure and recreation (as part of a mixed result). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H555: Housing allocation H3.12, New Mill Road, Wooldale, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>This site is within 36 - 40 minutes travel time of the nearest employment node; therefore a negligible effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>This site is mainly within 11 - 15 minutes travel time of both a primary and secondary school, while a small part in the south is within 6 – 10 minutes for both primary and secondary schools also. The site is within 31 – 35 minutes of a further education institute. Overall, there is likely to be a significant positive effect.</p>

SA Objectives	SA Score	Justification
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is mainly within 6-10 minutes travel time of a GP, while a small part is within 16 – 20 minutes. The site is also mainly within 46-50 minutes of a hospital, while a small part is within 51 – 55 minutes; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of residential properties within 100m of the site which may be affected by noise during the construction phase, including properties directly adjacent to the southern and western boundary of the site. In addition, the site bounds the A635. A significant negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is within 6 - 10 minutes travel time of a local centre and mainly within 16 – 20 minutes of a town/district centre, although a smaller part is within 11 -15 minutes; therefore a minor positive effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	<p>This site is located adjacent to an area of natural and semi-natural greenspace, while there is also an area approx. 300m to the south-west. In addition there are four outdoor sport facilities within 50m both north and south, approx. 170m to the south-east, and 200m to the west, which also has an area with provision for children and young people. Furthermore, there is an allotment approx. 330m south, while two areas of amenity greenspace with provision for children and young people are located approx. 360m south-west and 320m south-east respectively. A footpath does run through the site however and this access route may be lost if development was to proceed at this location. As such a potential significant negative is identified. Overall a mixed effect (significant positive/potential significant negative) is expected on this SA objective.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing.</p> <p>This site is relatively small site (1.16ha); therefore a minor positive effect is likely.</p>

SA Objectives	SA Score	Justification
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (1.16ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is located on land which has been designated as Grade 4 Agricultural Land.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a relatively small site (1.16ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development.</p> <p>The site is not in close proximity to the Peak District National Park.</p> <p>The site lies mainly in LCA F5: Holme & Hall Dyke (Holmfirth & Meltham), as identified in the 2015 Landscape Character Assessment for Kirklees. This landscape comprises steep incised valleys associated with the upper parts of River Holme and its tributaries. Mixed semi-natural woodlands are found along the waterways and on the steepest slopes of the valleys. There are contrasting levels of tranquillity throughout the LCA, influenced by proximity to development and roads. Perceptions of tranquillity and remoteness are greatest on the fringes of the National Park.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	<p>Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	<p>The closest site designated for its biodiversity and geodiversity interests is the Hagg Wood Candidate Local Wildlife Site which is over 100m from the site; therefore development here could have a negligible effect on this SA Objective. The effect is recorded as uncertain given that new development may present opportunities to promote habitat connectivity through the provision of greeninfrastructure etc.</p>
15. Reduce air, water and soil pollution.	0	<p>This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.</p>
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	<p>This site is on greenfield land but is outside of flood zones 2 and 3; therefore a minor negative effect is likely.</p>

SA Objectives	SA Score	Justification
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: culture and recreation facilities, 10: sustainable transport and 19: climate change, and a potential significant negative effect was identified in relation to SA objective 5: amenity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H556: Land adjacent The Old Dower House, Green Balk Lane, Lepton

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++/+	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. Levels of access to an employment node vary greatly throughout the site, from 11 – 15 minutes in the west to 26 – 30 minutes in the east. In other parts of the site, journey times to employment nodes vary in between those two extremes. Overall a mixed effect is likely, being significantly positive for the north-eastern part of the site and minor positive for the eastern part.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?/++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects

SA Objectives	SA Score	Justification
		<p>will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Levels of access to education facilities vary throughout this site. The site is within 6 – 10 minutes travel time to a primary school. For secondary schools the journey time is between 16-20 minutes in the west to 36-40 minutes in the east of the site. In addition, the journey time to a further education institute ranges from 21 – 25 minutes in the west to 36 – 40 minutes in the east. In between those parts of the site, journey times to education facilities vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially significant positive for the western part and potentially minor positive for the rest of the site.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 6-10 minutes travel time of a GP and within 41 -45 minutes of a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of residential properties within 100m of the site which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is mainly within 6 – 10 minutes travel time of a local centre, while a small part is within 5 minutes. The site is mainly within 16 - 20 minutes of a town/district centre, while a small part is within 11 – 15 minutes; therefore a negligible effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open	++	<p>There is an area of natural and semi-natural greenspace within 400m to the southwest of the site. A significant positive effect is therefore likely. In addition, there is an outdoor sports facility both east and west at approx.520m from the site. There is an area of amenity greenspace approx. 580m to the west of the site. There are also various PRoW footpaths within close proximity to the site. Therefore, a significant positive effect is likely.</p>

SA Objectives	SA Score	Justification
space and encourage their usage.		
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small site (1.51ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was assessed as being entirely or mainly 'green' for four of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (1.51ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is on Grade 4 agricultural land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (1.51ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E6: Fenay Beck Valley Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with large blocks of tree and woodland cover found on slopes. It is perceived as a tranquil landscape with a traditional rural feel, although this is impacted upon by the main roads and urban development around Shepley.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, As the site forms part of the area of open countryside which contributes to the setting of the Scheduled Monument at Castle Hill. The loss of this area and its subsequent development could harm elements which contribute to the significance of this Scheduled Monument. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	This site is approximately 240m from the Lepton Great Wood Candidate Local Wildlife Site (part of the wood has been designated as a Local Geological Site); therefore development here could have a significant negative effect on this SA Objective. The effect is recorded as uncertain given that new development may present opportunities to promote habitat connectivity through the provision of greeninfrastructure etc.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate	-	This site is on greenfield land outside of flood zones 2 and 3; therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was assessed as being entirely or mainly 'green' for four of the eight features assessed. Therefore, a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment (as part of a mixed effect overall), 3: education (as part of a mixed effect overall), 8: leisure and recreation, 10: sustainable transport and 19: climate change and potential significant negative effects were identified in relation to SA objectives 5: amenity and 14: biodiversity and geodiversity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H557: The Paddock, Sherburn Grove, Birkenshaw

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	+	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. This site is largely within 21 – 25 minutes travel time of the nearest employment node, whilst a small portion is within 16 - 20 minutes; therefore a minor positive effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA

SA Objectives	SA Score	Justification
investment, innovation and Entrepreneurship.		objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>This site is mainly within 5 minutes travel time of a primary school, whilst a smaller part is within 6 - 10 minutes. The site is also mainly 21 – 25 minutes of a secondary school, whilst a smaller part is 16 – 20 minutes of a secondary school. The site is also mainly 21 – 25 minutes of a further education institute, whilst a smaller part is 26 – 30 minutes. Overall, there is likely to be a minor positive effect.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is mainly within 6-10 minutes travel time of a GP, whilst a small part is within 5 minutes travel time. The site is also 56 – 60 minutes of a hospital. Overall, a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of residential properties around this site which may be affected by noise during the construction phase (particularly on Sherburn Grove to the north and State Lane to the west), including properties directly adjacent to the western and northern boundary of the site. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	-	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is mainly within 26-30 minutes travel time of a local centre, whilst a smaller part is within 21 – 25 minutes. The site is also within 16 - 20 minutes of a town/district centre; therefore a minor negative effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the

SA Objectives	SA Score	Justification
		effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is located in close proximity to a number of open spaces which may encourage their use by new residents. Outdoor schools facilities are provided within 60m to the north west of the site and within 300m to the south west of the site respectively. A small park which includes provision for children and young people is also located to the south west of the site within 255. Beyond this park at St Paul's Church a sizeable cemetery is located within 320m of the site to the south west. Furthermore, there is an allotment adjacent to the south-western boundary of the site. The site is not located within any area currently designated as open space and therefore a significant positive effect is likely.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.94ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to three of the eight features assessed. Therefore, a minor positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (0.94ha) on mostly greenfield land (a small part of the site to the north is located on brownfield land) with a low agricultural grade (the site is located on land which is classified as Urban Land); therefore a minor negative effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (0.94ha) on greenfield land (a small part of the site to the north is located on brownfield land); therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not close to the Peak District National Park. The site lies in an area classed as 'urban' in the 2015 Landscape Character Assessment for Kirklees.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment. This site lies 280 metres from the boundary of the Registered Battlefield at Adwalton. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 560m from the Tong Moor approved Local Wildlife Site and Local Nature Reserve; therefore development here could have a minor negative effect on this SA Objective. The effect is recorded as uncertain given that new development may present opportunities to promote habitat connectivity through the provision of

SA Objectives	SA Score	Justification
		greeninfrastructure etc.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on mostly greenfield land (a small part of the site to the north is located on brownfield land) but is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on mostly greenfield land (a small part of the site to the north is located on brownfield land); therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to three of the eight features assessed. Therefore, a minor positive effect is likely
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objective 8: leisure and recreation facilities and no potential significant negative effects were identified for any of the sites in relation to any of the SA objectives. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H558: Land to the north of Birkhill Farm, Birkhill Crescent, Birkenshaw, Bradford, BD11 2EQ

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. This site is within 0 - 20 minutes travel time of the nearest employment node; therefore a significant positive effect on

SA Objectives	SA Score	Justification
they are accessible.		this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>This site is within 6-10 minutes travel time of a primary and 11 – 15 minutes of a secondary school. The site is also within 21 – 25 minutes of a further education institute. A significant positive effect is likely.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 5 minutes travel time of a GP and within 46-50 minutes of a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are some residential properties which may be affected by noise during the construction phase, including properties directly adjacent to the western boundary of the site. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is mainly within 16 - 20 minutes travel time of a local centre, while a smaller part is within 11 – 15 minutes. The site is also within 11 -15 minutes of a town/district centre; therefore a minor positive effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the

SA Objectives	SA Score	Justification
		effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is located approximately 150m of allotments and 390m of an outdoor sports facility to the north-west. To the west there is another outdoor sports facility and a park and garden with provision for children and young people 250m and 200m respectively. In addition, there are PRow footpaths within 600m. The site is not located within any area currently designated as open space and therefore a significant positive effect is likely.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.58ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to six of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (0.58ha) on mainly on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is located on land which has been classified as Urban Land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (0.58ha) on mainly greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in an area classed as 'urban' in the 2015 Landscape Character Assessment for Kirklees.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, as this site lies 420 metres from the boundary of the Registered Battlefield at Adwalton. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 870m from the Tong Moor approved Local Wildlife Site and Local Nature Reserve; therefore development here could have a minor negative effect on this SA Objective. The effect is recorded as uncertain given that new development may present opportunities to promote habitat connectivity through the provision of greeninfrastructure etc.

SA Objectives	SA Score	Justification
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is mainly on greenfield land but is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is mainly on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to six of the eight features assessed. Therefore, a significant positive effect is likely
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment 3: education, 8: culture and recreation facilities, 10: sustainable transport and 19: climate change. No potential significant negative effects were identified for any of the sites in relation to the SA objectives against which they were assessed.		

H559: Land to the east of Leeds Road, Chidswell, Batley

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. This site is mainly within 16 – 20 minutes travel time of the nearest employment node, whilst some smaller patches are within 11 - 16 minutes; therefore a significant positive effect on this objective is expected.
2. Achieve an economy	0	The location of housing sites will not affect the success of the local economy. While housing development may result in

SA Objectives	SA Score	Justification
better capable of growth through increasing investment, innovation and Entrepreneurship.		job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>This site is mainly within 6 - 10 minutes travel time of a primary school, while smaller patches are within 5 minutes. The site is mainly within 21 – 25 minutes of a secondary school, while a smaller part is within 26 – 30 minutes. The site is also mainly within 21 – 25 minutes of a further education institute, while a smaller part is within 26 – 30 minutes. Overall, a minor positive effect is likely.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	0	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is mainly within 16 - 20 minutes travel time of a GP, while smaller patches are within and within 11 – 15 minutes of a GP. The site is also mainly within 36 – 40 minutes of a hospital, while smaller patches are within 41 – 45 minutes. Overall, a negligible effect is expected.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are some residential properties which may be affected by noise during the construction phase, including properties directly adjacent to the western boundary of the site. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	0/-	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Travel time of a local centre is a mixed picture, with the southern tip being within 11 – 15 minutes, whilst the eastern part is within 26 – 30 minutes. In between these areas, journey times vary in between those two extremes. Travel time of a town/district centre is mainly within 16 – 20 minutes, while smaller patches are within 11 - 15 minutes. Therefore a mixed effect on this objective is expected – negligible for the southern tip of the site and minor negative for the rest of the site.</p>
7. Make our communities safer by reducing crime, anti-	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting,

SA Objectives	SA Score	Justification
social behaviour and the fear of crime.		could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site located within 100m of amenity greenspace, provision for children and young people and an outdoor sports facility. Amenity greenspace, provision for children and young people and an outdoor sports facility are available within 400m north of the site. The site is not located within any area currently designated as open space and therefore a significant positive effect is likely.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (7.98ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to three of the eight features assessed. Therefore, a minor positive effect is likely.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively large site (7.98ha) on greenfield land; therefore a significant negative effect on this SA objective is likely. The site is located on Grade 3 Agricultural Land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This is a relatively large site (7.98ha) on greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is located more than 500m from the Peak District National Park. The site mainly lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may

SA Objectives	SA Score	Justification
		exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	This site is not located within 1km of any site designated for its biodiversity or geodiversity; therefore development here would have a negligible effect on this SA Objective. The effect is recorded as uncertain given that new development may present opportunities to promote habitat connectivity through the provision of greeninfrastructure etc.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land but is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to three of the eight features assessed. Therefore, a significant positive effect is likely
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 8: leisure and recreation facilities, and 9: affordable housing and potential significant negative effects were identified in relation to SA objectives 11: use of land and 12: character. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H560: POL, Bankfield Lane, Kirkheaton, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment	0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.

SA Objectives	SA Score	Justification
opportunities available for local people, and ensure that they are accessible.		This site is within 36-40 minutes travel time of the nearest employment node; therefore a negligible effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of the site is within 6-10 minutes of a primary school however, a small area to the north west of the site is within 11-15 minutes of a primary school. The majority of the site is within 31-35 minutes of a secondary school, with two small sections at the north east and north west of the site within 36-40 minutes of a secondary school. Similarly, the majority of the site is within 31-35 minutes of a further education institute, with two small sections at the north east and north west of the site within 36-40 minutes of a further education institute.</p> <p>Therefore, development of the site could have a minor positive effect on this SA objective.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Half of the site, to the east and north east, is within 6-10 minutes travel time of a GP, while the other half, to the west and south, is within 11-15 minutes travel time of a GP. The majority of the site is within 41-45 minutes travel time to a hospital with a very small part of the north west of the site within 46-50 minutes travel time to a hospital. The site is not within or adjacent to an AQMA. Therefore, a minor positive effect is expected.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>The east and south east of the site is within close proximity to existing residential developments, particularly St Peters Crescent, which may be affected by noise during the construction phase. In addition, to the south of the site is a large farmhouse and steading buildings. Therefore, a minor negative effect on this SA objective is likely.</p>

SA Objectives	SA Score	Justification
6. Retain and enhance access to local services and facilities.	0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is within 6-10 minutes travel time of a local centre. In addition, the majority of the site is within 11-15 minutes of a town/district centre, with the north, north east and north west of the site within 16-20 minutes travel time of a town/district centre. Therefore, a negligible effect on this SA objective is predicted.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	<p>Within 85m north of the site are 3 amenity greenspaces and a children's playground. To the north east of the site, approximately 365m distance, are allotments and amenity greenspace. To the south west and west of the site, there are several areas of semi-natural and natural greenspace with the closest approximately 445m distance, in addition to amenity greenspace (450m), a green corridor (370m), and a cemetery (270m). The site is adjacent to a footpath along Stead Lane and is also within 25m of a local cycle path (to the east of the site).</p> <p>A significant positive effect is therefore identified.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.38ha); therefore a minor positive effect is likely.</p>
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (1.38ha) on greenfield land. Furthermore, the site is not within an area of high quality agricultural land (it is classed as Grade 4). Therefore a minor negative effect on this SA objective is likely.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a relatively small site (1.38ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development.</p> <p>The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA E7: Emley Moor Northern Fringes, as identified in the 2015 Landscape Character Assessment for</p>

SA Objectives	SA Score	Justification
		Kirklees. This is a landscape of gently undulating elevated slopes with abundant woodland cover. The proximity of the urban centres exerts an influence on landscape character with urban fringe land uses evident in many areas.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that the development of the site is unlikely to result in harm to any designated heritage asset; therefore a negligible effect on this SA objective is likely.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is within approximately 715 meters of the Dalton Bank Local Nature Reserve and Local Wildlife Site. Therefore, development could have a minor negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site is classed as 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 8: leisure and recreation, 10: sustainable transport and 19: climate change, with no potential significant negative effects predicted. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H561: POL, Balderstone Hall

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++/+	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Access to employment nodes vary across the site. The most accessible area is in the south-eastern corner of the site, which is within 16-20 minutes of an employment node. The least accessible area is in the far northern area of the site which is within 26-30 minutes travel time to an employment node. In between these two extremes, travel times to an employment node vary. Therefore, a mixed effect is likely, potentially significant positive effect the south-eastern corner of the site and minor positive for the far northern area of the site.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	<p>The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however, this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.</p>
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Most of this site is within 6-10 minutes travel time to a primary school, aside from the northern area of the site, which is within 5 minutes travel time. Approximately half the site is within 16-20 minutes travel time to a secondary school, while the other half is within 21-25 minutes travel time. Therefore, a minor positive effect is likely for this SA objective. This site is also within 30 minutes travel time to a further education institute.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	0	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Approximately half of this site is within 16-20 minutes travel time to a GP, while the other half is within 11-15 minutes travel time. Most of this site is also within 46-50 minutes travel time to a hospital, aside from a small area in the northern part of the site which is within 51-55 minutes travel time. Therefore a negligible effect is likely for this SA objective. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are residential properties to the south and west of the site and a school to the north which may be affected by noise and light pollution during the construction phase. A significant negative effect on this SA objective is therefore</p>

SA Objectives	SA Score	Justification
		likely.
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Most of this site is within 6-10 minutes travel time to a local centre, aside from a small area in the north which is within 11-15 minutes travel time. Most of this site is also within 11-15 minutes travel time to a town/district centre, aside from the northern part of the site, which is within 16-20 minutes travel time. Therefore a minor positive effect is likely for this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is within 600m of more than three recreational facilities. There are several Public Rights of Way (PRoW) immediately adjacent to the site to the north, south and west. Greenspace designations nearby include one amenity greenspace, one park and garden and one semi-natural and natural greenspace. There are also five recreational facilities within 600m of the site, the closest being immediately adjacent to the site in the north. Some of these designations are within other housing site options and could therefore be lost as a result of housing development. However, overall a significant positive effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (4.76ha); therefore, a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This site relatively small (4.76ha) and on greenfield land; therefore a minor negative effect on this SA objective is likely. Most of this site is on land designated as urban quality, aside from the far northern area of the site which is located on Grade 3 agricultural land.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This site is relatively small (4.76ha) and on greenfield land; therefore, development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development.</p> <p>The site is not within 500m of the Peak District National Park.</p>

SA Objectives	SA Score	Justification
		The site lies mainly in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	<p>Historic England has rated this site as 'orange' in terms of the potential for effects on a Group of Grade II Listed Buildings around Balderstone Hall to the east of this area. The loss of this area and its subsequent development could harm elements which contribute to the significance of these buildings.</p> <p>The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 930m from Sunny Bank Ponds Local Nature Reserve; therefore, development here could have a minor negative effect on this SA Objective. Given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development the effect is noted to be uncertain.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore, a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and is outside of flood zone 3; therefore, a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on greenfield land; therefore, a minor negative effect is likely.</p>
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or</p>

SA Objectives	SA Score	Justification
		entirely 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 8: leisure and recreation, 10: sustainable transport and 19: climate change. Potential significant negative effects were identified in relation to SA objective 5: pollution. This will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H562: Land south of Back Lane, Clayton West, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The whole of this site is within 6-10 minutes of an employment node; therefore a significant positive effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The whole of this site is within 6-10 minutes travel time of a primary school and within 16-20 minutes of a secondary school and further education facility. A significant positive effect is therefore likely for this SA objective.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	The majority of this site is within 6-10 minutes travel time of a GP and 51-55 minutes from a hospital. A minor positive effect is likely given the site's proximity to a GP. The site is not in or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are a number of existing residential properties within 100m north and west of the site, and residents of these properties could be exposed to noise and light pollution during construction. A minor negative effect is therefore likely.

SA Objectives	SA Score	Justification
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 6-10 minutes travel time of a local centre and town/district centre; therefore a minor positive effect is likely for this SA objective.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is an area of semi-natural and natural greenspace adjacent to the north. Other recreational facilities and areas of open space include outdoor sports facilities, areas for children and young people, allotments and parks and gardens. There are also a number of PRoW footpaths surrounding the site, two of which run along the western and eastern edges of the site. A bridleway is directly adjacent to the north and runs along the site's northern edge. Overall, a significant positive effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (2.67ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to seven of eight of the features assessed. Therefore, a significant positive effect is likely overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is relatively small (2.67ha) and on greenfield land. Therefore, a minor negative effect is likely. The site is not in an area of quality agricultural land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This site is relatively small (2.67ha) and on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA G10: River Dearne Valley, as identified in the 2015 Landscape Character Assessment for Kirklees. This LCA comprises relatively broad valleys with a high level of broadleaved woodland cover. The main valley floor is densely settled and has a peri-urban feel, while the tributary sections of the LCA are generally more tranquil and rural and are only crossed by minor roads.
13. Conserve and enhance the historic environment,	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The

SA Objectives	SA Score	Justification
heritage assets and their settings.		effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	Cliffe Woods Park Quarry, Clayton West Local Geological Site is approximately 770m south west of the site; therefore a minor negative effect on this SA objective is most likely. However, this is uncertain as there may still be effects on non-designated biodiversity, and depending on the design of the development, it may be possible to incorporate biodiversity enhancements.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to seven of eight of the features assessed. Therefore, a significant positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: recreation and leisure, 10: sustainable transport and 19: climate change. There were no potential significant negative effects identified.		

H563

SA Objectives	SA Score	Justification
1: Increase the number and	++	While the location of housing sites will not influence the number, location or type of employment opportunities available

SA Objectives	SA Score	Justification
range of employment opportunities available for local people, and ensure that they are accessible.		in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 6-10 minutes travel time of an employment node, there a significant positive effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The whole of this site is within 6-10 minutes travel time of a primary school and the majority of the site is within 11-15 minutes of a secondary school and further education facility. A significant positive effect is therefore likely.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	The whole of this site is within 11-15 minutes travel time of a GP and the majority of the site is within 41-45 minutes from a hospital. A minor positive effect is likely given the site's proximity to a GP. The site is not in or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	--	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. This site is surrounded by sensitive receptors, including residential properties to the west, south and east and commercial premises to the north. Construction of the site could lead to these receptors being exposed to noise and light pollution. A significant negative effect is therefore likely.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The whole of this site is within 6-10 minutes travel time of a local centre and town/district centre; therefore a minor positive effect is likely for this SA objective.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.

SA Objectives	SA Score	Justification
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	There is an area of semi-natural and natural greenspace within this site and part of a nearby outdoor sports facility is also within the site. It is therefore considered possible that development of this site could lead to these being lost. However, there are a number of other recreational facilities and areas of open space within 600m of the site which could be used by future residents, including areas for children and young people, allotments and a park and garden. There are also a number of PRoW footpaths to the south-west, and there is a bridleway directly adjacent to the south. Overall, a mixed effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (1.06ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to seven of eight of the features assessed. Therefore, a significant positive effect is likely overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is small (1.06ha) and on mostly greenfield land which is classed as grade 3 agricultural quality. A minor negative effect is therefore likely overall.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This site is small (1.06ha) and on mostly greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA G10: River Dearne Valley, as identified in the 2015 Landscape Character Assessment for Kirklees. This LCA comprises relatively broad valleys with a high level of broadleaved woodland cover. The main valley floor is densely settled and has a peri-urban feel, while the tributary sections of the LCA are generally more tranquil and rural and are only crossed by minor roads.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	Cliffe Woods Park Quarry, Clayton West Local Geological Site is approximately 895m south west, Riding Wood approved Local Wildlife Site is approximately 970m south-west of the site and Riding Wood candidate Local Wildlife Site is approximately 920m south-west of the site. A minor negative effect is likely overall.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.

SA Objectives	SA Score	Justification
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on mostly greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. Therefore, a significant positive effect is likely overall.
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: recreation and leisure (part of a mixed effect overall), 10: sustainable transport and 19: climate change. A potential significant negative effect is likely for SA objective 5: amenity and 8: recreation and leisure (part of a mixed effect overall). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H564: Land east of Hightown Road, Hightown

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	+++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. Access to employment nodes vary across the site. The most accessible area is in the south eastern area of the site, which is within 11-15 minutes of an employment mode. The least accessible area is along the north east area of the site which is within 21-25 minutes travel time to an employment node. In between these two extremes, travel times to an employment node vary. Therefore, a mixed effect on this objective is expected – potentially significant positive for the south eastern area of the site and potentially minor positive for the north east area of the site.

SA Objectives	SA Score	Justification
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however, this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Travel times to education facilities vary across the site. The most accessible area is in the south east which is within 5 minutes travel time to a primary school and 11-15 minutes to a secondary school. The least accessible area is in the far north-eastern area of the site, which is within 11-15 minutes to a primary school and 16-20 minutes to a secondary school. In between these two extremes, travel times vary. However, overall a significant positive effect is likely.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however, where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Travel times to healthcare facilities vary across the site. The most accessible area is in the south-eastern area which is within 6-10 minutes travel time to a GP and 31-35 minutes of a hospital. The least accessible area is in the far north-eastern corner of the site, which is within 11-15 minutes to a GP and 51-55 minutes to a hospital. In between these two extremes, travel times vary. However overall a minor positive effect is expected. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are existing residential properties adjacent to the site to the southern, south-eastern, western and north-western boundaries of the site, which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+/0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Travel times to local and town/district centres vary across the site. The most accessible area is in the north western area which is within 11-15 minutes travel time to a local centre and 6-10 minutes travel time to a town/district centre. Therefore, a mixed effect is expected, minor</p>

SA Objectives	SA Score	Justification
		positive for the north western area of the site and a negligible effect for the north-eastern area of the site.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is within 600m of more than three recreational and leisure facilities, including several PROWs, the closest being immediately north and to the east of the site. Open space designations nearby include a green corridor, one amenity greenspace, one park and garden and two semi-natural and three natural greenspaces. Other spaces include five sites containing provision for children and young people and six outdoor sports facilities. However, the outdoor sports facility to the south-west of the site is located within housing option sites H198 and as such could be lost as a result of development. Some of these designations are within other housing site options and could therefore be lost as a result of housing development. However, a significant effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is large (10.88 ha); therefore, a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively large site (10.88 ha) on mainly greenfield land; therefore, a significant negative effect on this SA objective is likely. Most of this site is designated as urban land quality, aside from the north-western part of the site, which is designated as grade 3 agricultural quality.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This is a large site (10.88 ha) mainly on greenfield land, therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park.

SA Objectives	SA Score	Justification
		The site lies mainly in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	The site is not within close proximity of any designated biodiversity features; Hunsworth Great Wood and Little Wood Candidate Local Wildlife Site is the closest of such features but is located approximately 2.6 km to the north and as such, a negligible effect is recorded on this SA objective. Given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development the effect is noted to be uncertain.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is mainly on greenfield land and is outside of flood zone 3; therefore, a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is mainly on greenfield land; therefore, a potential minor negative effect is identified.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site is classed as mainly or entirely 'green' in terms of its access to seven of the eight features assessed; therefore a significant positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: leisure and recreation, 9: housing, 10: sustainable transport and 19: climate change. Potential significant negative effects were identified in relation to SA objectives 11: land use and 12: landscape character. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H565: Land between Wakefield Road and Liley Lane, Grange Moor

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	+	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Most of this site is within 21-25 minutes travel time of the nearest employment node (aside from an area in the south west which is within 16-20 minutes); therefore a minor positive effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The whole is within 6-10 minutes travel time to a primary and most of the site is within 26-30 minutes to a secondary school (aside from a small area on the south-western boundary which is within 31-35 minutes travel time); therefore, it is likely to have a minor positive effect. It is also within 35 minutes of a further education institute.</p>

SA Objectives	SA Score	Justification
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 6-10 minutes travel time of a GP. The site is also within 46-50 minutes of a hospital; therefore a minor positive effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is adjacent to the A642 (Wakefield Road), which may mean that residents in these parts of the site are affected by road noise. There are also existing residential properties adjacent to the site to the south which may be affected by noise during the construction phase. A significant negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	0	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Most of this site is within 6-10 minutes travel time of a local centre (aside from a small area in the western part of the site which is within 11-15 minutes). Most of this site is also within 21-25 minutes of a town/district centre (aside from a small area in the south western edge which is within 16-20 minutes); therefore a negligible effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/-??	<p>This site includes an allotment which could be lost as a result of housing development. However, this site is within 600m of more than three other recreational facilities. There are several Public Rights of Way (PRoW), the closest being 120m south-west of the site. Open spaces nearby include three areas of amenity greenspaces and one park and garden. Other areas include four outdoor sports facilities, two sites containing provision for children and young people and two allotments, although the allotment to the north of the site is included within the housing option site: H710 and therefore could be lost as a result of housing development.</p> <p>However overall a mixed (significant positive and potential significant negative) effect is therefore identified.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	<p>All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (2.08 ha); therefore, a minor positive effect is likely.</p>
10. Secure an effective and safe transport network which encourages people to make	+	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car-based modes of transport day to day.</p>

SA Objectives	SA Score	Justification
use of sustainable and active modes of transport.		In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as entirely 'green' in terms of its access to three of the eight features assessed. Therefore, a minor positive effect is likely.
11. Secure the efficient and prudent use of land.	+	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is small site (2.08 ha) on brownfield land; therefore a minor positive effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	+?	This is a small site (2.08 ha) on brownfield land; therefore development here could have a minor positive effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies in LCA N1: Emley Moor, as identified in the 2015 Landscape Character Assessment for Kirklees. This is an elevated, undulating farmland plateau with frequent woodland cover. The character is predominantly traditional rural, occupied by small villages.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible but uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	The site is not within close proximity of any designated biodiversity features; Liley Wood Local Wildlife Site is the closest of such features but is located approximately 1.7km to the north-west and as such, a negligible effect is recorded on this SA objective. Given that there may be opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development the effect is noted to be uncertain.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	0	This site is on brownfield land and is outside of flood zone 3; therefore a negligible effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	+?	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on brownfield land; therefore a potential minor positive effect is identified.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site is classed as mainly or entirely 'green' in terms of its access to three of the eight features assessed; therefore a minor positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objective 18: leisure and recreation and potential significant negative effects were identified in relation to SA objectives 5: amenity and 8: leisure and recreation. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H566: Land off Wickleden Gate, Scholes, Holmfirth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	-	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 41-45 minutes travel time of an employment node, there a minor negative effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The whole of this site is within 6-10 minutes travel time of a primary school and 21-25 minutes from a secondary school, therefore a minor positive effect is likely.
4. Improve the health of local people and ensure that they can access the health and	-	The whole of this site is within 16-20 minutes travel time of a GP and more than 60 minutes from a hospital. A minor negative effect is therefore likely. The site is not in or adjacent to an AQMA.

SA Objectives	SA Score	Justification
social care they need.		
5. Protect local amenity including avoiding noise and light pollution.	--	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There is an industrial area directly adjacent to the south-east, and future residents could be exposed to noise over the long term resulting in a significant negative effect. In addition, the site is also surrounded by existing residential properties, and residents of these properties could be exposed to noise and light pollution during construction of the site which reinforces the significant negative effect.
6. Retain and enhance access to local services and facilities.	0	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The whole of this site is within 6-10 minutes travel time of a local centre and 16-20 minutes of a town/district centre; therefore a negligible effect is likely for this SA objective.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	There is an area of semi-natural and natural greenspace within this site, and it is therefore considered possible that development of this site could lead to this area being lost. However, there are a number of other recreational facilities and areas of open space within 600m of the site which could be used by future residents, including amenity greenspace, outdoor sports facilities and a cemetery. There are also a number of PRow footpaths surrounding the site. Overall, a mixed effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (1.22ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to two of eight of the features assessed. Therefore, a minor positive effect is likely overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is small (1.22ha) and on greenfield land; therefore a minor negative effect is therefore likely overall. The site is not in an area of high quality agricultural land.
12. Protect and enhance the character of Kirklees and the	-?	This site is small (1.22ha) and on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close

SA Objectives	SA Score	Justification
quality of the landscape and townscape.		proximity of the Peak District National Park. The site lies in LCA E1: Holmfirth-Meltham, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with considerable tree and woodland cover. Although the proximity of the urban centres exerts an influence on landscape character, with urban fringe land uses evident in many areas, there are pockets of relative tranquillity away from the main settlements. There is a strong visual relationship with the moorlands of the National Park.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the Grade II Listed Town Head Farmhouse and adjoining cottage and barn (the loss of this area and its subsequent development could harm elements which contribute to the significance of these buildings). The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	Morton Wood approved Local Wildlife Site is approximately 620m south of this site; therefore a minor negative effect is likely.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to two of eight of the features assessed. Therefore, a minor positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objective 8: recreation and leisure (part of a mixed effect overall). A potential significant negative effect is likely for SA objective 5: amenity and 8: recreation and leisure (part of a mixed effect overall). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H567: North West of 183 – 199 Leeds Road, Heckmondwike

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The whole of this site is within 16-20 minutes travel time of an employment node, therefore a significant positive effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	0?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The whole of this site is within 16-20 minutes travel time of a primary school and 26-30 minutes from a secondary school. Therefore, a negligible effect is likely.
4. Improve the health of local people and ensure that they can access the health and social care they need.	0	The whole of this site is within 16-20 minutes travel time of a GP and 36-40 minutes from a hospital. A negligible effect is therefore likely. The site is not in or adjacent to an AQMA.

SA Objectives	SA Score	Justification
5. Protect local amenity including avoiding noise and light pollution.	--	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. This site is directly adjacent to the A62 (Leeds Road) and this could mean that future residents are exposed to noise pollution over the long term. A significant negative effect is therefore likely. There are also a number of existing residential properties within 100m to the west, south and north, and the residents of these properties could be exposed to noise and light pollution during construction and this reinforces the negative effect.
6. Retain and enhance access to local services and facilities.	0	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 6-10 minutes travel time of a local centre and the whole of the site is within 16-20 minutes of a town/district centre; therefore a negligible effect is likely for this SA objective.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is an area of amenity greenspace approximately 40m east of the site. Other recreational facilities and areas of open space include outdoor sports facilities, allotments, additional amenity greenspace, semi-natural and natural greenspace and areas for children and young people. There are also a number of PRow footpaths to the north and east. Overall, a significant positive effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.33ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to three of eight of the features assessed. Therefore, a minor positive effect is likely overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is relatively small (1.33ha) and on mostly greenfield land; therefore a minor negative effect is therefore likely overall. The site is not in an area of high quality agricultural land.

SA Objectives	SA Score	Justification
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This site is relatively small (1.33ha) and on mostly greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park.</p> <p>The site lies mainly in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the Grade II Listed Stubley Farmhouse (the loss of this area and its subsequent development could harm elements which contribute to the significance of these buildings). The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	The site is not within 1km of any designated biodiversity or geodiversity sites; therefore a negligible effect on this SA objective is most likely. However, this is uncertain as there may still be effects on non-designated biodiversity, and depending on the design of the development, it may be possible to incorporate biodiversity enhancements.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on mostly greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Therefore, a minor positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objective 1: employment and 8: recreation and leisure. A potential significant negative effect is likely for SA objective 5: amenity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H568: Cumberworth Lane, Denby Dale, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 16-20 minutes travel time of an employment node, therefore a significant positive effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The whole of this site is within 6-10 minutes travel time of a primary school and the majority of the site is within 11-15 minutes of a secondary school and further education facility. Therefore, a significant positive effect is likely.
4. Improve the health of local people and ensure that they can access the health and	+	The whole of this site is within 5 minutes travel time of a GP and 56-60 minutes from a hospital. A minor positive effect is therefore likely. The site is not in or adjacent to an AQMA.

SA Objectives	SA Score	Justification
social care they need.		
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are existing residential properties within 100m south, north-east and north-west of this site, and residents of these properties could be exposed to noise and light pollution during construction. A minor negative effect is therefore likely for this SA objective.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 11-15 minutes travel time of a local centre and the whole of the site is within 11-15 minutes of a town/district centre; therefore a minor positive effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is an area of semi-natural and natural greenspace approximately 110m east. Other recreational facilities and areas of open space include outdoor sports facilities, a park and garden, areas for children and young people and amenity greenspace. There are also a number of PRoW footpaths to the north and south. Overall, a significant positive effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (0.45ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to seven of eight of the features assessed. Therefore, a significant positive effect is likely overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is small (0.45ha) and on greenfield land; therefore a minor negative effect is therefore likely overall. The site is

SA Objectives	SA Score	Justification
		not in an area of high quality agricultural land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This site is small (0.45ha) and on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA G10: River Dearne Valley, as identified in the 2015 Landscape Character Assessment for Kirklees. This LCA comprises relatively broad valleys with a high level of broadleaved woodland cover. The main valley floor is densely settled and has a peri-urban feel, while the tributary sections of the LCA are generally more tranquil and rural and are only crossed by minor roads.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	The site is not within 1km of any designated biodiversity or geodiversity sites; therefore a negligible effect on this SA objective is most likely. However, this is uncertain as there may still be effects on non-designated biodiversity, and depending on the design of the development, it may be possible to incorporate biodiversity enhancements.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on greenfield land therefore a minor negative effect is likely on this SA objective.</p>

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to seven of eight of the features assessed. Therefore, a significant positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objective 1: employment, 3: education, 8: recreation and leisure, 10: sustainable transport and 19: climate change. There were no significant negative effects identified for this site.		

H569: Land east of Eastfield Road, Northorpe, Mirfield, WF14 0QR

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The whole of this site is within 11-15 minutes travel time of an employment node; therefore a significant positive effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The whole of this site is within 6-10 minutes travel time of a primary school and the majority of the site is within 11-15 minutes of a secondary school and 21-25 minutes from a further education facility. Therefore, a significant positive effect is likely.
4. Improve the health of local people and ensure that they can access the health and	0	The majority of this site is within 16-20 minutes travel time of a GP and 36-40 minutes from a hospital. A negligible effect is therefore likely. The site is not in or adjacent to an AQMA.

SA Objectives	SA Score	Justification
social care they need.		
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are existing residential properties within 100m south, east and north-west of this site, and residents of these properties could be exposed to noise and light pollution during construction. A minor negative effect is therefore likely for this SA objective.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 6-10 minutes travel time of a local centre and town/district centre; therefore a minor positive effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is a park and garden directly adjacent to the north-east of the site. Other recreational facilities and areas of open space include outdoor sports facilities, allotments, other parks and gardens, areas for children and young people and a cemetery. There are also a number of PRow footpaths to the north and west. Overall, a significant positive effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.08ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to six of eight of the features assessed. Therefore, a significant positive effect is likely overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is relatively small (1.08ha) and on greenfield land; therefore a minor negative effect is therefore likely overall.

SA Objectives	SA Score	Justification
		The site is not in an area of high quality agricultural land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This site is relatively small (1.08ha) and on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park.</p> <p>The site lies mainly in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	Lower Spen Wildlife Area Local Nature Reserve and approved Local Wildlife Site is approximately 760m to the east; therefore a minor negative effect is likely.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on greenfield land therefore a minor negative effect is likely on this SA objective.</p>

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to six of eight of the features assessed. Therefore, a significant positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objective 1: employment, 3: education, 8: recreation and leisure, 10: sustainable transport and 19: climate change. There were no significant negative effects identified for this site.		

H570: Land south of Tinker Lane, Lepton, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	+	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The whole of this site is within 26-30 minutes travel time of an employment node; therefore a minor positive effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?/0?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. Accessibility to education varies across this site. In this way, the north-western part of the site is within 11-15 minutes from a primary school and 31-35 minutes from a secondary school, whereas the south-eastern part of the site is within 16-20 minutes of a primary school and 31-35 minutes from a secondary school. Between these two extremes, accessibility to education varies. Overall a mixed effect is likely – minor positive for the north-western part of the site and negligible for the south-eastern part.
4. Improve the health of local	+/0	Accessibility to health services varies across this site. In this way, the north-western part of the site is within 6-10

SA Objectives	SA Score	Justification
people and ensure that they can access the health and social care they need.		minutes of a GP and 41-45 minutes from a hospital, whereas the south-eastern part is within 16-20 minutes from a GP and 56-60 minutes from a hospital. In between these extremes, accessibility to healthcare services varies. Overall a mixed effect is likely – minor positive for the north-western part and negligible for the south-eastern part. The site is not in or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. There are existing residential properties, including scattered properties within 100m north, south-west and south-east south, and residents of these properties could be exposed to noise and light pollution during construction. A minor negative effect is therefore likely for this SA objective.
6. Retain and enhance access to local services and facilities.	0/-	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. Accessibility to local services varies across this site. In this way, the north-western part of the site is within 6-10 minutes of a local centre and 21-25 minutes from a town/district centre, whereas the south-eastern part is within 16-20 minutes of a local centre and 26-30 minutes from a town/district centre. In between these extremes, accessibility to local services varies. Overall a mixed effect is likely – negligible for the north-western part and minor negative for the south-eastern part. The site is not in or adjacent to an AQMA.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is an outdoor sports facility directly adjacent to the north of the site. There is also a cemetery to the north-west and a number of PRow footpaths surround the site. Overall, a significant positive effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (3.17ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to three of eight of the features assessed. Therefore, a minor positive effect is likely overall.

SA Objectives	SA Score	Justification
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is relatively small (3.17ha) and on greenfield land; therefore a minor negative effect is therefore likely overall. The site is not in an area of high quality agricultural land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This site is relatively small (3.17ha) and on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E6: Fenay Beck Valley Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with large blocks of tree and woodland cover found on slopes. It is perceived as a tranquil landscape with a traditional rural feel, although this is impacted upon by the main roads and urban development around Shepley.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	Both Lepton Great Wood candidate Local Wildlife Site is approximately 670m and Lepton Great Wood Local Geological Site is approximately 985m to the west; therefore a minor negative effect is likely.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to three of eight of the features assessed. Therefore, a minor positive effect is likely overall.
Summary of SA findings: A potential significant positive effect was identified for this site in relation to SA objective 8: recreation and leisure. There were no significant negative effects identified for this site.		

H571

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0/-	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. Accessibility to employment nodes varies across this site. In this way, the north-eastern part of the site is within 31-35 minutes travel time of an employment node, whereas a section at the western end of the site is within 41-45 minutes of an employment node. In between these two extremes accessibility to employment nodes varies. Overall a mixed effect is likely – negligible for the north-eastern part and minor negative for the section at the western end.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?/0?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. Accessibility to education varies across this site. In this way, a section at the southern-end of the site is within 11-15 minutes of a primary school and secondary school and 21-25 minutes from a further education facility, whereas a section at the western end of the site is within 16-20 minutes from a primary school and secondary school and 31-35 minutes from a further education facility. Between these two extremes accessibility to education varies. Overall a mixed effect is likely – significant positive for the section at the southern end of the site and negligible for the section at the western

SA Objectives	SA Score	Justification
		end of the site.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	The majority of this site is within 6-10 minutes travel time of a GP and 51-55 minutes from a hospital; therefore a minor positive effect is likely. The site is not in or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	--	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. This site is adjacent to the A6024 (Huddersfield Road) and this could result in future residents being exposed to noise pollution over the long term. A significant negative effect is therefore likely. In addition, there are existing residential properties, including scattered properties, within 100m north, east, south and west, and residents of these properties could be exposed to noise and light pollution during construction which reinforces the negative effect.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. Accessibility to local services varies across this site. In this way, the north-eastern and south-western parts of the site are 11-15 minutes travel time of a local centre and 6-10 minutes of town/district centre, whereas the western part of the site is within 26-30 minutes of a local centre and 11-15 minutes from a town/district centre. Although accessibility between these two extremes varies, overall a minor positive effect is likely given the site's proximity to a town/district centre.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	There is a PRow footpath within the southern part of this site, and it is possible that this could be lost or disrupted during construction. However, there are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is a cemetery approximately 60m to the west. Other recreational facility and areas of open space include outdoor sports facilities, parks and gardens, a sports centre, areas for children and young people, areas of semi-natural and natural greenspace and amenity greenspace. There is also a number of PRow footpaths to the east and west of the site, as well as a bridleway to the east. Overall, a mixed effect is likely.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is large (14.65ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day.

SA Objectives	SA Score	Justification
encourages people to make use of sustainable and active modes of transport.		In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to five of eight of the features assessed. Therefore, a significant positive effect is likely overall.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is large (14.65ha) and on greenfield land which is classified as being of grade 3 agricultural quality. A significant negative effect is therefore likely on this SA objective.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This site is large (14.65ha) and on greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies mainly in LCA E1: Holmfirth-Meltham, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with considerable tree and woodland cover. Although the proximity of the urban centres exerts an influence on landscape character, with urban fringe land uses evident in many areas, there are pockets of relative tranquillity away from the main settlements. There is a strong visual relationship with the moorlands of the National Park.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the Netherthong/Denhouse Conservation Area (the loss of this area and its subsequent development could harm elements which contribute to the significance of this area). The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	Hagg Wood candidate Local Wildlife Site is approximately 470m north of the site, and Holmroyd Wood approved Local Wildlife Site is approximately 930m north-west of the site. A minor negative effect is therefore likely for this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to five of eight of the features assessed. Therefore, a significant positive effect is likely overall.
Summary of SA findings: A potential significant positive effect was identified for this site in relation to SA objective 3: education (part of a mixed effect overall), 8: recreation and leisure (part of a mixed effect overall), 9: housing, 10: sustainable transport, and 19: climate change. Significant negative effects were identified for SA objectives 5: amenity, 8: recreation and leisure (part of a mixed effect overall), 11: use of land (part of a mixed effect overall) and 12: character and landscape. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H572

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. Accessibility to employment nodes varies across this site. In this way, the western part of the site is within 6-10 minutes travel time of an employment node, whereas the eastern part of the site is within 16-20 minutes of an employment node. In between these two extremes accessibility to employment nodes varies. Although accessibility varies across this site, a significant positive effect is likely due to the sites proximity to an employment node.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?/0?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. Accessibility to education varies across this site. In this way, the south-eastern part of the site is within 11-15 minutes of a primary school, 21-25 minutes from a secondary school, whereas an area in the centre of the site is within 26-30 minutes of a primary school and 36-40 minutes of a secondary school. Between these two extremes accessibility to

SA Objectives	SA Score	Justification
		education varies. Overall a mixed effect is likely – minor positive for the south-eastern part and negligible for the area in the centre of the site.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	Accessibility to healthcare services varies across this site. In this way, the western end of the site is within 6-10 minutes from a GP and 31-35 minutes from a hospital, whereas a part in the eastern end of the site is within 11-15 minutes of a GP and 41-45 minutes of a hospital. Although accessibility varies between these two extremes, an overall minor positive effect is likely given the site's proximity to a GP. The site is not in or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. Within 100m north and east of this site, there are a number of sensitive receptors including residential properties and Ravenshall School, and these receptors could be exposed to noise and light pollution during construction of the site. A minor negative effect is therefore likely.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 16-20 minutes travel time of a local centre and within 11-15 minutes of a town/district centre; therefore a minor positive effect is likely for this SA objective.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	Parts of two local cycle routes and part of a bridleway lie within this site and it is possible that these could be lost or disrupted during construction. However, there are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is an outdoor sports facility directly adjacent to the east. Other recreational facilities and areas of open space include allotments, amenity greenspace, areas of semi-natural and natural greenspace and areas for children and young people. There is also a number of PRoW footpaths and bridleways surrounding this site as well as local cycle routes. In addition, a national cycle route is to the north-east. Overall, a mixed effect is likely.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is large (19.5ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to three of eight of the features assessed. Therefore, a minor positive effect is likely overall.
11. Secure the efficient and	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land

SA Objectives	SA Score	Justification
prudent use of land.		than development on brownfield sites or sites of lower quality agricultural land. This site is large (19.5ha) and on greenfield land which is mostly classified as being of grade 3 agricultural quality. A significant negative effect is expected on this SA objective.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	<p>This site is large (19.5ha) and on greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park.</p> <p>The site mainly lies in LCA E7: Emley Moor Northern Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a landscape of gently undulating elevated slopes with abundant woodland cover. The proximity of the urban centres exerts an influence on landscape character with urban fringe land uses evident in many areas.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	There are a number of biodiversity designations within 1km of this site, including Lower Spen Wildlife Area Local Nature Reserve and approved Local Wildlife Site (approximately 930m north of the site), Jordan Wood and Oliver Wood Local Wildlife Site (approximately 600m south) and Whitley Wood approved Local Wildlife Site (approximately 830m south-west). A minor negative effect is likely for this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to three of eight of the features assessed. Therefore, a minor positive effect is likely overall.
Summary of SA findings: A potential significant positive effect was identified for this site in relation to SA objective 1: employment, 8: recreation and leisure (part of a mixed effect overall) and 9: housing. Significant negative effects were identified for SA objectives 8: recreation and leisure (part of a mixed effect overall), 11: use of land (part of a mixed effect overall) and 12: character and landscape. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H573: Land south of Jagger Lane, Kirkheaton, Huddersfield, HD5 0QZ

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. This site is within 31-35 minutes travel time of the nearest employment node; therefore a negligible effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. This site is within 11-15 minutes travel time of a primary school. The majority of the site is within 11-15 minutes of a secondary school however, a small area to the west of the site is within 21-25 minutes of a secondary school. Similarly, the majority of the site is within 16-20 minutes of a further education institute, with a small area to the west of the site being 21-25 minutes of a further education institute.

SA Objectives	SA Score	Justification
		Therefore, development of the site could have a significant positive effect on this SA objective.
4. Improve the health of local people and ensure that they can access the health and social care they need.	0	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>This site is within 16-20 minutes travel time of a GP and within 36-40 minutes of a hospital; therefore a negligible effect is likely. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>The site is located adjacent to Jagger Hill Farm and there are a number of residential properties located to the west, and southwest (within 100m) which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is within 11-15 minutes travel time of a local centre and within 11-15 minutes of a town/district centre; therefore a minor positive effect is likely.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	<p>A PRoW traverses the centre of the site. The Dalton Bank Local Nature Reserve is approximately 125 meters to the north of the site. There are outdoor sports playing fields approximately 245m to the east, a children's playground 460m to the east, and several areas of semi-natural and natural greenspace to the north (400m), north west (555m) west (480m) and southwest (325m) of the site.</p> <p>Therefore, a mixed (significant positive and potential significant negative) effect is predicted for this SA objective.</p>
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.9ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.

SA Objectives	SA Score	Justification
which encourages people to make use of sustainable and active modes of transport.		In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (0.9ha) on greenfield land. Furthermore, the site is not within an area of high quality agricultural land (it is classed as Grade 4). Therefore a minor negative effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (0.9ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies across LCA E7: Emley Moor Northern Fringes and LCA M1: Calder Valley Floor, as identified in the 2015 Landscape Character Assessment for Kirklees. LCA E7: Emley Moor Northern Fringes is a landscape of gently undulating elevated slopes with abundant woodland cover. The proximity of the urban centres exerts an influence on landscape character with urban fringe land uses evident in many areas. LCA M1: Calder Valley Floor is an elevated, undulating farmland plateau with frequent woodland cover. The character is predominantly traditional rural, occupied by small villages.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'amber' in terms of the potential for effects on the historic environment due to the presence of a Grade II Listed Building at Jagger Hill 200 meters to the south-east of this area. The loss of this area and its subsequent development could harm elements which contribute to the significance of this building. The effect on the historic environment of development of this site is uncertain.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	The site is within approximately 125 meters of the Dalton Bank Local Nature Reserve and Local Wildlife Site. Therefore, development could have a significant negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
and people.		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site is classed as 'green' in terms of its access to five of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 10: sustainable transport and 19: climate change, and a potential significant negative effect was identified in relation to SA objective 14: biodiversity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H574: Land to west of Green Balk Lane, Lepton, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 16-20 minutes travel time of an employment node; therefore a significant positive effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.

SA Objectives	SA Score	Justification
		The whole of this site is within 6-10 minutes travel time of a primary school, and the majority of the site is within 21-25 minutes of a secondary school. A minor positive effect is therefore likely for this SA objective.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	The whole of this site is within 6-10 minutes travel time of a GP and 41-45 minutes of a hospital; therefore a minor positive effect is likely. This site is not in or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. Within 100m north of this site, there are a number of existing residential properties and residents of these properties could be exposed to noise and light pollution during construction of the site. A minor negative effect is therefore likely.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 6-10 minutes travel time of a local centre and within 11-15 minutes of a town/district centre; therefore a minor positive effect is likely for this SA objective.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is a cemetery adjacent to the east. Other recreational facilities and areas of open space include outdoor sports facilities, semi-natural and natural greenspace, amenity greenspace, a park and garden and area for children and young people. There is also a number of PRoW footpaths surrounding this site and there is a local cycle route and bridleway to the north. Overall, a significant positive effect is likely.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is small (0.44ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to six of eight of the features assessed. Therefore, a significant positive effect is likely

SA Objectives	SA Score	Justification
active modes of transport.		overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is small (0.44ha) and on greenfield land. Therefore a minor negative effect is likely on this SA objective. The site is not in an area of high quality agricultural land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This site is small (0.44ha) and on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site mainly lies in an area classed as 'urban' in the 2015 Landscape Character Assessment for Kirklees.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the Scheduled Monument at Caste Hill (the loss of this area and its subsequent development could harm elements which contribute to the significance of this asset). The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	Lepton Great Wood candidate Local Wildlife Site is approximately 270m south-west of this site and Lepton Great Wood Local Geological Site is approximately 890m south-west; therefore a minor negative effect is likely for this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to six of eight of the features assessed. Therefore, a significant positive effect is likely overall.
Summary of SA findings: A potential significant positive effect was identified for this site in relation to SA objective 1: employment, 8: recreation and leisure, 10: sustainable transport and 19: climate change. There were no significant negative effects identified for this site.		

H575: Land at junction of Paddock Road and Moor Lane, Kirkburton, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 11-15 minutes travel time of an employment node; therefore a significant positive effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The whole of this site is within 6-10 minutes travel time of a primary school, and the majority of the site is within 6-10 minutes of a secondary school and 16-20 minutes from a further education facility. A significant positive effect is therefore likely for this SA objective.
4. Improve the health of local people and ensure that they	+	The majority of this site is within 6-10 minutes travel time of a GP and the majority of the site is within 41-45 minutes of a hospital; therefore a minor positive effect is likely. This site is not in or adjacent to an AQMA.

SA Objectives	SA Score	Justification
can access the health and social care they need.		
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. Within 100m west, south and north-east of this site, there are a number of existing residential properties and residents of these properties could be exposed to noise and light pollution during construction of the site. A minor negative effect is therefore likely.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 11-15 minutes travel time of a local centre and the whole site is within 11-15 minutes of a town/district centre; therefore a minor positive effect is likely for this SA objective.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is a park and garden and area for children and young people directly adjacent to the west. Other recreational facilities and areas of open space include outdoor sports facilities, semi-natural and natural greenspace and amenity greenspace. There is also a number of PRow footpaths surrounding this site and there is a bridleway to the south. Overall, a significant positive effect is likely.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is large (7.47ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to seven of eight of the features assessed. Therefore, a significant positive effect is likely overall.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is large (7.47ha) and on greenfield land. Therefore a significant negative effect is likely on this SA objective. The site is mostly outside of an area of high quality agricultural land, although the northern half of the site is on grade 3 agricultural land.

SA Objectives	SA Score	Justification
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	<p>This site is large (7.47ha) and on greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA E6: Fenay Beck Valley Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateau with large blocks of tree and woodland cover found on slopes. It is perceived as a tranquil landscape with a traditional rural feel, although this is impacted upon by the main roads and urban development around Shepley.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the Grade II Listed Building at 118 Paddock Road (the loss of this area and its subsequent development could harm elements which contribute to the significance of this asset). The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	Lepton Great Wood candidate Local Wildlife Site is approximately 540m north and Lepton Great Wood Local Geological Site is approximately 570m north; therefore a minor negative effect is likely for this SA. The effect is uncertain given that there may be opportunities to promote habitat connectivity in new developments through measures such as the provision of green infrastructure.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on greenfield land therefore a minor negative effect is likely on this SA objective.</p>

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to seven of eight of the features assessed. Therefore, a significant positive effect is likely overall.
Summary of SA findings: A potential significant positive effect was identified for this site in relation to SA objective 1: employment, 3: education, 8: recreation and leisure, 9: housing, 10: sustainable transport and 19: climate change. Potential significant negative effects were identified in relation to SA objectives 11: use of land and 12: character and landscape. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H576: Land east of Carr Lane, Cinderhills, Holmfirth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	--	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The whole of this site is within 51-55 minutes travel time of an employment node; therefore a significant negative effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The whole of this site is within 6-10 minutes travel time of a primary school and 26-30 minutes of a secondary school. A minor positive effect is therefore likely for this SA objective.
4. Improve the health of local people and ensure that they	--	The majority of this site is within 31-35 minutes travel time of a GP and the whole of the site is more than 60 minutes from a hospital; therefore a significant negative effect is likely. This site is not in or adjacent to an AQMA.

SA Objectives	SA Score	Justification
can access the health and social care they need.		
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. Within 100m west and north-east of this site there are a number of existing residential properties and residents of these properties could be exposed to noise and light pollution during construction of the site. A minor negative effect is therefore likely.
6. Retain and enhance access to local services and facilities.	0	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The whole of this site is within 11-15 minutes travel time of a local centre and the majority of the site is within 21-25 minutes of a town/district centre; therefore a negligible effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	There are a number of recreational facilities and areas of open space within 600m of the site which could be used by future residents, the closest of which is a park and garden approximately 220m north-west. Other recreational facilities and areas of open space include semi-natural and natural greenspace and an area for children and young people. There is also a number of PRoW footpaths surrounding this site. A significant positive effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.02ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to two of eight of the features assessed. Therefore, a minor positive effect is likely overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is relatively small (1.02ha) and on greenfield land. Therefore a minor negative effect is likely on this SA objective. The site is not in an area of high quality agricultural land.
12. Protect and enhance the character of Kirklees and the	-?	This site is relatively small (1.02ha) and on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within

SA Objectives	SA Score	Justification
quality of the landscape and townscape.		close proximity of the Peak District National Park. The site lies in LCA D7: Peak Fringe Upland Pastures, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a broad terrace, comprising small square fields and is sparsely wooded. The settlement pattern is dispersed and there is a strongly rural, traditional agricultural character, although perceptions of tranquillity reduce closer to Huddersfield in the east.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	The site is not within 1km of any designated biodiversity or geodiversity sites; therefore a negligible effect on this SA objective is most likely. However, this is uncertain as there may still be effects on non-designated biodiversity, and depending on the design of the development, it may be possible to incorporate biodiversity enhancements.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land therefore a minor negative effect is likely on this SA objective.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to two of eight of the features assessed. Therefore, a minor positive effect is likely overall.
Summary of SA findings: A potential significant positive effect was identified for this site in relation to SA objective 8: recreation and leisure. Potential significant negative effects were identified in relation to SA objectives 1: employment and 4: health. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H577: Land east of Carr Lane, Cinderhills, Holmfirth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	--	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is more than 60 minutes travel time of an employment node; therefore a significant negative effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. Summary of SA findings: A potential significant positive effect was identified for this site in relation to SA objective 8: recreation and leisure. Potential significant negative effects were identified in relation to SA objectives 1: employment and 4: health. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H578: Land north of Longwood Edge Road, Salendine Nook, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 6-10 minutes travel time of an employment node; therefore a significant positive effect is likely.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?/0?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. Accessibility to education varies across this site. In this way, the eastern part of the site is within 26-30 minutes travel time of a primary school and within 5 minutes from a secondary school and further education facility, whereas a part of the western end of the site is within 21-25 minutes travel time of a primary school, 16-20 minutes from a secondary school and 11-15 minutes from a further education facility. In between these two extremes, accessibility to education

SA Objectives	SA Score	Justification
		varies. Overall a mixed effect is likely – minor positive for the eastern part of the site and negligible for the part of the western end of the site.
4. Improve the health of local people and ensure that they can access the health and social care they need.	++	The majority of this site is within 11-15 minutes travel time of a GP and a hospital; therefore a significant positive effect is likely. This site is not in or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. Within 100m north and west of this site there are a number of existing residential properties. Huddersfield New College is also to the east. It is considered likely that these receptors could be exposed to noise and light pollution during construction of the site, and a minor negative effect is therefore likely.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. The majority of this site is within 11-15 minutes travel time of a local centre and the whole of the site is within 11-15 minutes of a town/district centre. A minor positive effect is therefore likely overall.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	This site is on land designated as an outdoor sports facility and this makes up part of a larger outdoor sports facility in the area. It is possible that the outdoor sports facility area within the site could be lost if the site was developed. However, there are a number of other recreational facilities and areas of open space within 600m of the site which could be used by future residents, including allotments, parks and gardens, semi-natural and natural greenspace, amenity greenspace, a cemetery and areas for children and young people. There are a number of PRow footpaths to the east of the site, one of which runs along the eastern side of the site, and a byway is to the south. Overall, a mixed effect is likely for this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (2.11ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non-car based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to seven of eight of the features assessed. Therefore, a significant positive effect is

SA Objectives	SA Score	Justification
modes of transport.		likely overall.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This site is relatively small (2.11ha) and on mostly greenfield land. Therefore a minor negative effect is likely on this SA objective. The site is not in an area of high quality agricultural land.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This site is relatively small (2.11ha) and on mostly greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E2: Barkisland-Holywell Green, as identified in the 2015 Landscape Character Assessment for Kirklees. This area comprises steeply rising land with frequent tree and woodland cover. It is an urban fringe landscape. Some areas retain a relative tranquil, rural character despite the proximity of urban development. Increasing urbanisation on the LCA's fringes creates a landscape of transition. The area has an important visual relationship with the National Park.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	Longwood Edge Quarry Local Geological site is approximately 460m west of this site, therefore a minor negative effect is likely.
15. Reduce air, water and soil pollution.	0	This site is not within or directly adjacent to an AQMA, therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people	-	This site is on mostly greenfield land and outside flood zone 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on mostly greenfield land therefore a minor negative effect is likely on this SA objective.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, the site was classed as entirely or mainly 'green' in terms of its access to two of eight of the features assessed. Therefore, a significant positive effect is likely overall.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 4: health, 8: recreation and leisure (part of a mixed effect overall), 10: sustainable transport and 19: climate change. A significant negative effect was identified in relation to SA objective 8: leisure and recreation (part of a mixed effect overall). These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H579: Land south of Jagger Lane, Kirkheaton, Huddersfield, HD5 0QZ

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. This site is within 31-35 minutes travel time of the nearest employment node; therefore a negligible effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. This site is within 11-15 minutes travel time of a primary school and within 21-25 minutes of a secondary school, therefore it is likely to have a minor positive effect. It is also within 21-25 minutes of a further education institute.
4. Improve the health of local people and ensure that they	0	The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.

SA Objectives	SA Score	Justification
can access the health and social care they need.		This site is within 16-20 minutes travel time of a GP and within 36-40 minutes of a hospital; therefore a negligible effect is likely. The site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. The site is located adjacent to Jagger Hill Farm and there are a number of residential properties located to the west and southwest of the site (within 100m) which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	+	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. This site is within 11-15 minutes travel time of a local centre and within 11-15 minutes of a town/district centre; therefore a minor positive effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	The Dalton Bank Local Nature Reserve is approximately 130 meters to the north of the site. There are outdoor sports playing fields approximately 350m to the east, a children's playground 550m to the east, and several areas of semi-natural and natural greenspace to the north (380m), north west (510m) west (465m) and southwest (420m) of the site. In addition, within 25 meters there is a PRoW footpath to the north east of the site. A significant positive effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.41ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of

SA Objectives	SA Score	Justification
prudent use of land.		land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (0.41ha) on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land (it is classed as Grade 4).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (0.41ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA M1: Calder Valley Floor, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a valley landscape with limited woodland cover, and agricultural land cover is very limited due to urban development. This is a heavily urbanised area with little tranquillity, although the area has more of a rural feel in the east.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that the development of the site is unlikely to result in harm to any designated heritage asset; therefore a negligible effect on this SA objective is likely.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	The site is within approximately 130 meters of the Dalton Bank Local Nature Reserve and Local Wildlife Site. Therefore, development could have a significant negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site is classed as 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 8: leisure and recreation, 10: sustainable transport and 19: climate change, and a potential significant negative effect was identified in relation to SA objective 14: biodiversity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H580: Land to the east and west of Hardcastle Lane, Flockton

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0/--	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Access to an employment node varies across the site. The south western and central part of the site is located within 31-35 minutes travel time of an employment node. The north western part of the site is located more than 60 minutes ravel time of an employment node. Overall a mixed effect (negligible/significant negative) is expected on this SA objective.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?/--?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The site is located at variable travel times from the nearest primary school and secondary school. The north western part of the site is located more than 60 minutes travel time of a primary school while the southern western and central</p>

SA Objectives	SA Score	Justification
		part of the site is located within 6-10 minutes travel time of a primary school. The north western part of the site is located more than 60 minutes travel time of a secondary school while the central part of the site is located within 16-20 minutes travel time of a secondary school. Overall a mixed effect (significant positive/significant negative) is expected on this SA objective for the entire site.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+/-	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The site is located within variable travel times of the nearest GP and hospital. The north western part of the site is located more than 60 minutes travel time of the nearest GP while the central part of the site is located within 11-15 minutes travel time of the nearest GP. The north western part of the site is located more than 60 minutes travel time of the nearest hospital while the south western and central part of the site is located within 46-50 minutes travel time of a hospital. Overall a mixed effect (minor positive/significant negative) is expected on this SA objective.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is in close proximity to existing residential properties to the south on Manor Drive, Manor House and Ash Brow. These properties may be affected by noise during the construction phase and a minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+/-	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The site is located within variable travel times of the nearest local centre and town/district centre. The north west part of the site is located more than 60 minutes travel time of the nearest local centre while the south western part of the site is located within 5 minutes travel time of the nearest local centre. The north western part of the site is also located more than 60 minutes travel time of the nearest town/district centre while the southern western part of the site is located within 31-35 minutes travel time of the nearest town/district centre. Overall a mixed effect (minor positive/significant negative) is expected for this SA objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.

SA Objectives	SA Score	Justification
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	The site is on land which contains a footpath, which could be lost as a result of housing development; therefore a potential significant negative effect is identified. However, the site is also in close proximity to a number of additional open spaces which could be used by residents. Two children's playgrounds are located to the south of the site within 45m and 80m respectively. A semi-natural and natural greenspace has been located to the south of the site also and is located within 40m. This area also contains amenity greenspace. Outdoor sports facilities, a semi-natural and natural greenspace, a small park and a children's playground are all located to the west of the site within 125m by Parkside. Overall a mixed (significant positive and potential significant negative) effect is therefore identified on this SA objective.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (27.14ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to three of the eight features assessed. Therefore, a minor positive effect is likely.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively large site (27.14ha) on greenfield land; therefore a significant negative effect on this SA objective is likely. The site is located on land which has been identified as Urban Land in terms of its Agricultural Land Classification.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This is a relatively large site (27.14ha) on greenfield land; therefore development here is expected to have a significant negative effect on this SA objective. This impact is uncertain given that it is dependent on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA N1: Emley Moor, as identified in the 2015 Landscape Character Assessment for Kirklees. This is an elevated, undulating farmland plateau with frequent woodland cover. The character is predominantly traditional rural, occupied by small villages.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, meaning that it considers that the development of the site is unlikely to result in harm to any designated heritage asset. The effect on this SA objective is therefore likely to be negligible although this is uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development and opportunities may exist to enhance the setting of heritage features.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	The site is located within 720m of Kirkby Woodwhich has been identified as a Candidate Local Wildlife Site to the south. The relative proximity of the site to this designated biodiversity feature may result in potential detrimental impacts, e.g. through habitat damage/loss, fragmentation, disturbance to species, air pollution, trampling etc and as such a minor negative effect is recorded for this SA objective. The effect is recorded as uncertain given that there may be

SA Objectives	SA Score	Justification
		opportunities to promote habitat connectivity through the inclusion of green infrastructure with any development.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is located on greenfield land and is not within Flood Zones 2 and 3; therefore a minor negative effect is likely given that the development of new housing on this greenfield land would increase the area of impermeable surfaces and could therefore increase overall flood risk in Kirklees.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. Development at this site would make use of greenfield land meaning there are unlikely to be opportunities to reuse materials already onsite. A minor negative effect is therefore likely on this SA objective.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. This site is classed as 'green' in terms of its access to three of the eight features assessed; therefore a minor positive effect is likely.
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: recreation and leisure (it should be noted that the overall scores for these two SA objectives were recorded as mixed), and 9: housing and potential significant negative effects were identified for this site in relation to SA objective 1: employment, 3: education, 4: health, 6: access to local services, 8: recreation and leisure (it should be noted that the overall scores for these five SA objectives were recorded as mixed), 11: land use and 12: landscape and townscape. These issues will need to be considered further in terms of enhancement and/or mitigation, which may be achieved through Local Plan policies.</p>		

H581: Land to the south east of Hermitage Park, Lepton, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in

SA Objectives	SA Score	Justification
range of employment opportunities available for local people, and ensure that they are accessible.		Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of the site is within 11-15 minutes travel time of the nearest employment node (with an area in the south within 16-20 minutes); therefore a significant positive effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?/0?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Levels of access to education facilities vary throughout this site. The most accessible part of the site is northern part which is within 5 minutes travel time of a primary school and within 16-20 minutes travel time of a secondary school. The least accessible part of the site is the southern edge which is within 16-20 minutes from a primary school and within 21-25 minutes of a secondary school. In between those areas journey times to education facilities vary in between those two extremes. Therefore a mixed effect is expected for this objective: potentially significant positive for the northern part of the site and potentially negligible for the southern edge of the site. Travel times to the nearest further education institute also vary across the site.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+/0	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Levels of access to healthcare facilities vary throughout this site. The most accessible part of the site is the northern part which is within 6-10 minutes travel time of the nearest GP and within 41-45 minutes of a hospital. The least accessible part of the site is the southern part which is within 21-25 minutes of a GP and within 51-55 minutes of a hospital. In between those areas journey times to healthcare facilities vary in between those two extremes. Therefore a mixed effect is expected for this objective; potentially minor positive for the northern part and potentially negligible effect for the southern part of the site. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties within close proximity of the site to the north and west of the site. A minor negative effect on this SA objective is therefore likely.</p>

SA Objectives	SA Score	Justification
6. Retain and enhance access to local services and facilities.	+/-	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Levels of access to local and town/district services and facilities vary throughout this site. The most accessible area of the site is the northern part which is 6-10 minutes travel time from both the nearest local centre and town/district centre. The least accessible area of the site is the southern part which is within 21-25 minutes from the nearest local centre and within 16-20 minutes of a town/district centre. In between those areas journey times to local services and facilities vary in between those two extremes. Therefore a mixed effect is expected for this objective; potentially minor positive for the northern part and potentially minor negative for the southern part of the site.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	There is a PRoW footpath the north part of the site which could be lost or disrupted as a result of housing development. However, the site is adjacent to an area of semi-natural and natural greenspace. Approximately 25m north of the site is an area of school playing grounds and playing fields which is adjacent to an area of semi-natural and natural greenspace and an area of amenity greenspace. In addition, approximately 150m to the west of the site is a Green corridor/pedestrian/cycleway. Approximately 540m to the north west of the site is an area of semi-natural and natural greenspace. Within 510m north of the site is an area of park and gardens which contains three areas of children's play provision and a multiuse games area. Also, approximately 405m south of the site is an area of school grounds and playing fields however this is located within another housing site option. Approximately 565m to the south west of the site is a local nature reserve area of woodland. Approximately 520m to the west of the site is a golf course. Therefore a mixed significant positive and significant negative effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (12.72ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as entirely 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.</p>
11. Secure the efficient and prudent use of land.	--	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively large site (12.72ha) and is on greenfield land; therefore a significant negative effect on this SA</p>

SA Objectives	SA Score	Justification
		objective is likely. The majority of the site is within an area of high quality agricultural land (the land is classed as grade 3 with an area classed as urban to the west).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	<p>This is a relatively large site (12.72ha) and is on greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development.</p> <p>The site is not within close proximity of the Peak District National Park.</p> <p>The site lies in LCA E6: Fenay Beck Valley Rural Fringes and LCA G9: Fenay Beck Valley & Tributaries, as identified in the 2015 Landscape Character Assessment for Kirklees.</p> <p>LCA E6: Fenay Beck Valley Rural Fringes is a gently undulating plateau with large blocks of tree and woodland cover found on slopes. It is perceived as a tranquil landscape with a traditional rural feel, although this is impacted upon by the main roads and urban development around Shepley.</p> <p>LCA G9: Fenay Beck Valley & Tributaries comprises the main valley of the Fenay Beck River. There are high levels of broadleaved woodland cover. Tranquillity is variable throughout the LCA, with the less developed and more rural tributary valleys being much more tranquil than the main Fenay Beck valley due to the main roads and larger settlements.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	<p>Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on Crow Trees on Rowley Lane which is a Grade II Listed Building.</p> <p>The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	This site is adjacent to Lepton Great Wood Local Wildlife Site and approximately 80m from Lepton Great Wood Local Geological Site; therefore development here could have a significant negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	The site is on greenfield land and the majority of the site is outside of flood zones 2 and 3 (with a small area on the southern edge of the site within flood zone 3); therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.

SA Objectives	SA Score	Justification
		The site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as entirely 'green' in terms of its access to seven of the eight features assessed; therefore a significant positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education (part of a mixed effect), 8: leisure and recreation (part of a mixed effect), 9: affordable housing, 10: sustainable transport and 19: climate change . Potential significant negative effects were identified in relation to SA objectives 8: leisure and recreation (mixed effect), 11: use of land, 12: character and 14: biodiversity and geodiversity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H582: Land south of New Hey Road, Mount, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>The majority of the site is within 6-10 minutes travel time of the nearest employment node (with an area in the north west within 11-15 minutes); therefore a significant positive effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.

SA Objectives	SA Score	Justification
		The site is within 5 minutes travel time of the nearest primary school and within 26-30 minutes of a secondary school. Therefore a minor positive effect is expected for this objective. The site is also within 16-20 minutes travel time of a further education institute.
4. Improve the health of local people and ensure that they can access the health and social care they need.	++	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The majority of the site is within 6-10 minutes travel time of the nearest GP (with an area in the east within 5 minutes) and is within 11-15 minutes of the nearest hospital (with an area in the north west within 16-20 minutes). Therefore a significant positive effect is expected for this objective. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties within close proximity of the site to the north and south of the site. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is within 6-10 minutes travel time of the nearest local centre (with an area to the east within 5 minutes) and within 11-15 minutes of a town/district centre. Therefore a minor positive effect is expected for this objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	To the west of the site within 315m is an area of children's play provision however the open space and site are separate by the M62 motorway which makes it less easily accessible. Approximately 195m to the north east of the site is an area of park and gardens that include two children's play areas however it is located within another housing site option. A bridleway runs adjacent to the southern boundary of the site. There are a further three bridleways and a PRoW footpath within 285m of the southern boundary. In addition, approximately 305m south of the site is a golf course. Also, approximately 405m to the east of the site is an area of school grounds and playing fields which is adjacent to an area of private playing fields (a rugby football ground and sports centre). Therefore a significant positive effect is expected for this objective.
9. Ensure all people are able	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the

SA Objectives	SA Score	Justification
to live in a decent home which meets their needs.		proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.08ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as entirely 'green' in terms of its access to seven of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (1.08ha) and is on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land (the land is classed as urban and a small area of grade 4 to the south).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (1.08ha) and is on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E2: Barkisland-Holywell Green, as identified in the 2015 Landscape Character Assessment for Kirklees. This area comprises steeply rising land with frequent tree and woodland cover. It is an urban fringe landscape. Some areas retain a relative tranquil, rural character despite the proximity of urban development. Increasing urbanisation on the LCA's fringes creates a landscape of transition. The area has an important visual relationship with the National Park.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 265m from Shaw Wood Local Wildlife Site, approximately 620m from Longwood Edge Quarry, Huddersfield Local Geological Site and 805m from Old Lindley Moor, Huddersfield Local Geological Site; therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood	-	The site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
risk for existing property and people.		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. The site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such as the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as entirely 'green' in terms of its access to seven of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 4: health, 8: leisure and recreation, 10: sustainable transport and 19: climate change. No potential significant negative effects were identified in relation to any of the SA objectives.		

H583: POL Barnsley Road, Flockton, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The site is within 16-20 minutes travel time of the nearest employment node; therefore a significant positive effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how

SA Objectives	SA Score	Justification
		<p>accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The site is within 6-10 minutes travel time of the nearest primary school and within 26-30 minutes of a secondary school. Therefore a minor positive effect is expected for this objective. Also, the majority of the site is within 46-50 minutes travel time of a further education institute (with one small area in the north west and one small area in the south east within 51-55 minutes).</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The site is within 11-15 minutes travel time of the nearest GP and is within 56-60 minutes of the nearest hospital. Therefore a minor positive effect is expected for this objective. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties within close proximity of the site to the south, east and west of the site. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	-	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>This site is within 6-10 minutes travel time of the nearest local centre and within 21-25 minutes of a town/district centre. Therefore a minor negative effect is expected for this objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	<p>To the west of the site approximately 160m away is a PRoW footpath which runs adjacent to an area of allotments. Approximately 150m to the east of the site is an area of semi-natural and natural greenspace. In addition, approximately 370m to the east of the site is an area of school grounds and playing fields. Within 470m east of the site is an area of public playing fields which contains a cricket ground, an allotment garden and recreation ground and it is adjacent to an area of semi-natural and natural greenspace. Also, a PRoW footpath runs adjacent to the eastern boundary of the site and within 300m south west of the site there is another PRoW footpath and a PRoW byway. Therefore a significant positive effect is expected for this objective.</p>

SA Objectives	SA Score	Justification
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (1.67ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as entirely 'green' in terms of its access to four of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (1.67ha) and the majority of the site is on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is also within an area of high quality agricultural land (the land is classed as grade 3).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (1.67ha) and the majority of the site is on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA N1: Emley Moor, as identified in the 2015 Landscape Character Assessment for Kirklees. This is an elevated, undulating farmland plateau with frequent woodland cover. The character is predominantly traditional rural, occupied by small villages.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 740m from Kirkby Wood Local Wildlife Site; therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood	-	The majority of the site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
risk for existing property and people.		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. The majority of the site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as entirely 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 8: leisure and recreation, 10: sustainable transport and 19: climate change. No potential significant negative effects were identified in relation to any of the SA objectives.		

H584: Land south of Gynn Lane, Honley, Holmfirth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	--	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of the site is over 60 minutes travel time of the nearest employment node (with a small area in the north within 21-25 minutes); therefore a significant negative effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	--?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects

SA Objectives	SA Score	Justification
		<p>will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of the site is over 60 minutes travel time of the nearest primary school (with a small area in the north within 6-10 minutes) and over 60 minutes from a secondary school (with a small area in the north within 5 minutes). Therefore a significant negative effect is expected for this objective. The majority of the site is also over 60 minutes travel time of a further education institute (with two small area in the north within 16-20 and 21-25 minutes).</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+/--	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Levels of access to healthcare facilities vary throughout this site. The most accessible part of the site is a small area in the north which is within 6-10 minutes travel time of the nearest GP and within 31-35 minutes of a hospital. The remainder of the site is over 60 minutes from both a GP and hospital. In between those areas journey times healthcare facilities vary in between those two extremes. Therefore a mixed effect is expected for this objective; minor positive for the small area in the north and significant negative for the remainder of the site. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties within close proximity of the site to the north and west of the site. In addition, the eastern boundary of the site is adjacent to a railway line which may result in noise pollution affecting residents in the longer-term. A significant negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	--	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>The majority of the site is over 60 minutes travel time of the nearest local centre (with a small area in the north within 6-10 minutes) and over 60 minutes of a town/district centre (with a small area in the north within 5 minutes). Therefore a significant negative effect is expected for this objective.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	<p>The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.</p>
8. Protect and enhance existing and support the provision of new recreation	++	<p>Within 5m south west of the site is a PRoW footpath which continues to run parallel to the southern boundary of the site. Also, approximately 20m south west of the site is an area of school grounds and playing fields. There is another area of playing fields approximately 135m north west of the site. Within 70m north west of the site is PRoW footpath.</p>

SA Objectives	SA Score	Justification
facilities and areas of open space and encourage their usage.		Approximately 455m west of the site is an area of semi-natural and natural greenspace. In addition, approximately 260m west of the site is a Green corridor/pedestrian/cycleway. To the south west of the site approximately 330m away is an area of semi-natural and natural greenspace. To the south of the site within 370m is an area of semi-natural and natural greenspace however it is located within another housing site option. Approximately 475m south west of the site is cricket ground which is within 10m of an area of public playing grounds which includes four areas of children's play provision. Again to the south west of the site, approximately 535m away is an area of school grounds and playing fields. To the north east of the site within 225m is a PRoW footpath. Therefore a significant positive effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (2.61ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	--	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was not classed as entirely 'green' in terms of its access for any of the eight features assessed. Therefore, a significant negative effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (2.61ha) and is on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is also within an area of high quality agricultural land (the land is classed as grade 3).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (2.61ha) and is on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA G8: Holme River Valley, as identified in the 2015 Landscape Character Assessment for Kirklees. This is the main valley of the River Holme, and it is a densely settled landscape. It is generally low lying and enclosed, with frequent deciduous woodland along watercourses and on the steeper slopes.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on 30 and 32 Gynn Lane which are Grade II Listed Buildings. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 280m from Honley Station Cutting Site of Special Scientific Interest (SSSI), 285m from Cliff Wood Local Wildlife Site, 350m from Hey Wood/West Wood Local Wildlife Site, 725m from Upper Park Wood Local Nature Reserve and Local Wildlife Site, 825m from Park Wood Local Wildlife Site and approximately 985m from

SA Objectives	SA Score	Justification
		Brockholes and Round Wood, Brockholes Local Geodiversity Site; therefore development here could have a minor negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	The site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. The site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	--	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was not classed as entirely 'green' in terms of its access in any of the eight features assessed; therefore a significant negative effect is likely.
<p>Summary of SA findings: A potential significant positive effect was identified for this site in relation to SA objective 8: leisure and recreation. Potential significant negative effects were identified in relation to SA objectives 1: employment, 3: education, 4: health (part of a mixed effect), 5: amenity, 6: local services and facilities, 10: sustainable transport and 19: climate change. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H585: Land North of Quarry Lane, Lascelles Hall, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and	+/0	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.

SA Objectives	SA Score	Justification
ensure that they are accessible.		Accessibility to the nearest employment node varies across this site. The majority of the site is within 36-40 minutes travel time of the nearest employment node; however a small area to the south is within 21-25 minutes travel time. In between, journey times vary between these two extremes. A mixed effect is therefore likely – minor positive to the south of the site and negligible to the north.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+?/-?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Accessibility to both primary and secondary schools vary across the site. An area to the north of this site is within 11-15 minutes travel time of a primary school and 31-35 minutes travel time of a secondary school. However an area to the south east is within 26-30 minutes of a primary school and within 41-45 minutes of a secondary school. In between, journey times vary between these two extremes. A mixed effect is therefore likely – minor positive to the north of the site and minor negative to the south of the site.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+/0	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Accessibility to healthcare facilities varies across this site. An area to the north west and also a small area to the south of the site are within 11-15 minutes travel time of a GP, while an area to the east is within 21-25 minutes travel time. The south of the site is within 31-35 minutes travel time of a hospital; however the northern area of this site is within 41-45 minutes travel time. In between, journey times vary between these extremes. A mixed effect is therefore likely - minor positive in the south and negligible in the north of the site. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is not surrounded by residential development; however there is an existing industrial area directly adjacent to part of the western site boundary, which may have a long term negative effect on development in this area of the site. A significant negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	0	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however

SA Objectives	SA Score	Justification
		<p>the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Accessibility to local services and facilities varies across this site. An area to the north of this site is within 11-15 minutes travel time of a local centre and 16-20 minutes travel time of a town/district centre. However an area to the east of the site is within 21-25 minutes travel time of a local centre and 26-30 minutes of a town/district centre. Despite these variances a negligible effect is likely across the whole of the site.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++	This site is within 600m of a number of areas of open space including a green corridor approximately 130m to the north west of the site and two areas of semi natural and natural greenspace located approximately 99m to the south west and 174m to the north west. In addition there is an existing Public Right of Way directly adjacent to the western site boundary. A significant positive effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (4.36ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	--	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' or mainly 'green' in terms of its access to none of the eight features assessed. Therefore, a significant negative effect is likely.</p>
11. Secure the efficient and prudent use of land.	-	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively small site (4.36ha) on greenfield land; therefore a minor negative effect on this SA objective is likely.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	<p>This is a relatively small site (4.36ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development.</p> <p>The site is not within 500m of the Peak District National Park.</p> <p>The site mainly lies in LCA M1: Calder Valley Floor, as identified in the 2015 Landscape Character Assessment for</p>

SA Objectives	SA Score	Justification
		Kirklees. This is a valley landscape with limited woodland cover, and agricultural land cover is very limited due to urban development. This is a heavily urbanised area with little tranquillity, although the area has more of a rural feel in the east.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	<p>Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the Church of St John the Baptist, a Grade II* Listed Building 215m to the north of the site and on 94A, 96 and 112 Lascelles Hall Road which are Grade II Listed Buildings. The loss of this area and its subsequent development could harm elements which contribute to the significance of this building.</p> <p>The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 270m from the Round Wood, Tandem candidate Local Wildlife Site and 313m from the Round Wood, Tandem Local Wildlife Site; therefore development here could have a minor negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	<p>Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site.</p> <p>This site is on greenfield land; therefore a minor negative effect is likely.</p>
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	--	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' or mainly 'green' in terms of its access to none of the eight features assessed. Therefore, a significant negative effect is likely.</p>

SA Objectives	SA Score	Justification
<p>Summary of SA findings: A potential significant positive effect was identified for this site in relation to SA objective 8: leisure and recreation, and potential significant negative effects were identified in relation to SA objectives 5: amenity, 10: sustainable transport and 19: climate change. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H586

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	+ +/--	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>Levels of access to an employment node vary throughout this site. The most accessible part of the site is a section in the south east which is within 6-10 minutes travel time of the nearest employment node. The least accessible part of the site is a section that runs across the southern part of the site which is over 60 minutes from an employment node. In between those areas journey times to an employment node vary in between those two extremes. Therefore a mixed effect on this objective is expected – potentially significant positive for the south eastern section and potentially significant negative for the southern section of the site.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	+ +?/--?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Levels of access to education facilities vary throughout this site. The most accessible part of the site is the eastern part of the site which is within 6-10 minutes of a primary school and within 16-20 minutes travel time of a secondary school and a further education institute. The least accessible part of the site is a section that runs across the southern part of the site which is over 60 minutes from a primary school, secondary school and further education institute. In between those areas journey times to education facilities vary in between those two extremes. Therefore a mixed effect is expected for this objective: potentially significant positive for the eastern part of the site and potentially significant negative for the southern part of the site.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+/--	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Levels of access to healthcare facilities vary throughout this site. The most accessible part of the site is a section in the</p>

SA Objectives	SA Score	Justification
		north of the site which is 11-15 minutes travel time from the nearest GP and within 26-30 minutes of a hospital, whereas a section that runs across the southern part of the site is the least accessible as it is over 60 minutes from both a GP and hospital. In between those areas journey times to healthcare facilities vary in between those two extremes. Therefore a mixed effect is expected for this objective; potentially minor positive for the northern section and potentially minor negative section for the southern section of the site. The site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	--	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties to the north, west and south of the site. In addition, there is an industrial area immediately to the south west of the site which may result in noise pollution affecting residents in the longer-term. A significant negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	0/--	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Levels of access to local and town/district services and facilities vary throughout this site. The most accessible part of the site is a section in the south east, which is 11-15 minutes travel time from the nearest local centre and 16-20 minutes from a town/district centre. The least accessible part of the site is a section running across the southern part of the site which is over 60 minutes from the nearest local centre and nearest town/district centre. In between those areas journey times to local services and facilities vary in between those two extremes. Therefore a mixed effect is expected for this objective; potentially negligible for the south eastern corner and potentially significant negative for the north western part.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	There are several Bridleways and PRoW footpaths that run through this site which could be lost or disrupted as a result of housing development. However, within 20m south of the site is an area of public playing fields which is adjacent to an area of park and gardens that contains two children's play areas and a multiuse games area. In addition approximately 70m to the west of the site is an area of school grounds and playing fields. Also, approximately 325m to the south of the site is an area of amenity greenspace and approximately 530m south of the site is a children's play area. To the west of the site approximately 125m away is an area of semi-natural and natural greenspace however it is located within another housing option site. Also, to the west of the site is an area of allotments approximately 590m away. To the south west approximately 410m away is an area of school grounds and playing fields. Therefore a mixed significant positive and

SA Objectives	SA Score	Justification
		significant negative effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (67.64ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	+	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to two of the eight features assessed. Therefore, a minor positive effect is likely.
11. Secure the efficient and prudent use of land.	--	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively large site (67.64ha) and is on greenfield land; therefore a significant negative effect on this SA objective is likely. The site is also within an area of relatively high quality agricultural land (the land is classed as grade 3 with very small areas of urban land to the south).
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This is a relatively large site (67.64ha) and is on greenfield land; therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within close proximity of the Peak District National Park. The site lies in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment as it is considered unlikely to result in any harm to any designated heritage asset. The effect on this SA objective is therefore negligible and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	This site is within 20m of Soothill Wood Local Wildlife Site, approximately 180m from Scargill Wood Local Wildlife Site and approximately 310m from Dunn Wood Local Wildlife Site; therefore development here could have a significant negative effect on this SA Objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure	-	The site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
development does not contribute to increased flood risk for existing property and people.		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. The site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	+	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as mainly or entirely 'green' in terms of its access to two of the eight features assessed; therefore a significant positive effect is likely.
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment (mixed effect), 3: education (mixed effect), 8: leisure and recreation (mixed effect) and 9: affordable housing and potential significant negative effects were identified in relation to SA objectives 1: employment (mixed effect), 3: education (mixed effect), 4: health (mixed effect), 5: amenity, 6: local services (mixed effect) and facilities (mixed effect), 8: leisure and recreation (mixed effect), 11: use of land, 12: character and 14: biodiversity and geodiversity. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H587: Land to the North and East of Ullswater Road, Hanging Heaton, Batley

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. This site is within 11-15 minutes travel time of the nearest employment node; therefore a significant positive effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered

13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	<p>Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, as the development of this site is unlikely to result in harm to any designated asset.</p> <p>The effect on this SA objective is therefore negligible but uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 557m from the Calum's Wood Quarry Local Geological Site; therefore development here could have a minor negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 8: leisure and recreation, 10: sustainable transport and 19: climate change. No potential significant negative effects were identified in relation to any of the SA objectives.		

H588: Land between Hossacks Lane and Meltham, Honley, Holmfirth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	+/--	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. Accessibility to the nearest employment node varies across this site. An area to the south east of the site is within 26-30 minutes travel time; however an area to the north is more than an hour from the nearest employment node. In between, journey times vary between these two extremes. A mixed effect is therefore likely – minor positive to the south east and significant negative to the north.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.

SA Objectives	SA Score	Justification
		Accessibility to education facilities varies across this site. An area to the south east is within 11-15 minutes travel time of both a primary school and a secondary school, and within 16-20 minutes of a further education institute; however an area to the north is more than an hour from the nearest primary and secondary schools. A mixed effect is therefore likely – significant positive to the south east of the site and significant negative to the north.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+/--	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Accessibility to health care facilities varies across this site. An area to the south east of the site is within 11-15 minutes travel time of a GP and within 46-50 minutes of a hospital; however an area to the north is more than an hour from both a GP and a hospital. A mixed effect is therefore likely – minor positive to the south east of the site and significant negative to the north. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is not surrounded by existing residential development; however there are a number of sensitive receptors directly adjacent to the eastern and southern site boundaries, which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+/--	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Accessibility to local services and facilities varies across this site. An area to the south east of the site is within 16-20 minutes travel time of a local centre and within 11-15 minutes of a town/district centre; however an area to the north is more than an hour from both a local centre and a town/district centre. A mixed effect is therefore likely – minor positive to the south east of the site and significant negative to the north.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their	+ +/--?	There is a public playing field, including a children's playground, located within this site boundary, which could be lost as a result of housing development. The site is also bisected by an existing Public Right of Way which could be lost if this site is developed. However there are a number of areas of open space within 600m, including an area of semi natural and natural greenspace approximately 98m to the north west of the site and an area of

SA Objectives	SA Score	Justification
usage.		amenity greenspace approximately 180m to the south. In addition there is an existing bridleway directly adjacent to the northern site boundary. A mixed (significant positive and potential significant negative) effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	++	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively large (11.7ha); therefore a significant positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	--	<p>How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.</p> <p>In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to none of the eight features assessed. Therefore, a significant negative effect is likely.</p>
11. Secure the efficient and prudent use of land.	--	<p>Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land.</p> <p>This is a relatively large site (11.7ha) on mainly greenfield land (although there is an existing building in the north eastern corner of the site). The land is classified as being of Grade 3 agricultural quality; therefore a significant negative effect is expected on this SA objective given that it will result in the development of a large amount of previously undeveloped greenfield land.</p>
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	<p>This is a relatively large site (11.7ha) on mainly greenfield land (although there is an existing building in the north eastern corner of the site); therefore development here could have a significant negative effect on this SA objective although this is uncertain depending on the design of the development.</p> <p>The site is not within 500m of the Peak District National Park.</p> <p>The site lies in LCA E1: Holmfirth-Meltham, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a gently undulating plateaux with considerable tree and woodland cover. Although the proximity of the urban centres exerts an influence on landscape character, with urban fringe land uses evident in many areas, there are pockets of relative tranquillity away from the main settlements. There is a strong visual relationship with the moorlands of the National Park.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the prehistoric remains at Honley Wood, a designated Scheduled Monument located approximately 260m from the site. English Heritage is currently considering a request to extend the boundary of this site so that the monument would be within 100m of this site. The loss of this area and its subsequent development could harm elements which contribute to the significance of this Scheduled Monument. This site also lies opposite a group of Grade II Listed weaver's houses on Chandler Lane. The loss of this area and its subsequent development could harm elements which contribute to the significance of these buildings.

SA Objectives	SA Score	Justification
		The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	--?	This site is approximately 10m from the Honley Wood candidate Local Wildlife Site; therefore development here could have a significant negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on mainly greenfield land (although there is an existing building in the north eastern corner of the site) and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on mainly greenfield land (although there is an existing building in the north eastern corner of the site); therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	--	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to none of the eight features assessed. Therefore, a significant negative effect is likely.
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 3: education, 8: leisure and recreation (part of an overall mixed effect) and 9: housing, and potential significant negative effects were identified in relation to SA objectives 4: health, 6: services (part of an overall mixed effect), 8: leisure and recreation (part of an overall mixed effect), 10: sustainable transport, 11: land use, 12: landscape, 14: biodiversity and 19: climate change. These issues will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H589: Land to the North West of 330 – 342 Leymoor Road, Golcar, Huddersfield

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	0	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>This site is within 31-35 minutes travel time of the nearest employment node; therefore a negligible effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	<p>The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.</p>
3. Ensure education facilities are available to all.	+?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>The majority of the site is within 6-10 minutes travel time of the nearest primary school (with a small section in the south within 5 minutes) and within 36-40 minutes of a secondary school (with a tiny area on the northern edge within 41-45 minutes). Therefore a minor positive effect is expected for this objective. The site is also within 21-25 minutes travel time of a further education institute.</p>
4. Improve the health of local people and ensure that they can access the health and social care they need.	+	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>The majority of the site is within 5 minutes travel time of the nearest GP (with an area on the northern edge of the site within 6-10 minutes) and is within 41-45 minutes of the nearest hospital (with an area in the south within 36-40 minutes). Therefore a minor positive effect is expected for this objective. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>There are a number of existing residential properties within close proximity of the site to the south and west of the site. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p>

SA Objectives	SA Score	Justification
		This site is within 6-10 minutes travel time of the nearest local centre and the majority of the site is within 11-15 minutes of a town/district centre (with a small area in the south within 6-10 minutes). Therefore a minor positive effect is expected for this objective.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	++/--?	There is a bridleway that runs parallel and encroaches on the site slightly on the south western boundary of the site which could be lost or disrupted as a result of housing development. However, a PRow footpath runs parallel to the western boundary of the site. Approximately 370m north of the site is another PRow footpath however there is a brook running between the site and the footpath which makes it less easily accessible. Approximately 270m east of the site is a private cricket ground. Also, to the south east of the site is a private bowling green approximately 320m away. To the south of the site, approximately 270m away is an area of semi-natural and natural greenspace however this is located within another housing site option. This area of open space is also adjacent to an area of allotments and an area of amenity greenspace. Approximately 265m south of the site is an area of school grounds and playing fields which is adjacent to a children's play area and an area of park and gardens. There is an area of school grounds and playing fields approximately 435m south east of the site which is adjacent to an area of public playing fields that includes a children's play area. In addition approximately 470m south west of the site is an area of public playing fields which is adjacent to a private bowling green and an area of amenity greenspace. Therefore a mixed significant positive and significant negative effect is expected for this objective.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.7ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as entirely 'green' in terms of its access to five of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (0.7ha) and the majority of the site is on greenfield land; therefore a minor negative effect on this SA objective is likely. The site is not within an area of high quality agricultural land (the land is classed as grade 4 and a small area of urban land to the south).
12. Protect and enhance the	-?	This is a relatively small site (0.7ha) and the majority of the site is on greenfield land; therefore development here could

SA Objectives	SA Score	Justification
character of Kirklees and the quality of the landscape and townscape.		<p>have a minor negative effect on this SA objective although this is uncertain depending on the design of the development.</p> <p>The site is not within close proximity of the Peak District National Park.</p> <p>The site mainly lies in LCA E2: Barkisland-Holywell Green, as identified in the 2015 Landscape Character Assessment for Kirklees. This area comprises steeply rising land with frequent tree and woodland cover. It is an urban fringe landscape. Some areas retain a relative tranquil, rural character despite the proximity of urban development. Increasing urbanisation on the LCA's fringes creates a landscape of transition. The area has an important visual relationship with the National Park.</p>
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	<p>Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to the uncertain potential impacts on the adjacent 338 to 342 Leymoor Road which are Grade II Listed Buildings.</p> <p>The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.</p>
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	0?	<p>This site is over 1km from any designated biodiversity or geodiversity site; therefore development here could have a negligible effect on this SA Objective.</p>
15. Reduce air, water and soil pollution.	0	<p>This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.</p>
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	<p>The majority of the site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.</p>
17. 4. Improve the health of local	++	The location of housing sites will not affect the number or location of healthcare facilities; however where

SA Objectives	SA Score	Justification
people and ensure that they can access the health and social care they need.		healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health. This site is within 5 minutes travel time of a GP and within 26-30 minutes of a hospital; therefore a significant positive effect is likely. The site is not within or adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term. This site is not surrounded by existing residential development; however there are a number of sensitive receptors within 100m of the north eastern, southern and western site boundaries, which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.
6. Retain and enhance access to local services and facilities.	0	The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities. This site is within 6-10 minutes travel time of a local centre and within 11-15 minutes of a town/district centre; therefore a negligible effect is likely.
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	This site is wholly within an area of semi-natural and natural greenspace, which could be lost as a result of housing development. However, it is part of a much larger area of greenspace, most of which is outside of the site. There are a number of areas of open space with 600m of the site, including an area of amenity greenspace located approximately 77m to the east of the site, and a children's playground located approximately 207m to the north east. In addition a Public Right of Way is located directly adjacent to the western site boundary. A mixed (significant positive and potential significant negative) effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (0.5ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in

SA Objectives	SA Score	Justification
		terms of its access to six of the eight features assessed. Therefore, a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (0.5ha) on greenfield land; therefore a minor negative effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (0.5ha) on greenfield land; therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies mainly in an area classed as 'urban' in the 2015 Landscape Character Assessment for Kirklees.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, as the development of this site is unlikely to result in harm to any designated asset. The effect on this SA objective is therefore negligible but uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 816m from the Huddersfield Narrow Canal candidate Local Wildlife Site; therefore development here could have a minor negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and

SA Objectives	SA Score	Justification
		the associated greenhouse gas emissions are likely to be lower. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' in terms of its access to six of the eight features assessed. Therefore, a significant positive effect is likely.
Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 4: health, 8: leisure and recreation (part of an overall mixed effect), 10: sustainable transport and 19: climate change, and a potential significant negative effect was identified in relation to SA objective 8: leisure and recreation (part of an overall mixed effect). This issue will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.		

H591: Land North of 271 Cliffe Lane, Gomersal, Cleckheaton

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	++	While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs. The majority of this site is within 16-20 minutes travel time of the nearest employment node (although an area to the north west is within 21-25 minutes travel time); therefore a significant positive effect on this objective is expected.
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	++?	The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils. The majority of this site is 11-15 minutes travel time of both a primary school and secondary school (although an area to the north west of the site is within 16-20 minutes of both) and so is likely to have a significant positive effect.
4. Improve the health of local people and ensure that they can access the health and social care they need.	0/+	The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health. Accessibility to health and social care varies across this site. An area to the north west of this site is within 16-20 minutes of a GP and 46-50 minutes of a hospital; however an area to the south is within 6-10 minutes of a GP and 41-45 minutes of a hospital. In between, journey times vary between these extremes. A mixed effect is therefore likely – negligible to the north west and minor positive to the south of the site. The site is not within or

SA Objectives	SA Score	Justification
		adjacent to an AQMA.
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is not surrounded by existing residential development; however there are a number of sensitive receptors directly adjacent to the eastern, western and southern site boundaries, which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+/-	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Accessibility to local services and facilities varies across this site. An area to the north west is within 26-30 minutes travel time of a local centre; however an area to the south west is within 11-15 minutes travel time. In between, journey times vary between these extremes. An area to the north of this site is within 16-20 minutes travel time of a town/district centre, while an area to the south and east of the site is within 11-15 minutes travel time. A mixed effect is therefore likely – minor positive in the southern and eastern area of the site and minor negative in the north western area of the site.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new recreation facilities and areas of open space and encourage their usage.	+ +/--?	An existing Public Right of Way runs just within the site, parallel to part of the western boundary. This could be lost as a result of housing development. However this site is also within 600m of a number of areas of open space including two children's playground located approximately 109m and 193m to the south of the site, two area of amenity greenspace located approximately 204m and 216m to the south east of the site, and an area of semi natural and natural greenspace, located approximately 236m to the south west of the site. In addition there is an existing Public Right of Way directly adjacent to the northern site boundary. A mixed (significant positive and potential significant negative) effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (3.89ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable	++	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day.

SA Objectives	SA Score	Justification
and active modes of transport.		This site is classed as 'green' or mainly 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (3.89ha) on mainly greenfield land (although there is an existing property located in the south western corner of the site); therefore a minor negative effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	-?	This is a relatively small site (3.89ha) on mainly greenfield land (although there is an existing property located in the south western corner of the site); therefore development here could have a minor negative effect on this SA objective although this is uncertain depending on the design of the development. The site is not within 500m of the Peak District National Park. The site lies mainly in LCA E8: Batley-Dewsbury Rural Fringes, as identified in the 2015 Landscape Character Assessment for Kirklees. This comprises gently undulating land with varied tree cover. Urban expansion and associated land uses are spreading into the farmland landscape. Some areas still retain a relative sense of tranquillity and rural character, however increasing urbanisation creates a landscape of transition.
13. Conserve and enhance the historic environment, heritage assets and their settings.	?	Historic England has rated this site as 'orange' in terms of the potential for effects on the historic environment, due to uncertain impacts on the nearby Gomersal Conservation Area. The loss of this currently-open area and its subsequent development could harm elements which contribute to the significance of this area. The effect on this SA objective is therefore uncertain and the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 709m from the Oakwell Park Local Nature Reserve; therefore development here could have a minor negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and ensure development does not contribute to increased flood risk for existing property and people.	-	This site is on mainly greenfield land (although there is an existing property located in the south western corner of the site) and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on mainly greenfield land (although there is an existing property located in the south western corner of

SA Objectives	SA Score	Justification
		the site); therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
19. Reduce the contribution that the district makes to climate change.	++	<p>The location of residential development will not affect the contribution that the buildings make to climate change, which will be influenced by other factors such the design of the buildings. However, where residential sites are well-connected by sustainable transport links to employment nodes, services and facilities, levels of car use and the associated greenhouse gas emissions are likely to be lower.</p> <p>This site is classed as 'green' or mainly 'green' in terms of its access to four of the eight features assessed; therefore a significant positive effect is likely.</p>
<p>Summary of SA findings: Potential significant positive effects were identified for this site in relation to SA objectives 1: employment, 3: education, 8: leisure and recreation (part of an overall mixed effect), 10: sustainable transport and 19: climate change and a potential significant negative effect was identified in relation to SA objective 8: leisure and recreation (part of an overall mixed effect). This issue will need to be considered further in terms of mitigation and/or enhancement, which may be achieved through Local Plan policies.</p>		

H592: Land North of Red Lane, Meltham, Holmfirth

SA Objectives	SA Score	Justification
1: Increase the number and range of employment opportunities available for local people, and ensure that they are accessible.	-	<p>While the location of housing sites will not influence the number, location or type of employment opportunities available in Kirklees, the proximity of housing to employment nodes can affect people's ability to access jobs.</p> <p>This site is within 41-45 minutes travel time of the nearest employment node; therefore a minor negative effect on this objective is expected.</p>
2. Achieve an economy better capable of growth through increasing investment, innovation and Entrepreneurship.	0	The location of housing sites will not affect the success of the local economy. While housing development may result in job creation during the construction phase, this will not be influenced by the location of the development. Housing provision may also affect the size and location of the local workforce; however this is considered separately under SA objective 1 above. Therefore, the effects of all residential site options will be negligible.
3. Ensure education facilities are available to all.	0?/--?	<p>The availability of school and college places to serve the growing population will depend in part on whether new places are provided as part of new housing developments, which is unknown at this stage. Effects will also depend on how accessible existing schools and colleges are from residential site options, although there are uncertainties as the effects will depend on there being capacity at those schools and colleges to accommodate new pupils.</p> <p>Accessibility to education facilities varies across this site. An area to the north of the site is within 16-20 minutes travel time of a primary school; however an area near the centre of the site is within 41-45 minutes travel time.</p>

SA Objectives	SA Score	Justification
		In between, journey times vary between these two extremes. The majority of the site is within 31-35 minutes of a secondary school, while an area to the east of the site is within 26-30 minutes travel time. A mixed effect is therefore likely - negligible in the north of the site and in an area to the east, and significant negative in an area to the west of the site.
4. Improve the health of local people and ensure that they can access the health and social care they need.	+/-	<p>The location of housing sites will not affect the number or location of healthcare facilities; however where healthcare facilities are easily accessible from housing sites there will be positive effects on residents' health.</p> <p>Accessibility to health and social care is varied across this site. An area to the north of this site is within 11-15 minutes travel time of a GP; however an area in the centre of the site is within 36-40 minutes of a GP. In between, journey times vary between these extremes. The majority of the site is within 56-60 minutes travel time of a hospital, while an area to the east is within 51-55 minutes travel time. A mixed effect is therefore likely – minor positive to the north of the site and minor negative in the central area of the site. The site is not within or adjacent to an AQMA.</p>
5. Protect local amenity including avoiding noise and light pollution.	-	<p>Where new residential development is proposed within close proximity of sensitive receptors there may be negative effects on amenity as a result of increased noise and light pollution, particularly during the construction phase. New residential development within close proximity of major roads or railways or industrial areas may result in noise pollution affecting residents in the longer term.</p> <p>This site is not surrounded by existing residential development; however there are a number of sensitive receptors within 100m of the southern and western site boundaries, which may be affected by noise during the construction phase. A minor negative effect on this SA objective is therefore likely.</p>
6. Retain and enhance access to local services and facilities.	+/--	<p>The location of housing sites will not directly affect the number or range of services in a particular location (although a large scale housing development could potentially stimulate the provision of new services); however the location of housing sites could affect this objective by influencing people's ability to access existing services and facilities.</p> <p>Accessibility to local services and facilities varies across this site. The majority of the site is within 21-25 minutes travel time of a local centre (although an area to the east is within 16-20 minutes). An area to the north is within 11-15 minutes travel time of a town/district centre; however the central area of the site is within 36-40 minutes travel time. A mixed effect is therefore likely – minor positive to the north of the site and significant negative in the central area of the site.</p>
7. Make our communities safer by reducing crime, anti-social behaviour and the fear of crime.	0	The effects of new housing developments on levels of crime and fear of crime will depend on factors such as the incorporation of green space within the housing sites which, depending on design and the use of appropriate lighting, could have an effect on perceptions of personal safety, particularly at night. However, such issues will not be influenced by the location of housing sites (rather they will be determined through the detailed proposals for each site) and so the effects of all of the potential residential sites on this SA objective will be negligible.
8. Protect and enhance existing and support the provision of new	++	This site is within 600m of a number of areas of open space including an area of semi natural and natural greenspace located approximately 169m to the south east of the site, a green corridor located approximately

SA Objectives	SA Score	Justification
recreation facilities and areas of open space and encourage their usage.		169m to the south east and a children's playground located approximately 244m to the south east of the site. In addition there is an existing Public Right of Way approximately 117m from the western site boundary. A significant positive effect is therefore identified.
9. Ensure all people are able to live in a decent home which meets their needs.	+	All of the potential residential sites are expected to have positive effects on this objective, due to the nature of the proposed development and it is assumed that housing developments will include an appropriate proportion of affordable housing. This site is relatively small (2.24ha); therefore a minor positive effect is likely.
10. Secure an effective and safe transport network which encourages people to make use of sustainable and active modes of transport.	--	How well connected housing sites are to services, facilities and employment opportunities by sustainable modes of transport will affect the extent to which residents are able to make use of non car-based modes of transport day to day. In the accessibility heat mapping work that was undertaken for Kirklees Council, this site was classed as 'green' or mainly 'green' in terms of its access to none of the eight features assessed. Therefore, a significant negative effect is likely.
11. Secure the efficient and prudent use of land.	-	Where development takes place on greenfield land or areas of high quality agricultural land it is a less efficient use of land than development on brownfield sites or sites of lower quality agricultural land. This is a relatively small site (2.24ha) on greenfield land; therefore a minor negative effect on this SA objective is likely.
12. Protect and enhance the character of Kirklees and the quality of the landscape and townscape.	--?	This is a relatively small site (2.24ha) on greenfield land; however it is located approximately 120m to the north east of the Peak District National Park. Therefore development here could have a significant negative effect on this SA objective, although this effect is recorded as uncertain depending on the design of the development. The site lies in LCA D7: Peak Fringe Upland Pastures, as identified in the 2015 Landscape Character Assessment for Kirklees. This is a broad terrace, comprising small square fields and is sparsely wooded. The settlement pattern is dispersed and there is a strongly rural, traditional agricultural character, although perceptions of tranquillity reduce closer to Huddersfield in the east.
13. Conserve and enhance the historic environment, heritage assets and their settings.	0?	Historic England has rated this site as 'green' in terms of the potential for effects on the historic environment, as the development of this site is unlikely to result in harm to any designated asset. The effect on this SA objective is therefore negligible but uncertain as the potential for effects on cultural heritage assets will depend on the exact scale, design and layout of the new development.
14. Maximise opportunities to protect and enhance biodiversity and geodiversity.	-?	This site is approximately 693m from the South Pennine Moors, a designated SAC, SPA and SSSI; therefore development here could have a minor negative effect on this SA objective.
15. Reduce air, water and soil pollution.	0	This site is not within an AQMA; therefore a negligible effect on this SA objective is likely.
16. Prevent inappropriate new development in flood risk areas and	-	This site is on greenfield land and is outside of flood zones 2 and 3; therefore a minor negative effect is likely.

SA Objectives	SA Score	Justification
ensure development does not contribute to increased flood risk for existing property and people.		
17. Increase prevention, re-use, recovery and recycling of waste close to source.	-	Where housing development is proposed on brownfield land, there may be good opportunities for using existing buildings and materials although this is uncertain depending on the previous use of the site. This site is on greenfield land; therefore a minor negative effect is likely.
18. Increase efficiency in water, energy and raw material use.	0	While all new residential development is likely to involve an increase in energy and water consumption this will not be influenced by the location of residential sites. Similarly, all residential development will result in the increased consumption of minerals for construction but this will not be influenced by the location of residential sites. Therefore, all sites will have a negligible effect on this SA objective.
